Tünde Baranyi

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/9240913/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Different Contributions to Space Weather and Space Climate from Different Big Solar Active Regions. Astrophysical Journal, 2019, 871, 16.	4.5	15
2	Stable Sunspot Area Level of Debrecen Photoheliographic Data and Multivariate Correction Factor of SOON Data. Solar Physics, 2018, 293, 1.	2.5	3
3	Comparative analysis of Debrecen sunspot catalogues. Monthly Notices of the Royal Astronomical Society, 2017, 465, 1259-1273.	4.4	56
4	An Alternative Measure of Solar Activity from Detailed Sunspot Datasets. Solar Physics, 2016, 291, 2941-2950.	2.5	4
5	ACTIVE LONGITUDE AND SOLAR FLARE OCCURRENCES. Astrophysical Journal, 2016, 818, 127.	4.5	20
6	On-line Tools for Solar Data Compiled at the Debrecen Observatory and Their Extensions with the Greenwich Sunspot Data. Solar Physics, 2016, 291, 3081-3102.	2.5	95
7	Statistical study of spatio-temporal distribution of precursor solar flares associated with major flares. Monthly Notices of the Royal Astronomical Society, 2016, 459, 3532-3539.	4.4	7
8	ON FLARE PREDICTABILITY BASED ON SUNSPOT GROUP EVOLUTION. Astrophysical Journal Letters, 2015, 802, L21.	8.3	31
9	Dynamic Precursors of Flares in Active Region NOAA 10486. Journal of Astrophysics and Astronomy, 2015, 36, 111-121.	1.0	5
10	Comparison of Debrecen and Mount Wilson/Kodaikanal sunspot group tilt angles and the Joy's law. Monthly Notices of the Royal Astronomical Society, 2015, 447, 1857-1865.	4.4	26
11	ACTIVE-REGION TILT ANGLES: MAGNETIC VERSUS WHITE-LIGHT DETERMINATIONS OF JOY'S LAW. Astrophysical Journal, 2015, 798, 50.	4.5	29
12	Statistical relationship between the succeeding solar flares detected by the RHESSI satellite. Monthly Notices of the Royal Astronomical Society, 2014, 441, 1157-1165.	4.4	3
13	PRE-FLARE DYNAMICS OF SUNSPOT GROUPS. Astrophysical Journal, 2014, 789, 107.	4.5	24
14	Migration and Extension of Solar Active Longitudinal Zones. Solar Physics, 2014, 289, 579-591.	2.5	15
15	Sunspot Group Development in High Temporal Resolution. Solar Physics, 2014, 289, 563-577.	2.5	11
16	Indirect comparison of Debrecen and Greenwich daily sums of sunspot areas. Monthly Notices of the Royal Astronomical Society, 2013, 434, 1713-1720.	4.4	20
17	Migration and Extension of Solar Active Longitudinal Zones. , 2013, , 143-155.		0
18	Active region properties and irradiance variations. Advances in Space Research, 2012, 50, 676-682.	2.6	3

#	Article	IF	CITATIONS
19	In-depth survey of sunspot and active region catalogs. Proceedings of the International Astronomical Union, 2010, 6, 221-225.	0.0	1
20	Photospheric data programs at the Debrecen Observatory. Proceedings of the International Astronomical Union, 2010, 6, 403-407.	0.0	40
21	Possible north–south asymmetry related to the mean Bz of interplanetary coronal mass ejections. Advances in Space Research, 2006, 38, 931-935.	2.6	1
22	Symmetric or asymmetric energy transfer from Interplanetary Coronal Mass Ejections to the magnetosphere depending on the solar dipole. Advances in Space Research, 2005, 35, 421-425.	2.6	1
23	Study of differences between sunspot area data determined from ground-based and space-borne observations. Advances in Space Research, 2004, 34, 269-273.	2.6	7
24	Statistical study of the East-West asymmetry of sunspots. Proceedings of the International Astronomical Union, 2004, 2004, 285-286.	0.0	1
25	Effects of solar polarity reversals on geoeffective plasma streams. Journal of Geophysical Research, 2003, 108, .	3.3	5
26	Evolution of the source region of the interplanetary magnetic cloud of 18–20 Oct. 1995. Advances in Space Research, 2002, 29, 1489-1492.	2.6	2
27	Comparison of sunspot area data bases. Monthly Notices of the Royal Astronomical Society, 2001, 323, 223-230.	4.4	48
28	22 year solar modulation of Earth's northern hemisphere temperatures. Geophysical Research Letters, 1998, 25, 2269-2272.	4.0	11
29	Some Polarity Conditions in Corpuscular Events. Solar Physics, 1997, 173, 383-389.	2.5	3
30	Role of the solar main magnetic dipole field in the solar-tropospheric relations. Part I. Semiannual fluctuations in Europe. Annales Geophysicae, 1995, 13, 427-436.	1.6	4
31	Role of the solar main magnetic dipole field in the solar-tropospheric relations. Part II. Dependence on the types of solar sources. Annales Geophysicae, 1995, 13, 886-892.	1.6	3
32	Semiannual fluctuation depending on the polarity of the solar main magnetic dipole field. Journal of Geophysical Research, 1995, 100, 14801.	3.3	3
33	Distinction between the climatic effects of the solar corpuscular and electromagnetic radiation. Solar Physics, 1994, 152, 297-302.	2.5	3
34	Distinction between the Climatic Effects of the Solar Corpuscular and Electromagnetic Radiation. , 1994, , 297-302.		1
35	Detection Possibility of the Giant Rolls in the Sun. International Astronomical Union Colloquium, 1993, 137, 81-83.	0.1	0
36	Semiannual fluctuation and efficiency factors in Sunâ€weather relations. Journal of Geophysical Research, 1992, 97, 14923-14928.	3.3	4

#	Article	IF	CITATIONS
37	Study of possible subsurface influences on the emerging active regions. Solar Physics, 1992, 139, 247-254.	2.5	4
