|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | The Determining Effective Testing in Emergency Departments and Care Coordination on Treatment Outcomes (DETECT) for Hepatitis C (Hep C) Screening Trial: rationale and design of a multi-center pragmatic randomized clinical trial of hepatitis C screening in emergency departments. <i>Trials</i> , 2022, 23, 354. | 0.7 | 3         |
| 2  | Emergency Medicine Interest Groups. <i>Journal of Emergency Medicine</i> , 2021, 60, e13-e17.                                                                                                                                                                                                                         | 0.3 | 2         |
| 3  | <i>Mycoplasma genitalium</i> infection in women reporting dysuria: A pilot study and review of the literature. <i>International Journal of STD and AIDS</i> , 2021, 32, 1196-1203.                                                                                                                                    | 0.5 | 8         |
| 4  | Prevalence of Hepatitis C Virus Infection Identified From Nontargeted Screening Among Adult Visitors in an Academic Appalachian Regional Emergency Department. <i>Open Forum Infectious Diseases</i> , 2021, 8, ofab374.                                                                                              | 0.4 | 4         |
| 5  | Predictors of linkage to care for a nontargeted emergency department hepatitis C screening program. <i>American Journal of Emergency Medicine</i> , 2020, 38, 1396-1401.                                                                                                                                              | 0.7 | 27        |
| 6  | Sleep and stress before and after duty across residency years under 2017 ACGME hours. <i>American Journal of Surgery</i> , 2020, 220, 83-89.                                                                                                                                                                          | 0.9 | 4         |
| 7  | Human Papillomavirus Awareness, Vaccine Status, and Risk Factors in Female Emergency Patients. <i>Western Journal of Emergency Medicine</i> , 2020, 21, 203-208.                                                                                                                                                      | 0.6 | 2         |
| 8  | High Prevalence of Hepatitis C Infection Among Adult Patients at Four Urban Emergency Departments â€” Birmingham, Oakland, Baltimore, and Boston, 2015â€”2017. <i>Morbidity and Mortality Weekly Report</i> , 2020, 69, 569-574.                                                                                      | 9.0 | 20        |
| 9  | Author Response to Letter to the Editor Regarding â€œPotential Problems of Using Same Race Category for Native Hawaiians, Pacific Islanders, and Asiansâ€œ. <i>American Journal of Preventive Medicine</i> , 2019, 57, 290-291.                                                                                       | 1.6 | 1         |
| 10 | Attitudes and availability: A comparison of naloxone dispensing across chain and independent pharmacies in rural and urban areas in Alabama. <i>International Journal of Drug Policy</i> , 2019, 74, 229-235.                                                                                                         | 1.6 | 28        |
| 11 | Human Immunodeficiency Virus Risk Factors and Beliefs Reported by Families Presenting to a Pediatric Emergency Department. <i>Pediatric Emergency Care</i> , 2018, 34, 1-5.                                                                                                                                           | 0.5 | 4         |
| 12 | Racial and Geographic Disparities in Hepatocellular Carcinoma Outcomes. <i>American Journal of Preventive Medicine</i> , 2018, 55, S40-S48.                                                                                                                                                                           | 1.6 | 35        |
| 13 | Medical, psychosocial, and treatment predictors of opioid overdose among high risk opioid users. <i>Addictive Behaviors</i> , 2018, 86, 51-55.                                                                                                                                                                        | 1.7 | 21        |
| 14 | Continuum of Care for Hepatitis C Virus Among Patients Diagnosed in the Emergency Department Setting. <i>Clinical Infectious Diseases</i> , 2017, 64, 1540-1546.                                                                                                                                                      | 2.9 | 42        |
| 15 | Characterizing Failure to Establish Hepatitis C Care of Baby Boomers Diagnosed in the Emergency Department. <i>Open Forum Infectious Diseases</i> , 2016, 3, ofw211.                                                                                                                                                  | 0.4 | 25        |
| 16 | Evolution and Escalation of an Emergency Department Routine, Opt-out HIV Screening and Linkage-to-Care Program. <i>Public Health Reports</i> , 2016, 131, 96-106.                                                                                                                                                     | 1.3 | 23        |
| 17 | Emergency Department Screening for Hepatitis C Virus: Geographic Reach and Spatial Clustering in Central Alabama. <i>Clinical Infectious Diseases</i> , 2016, 62, 613-616.                                                                                                                                            | 2.9 | 6         |
| 18 | Hepatitis C Virus Screening: An Important Public Health Opportunity for United States Emergency Departments. <i>Annals of Emergency Medicine</i> , 2016, 67, 129-130.                                                                                                                                                 | 0.3 | 11        |

| #  | ARTICLE                                                                                                                                                                     | IF  | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Unrecognized chronic hepatitis C virus infection among baby boomers in the emergency department. <i>Hepatology</i> , 2015, 61, 776-782.                                     | 3.6 | 109       |
| 20 | Dysuria in the Emergency Department: Missed Diagnosis of <i>Chlamydia trachomatis</i> . <i>Western Journal of Emergency Medicine</i> , 2014, 15, 227-230.                   | 0.6 | 17        |
| 21 | National Estimates of Healthcare Utilization by Individuals With Hepatitis C Virus Infection in the United States. <i>Clinical Infectious Diseases</i> , 2014, 59, 755-764. | 2.9 | 64        |
