#	ARTICLE	IF	CITATIONS
1	Analysis of thermo-hydraulic characteristics for flow of MWCNT-Fe ₃ O ₄ /H ₂ O hybrid nanofluid through a wavy channel under magnetic field. Proceedings of the Institution of Mechanical Engineers, Part E: Journal of Process Mechanical Engineering, 2024, 238, 67-77.	1.4	1
2	Analysis of forced convective nanofluid flow through a wavy channel with linearly varying amplitude at the entrance. International Journal of Numerical Methods for Heat and Fluid Flow, 2023, 33, 311-332.	1.6	3
3	Analysis of conjugate heat transfer for forced convective flow through wavy minichannel. International Journal of Numerical Methods for Heat and Fluid Flow, 2023, 33, 174-203.	1.6	3
4	Analysis of natural convection in a rhombic enclosure with undulations of the top wall "a numerical study. International Journal of Ambient Energy, 2022, 43, 87-97.	1.4	13
5	Analysis of thermo-hydraulic and entropy generation characteristics for flow through ribbed-wavy channel. International Journal of Numerical Methods for Heat and Fluid Flow, 2022, 32, 1618-1642.	1.6	9
6	Implications of capillarity-wettability interaction on geometrically mediated droplet splitting mechanism. Colloids and Surfaces A: Physicochemical and Engineering Aspects, 2022, 633, 127873.	2.3	8
7	Natural convection heat transfer within a square porous enclosure with four heated cylinders. Case Studies in Thermal Engineering, 2022, 30, 101733.	2.8	9
8	Natural convection in an enclosure with a pair of cylinders under magnetic field. Case Studies in Thermal Engineering, 2022, 30, 101763.	2.8	8
9	Charge convection and interfacial deformation of a compound drop in plane Poiseuille flow under an electric field. Physical Review Fluids, 2022, 7, .	1.0	6
10	Critical review on local thermal equilibrium and local thermal non-equilibrium approaches for the analysis of forced convective flow through porous media. International Communications in Heat and Mass Transfer, 2022, 132, 105889.	2.9	18
11	Effect of amplitude of walls on thermal and hydrodynamic characteristics of laminar flow through an asymmetric wavy channel. Case Studies in Thermal Engineering, 2022, 31, 101796.	2.8	21
12	Natural Convection Inside a Porous Square Enclosure Embedded with Two Elliptic Cylinders. Journal of Thermophysics and Heat Transfer, 2022, 36, 745-762.	0.9	2
13	Enhanced Electroosmotic Mixing in a Wavy Micromixer Using Surface Charge Heterogeneity. Industrial & Engineering Chemistry Research, 2022, 61, 2904-2914.	1.8	19
14	Morpho-dynamic evolution due to inertia-mediated impact of a compound drop on a deep liquid pool. Physics of Fluids, 2022, 34, .	1.6	7
15	Analytical study of two-layered mixed electro-osmotic and pressure-driven flow and heat transfer in a microchannel with hydrodynamic slippage and asymmetric wall heating. Physics of Fluids, 2022, 34, .	1.6	10
16	Electroosmotic mixing in a microchannel with heterogeneous slip dependent zeta potential. Chemical Engineering and Processing: Process Intensification, 2022, 176, 108940.	1.8	18
17	Mixing characteristics and pressure drop analysis in a spiral micromixer. Proceedings of the Institution of Mechanical Engineers, Part E: Journal of Process Mechanical Engineering, 2022, 236, 2618-2629.	1.4	6
18	Enhanced electroosmotic mixing of non-Newtonian fluids in a heterogeneous surface charged micromixer with obstacles. Colloids and Surfaces A: Physicochemical and Engineering Aspects, 2022, 648, 129215.	2.3	17

#	ARTICLE	IF	CITATIONS
19	Implications of novel cold plate design with hybrid cooling on thermal management of fast discharging lithium-ion battery. <i>Journal of Energy Storage</i> , 2022, 53, 105051.	3.9	20
20	Natural convection heat transfer and entropy generation in a porous rhombic enclosure: influence of non-uniform heating. <i>Journal of Thermal Analysis and Calorimetry</i> , 2021, 144, 1493-1515.	2.0	35
21	Implication of geometrical configuration on heat transfer enhancement in converging minichannel using nanofluid by two phase mixture model: A numerical analysis. <i>Proceedings of the Institution of Mechanical Engineers, Part E: Journal of Process Mechanical Engineering</i> , 2021, 235, 416-427.	1.4	6
22	Thermo-hydraulic and entropy generation analysis for magnetohydrodynamic pressure driven flow of nanofluid through an asymmetric wavy channel. <i>International Journal of Numerical Methods for Heat and Fluid Flow</i> , 2021, 31, 1190-1213.	1.6	26
23	Influence of non-uniform asymmetric heating on conjugate heat transfer in a rectangular minichannel using nanofluid by two-phase Eulerian-Lagrangian method. <i>Powder Technology</i> , 2021, 381, 164-180.	2.1	14
24	Conjugate Heat Transfer Analysis for Flow Through Microduct Subjected to Non-uniform Heating. <i>Lecture Notes in Mechanical Engineering</i> , 2021, , 377-385.	0.3	0
25	Thermo-Hydraulic Performance for an Electronic Cooling System Using Porous Material. , 2021, , 197-204.		2
26	Analysis of Heat Transfer and Pressure Drop for Pressure Driven Flow of Non-Newtonian Fluids Through a Serpentine Channel: Influence of Prandtl Number. , 2021, , 965-974.		1
27	Influence of Thermal Radiation on Natural Convection in a Square Enclosure. , 2021, , 513-524.		1
28	Effect of Slip on Vortex Formation Near Two-Part Cylinder with Same Sign Zeta Potential in a Plane Microchannel. , 2021, , 1013-1022.		1
29	Natural Convection from a Pair of Heated Cylinders in a Square Cavity with Non-uniform Temperature on the Side Walls. <i>Journal of the Institution of Engineers (India): Series C</i> , 2021, 102, 389-396.	0.7	5
30	Numerical study of the vortex-induced electroosmotic mixing of non-Newtonian biofluids in a nonuniformly charged wavy microchannel: Effect of finite ion size. <i>Electrophoresis</i> , 2021, 42, 2498-2510.	1.3	58
31	Influence of conjugate heat transfer on the minimization of entropy generation for forced convective flow through parallel plate channel filled with porous material. <i>Heat Transfer</i> , 2021, 50, 6401-6417.	1.7	4
32	Implications of non-uniform porosity distribution in gas diffusion layer on the performance of a high temperature PEM fuel cell. <i>International Journal of Hydrogen Energy</i> , 2021, 46, 18571-18588.	3.8	20
33	Comparative assessment of mixing characteristics and pressure drop in spiral and serpentine micromixers. <i>Chemical Engineering and Processing: Process Intensification</i> , 2021, 162, 108335.	1.8	40
34	Influence of wettability and initial size on the merging dynamics of droplet within a Y-shaped bifurcating channel. <i>Fluid Dynamics Research</i> , 2021, 53, 035506.	0.6	4
35	Implication of corrugation profile on thermo-hydraulic characteristics of Cu-water nanofluid flow through partially filled porous channel. <i>International Communications in Heat and Mass Transfer</i> , 2021, 125, 105329.	2.9	20
36	Conjugate heat transfer analysis for forced convective flow through a parallel plate microchannel: Effect of nonuniform asymmetric heating. <i>Numerical Heat Transfer; Part A: Applications</i> , 2021, 80, 210-233.	1.2	8

#	ARTICLE	IF	CITATIONS
37	Analysis of thermal transport and entropy generation characteristics for electroosmotic flow through a hydrophobic microchannel considering viscoelectric effect. <i>International Communications in Heat and Mass Transfer</i> , 2021, 127, 105519.	2.9	24
38	Numerical analysis of electroosmotic mixing in a heterogeneous charged micromixer with obstacles. <i>Chemical Engineering and Processing: Process Intensification</i> , 2021, 168, 108585.	1.8	43
39	Implication of air-throttling on combustion characteristics of cavity-strut based scramjet combustor. <i>Acta Astronautica</i> , 2021, 188, 171-184.	1.7	5
40	Numerical analysis of magnetohydrodynamic natural convection in a nanofluid filled quadrantal enclosure. <i>Case Studies in Thermal Engineering</i> , 2021, 28, 101507.	2.8	26
41	Numerical investigation of mixing performance in spiral micromixers based on Dean flows and chaotic advection. <i>Chemical Engineering and Processing: Process Intensification</i> , 2021, 169, 108609.	1.8	33
42	Natural Convection from Two Cylinders in an Enclosure with Sinusoidal Bottom Wall: A Numerical Study. <i>Lecture Notes in Mechanical Engineering</i> , 2021, , 351-359.	0.3	1
43	Serpentine square wave microchannel fabrication with WEDM and soft lithography. <i>Materials Today: Proceedings</i> , 2021, 46, 8513-8518.	0.9	7
44	Effect of Non-uniform Heating on Forced Convective Flow Through Asymmetric Wavy Channel. <i>Lecture Notes in Mechanical Engineering</i> , 2021, , 333-341.	0.3	4
45	On the Implication of Porosity Configuration on Lithium-Ion Cell Performance: A Numerical Study. <i>Journal of Electrochemical Energy Conversion and Storage</i> , 2021, 18, .	1.1	3
46	Analytical solution to heat transfer for mixed electroosmotic and pressure-driven flow through a microchannel with slip-dependent zeta potential. <i>International Journal of Heat and Mass Transfer</i> , 2021, 181, 121989.	2.5	23
47	Numerical Investigation on the Influence of Reactant Gas Concentration on the Performance of a PEM Fuel Cell. <i>Springer Proceedings in Energy</i> , 2021, , 1679-1689.	0.2	0
48	Tuning of regimes during two-phase flow through a cross-junction. <i>Physics of Fluids</i> , 2021, 33, .	1.6	15
49	Electroosmotic flow of viscoelastic fluid through a microchannel with slip-dependent zeta potential. <i>Physics of Fluids</i> , 2021, 33, .	1.6	30
50	Natural convection heat transfer and entropy generation from a heated cylinder of different geometry in an enclosure with non-uniform temperature distribution on the walls. <i>Journal of Thermal Analysis and Calorimetry</i> , 2020, 141, 839-857.	2.0	37
51	Analysis of mixed convective heat transfer from a sphere with an aligned magnetic field. <i>International Journal of Heat and Mass Transfer</i> , 2020, 162, 120342.	2.5	7
52	Tuning the Splitting Behavior of Droplet in a Bifurcating Channel through Wettabilityâ€™Capillarity Interaction. <i>Langmuir</i> , 2020, 36, 10471-10489.	1.6	21
53	Combined effects of wall slip and nanofluid on interfacial transport from a thin-film evaporating meniscus in a microfluidic channel. <i>Microfluidics and Nanofluidics</i> , 2020, 24, 1.	1.0	13
54	Thermal transport analysis for natural convection in a porous corrugated rhombic enclosure. <i>Heat Transfer</i> , 2020, 49, 3287-3313.	1.7	11

#	ARTICLE	IF	CITATIONS
55	Numerical investigation of multi-layered porosity in the gas diffusion layer on the performance of a PEM fuel cell. International Journal of Hydrogen Energy, 2020, 45, 21836-21847.	3.8	48
56	Analysis of mixed convective heat transfer past an isoflux/isothermal sphere: influence of Prandtl number. Physica Scripta, 2020, 95, 085211.	1.2	5
57	Effects of undulated wall on the hydrodynamic and thermal transport characteristics of turbulent jet. International Journal of Thermal Sciences, 2020, 152, 106297.	2.6	14
58	Numerical study of thermo-hydraulic characteristics for forced convective flow through wavy channel at different Prandtl numbers. Journal of Thermal Analysis and Calorimetry, 2020, 141, 2429-2451.	2.0	33
59	Numerical investigation on the effect of magnetic field on natural convection heat transfer from a pair of embedded cylinders within a porous enclosure. Journal of Thermal Analysis and Calorimetry, 2020, 141, 2405-2427.	2.0	18
60	Optimal heating strategy for minimization of peak temperature and entropy generation for forced convective flow through a circular pipe. International Journal of Heat and Mass Transfer, 2020, 150, 119318.	2.5	24
61	Fabrication of wavy micromixer using soft lithography technique. Materials Today: Proceedings, 2020, 26, 1271-1278.	0.9	13
62	Numerical Analysis of Mixing Performance in Microchannel with Different Ratio of Outlet to Inlet Width. , 2020, , 257-266.		8
63	Influence of Confluence Angle Between Inlets on the Mixing Performance of Micro-mixer with Obstacles. , 2020, , 275-283.		9
64	Effect of Thickness of Porous Layer on Thermo-Hydraulic Characteristics and Entropy Generation in a Partially Porous Wavy Channel. Lecture Notes in Mechanical Engineering, 2020, , 119-130.	0.3	6
65	Analysis of mixed convection past a heated sphere. Proceedings of the Institution of Mechanical Engineers, Part E: Journal of Process Mechanical Engineering, 2019, 233, 601-616.	1.4	6
66	Conjugate heat transfer in a duct using nanofluid by two-phase Eulerian-Lagrangian method: Effect of non-uniform heating. Powder Technology, 2019, 346, 180-192.	2.1	25
67	Implication of fluid rheology on the hydrothermal and entropy generation characteristics for mixed convective flow in a backward facing step channel with baffle. International Journal of Heat and Mass Transfer, 2019, 137, 138-160.	2.5	25
68	Numerical investigation of magnetohydrodynamic natural convection heat transfer and entropy generation in a rhombic enclosure filled with Cu-water nanofluid. International Journal of Heat and Mass Transfer, 2019, 136, 777-798.	2.5	92
69	Analysis of mixing performances in microchannel with obstacles of different aspect ratios. Proceedings of the Institution of Mechanical Engineers, Part E: Journal of Process Mechanical Engineering, 2019, 233, 1045-1051.	1.4	33
70	Numerical analysis of natural convection heat transfer and entropy generation in a porous quadrantal cavity. International Journal of Numerical Methods for Heat and Fluid Flow, 2019, 29, 4826-4849.	1.6	30
71	Numerical study of mixing in wavy micromixers: comparison between raccoon and serpentine mixer. Chemical Engineering and Processing: Process Intensification, 2019, 136, 44-61.	1.8	104
72	Effect of non-uniform asymmetric heating on the thermal and entropy generation characteristics for flow of Al ₂ O ₃ -water nanofluid in a micro-channel. International Journal of Numerical Methods for Heat and Fluid Flow, 2019, 29, 981-999.	1.6	24

#	ARTICLE	IF	CITATIONS
73	Numerical Analysis of Heat Transfer and Entropy Generation for Natural Convection in a Quadrantal Cavity with Non-uniform Heating at the Bottom Wall. Lecture Notes on Multidisciplinary Industrial Engineering, 2019, , 483-501.	0.4	1
74	Analysis of thermo-hydraulic performance and entropy generation characteristics for laminar flow through triangular corrugated channel. Journal of Thermal Analysis and Calorimetry, 2019, 136, 49-62.	2.0	52
75	Limiting thermal characteristics for flow of non-Newtonian fluids between asymmetrically heated parallel plates: An analytical study. Proceedings of the Institution of Mechanical Engineers, Part E: Journal of Process Mechanical Engineering, 2019, 233, 880-892.	1.4	1
76	Effects of temperature-dependent thermo-physical properties on hydrodynamic swirl decay in microtubes. Proceedings of the Institution of Mechanical Engineers, Part E: Journal of Process Mechanical Engineering, 2019, 233, 427-435.	1.4	6
77	Natural convection heat transfer and entropy generation inside porous quadrantal enclosure with nonisothermal heating at the bottom wall. Numerical Heat Transfer; Part A: Applications, 2018, 73, 222-240.	1.2	58
78	Hydrothermal performance and entropy generation analysis for mixed convective flows over a backward facing step channel with baffle. International Journal of Heat and Mass Transfer, 2018, 125, 525-542.	2.5	27
79	Thermo-hydraulic transport characteristics of non-Newtonian fluid flows through corrugated channels. International Journal of Thermal Sciences, 2018, 129, 201-208.	2.6	41
80	Numerical investigation of unsteady natural convection heat transfer and entropy generation from a pair of cylinders in a porous enclosure. Numerical Heat Transfer; Part A: Applications, 2018, 74, 1323-1341.	1.2	34
81	Wettability-mediated dynamics of two-phase flow in microfluidic T-junction. Physics of Fluids, 2018, 30, 122106.	1.6	41
82	Effect of Prandtl number on thermo-fluidic transport characteristics for mixed convection past a sphere. International Communications in Heat and Mass Transfer, 2018, 98, 191-199.	2.9	14
83	Heat Transfer and Entropy Generation Characteristics of a Non-Newtonian Fluid Squeezed and Extruded Between Two Parallel Plates. Journal of Heat Transfer, 2017, 139, .	1.2	25
84	Numerical investigation of thermo-hydraulic transport characteristics in wavy channels: Comparison between raccoon and serpentine channels. International Communications in Heat and Mass Transfer, 2017, 88, 171-176.	2.9	66
85	Effects of the inclination angle on natural convection heat transfer and entropy generation in a square porous enclosure. Numerical Heat Transfer; Part A: Applications, 2016, 70, 1271-1296.	1.2	36
86	Evaporation of multicomponent liquid fuel droplets: Influences of component composition in droplet and vapor concentration in free stream ambience. International Journal of Thermal Sciences, 2016, 105, 83-95.	2.6	22
87	Influence of wavy wall and non-uniform heating on natural convection heat transfer and entropy generation inside porous complex enclosure. Energy, 2015, 79, 467-481.	4.5	115
88	Film condensation in presence of non-condensable gases: Interplay between variable radius of curvature and interfacial slip. International Communications in Heat and Mass Transfer, 2014, 56, 31-36.	2.9	7
89	Slip-driven alteration in film condensation over vertical surfaces. International Communications in Heat and Mass Transfer, 2013, 46, 37-41.	2.9	18
90	Combined influences of electrostatic component of disjoining pressure and interfacial slip on thin film evaporation in nanopores. International Journal of Heat and Mass Transfer, 2013, 64, 304-312.	2.5	21

#	ARTICLE	IF	CITATIONS
91	Thermodynamic performance of microscale swirling flows with interfacial slip. International Journal of Heat and Mass Transfer, 2013, 57, 397-401.	2.5	22
92	Consistent description of electrohydrodynamics in narrow fluidic confinements in the presence of hydrophobic interactions. Physical Review E, 2012, 85, 046305.	0.8	11
93	Hydrodynamic Swirl Decay in Microtubes with Interfacial Slip. Nanoscale and Microscale Thermophysical Engineering, 2012, 16, 133-143.	1.4	11
94	Hydrodynamic and thermal transport characteristics of swirling flows through microchannels with interfacial slip. International Journal of Heat and Mass Transfer, 2012, 55, 4359-4365.	2.5	11
95	Influence of ambient vapor concentration on droplet evaporation in a perspective of comparison between diffusion controlled model and kinetic model. International Journal of Heat and Mass Transfer, 2011, 54, 4580-4584.	2.5	12
96	Effect of non-uniform heating on conjugate heat transfer performance for nanofluid flow in a converging duct by a two-phase Eulerian-Lagrangian method. Proceedings of the Institution of Mechanical Engineers, Part E: Journal of Process Mechanical Engineering, 0, , 095440892110429.	1.4	3
97	Numerical assessment of hydrodynamic and mixing characteristics for mixed electroosmotic and pressure-driven flow through a wavy microchannel with patchwise surface heterogeneity. Proceedings of the Institution of Mechanical Engineers, Part E: Journal of Process Mechanical Engineering, 0, , 095440892110516.	1.4	10
98	Magneto hydrodynamic Natural Convection in a Quadrantal Enclosure. Journal of Thermophysics and Heat Transfer, 0, , 1-15.	0.9	1
