

Gong Su

List of Publications by Citations

Source: <https://exaly.com/author-pdf/920771/gong-su-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
8	Association of glycemic variability and the presence and severity of coronary artery disease in patients with type 2 diabetes. <i>Cardiovascular Diabetology</i> , 2011 , 10, 19	8.7	170
7	Impact of admission glycemic variability, glucose, and glycosylated hemoglobin on major adverse cardiac events after acute myocardial infarction. <i>Diabetes Care</i> , 2013 , 36, 1026-32	14.6	105
6	Comparison of in-hospital glycemic variability and admission blood glucose in predicting short-term outcomes in non-diabetes patients with ST elevation myocardial infarction underwent percutaneous coronary intervention. <i>Diabetology and Metabolic Syndrome</i> , 2017 , 9, 20	5.6	9
5	Association Between Blood Glucose Variability and the Characteristics of Vulnerable Plaque in Elderly Non-ST Segment Elevation Acute Coronary Syndrome Patients. <i>International Heart Journal</i> , 2019 , 60, 569-576	1.8	9
4	Admission glycemic variability correlates with in-hospital outcomes in diabetic patients with non-ST segment elevation acute coronary syndrome undergoing percutaneous coronary intervention. <i>Anatolian Journal of Cardiology</i> , 2018 , 19, 368-373	0.8	6
3	Association of Isoprostanes-Related Oxidative Stress with Vulnerability of Culprit Lesions in Diabetic Patients with Acute Coronary Syndrome. <i>International Heart Journal</i> , 2019 , 60, 271-279	1.8	5
2	Urinary 8-iso-prostaglandin F as a risk marker for the vulnerability of culprit plaque in diabetic patients with stable coronary artery disease. <i>Prostaglandins Leukotrienes and Essential Fatty Acids</i> , 2019 , 140, 11-17	2.8	4
1	Effect of 1,5-anhydroglucitol levels on culprit plaque rupture in diabetic patients with acute coronary syndrome. <i>Cardiovascular Diabetology</i> , 2020 , 19, 71	8.7	3
