#	ARTICLE	IF	CITATIONS
1	Supplementation of oligosaccharide-based polymer enhanced growth and disease resistance of weaned pigs by modulating intestinal integrity and systemic immunity. <i>Journal of Animal Science and Biotechnology</i> , 2022, 13, 10.	5.3	6
2	Spatial proteogenomics reveals distinct and evolutionarily conserved hepatic macrophage niches. <i>Cell</i> , 2022, 185, 379-396.e38.	28.9	343
3	Intestinal Epithelial Cells Modulate the Production of Enterotoxins by Porcine Enterotoxigenic <i>E. coli</i> Strains. <i>International Journal of Molecular Sciences</i> , 2022, 23, 6589.	4.1	1
4	Lactoferrin, a versatile natural antimicrobial glycoprotein that modulates the host's innate immunity. <i>Biochemistry and Cell Biology</i> , 2021, 99, 61-65.	2.0	24
5	Arrival cortisol measurement in veal calves and its association with body weight, protein fractions, animal health and performance. <i>Preventive Veterinary Medicine</i> , 2021, 187, 105251.	1.9	11
6	Î²-Glucan-Induced IL-10 Secretion by Monocytes Triggers Porcine NK Cell Cytotoxicity. <i>Frontiers in Immunology</i> , 2021, 12, 634402.	4.8	11
7	Porcine small intestinal organoids as a model to explore ETEC-host interactions in the gut. <i>Veterinary Research</i> , 2021, 52, 94.	3.0	13
8	Advances in Oral Subunit Vaccine Design. <i>Vaccines</i> , 2021, 9, 1.	4.4	102
9	A Systematic Review of Metabolic Alterations Underlying IgE-Mediated Food Allergy in Children. <i>Molecular Nutrition and Food Research</i> , 2021, 65, e2100536.	3.3	7
10	Antibody-Mediated Targeting of Antigens to Intestinal Aminopeptidase N Elicits Gut IgA Responses in Pigs. <i>Frontiers in Immunology</i> , 2021, 12, 753371.	4.8	2
11	Mucosal Vaccination Against Periodontal Disease: Current Status and Opportunities. <i>Frontiers in Immunology</i> , 2021, 12, 768397.	4.8	14
12	Molecular Study of <i>Toxoplasma gondii</i> Isolates Originating from Humans and Organic Pigs in Belgium. <i>Foodborne Pathogens and Disease</i> , 2020, 17, 316-321.	1.8	4
13	<i>Chlamydia trachomatis</i> L2c Infection in a Porcine Model Produced Urogenital Pathology and Failed to Induce Protective Immune Responses Against Re-Infection. <i>Frontiers in Immunology</i> , 2020, 11, 555305.	4.8	1
14	Identification of Shigatoxigenic and Enteropathogenic <i>Escherichia coli</i> Serotypes in Healthy Young Dairy Calves in Belgium by Recto-Anal Mucosal Swabbing. <i>Veterinary Sciences</i> , 2020, 7, 167.	1.7	4
15	Detection of allergen-specific antibody-secreting cells in dogs by ELISPOT. <i>Veterinary Immunology and Immunopathology</i> , 2020, 228, 110101.	1.2	1
16	Beta-glucan's varying structure characteristics modulate survival and immune-related genes expression from <i>Vibrio harveyi</i> -infected <i>Artemia franciscana</i> in gnotobiotic conditions. <i>Fish and Shellfish Immunology</i> , 2020, 102, 307-315.	3.6	10
17	Structure-Functional Activity Relationship of Î²-Glucans From the Perspective of Immunomodulation: A Mini-Review. <i>Frontiers in Immunology</i> , 2020, 11, 658.	4.8	125
18	Effects of omega-3 fatty acids on immune, health and growth variables in veal calves. <i>Preventive Veterinary Medicine</i> , 2020, 179, 104979.	1.9	3

#	ARTICLE	IF	CITATIONS
19	Porcine Enterotoxigenic Escherichia coli Strains Differ in Their Capacity To Secrete Enterotoxins through Varying YghG Levels. Applied and Environmental Microbiology, 2020, 86, .	3.1	8
20	Adjuvanting Allergen Extracts for Sublingual Immunotherapy: Calcitriol Downregulates CXCL8 Production in Primary Sublingual Epithelial Cells. Frontiers in Immunology, 2020, 11, 1033.	4.8	3
21	Porcine and Bovine Forms of Lactoferrin Inhibit Growth of Porcine Enterotoxigenic Escherichia coli and Degrade Its Virulence Factors. Applied and Environmental Microbiology, 2020, 86, .	3.1	13
22	Evaluating single-domain antibodies as carriers for targeted vaccine delivery to the small intestinal epithelium. Journal of Controlled Release, 2020, 321, 416-429.	9.9	12
23	Glucan particles as suitable carriers for the natural anti-inflammatory compounds curcumin and diplocone – Evaluation in an ex vivo model. International Journal of Pharmaceutics, 2020, 582, 119318.	5.2	16
24	Early Kinetics of Intestinal Infection and Immune Responses to Two Toxoplasma gondii Strains in Pigs. Frontiers in Cellular and Infection Microbiology, 2020, 10, 161.	3.9	7
25	Effects of glycerol-esters of saturated short- and medium chain fatty acids on immune, health and growth variables in veal calves. Preventive Veterinary Medicine, 2020, 178, 104983.	1.9	10
26	Phylogeography of Human and Animal Coxiella burnetii Strains: Genetic Fingerprinting of Q Fever in Belgium. Frontiers in Cellular and Infection Microbiology, 2020, 10, 625576.	3.9	15
27	QuilA-Adjuvanted T. gondii Lysate Antigens Trigger Robust Antibody and IFN γ T Cell Responses in Pigs Leading to Reduction in Parasite DNA in Tissues Upon Challenge Infection. Frontiers in Immunology, 2019, 10, 2223.	4.8	8
28	Escherichia coli O157:H7: distribution, molecular characterization, antimicrobial resistance patterns and source of contamination of sheep and goat carcasses at an export abattoir, Mojdo, Ethiopia. BMC Microbiology, 2019, 19, 215.	3.3	30
29	Lactoferrin translocates to the nucleus of bovine rectal epithelial cells in the presence of Escherichia coli O157:H7. Veterinary Research, 2019, 50, 75.	3.0	7
30	Rapid production of a chimeric antibody-antigen fusion protein based on 2A-peptide cleavage and green fluorescent protein expression in CHO cells. MAbs, 2019, 11, 559-568.	5.2	9
31	Toll-like receptor 5-mediated IL-17C expression in intestinal epithelial cells enhances epithelial host defense against F4+ ETEC infection. Veterinary Research, 2019, 50, 48.	3.0	11
32	Food allergen-specific sublingual immunotherapy modulates peripheral T cell responses of dogs with adverse food reactions. Veterinary Immunology and Immunopathology, 2019, 212, 38-42.	1.2	10
33	Randomized field trial on the effects of body weight and short transport on stress and immune variables in –to 4-week-old dairy calves. Journal of Veterinary Internal Medicine, 2019, 33, 1514-1529.	1.6	28
34	Yeast-secreted, dried and food-admixed monomeric IgA prevents gastrointestinal infection in a piglet model. Nature Biotechnology, 2019, 37, 527-530.	17.5	51
35	How genomics can be used to understand host susceptibility to enteric infection, aiding in the development of vaccines and immunotherapeutic interventions. Vaccine, 2019, 37, 4805-4810.	3.8	9
36	Heat-Stable Enterotoxins of Enterotoxigenic Escherichia coli and Their Impact on Host Immunity. Toxins, 2019, 11, 24.	3.4	66

#	ARTICLE	IF	CITATIONS
37	Pork as a source of transmission of <i>Toxoplasma gondii</i> to humans: a parasite burden study in pig tissues after infection with different strains of <i>Toxoplasma gondii</i> as a function of time and different parasite stages. <i>International Journal for Parasitology</i> , 2018, 48, 555-560.	3.1	48
38	Antibacterial and immunomodulatory activities of bovine lactoferrin against <i>Escherichia coli</i> O157:H7 infections in cattle. <i>BioMetals</i> , 2018, 31, 321-330.	4.1	13
39	Comparison of the Expression Kinetics and Immunostimulatory Activity of Replicating mRNA, Nonreplicating mRNA, and pDNA after Intradermal Electroporation in Pigs. <i>Molecular Pharmaceutics</i> , 2018, 15, 377-384.	4.6	22
40	Vaccines as alternatives to antibiotics for food producing animals. Part 2: new approaches and potential solutions. <i>Veterinary Research</i> , 2018, 49, 70.	3.0	57
41	Vaccines as alternatives to antibiotics for food producing animals. Part 1: challenges and needs. <i>Veterinary Research</i> , 2018, 49, 64.	3.0	84
42	Seroprevalence of anti- <i>Toxoplasma gondii</i> antibodies in Egyptian sheep and goats. <i>BMC Veterinary Research</i> , 2018, 14, 120.	1.9	33
43	High susceptibility prevalence for F4 + and F18 + <i>Escherichia coli</i> in Flemish pigs. <i>Veterinary Microbiology</i> , 2017, 202, 52-57.	1.9	32
44	Effects of lactoferrin treatment on <i>Escherichia coli</i> O157:H7 rectal colonization in cattle. <i>Veterinary Microbiology</i> , 2017, 202, 38-46.	1.9	8
45	Cranberry extract inhibits in vitro adhesion of F4 and F18 + <i>Escherichia coli</i> to pig intestinal epithelium and reduces in vivo excretion of pigs orally challenged with F18 + verotoxigenic <i>E. coli</i> . <i>Veterinary Microbiology</i> , 2017, 202, 64-71.	1.9	30
46	A more sensitive, efficient and ISO 17025 validated Magnetic Capture real time PCR method for the detection of archetypal <i>Toxoplasma gondii</i> strains in meat. <i>International Journal for Parasitology</i> , 2017, 47, 875-884.	3.1	29
47	Heterologous prime-boost vaccination with H3N2 influenza viruses of swine favors cross-clade antibody responses and protection. <i>Npj Vaccines</i> , 2017, 2, .	6.0	26
48	Changes in cytokine profiles following treatment with food allergen-specific sublingual immunotherapy in dogs with adverse food reactions. <i>Veterinary Dermatology</i> , 2017, 28, 612-e149.	1.2	10
49	Prevalence and antimicrobial susceptibility of <i>Escherichia coli</i> O157 in beef at butcher shops and restaurants in central Ethiopia. <i>BMC Microbiology</i> , 2017, 17, 49.	3.3	28
50	Prevalence of <i>Escherichia coli</i> O157:H7 in beef cattle at slaughter and beef carcasses at retail shops in Ethiopia. <i>BMC Infectious Diseases</i> , 2017, 17, 277.	2.9	43
51	Strain- and Dose-Dependent Reduction of <i>Toxoplasma gondii</i> Burden in Pigs Is Associated with Interferon-Gamma Production by CD8+ Lymphocytes in a Heterologous Challenge Model. <i>Frontiers in Cellular and Infection Microbiology</i> , 2017, 7, 232.	3.9	22
52	Duality of β-glucan microparticles: antigen carrier and immunostimulants. <i>International Journal of Nanomedicine</i> , 2016, 11, 2463.	6.7	25
53	Maternal colostral leukocytes appear to enhance cell-mediated recall response, but inhibit humoral recall response in prime"boost vaccinated calves. <i>Journal of Reproductive Immunology</i> , 2016, 113, 68-75.	1.9	10
54	A double blind, randomized, placebo controlled trial of the efficacy, quality of life and safety of food allergen"specific sublingual immunotherapy in client owned dogs with adverse food reactions: a small pilot study. <i>Veterinary Dermatology</i> , 2016, 27, 361.	1.2	11

#	ARTICLE	IF	CITATIONS
55	The case for plant-made veterinary immunotherapeutics. <i>Biotechnology Advances</i> , 2016, 34, 597-604.	11.7	46
56	F4+ ETEC infection and oral immunization with F4 fimbriae elicits an IL-17-dominated immune response. <i>Veterinary Research</i> , 2015, 46, 121.	3.0	35
57	Inhibition of Heat-Stable Toxinâ€œInduced Intestinal Salt and Water Secretion by a Novel Class of Guanylyl Cyclase C Inhibitors. <i>Journal of Infectious Diseases</i> , 2015, 212, 1806-1815.	4.0	22
58	Heat-labile enterotoxin of <i>Escherichia coli</i> promotes intestinal colonization of <i>Salmonella enterica</i> . <i>Comparative Immunology, Microbiology and Infectious Diseases</i> , 2015, 43, 1-7.	1.6	13
59	Î²-glucan microparticles targeted to epithelial APN as oral antigen delivery system. <i>Journal of Controlled Release</i> , 2015, 220, 149-159.	9.9	40
60	Maternal immunity enhances systemic recall immune responses upon oral immunization of piglets with F4 fimbriae. <i>Veterinary Research</i> , 2015, 46, 72.	3.0	13
61	Aflatoxins of type B and G affect porcine dendritic cell maturation <i>in vitro</i> . <i>Journal of Immunotoxicology</i> , 2015, 12, 174-180.	1.7	16
62	Cell type-specific differences in Î²-glucan recognition and signalling in porcine innate immune cells. <i>Developmental and Comparative Immunology</i> , 2015, 48, 192-203.	2.3	54
63	Development and Validation of a Real-Time PCR for <i>Chlamydia suis</i> Diagnosis in Swine and Humans. <i>PLoS ONE</i> , 2014, 9, e96704.	2.5	33
64	Refined Candidate Region for F4ab/ac Enterotoxigenic <i>Escherichia coli</i> Susceptibility Situated Proximal to MUC13 in Pigs. <i>PLoS ONE</i> , 2014, 9, e105013.	2.5	28
65	Plant-based solutions for veterinary immunotherapeutics and prophylactics. <i>Veterinary Research</i> , 2014, 45, 117.	3.0	50
66	Evaluation of the presence and zoonotic transmission of <i>Chlamydia suis</i> in a pig slaughterhouse. <i>BMC Infectious Diseases</i> , 2014, 14, 560.	2.9	52
67	The immune response against <i>Chlamydia suis</i> genital tract infection partially protects against re-infection. <i>Veterinary Research</i> , 2014, 45, 95.	3.0	11
68	Variation in 12 porcine genes involved in the carbohydrate moiety assembly of glycosphingolipids does not account for differential binding of F4 <i>Escherichia coli</i> and their fimbriae. <i>BMC Genetics</i> , 2014, 15, 103.	2.7	2
69	Isolation and genotyping of viable <i>Toxoplasma gondii</i> from sheep and goats in Ethiopia destined for human consumption. <i>Parasites and Vectors</i> , 2014, 7, 425.	2.5	28
70	Parasite distribution and associated immune response during the acute phase of <i>Toxoplasma gondii</i> infection in sheep. <i>BMC Veterinary Research</i> , 2014, 10, 293.	1.9	26
71	Development of a method for isolating bovine colostrum mononuclear leukocytes for phenotyping and functional studies. <i>Veterinary Journal</i> , 2014, 200, 294-298.	1.7	12
72	Aflatoxin B1 interferes with the antigen-presenting capacity of porcine dendritic cells. <i>Toxicology in Vitro</i> , 2014, 28, 531-537.	2.4	47

#	ARTICLE	IF	CITATIONS
73	Porcine intestinal glycosphingolipids recognized by F6-fimbriated enterotoxigenic <i>Escherichia coli</i> . <i>Microbial Pathogenesis</i> , 2014, 76, 51-60.	2.9	8
74	Effect of fatty acid composition of the sow diet on the innate and adaptive immunity of the piglets after weaning. <i>Veterinary Journal</i> , 2014, 200, 287-293.	1.7	6
75	Nanobody Mediated Inhibition of Attachment of F18 Fimbriae Expressing <i>Escherichia coli</i> . <i>PLoS ONE</i> , 2014, 9, e114691.	2.5	23
76	Seroepidemiology of <i>Toxoplasma gondii</i> infection in women of child-bearing age in central Ethiopia. <i>BMC Infectious Diseases</i> , 2013, 13, 101.	2.9	79
77	Seroepidemiological study of ovine toxoplasmosis in East and West Shewa Zones of Oromia Regional State, Central Ethiopia. <i>BMC Veterinary Research</i> , 2013, 9, 117.	1.9	35
78	Expression and distribution patterns of Mas-related gene receptor subtypes A α -H in the mouse intestine: inflammation-induced changes. <i>Histochemistry and Cell Biology</i> , 2013, 139, 639-658.	1.7	23
79	Emerging <i>Chlamydia psittaci</i> infections in the chicken industry and pathology of <i>Chlamydia psittaci</i> genotype B and D strains in specific pathogen free chickens. <i>Veterinary Microbiology</i> , 2013, 162, 740-749.	1.9	33
80	ETEC vaccination in pigs. <i>Veterinary Immunology and Immunopathology</i> , 2013, 152, 37-42.	1.2	85
81	Several enteropathogens are circulating in suckling and newly weaned piglets suffering from diarrhea in the province of Villa Clara, Cuba. <i>Tropical Animal Health and Production</i> , 2013, 45, 435-440.	1.4	16
82	Optimization of a small intestinal segment perfusion model for heat-stable enterotoxin A induced secretion in pigs. <i>Veterinary Immunology and Immunopathology</i> , 2013, 152, 82-86.	1.2	11
83	One-step spray-dried polyelectrolyte microparticles enhance the antigen cross-presentation capacity of porcine dendritic cells. <i>European Journal of Pharmaceutics and Biopharmaceutics</i> , 2013, 84, 421-429.	4.3	15
84	Bovine innate and adaptive immune responses against <i>Escherichia coli</i> O157:H7 and vaccination strategies to reduce faecal shedding in ruminants. <i>Veterinary Immunology and Immunopathology</i> , 2013, 152, 109-120.	1.2	36
85	The Fc γ 3 receptor expression profile on porcine dendritic cells depends on the nature of the stimulus. <i>Veterinary Immunology and Immunopathology</i> , 2013, 152, 43-49.	1.2	7
86	Seroepidemiological study of caprine toxoplasmosis in East and West Shewa Zones, Oromia Regional State, Central Ethiopia. <i>Research in Veterinary Science</i> , 2013, 94, 43-48.	1.9	33
87	Use of Antibody Responses against Locus of Enterocyte Effacement (LEE)-Encoded Antigens To Monitor Enterohemorrhagic <i>Escherichia coli</i> Infections on Cattle Farms. <i>Applied and Environmental Microbiology</i> , 2013, 79, 3677-3683.	3.1	4
88	Orally fed seeds producing designer IgAs protect weaned piglets against enterotoxigenic <i>Escherichia coli</i> infection. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2013, 110, 11809-11814.	7.1	114
89	Expression of verocytotoxic <i>Escherichia coli</i> antigens in tobacco seeds and evaluation of gut immunity after oral administration in mouse model. <i>Journal of Veterinary Science</i> , 2013, 14, 263.	1.3	22
90	Exposure to the Proton Scavenger Glycine under Alkaline Conditions Induces <i>Escherichia coli</i> Viability Loss. <i>PLoS ONE</i> , 2013, 8, e60328.	2.5	30

#	ARTICLE	IF	CITATIONS
91	Structural insight in histoâ€blood group binding by the F18 fimbrial adhesin FedF. <i>Molecular Microbiology</i> , 2012, 86, 82-95.	2.5	46
92	Role of Heat-Stable Enterotoxins in the Induction of Early Immune Responses in Piglets after Infection with Enterotoxigenic <i>Escherichia coli</i> . <i>PLoS ONE</i> , 2012, 7, e41041.	2.5	60
93	Protection of pigs against genital <i>Chlamydia trachomatis</i> challenge by parenteral or mucosal DNA immunization. <i>Vaccine</i> , 2012, 30, 2869-2881.	3.8	27
94	Crossing the barrier: Targeting epithelial receptors for enhanced oral vaccine delivery. <i>Journal of Controlled Release</i> , 2012, 160, 431-439.	9.9	81
95	Characterization and clonal grouping of pathogenic <i>Escherichia coli</i> isolated from intestinal contents of diarrheic piglets in Villa Clara province, Cuba, according to their antibiotic resistance and ERIC-PCR profiles. <i>Veterinary Microbiology</i> , 2012, 154, 425-428.	1.9	3
96	Production of a Subunit Vaccine Candidate against Porcine Post-Weaning Diarrhea in High-Biomass Transplastomic Tobacco. <i>PLoS ONE</i> , 2012, 7, e42405.	2.5	32
97	Designing oral vaccines targeting intestinal dendritic cells. <i>Expert Opinion on Drug Delivery</i> , 2011, 8, 467-483.	5.0	19
98	Influence of polymer hydrolysis on adjuvant effect of Gantrez®AN nanoparticles: Implications for oral vaccination. <i>European Journal of Pharmaceutics and Biopharmaceutics</i> , 2011, 79, 392-398.	4.3	9
99	Adjuvant effect of Gantrez®AN nanoparticles during oral vaccination of piglets against F4+enterotoxigenic <i>Escherichia coli</i> . <i>Veterinary Immunology and Immunopathology</i> , 2011, 139, 148-155.	1.2	23
100	Sera from dams of calves with bovine neonatal pancytopenia contain alloimmune antibodies directed against calf leukocytes. <i>Veterinary Immunology and Immunopathology</i> , 2011, 141, 293-300.	1.2	27
101	Erythrocyte and Porcine Intestinal Glycosphingolipids Recognized by F4 Fimbriae of Enterotoxigenic <i>Escherichia coli</i> . <i>PLoS ONE</i> , 2011, 6, e23309.	2.5	26
102	Rectal inoculation of sheep with <i>E. coli</i> O157:H7 results in persistent infection in the absence of a protective immune response. <i>Veterinary Microbiology</i> , 2011, 147, 376-382.	1.9	15
103	Oral infection with a Shiga toxin-negative <i>Escherichia coli</i> O157:H7 strain elicits humoral and cellular responses but does not protect sheep from colonisation with the homologous strain. <i>Veterinary Microbiology</i> , 2011, 148, 317-322.	1.9	10
104	High prevalence of F4+ and F18+ <i>Escherichia coli</i> in Cuban piggeries as determined by serological survey. <i>Tropical Animal Health and Production</i> , 2011, 43, 937-946.	1.4	15
105	Validation of the <i>Chlamydia trachomatis</i> genital challenge pig model for testing recombinant protein vaccines. <i>Journal of Medical Microbiology</i> , 2011, 60, 117-127.	1.8	23
106	Varying Effects of Different Î²-Glucans on the Maturation of Porcine Monocyte-Derived Dendritic Cells. <i>Vaccine Journal</i> , 2011, 18, 1441-1446.	3.1	22
107	Porcine Sialoadhesin (CD169/Siglec-1) Is an Endocytic Receptor that Allows Targeted Delivery of Toxins and Antigens to Macrophages. <i>PLoS ONE</i> , 2011, 6, e16827.	2.5	65
108	Enterotoxigenic <i>Escherichia coli</i> (K88) induce proinflammatory responses in porcine intestinal epithelial cells. <i>Developmental and Comparative Immunology</i> , 2010, 34, 1175-1182.	2.3	80

#	ARTICLE	IF	CITATIONS
109	Influence of reaction medium during synthesis of Gantrez® AN 119 nanoparticles for oral vaccination. <i>European Journal of Pharmaceutics and Biopharmaceutics</i> , 2010, 74, 202-208.	4.3	16
110	Primary porcine CD11R1+ antigen-presenting cells isolated from small intestinal mucosa mature but lose their T cell stimulatory function in response to cholera toxin treatment. <i>Veterinary Immunology and Immunopathology</i> , 2010, 134, 239-248.	1.2	2
111	Targeting of <i>Escherichia coli</i> F4 fimbriae to Fc γ 3 receptors enhances the maturation of porcine dendritic cells. <i>Veterinary Immunology and Immunopathology</i> , 2010, 135, 188-198.	1.2	19
112	The effect of β -glucans on porcine leukocytes. <i>Veterinary Immunology and Immunopathology</i> , 2010, 135, 199-207.	1.2	100
113	Clathrin-mediated endocytosis and transcytosis of enterotoxigenic <i>Escherichia coli</i> F4 fimbriae in porcine intestinal epithelial cells. <i>Veterinary Immunology and Immunopathology</i> , 2010, 137, 243-250.	1.2	34
114	Gamma Radiation Alters the Ultrastructure in Tissue-Engineered Heart Valve Scaffolds. <i>Tissue Engineering - Part A</i> , 2009, 15, 3597-3604.	3.1	13
115	Recognition of Blood Group ABH Type 1 Determinants by the FedF Adhesin of F18-fimbriated <i>Escherichia coli</i> . <i>Journal of Biological Chemistry</i> , 2009, 284, 9713-9726.	3.4	66
116	Identification of the Porcine C-type lectin dectin-1. <i>Veterinary Immunology and Immunopathology</i> , 2009, 130, 131-134.	1.2	22
117	The food contaminant fumonisin B1 reduces the maturation of porcine CD11R1+ intestinal antigen presenting cells and antigen-specific immune responses, leading to a prolonged intestinal ETEC infection. <i>Veterinary Research</i> , 2009, 40, 40.	3.0	79
118	The polymeric stability of the <i>Escherichia coli</i> F4 (K88) fimbriae enhances its mucosal immunogenicity following oral immunization. <i>Vaccine</i> , 2008, 26, 5728-5735.	3.8	18
119	Transcytosis of F4 fimbriae by villous and dome epithelia in F4-receptor positive pigs supports importance of receptor-dependent endocytosis in oral immunization strategies. <i>Veterinary Immunology and Immunopathology</i> , 2008, 124, 29-40.	1.2	16
120	Evaluation of anticollagen type I antibody titers in synovial fluid of both stifle joints and the left shoulder joint of dogs with unilateral cranial cruciate disease. <i>American Journal of Veterinary Research</i> , 2007, 68, 283-289.	0.6	24
121	Cytokine mRNA expression in synovial fluid of affected and contralateral stifle joints and the left shoulder joint in dogs with unilateral disease of the stifle joint. <i>American Journal of Veterinary Research</i> , 2007, 68, 953-961.	0.6	14
122	The IgA system: a comparison of structure and function in different species. <i>Veterinary Research</i> , 2006, 37, 455-467.	3.0	155
123	Adjuvants modulating mucosal immune responses or directing systemic responses towards the mucosa. <i>Veterinary Research</i> , 2006, 37, 511-539.	3.0	117
124	Acellular porcine and kangaroo aortic valve scaffolds show more intense immune-mediated calcification than cross-linked Toronto SPV(R) valves in the sheep model. <i>Interactive Cardiovascular and Thoracic Surgery</i> , 2006, 5, 544-549.	1.1	19
125	Use of vitamin B12 in joint lavage for determination of dilution factors of canine synovial fluid. <i>American Journal of Veterinary Research</i> , 2005, 66, 1903-1906.	0.6	5
126	The role of enterocytes in the intestinal barrier function and antigen uptake. <i>Microbes and Infection</i> , 2005, 7, 997-1004.	1.9	141
