

Maya Opendak

List of Publications by Citations

Source: <https://exaly.com/author-pdf/9256717/maya-opendak-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
30	Adult neurogenesis: a substrate for experience-dependent change. <i>Trends in Cognitive Sciences</i> , 2015 , 19, 151-61	14	124
29	Early life adversity during the infant sensitive period for attachment: Programming of behavioral neurobiology of threat processing and social behavior. <i>Developmental Cognitive Neuroscience</i> , 2017 , 25, 145-159	5.5	44
28	Using a Developmental Ecology Framework to Align Fear Neurobiology Across Species. <i>Annual Review of Clinical Psychology</i> , 2019 , 15, 345-369	20.5	43
27	Lasting Adaptations in Social Behavior Produced by Social Disruption and Inhibition of Adult Neurogenesis. <i>Journal of Neuroscience</i> , 2016 , 36, 7027-38	6.6	35
26	Early life trauma increases threat response of peri-weaning rats, reduction of axo-somatic synapses formed by parvalbumin cells and perineuronal net in the basolateral nucleus of amygdala. <i>Journal of Comparative Neurology</i> , 2018 , 526, 2647-2664	3.4	27
25	During infant maltreatment, stress targets hippocampus, but stress with mother present targets amygdala and social behavior. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2019 , 116, 22821-22832	11.5	26
24	Neurobiology of maternal regulation of infant fear: the role of mesolimbic dopamine and its disruption by maltreatment. <i>Neuropsychopharmacology</i> , 2019 , 44, 1247-1257	8.7	24
23	Oxytocin neurons enable social transmission of maternal behaviour. <i>Nature</i> , 2021 , 596, 553-557	50.4	24
22	Social behavior, hormones and adult neurogenesis. <i>Frontiers in Neuroendocrinology</i> , 2016 , 41, 71-86	8.9	21
21	Sexual experience enhances cognitive flexibility and dendritic spine density in the medial prefrontal cortex. <i>Neurobiology of Learning and Memory</i> , 2015 , 125, 73-9	3.1	20
20	Immature Neurons and Radial Glia, But Not Astrocytes or Microglia, Are Altered in Adult Cntnap2 and Shank3 Mice, Models of Autism. <i>ENeuro</i> , 2016 , 3,	3.9	20
19	Infant Trauma Alters Social Buffering of Threat Learning: Emerging Role of Prefrontal Cortex in Preadolescence. <i>Frontiers in Behavioral Neuroscience</i> , 2019 , 13, 132	3.5	18
18	Unique neurobiology during the sensitive period for attachment produces distinctive infant trauma processing. <i>Högre Utbildning</i> , 2016 , 7, 31276	5	17
17	Adverse caregiving in infancy blunts neural processing of the mother. <i>Nature Communications</i> , 2020 , 11, 1119	17.4	16
16	Neurobiology of Infant Fear and Anxiety: Impacts of Delayed Amygdala Development and Attachment FigureQuality. <i>Biological Psychiatry</i> , 2021 , 89, 641-650	7.9	12
15	New neurons maintain efficient stress recovery. <i>Cell Stem Cell</i> , 2011 , 9, 287-8	18	11
14	The effects of living in an outdoor enclosure on hippocampal plasticity and anxiety-like behavior in response to nematode infection. <i>Hippocampus</i> , 2019 , 29, 366-377	3.5	11

13	Developmental transitions in amygdala PKC isoforms and AMPA receptor expression associated with threat memory in infant rats. <i>Scientific Reports</i> , 2018 , 8, 14679	4.9	11
12	Unique infant neurobiology produces distinctive trauma processing. <i>Developmental Cognitive Neuroscience</i> , 2019 , 36, 100637	5.5	10
11	Corticosterone administration targeting a hypo-reactive HPA axis rescues a socially-avoidant phenotype in scarcity-adversity reared rats. <i>Developmental Cognitive Neuroscience</i> , 2019 , 40, 100716	5.5	9
10	Early Life Trauma Has Lifelong Consequences for Sleep And Behavior. <i>Scientific Reports</i> , 2019 , 9, 16701	4.9	7
9	Developmental and neurobehavioral transitions in survival circuits. <i>Current Opinion in Behavioral Sciences</i> , 2018 , 24, 50-55	4	5
8	Development of Threat Expression Following Infant Maltreatment: Infant and Adult Enhancement but Adolescent Attenuation. <i>Frontiers in Behavioral Neuroscience</i> , 2019 , 13, 130	3.5	5
7	Defining Immediate Effects of Sensitive Periods on Infant Neurobehavioral Function. <i>Current Opinion in Behavioral Sciences</i> , 2020 , 36, 106-114	4	5
6	Bidirectional control of infant rat social behavior via dopaminergic innervation of the basolateral amygdala. <i>Neuron</i> , 2021 ,	13.9	4
5	Oxytocin Neurons Enable Social Transmission of Maternal Behavior		4
4	Elevated infant cortisol is necessary but not sufficient for transmission of environmental risk to infant social development: Cross-species evidence of mother-infant physiological social transmission. <i>Development and Psychopathology</i> , 2020 , 32, 1696-1714	4.3	3
3	Social Regulation of Negative Valence Systems During Development.. <i>Frontiers in Systems Neuroscience</i> , 2021 , 15, 828685	3.5	0
2	Infant Attachment and Social Modification of Stress Neurobiology. <i>Frontiers in Systems Neuroscience</i> , 2021 , 15, 718198	3.5	0
1	Cover Image, Volume 29, Issue 4. <i>Hippocampus</i> , 2019 , 29, C1-C1	3.5
