

Edita Jurak

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/9217949/edita-jurak-publications-by-year.pdf>

Version: 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
23	Efficient isolation of membrane-associated exopolysaccharides of four commercial bifidobacterial strains.. <i>Carbohydrate Polymers</i> , 2022 , 278, 118913	10.3	1
22	The influence of amylose content on the modification of starches by glycogen branching enzymes. <i>Food Chemistry</i> , 2022 , 133294	8.5	1
21	Highly Efficient Semi-Continuous Extraction and In-Line Purification of High EO-4 Butanosolv Lignin. <i>Frontiers in Chemistry</i> , 2021 , 9, 655983	5	8
20	Polysaccharide utilization loci-driven enzyme discovery reveals BD-FAE: a bifunctional feruloyl and acetyl xylan esterase active on complex natural xylans. <i>Biotechnology for Biofuels</i> , 2021 , 14, 127	7.8	1
19	Long chains and crystallinity govern the enzymatic degradability of gelatinized starches from conventional and new sources. <i>Carbohydrate Polymers</i> , 2021 , 260, 117801	10.3	5
18	5-Hydroxy-2-Methylfurfural from Sugar Beet Thick Juice: Kinetic and Modeling Studies. <i>ACS Sustainable Chemistry and Engineering</i> , 2021 , 9, 2626-2638	8.3	2
17	Tunable and functional deep eutectic solvents for lignocellulose valorization. <i>Nature Communications</i> , 2021 , 12, 5424	17.4	23
16	GH13 Glycogen branching enzymes can adapt the substrate chain length towards their preferences via E1,4-transglycosylation. <i>Enzyme and Microbial Technology</i> , 2021 , 150, 109882	3.8	4
15	Reliability factor for identification of amylolytic enzyme activity in the optimized starch-iodine assay. <i>Analytical Biochemistry</i> , 2020 , 597, 113696	3.1	3
14	Biocatalytic Production of Amino Carbohydrates through Oxidoreductase and Transaminase Cascades. <i>ChemSusChem</i> , 2019 , 12, 848-857	8.3	21
13	The physiology of <i>Agaricus bisporus</i> in semi-commercial compost cultivation appears to be highly conserved among unrelated isolates. <i>Fungal Genetics and Biology</i> , 2018 , 112, 12-20	3.9	7
12	Production of E1,3-L-arabinofuranosidase active on substituted xylan does not improve compost degradation by <i>Agaricus bisporus</i> . <i>PLoS ONE</i> , 2018 , 13, e0201090	3.7	3
11	A novel acetyl xylan esterase enabling complete deacetylation of substituted xylans. <i>Biotechnology for Biofuels</i> , 2018 , 11, 74	7.8	29
10	Analysis of the substrate specificity of E1-arabinofuranosidases by DNA sequencer-aided fluorophore-assisted carbohydrate electrophoresis. <i>Applied Microbiology and Biotechnology</i> , 2018 , 102, 10091-10102	5.7	0
9	Occurrence and function of enzymes for lignocellulose degradation in commercial <i>Agaricus bisporus</i> cultivation. <i>Applied Microbiology and Biotechnology</i> , 2017 , 101, 4363-4369	5.7	38
8	HO as a candidate bottleneck for MnP activity during cultivation of <i>Agaricus bisporus</i> in compost. <i>AMB Express</i> , 2017 , 7, 124	4.1	15
7	Accumulation of recalcitrant xylan in mushroom-compost is due to a lack of xylan substituent removing enzyme activities of <i>Agaricus bisporus</i> . <i>Carbohydrate Polymers</i> , 2015 , 132, 359-68	10.3	5

6	The acclimation of carnivorous round-leaved sundew (<i>Drosera rotundifolia</i> L.) to solar radiation. <i>Acta Physiologiae Plantarum</i> , 2015 , 37, 1	2.6	4
5	Uncovering the abilities of <i>Agaricus bisporus</i> to degrade plant biomass throughout its life cycle. <i>Environmental Microbiology</i> , 2015 , 17, 3098-109	5.2	37
4	Fate of Carbohydrates and Lignin during Composting and Mycelium Growth of <i>Agaricus bisporus</i> on Wheat Straw Based Compost. <i>PLoS ONE</i> , 2015 , 10, e0138909	3.7	55
3	Compost Grown <i>Agaricus bisporus</i> Lacks the Ability to Degrade and Consume Highly Substituted Xylan Fragments. <i>PLoS ONE</i> , 2015 , 10, e0134169	3.7	16
2	Carbohydrate composition of compost during composting and mycelium growth of <i>Agaricus bisporus</i> . <i>Carbohydrate Polymers</i> , 2014 , 101, 281-8	10.3	24
1	Carbohydrate utilization and metabolism is highly differentiated in <i>Agaricus bisporus</i> . <i>BMC Genomics</i> , 2013 , 14, 663	4.5	27
