

Vijay Singh

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/9264213/vijay-singh-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

109

#	Paper	IF	Citations
109	Coprocessing Corn Germ Meal for Oil Recovery and Ethanol Production: A Process Model for Lipid-Producing Energy Crops. <i>Processes</i> , 2022 , 10, 661	2.9	1
108	Integrated Biorefinery for Valorization of Engineered Bioenergy Crops: A Review. <i>Industrial Biotechnology</i> , 2021 , 17, 271-282	1.3	0
107	Bioactive compounds, nutritional benefits and food applications of colored wheat: a comprehensive review. <i>Critical Reviews in Food Science and Nutrition</i> , 2021 , 61, 3197-3210	11.5	28
106	Technical and economic feasibility of an integrated ethanol and anthocyanin coproduction process using purple corn stover. <i>Biofuels, Bioproducts and Biorefining</i> , 2021 , 15, 719-735	5.3	0
105	Wet milling characteristics of export commodity corn originating from different international geographical locations. <i>Cereal Chemistry</i> , 2021 , 98, 794-801	2.4	
104	Biodiesel from oil produced in vegetative tissues of biomass - A review. <i>Bioresource Technology</i> , 2021 , 326, 124772	11	16
103	Development and validation of time-domain 1H-NMR relaxometry correlation for high-throughput phenotyping method for lipid contents of lignocellulosic feedstocks. <i>GCB Bioenergy</i> , 2021 , 13, 1179-1190	5.6	1
102	Characterization of Amylose Lipid Complexes and Their Effect on the Dry Grind Ethanol Process. <i>Starch/Staerke</i> , 2021 , 73, 2100069	2.3	
101	Response surface methodology guided adsorption and recovery of free fatty acids from oil using resin. <i>Biofuels, Bioproducts and Biorefining</i> , 2021 , 15, 1485-1495	5.3	
100	Conversion of High-Solids Hydrothermally Pretreated Bioenergy Sorghum to Lipids and Ethanol Using Yeast Cultures. <i>ACS Sustainable Chemistry and Engineering</i> , 2021 , 9, 8515-8525	8.3	3
99	Balancing sugar recovery and inhibitor generation during energycane processing: Coupling cryogenic grinding with hydrothermal pretreatment at low temperatures. <i>Bioresource Technology</i> , 2021 , 321, 124424	11	5
98	Techno-economic feasibility analysis of engineered energycane-based biorefinery co-producing biodiesel and ethanol. <i>GCB Bioenergy</i> , 2021 , 13, 1498-1514	5.6	4
97	A study of moisture dependent changes in engineering properties and debranning characteristics of purple wheat. <i>Journal of Food Processing and Preservation</i> , 2021 , 45, e15916	2.1	1
96	Developing an integrated technology-environment-economics model to simulate food-energy-water systems in Corn Belt watersheds. <i>Environmental Modelling and Software</i> , 2021 , 143, 105083	5.2	5
95	Invited review on maize in the 21st century: Emerging trends of maize biorefineries in the 21st century: scientific and technological advancements in biofuel and bio-sustainable market. <i>Journal of Cereal Science</i> , 2021 , 101, 103272	3.8	1
94	Process design and techno-economic analysis of 2'-fucosyllactose enriched distiller's dried grains with solubles production in dry grind ethanol process using genetically engineered <i>Saccharomyces cerevisiae</i> . <i>Bioresource Technology</i> , 2021 , 341, 125919	11	0
93	Hydrothermal pretreatment for valorization of genetically engineered bioenergy crop for lipid and cellulosic sugar recovery. <i>Bioresource Technology</i> , 2021 , 341, 125817	11	4

92	Global View of Biofuel Butanol and Economics of Its Production by Fermentation from Sweet Sorghum Bagasse, Food Waste, and Yellow Top Presscake: Application of Novel Technologies. <i>Fermentation</i> , 2020 , 6, 58	4.7	13
91	Recovering phosphorus as a coproduct from corn dry grind plants: A techno-economic evaluation. <i>Cereal Chemistry</i> , 2020 , 97, 449-458	2.4	3
90	Phosphorus fractionation and protein content control chemical phosphorus removal from corn biorefinery streams. <i>Journal of Environmental Quality</i> , 2020 , 49, 220-227	3.4	0
89	Towards oilcane: Engineering hyperaccumulation of triacylglycerol into sugarcane stems. <i>GCB Bioenergy</i> , 2020 , 12, 476-490	5.6	30
88	Bioconversion of Processing Waste from Agro-Food Industries to Bioethanol: Creating a Sustainable and Circular Economy 2020 , 161-181		6
87	Biodiesel production from engineered sugarcane lipids under uncertain feedstock compositions: Process design and techno-economic analysis. <i>Applied Energy</i> , 2020 , 280, 115933	10.7	15
86	Chemical Free Two-Step Hydrothermal Pretreatment to Improve Sugar Yields from Energy Cane. <i>Energies</i> , 2020 , 13, 5805	3.1	1
85	Improving technical and economic feasibility of water based anthocyanin recovery from purple corn using staged extraction approach. <i>Industrial Crops and Products</i> , 2020 , 158, 112976	5.9	10
84	Recoveries of Oil and Hydrolyzed Sugars from Corn Germ Meal by Hydrothermal Pretreatment: A Model Feedstock for Lipid-Producing Energy Crops. <i>Energies</i> , 2020 , 13, 6022	3.1	5
83	Enhancing ethanol yields in corn dry grind process by reducing glycerol production. <i>Cereal Chemistry</i> , 2020 , 97, 1026-1036	2.4	4
82	High solids loading biorefinery for the production of cellulosic sugars from bioenergy sorghum. <i>Bioresource Technology</i> , 2020 , 318, 124051	11	24
81	Production of xylose enriched hydrolysate from bioenergy sorghum and its conversion to β -carotene using an engineered <i>Saccharomyces cerevisiae</i> . <i>Bioresource Technology</i> , 2020 , 308, 123275	11	14
80	Economic Analysis of Cellulosic Ethanol Production from Sugarcane Bagasse Using a Sequential Deacetylation, Hot Water and Disk-Refining Pretreatment. <i>Processes</i> , 2019 , 7, 642	2.9	27
79	Sugar production from bioenergy sorghum by using pilot scale continuous hydrothermal pretreatment combined with disk refining. <i>Bioresource Technology</i> , 2019 , 289, 121663	11	27
78	Nutritional evaluation of 3 types of novel ethanol coproducts. <i>Poultry Science</i> , 2019 , 98, 2933-2939	3.9	1
77	Effect of sulfur dioxide and lactic acid in steeping water on the extraction of anthocyanins and bioactives from purple corn pericarp. <i>Cereal Chemistry</i> , 2019 , 96, 575-589	2.4	8
76	Improving ethanol yields with deacetylated and two-stage pretreated corn stover and sugarcane bagasse by blending commercial xylose-fermenting and wild type <i>Saccharomyces</i> yeast. <i>Bioresource Technology</i> , 2019 , 282, 103-109	11	34
75	Techno-economic feasibility of phosphorus recovery as a coproduct from corn wet milling plants. <i>Cereal Chemistry</i> , 2019 , 96, 380-390	2.4	6

74	Impact of Fractionation Process on the Technical and Economic Viability of Corn Dry Grind Ethanol Process. <i>Processes</i> , 2019 , 7, 578	2.9	8
73	Improving Fermentation Rate during Use of Corn Grits in Beverage Alcohol Production. <i>Beverages</i> , 2019 , 5, 5	3.4	2
72	Improving dry-fractionated corn fermentation by supplementation of corn germ meal and pasta mill feed from agro-food industries. <i>Cereal Chemistry</i> , 2019 , 96, 243-251	2.4	1
71	Bioprocessing and techno-economic feasibility analysis of simultaneous production of d-psicose and ethanol using engineered yeast strain KAM-2GD. <i>Bioresource Technology</i> , 2019 , 275, 27-34	11	11
70	Fermentation of undetoxified sugarcane bagasse hydrolyzates using a two stage hydrothermal and mechanical refining pretreatment. <i>Bioresource Technology</i> , 2018 , 261, 313-321	11	40
69	Techno-economic feasibility analysis of blue and purple corn processing for anthocyanin extraction and ethanol production using modified dry grind process. <i>Industrial Crops and Products</i> , 2018 , 115, 78-87	5.9	33
68	Fermentation technology to improve productivity in dry grind corn process for bioethanol production. <i>Fuel Processing Technology</i> , 2018 , 173, 66-74	7.2	15
67	Biorefinery for combined production of jet fuel and ethanol from lipid-producing sugarcane: a techno-economic evaluation. <i>GCB Bioenergy</i> , 2018 , 10, 92-107	5.6	30
66	Changes in Corn Protein Content During Storage and Their Relationship with Dry Grind Ethanol Production. <i>JAOCS, Journal of the American Oil ChemiststSociety</i> , 2018 , 95, 923-932	1.8	3
65	Comparison of Cassava Starch with Corn as a Feedstock for Bioethanol Production. <i>Energies</i> , 2018 , 11, 3476	3.1	19
64	Ethanol Production from Corn Fiber Separated after Liquefaction in the Dry Grind Process. <i>Energies</i> , 2018 , 11, 2921	3.1	11
63	Evaluation of the quantity and composition of sugars and lipid in the juice and bagasse of lipid producing sugarcane. <i>Biocatalysis and Agricultural Biotechnology</i> , 2017 , 10, 148-155	4.2	13
62	Impact of disk milling on corn stover pretreated at commercial scale. <i>Bioresource Technology</i> , 2017 , 232, 297-303	11	7
61	A comparative study of anthocyanin distribution in purple and blue corn coproducts from three conventional fractionation processes. <i>Food Chemistry</i> , 2017 , 231, 332-339	8.5	40
60	Germ soak water as nutrient source to improve fermentation of corn grits from modified corn dry grind process. <i>Bioresources and Bioprocessing</i> , 2017 , 4, 38	5.2	14
59	Promise of combined hydrothermal/chemical and mechanical refining for pretreatment of woody and herbaceous biomass. <i>Biotechnology for Biofuels</i> , 2016 , 9, 97	7.8	41
58	Use of Pigmented Maize in Both Conventional Dry-Grind and Modified Processes Using Granular Starch Hydrolyzing Enzyme. <i>Cereal Chemistry</i> , 2016 , 93, 344-351	2.4	8
57	Maize Proximate Composition and Physical Properties Correlations to Dry-Grind Ethanol Concentrations. <i>Cereal Chemistry</i> , 2016 , 93, 414-418	2.4	5

56	Technoeconomic Analysis of Biodiesel and Ethanol Production from Lipid-Producing Sugarcane and Sweet Sorghum. <i>Industrial Biotechnology</i> , 2016 , 12, 357-365	1.3	14
55	Coproduct yield comparisons of purple, blue and yellow dent corn for various milling processes. <i>Industrial Crops and Products</i> , 2016 , 87, 266-272	5.9	36
54	Techno-economic analysis of biodiesel and ethanol co-production from lipid-producing sugarcane. <i>Biofuels, Bioproducts and Biorefining</i> , 2016 , 10, 299-315	5.3	68
53	Improvement of sugar yields from corn stover using sequential hot water pretreatment and disk milling. <i>Bioresource Technology</i> , 2016 , 216, 706-13	11	57
52	Processing method and corn cultivar affected anthocyanin concentration from dried distillers grains with solubles. <i>Journal of Agricultural and Food Chemistry</i> , 2015 , 63, 3205-18	5.7	25
51	Ethanol production from food waste at high solids content with vacuum recovery technology. <i>Journal of Agricultural and Food Chemistry</i> , 2015 , 63, 2760-6	5.7	71
50	Butanol production from food waste: a novel process for producing sustainable energy and reducing environmental pollution. <i>Biotechnology for Biofuels</i> , 2015 , 8, 147	7.8	88
49	Improvement of Dry-Fractionation Ethanol Fermentation by Partial Germ Supplementation. <i>Cereal Chemistry</i> , 2015 , 92, 218-223	2.4	6
48	Seasonal variability in ethanol concentrations from a dry grind fermentation operation associated with incoming corn variability. <i>Industrial Crops and Products</i> , 2015 , 67, 155-160	5.9	15
47	Process integration for simultaneous saccharification, fermentation, and recovery (SSFR): production of butanol from corn stover using <i>Clostridium beijerinckii</i> P260. <i>Bioresource Technology</i> , 2014 , 154, 222-8	11	88
46	An economic evaluation of biological conversion of wheat straw to butanol: A biofuel. <i>Energy Conversion and Management</i> , 2013 , 65, 456-462	10.6	117
45	Effect of Wet and Dry Fractionation Methods on Ethanol Production from Hard and Soft Endosperm Corn Types. <i>Transactions of the ASABE</i> , 2011 , 54, 247-253	0.9	2
44	Germ-Derived FAN as Nitrogen Source for Corn Endosperm Fermentation. <i>Cereal Chemistry</i> , 2011 , 88, 328-332	2.4	5
43	Effect of resistant starch on hydrolysis and fermentation of corn starch for ethanol. <i>Applied Biochemistry and Biotechnology</i> , 2010 , 160, 800-11	3.2	25
42	Protease Treatment to Improve Ethanol Fermentation in Modified Dry Grind Corn Processes. <i>Cereal Chemistry</i> , 2009 , 86, 323-328	2.4	24
41	Engineering process and cost model for a conventional corn wet milling facility. <i>Industrial Crops and Products</i> , 2008 , 27, 91-97	5.9	64
40	Comparison Between Granular Starch Hydrolyzing Enzyme and Conventional Enzymes for Ethanol Production from Maize Starch with Different Amylose: Amylopectin Ratios. <i>Starch/Staerke</i> , 2007 , 59, 549-556	2.3	39
39	Comparison of Raw Starch Hydrolyzing Enzyme with Conventional Liquefaction and Saccharification Enzymes in Dry-Grind Corn Processing. <i>Cereal Chemistry</i> , 2007 , 84, 10-14	2.4	62

38	Evaluation and Strategies to Improve Fermentation Characteristics of Modified Dry-Grind Corn Processes. <i>Cereal Chemistry</i> , 2006 , 83, 455-459	2.4	40
37	Analysis of Heat Transfer Fouling by Dry-Grind Maize Thin Stillage Using an Annular Fouling Apparatus. <i>Cereal Chemistry</i> , 2006 , 83, 121-126	2.4	8
36	Effect of pH on Fouling Characteristics and Deposit Compositions in Dry-Grind Thin Stillage. <i>Cereal Chemistry</i> , 2006 , 83, 311-314	2.4	12
35	Improvement in fermentation characteristics of degermed ground corn by lipid supplementation. <i>Journal of Industrial Microbiology and Biotechnology</i> , 2006 , 33, 655-60	4.2	20
34	Effect of Steeping with Sulfite Salts and Adjunct Acids on Corn Wet-Milling Yields and Starch Properties. <i>Cereal Chemistry</i> , 2005 , 82, 420-424	2.4	12
33	Composition and economic comparison of germ fractions from modified corn processing technologies. <i>JAOCS, Journal of the American Oil ChemiststSociety</i> , 2005 , 82, 603-608	1.8	51
32	PARTICLE SIZE DISTRIBUTIONS OF GROUND CORN AND DDGS FROM DRY GRIND PROCESSING. <i>Transactions of the American Society of Agricultural Engineers</i> , 2005 , 48, 273-277		27
31	EFFECT OF CORN HYBRID VARIABILITY AND PLANTING LOCATION ON DRY GRIND ETHANOL PRODUCTION. <i>Transactions of the American Society of Agricultural Engineers</i> , 2005 , 48, 709-714		36
30	Enzymatic Milling Product Yield Comparison with Reduced Levels of Bromelain and Varying Levels of Sulfur Dioxide. <i>Cereal Chemistry</i> , 2005 , 82, 523-527	2.4	11
29	Comparison of Enzymatic (E-Mill) and Conventional Dry-Grind Corn Processes Using a Granular Starch Hydrolyzing Enzyme. <i>Cereal Chemistry</i> , 2005 , 82, 734-738	2.4	53
28	Enzymatic Milling of Corn: Optimization of Soaking, Grinding, and Enzyme Incubation Steps. <i>Cereal Chemistry</i> , 2004 , 81, 626-632	2.4	25
27	Fermentation of Quick Fiber Produced from a modified corn-milling process into ethanol and recovery of corn fiber oil. <i>Applied Biochemistry and Biotechnology</i> , 2004 , 115, 0937-0950	3.2	25
26	Pretreatment of Wet-Milled Corn Fiber to Improve Recovery of Corn Fiber Oil and Phytosterols. <i>Cereal Chemistry</i> , 2003 , 80, 118-122	2.4	17
25	Technique to Measure Surface-Fouling Tendencies of Steepwater from Corn Wet Milling. <i>Cereal Chemistry</i> , 2003 , 80, 84-86	2.4	12
24	Enrichment of Oil in Corn Fiber by Size Reduction and Floatation of Aleurone Cells. <i>Cereal Chemistry</i> , 2003 , 80, 123-125	2.4	6
23	Pressurized liquid extraction of polar and nonpolar lipids in corn and oats with hexane, methylene chloride, isopropanol, and ethanol. <i>JAOCS, Journal of the American Oil ChemiststSociety</i> , 2003 , 80, 1063-1067	1.8	110
22	Yield and Phytosterol Composition of Oil Extracted from Grain Sorghum and Its Wet-Milled Fractions. <i>Cereal Chemistry</i> , 2003 , 80, 126-129	2.4	40
21	Pasting Properties and Surface Characteristics of Starch Obtained from an Enzymatic Corn Wet-Milling Process. <i>Cereal Chemistry</i> , 2002 , 79, 523-527	2.4	11

20	Effect of Corn Milling Practices on Aleurone Layer Cells and Their Unique Phytosterols. <i>Cereal Chemistry</i> , 2001 , 78, 436-441	2.4	18
19	Diferuloylputrescine and p-coumaroyl-feruloylputrescine, abundant polyamine conjugates in lipid extracts of maize kernels. <i>Lipids</i> , 2001 , 36, 839-44	1.6	49
18	Effect of Harvest Moisture Content and Ambient Air Drying on Maize Fiber Oil Yield and its Phytosterol Composition. <i>Starch/Staerke</i> , 2001 , 53, 635-638	2.3	3
17	Use of Proteases to Reduce Steep Time and SO2 Requirements in a Corn Wet-Milling Process. <i>Cereal Chemistry</i> , 2001 , 78, 405-411	2.4	43
16	Comparison of oil and phytosterol levels in germplasm accessions of corn, teosinte, and Job's tears. <i>Journal of Agricultural and Food Chemistry</i> , 2001 , 49, 3793-5	5.7	35
15	Effect of Alternative Milling Techniques on the Yield and Composition of Corn Germ Oil and Corn Fiber Oil. <i>Cereal Chemistry</i> , 2001 , 78, 46-49	2.4	18
14	Quick Fiber Process: Effect of Mash Temperature, Dry Solids, and Residual Germ on Fiber Yield and Purity. <i>Cereal Chemistry</i> , 2000 , 77, 640-644	2.4	23
13	Hybrid Variability and Effect of Growth Location on Corn Fiber Yields and Corn Fiber Oil Composition. <i>Cereal Chemistry</i> , 2000 , 77, 692-695	2.4	14
12	Comparison of Coarse and Fine Corn Fiber for Corn Fiber Gum Yields and Sugar Profiles. <i>Cereal Chemistry</i> , 2000 , 77, 560-561	2.4	18
11	Effect of Various Acids and Sulfites in Steep Solution on Yields and Composition of Corn Fiber and Corn Fiber Oil. <i>Cereal Chemistry</i> , 2000 , 77, 665-668	2.4	8
10	Phytosterols in the aleurone layer of corn kernels. <i>Biochemical Society Transactions</i> , 2000 , 28, 803-806	5.1	41
9	Batch Steeping of Corn: Effects of Adding Lactic Acid and Sulfur Dioxide at Different Times on Starch Yields, Protein Contents, and Starch Pasting Properties. <i>Cereal Chemistry</i> , 1999 , 76, 600-605	2.4	9
8	Effect of Corn Oil on Thin Stillage Evaporators. <i>Cereal Chemistry</i> , 1999 , 76, 846-849	2.4	15
7	Recovery of Fiber in the Corn Dry-Grind Ethanol Process: A Feedstock for Valuable Coproducts. <i>Cereal Chemistry</i> , 1999 , 76, 868-872	2.4	58
6	Wet-Milling Characteristics of Selected Yellow Dent Corn Hybrids as Influenced by Storage Conditions. <i>Cereal Chemistry</i> , 1998 , 75, 235-240	2.4	8
5	Economics of Germ Preseparation for Dry-Grind Ethanol Facilities. <i>Cereal Chemistry</i> , 1997 , 74, 462-466	2.4	34
4	Hybrid-Dependent Effect of Lactic Acid on Corn Starch Yields. <i>Cereal Chemistry</i> , 1997 , 74, 249-253	2.4	17
3	Effect of Kernel Size, Location, and Type of Damage on Popping Characteristics of Popcorn. <i>Cereal Chemistry</i> , 1997 , 74, 672-675	2.4	9

2	Wet Milling Characteristics of Waxy Corn Hybrids Obtained from Different Planting Locations. <i>Starch/Staerke</i> , 1996 , 48, 335-337	2.3	6
1	Performance of glucoamylase self-producing eBOOST [®] GT yeast on ethanol production. <i>Cereal Chemistry</i> ,	2.4	1
