Ju-Hyeong Park

List of Publications by Year
in descending order

22 papers	533 citations	759233 12 h-index	677142 22 g-index
26 all docs	26 docs citations	26 times ranked	492 citing authors

#	Article	IF	Citations
1	Hydrophilic Fungi and Ergosterol Associated with Respiratory Illness in a Water-Damaged Building. Environmental Health Perspectives, 2008, 116, 45-50.	6.0	95
2	Fungal and endotoxin measurements in dust associated with respiratory symptoms in a water-damaged office building. Indoor Air, 2006, 16, 192-203.	4.3	87
3	Effects of air cleaners and school characteristics on classroom concentrations of particulate matter in 34 elementary schools in Korea. Building and Environment, 2020, 167, 106437.	6.9	49
4	Mold exposure and respiratory health in damp indoor environments. Frontiers in Bioscience - Elite, 2011, E3, 757-771.	1.8	44
5	Comparison of DNA extraction methodologies used for assessing fungal diversity via ITS sequencing. Journal of Environmental Monitoring, 2012, 14, 766.	2.1	34
6	Observational scores of dampness and mold associated with measurements of microbial agents and moisture in three public schools. Indoor Air, 2016, 26, 168-178.	4.3	27
7	Rhinosinusitis and mold as risk factors for asthma symptoms in occupants of a water-damaged building. Indoor Air, 2012, 22, 396-404.	4.3	26
8	Characterization of fungi in office dust: Comparing results of microbial secondary metabolites, fungal internal transcribed spacer region sequencing, viable culture and other microbial indices. Indoor Air, 2018, 28, 708-720.	4.3	20
9	Assessment of fungal diversity in a water-damaged office building. Journal of Occupational and Environmental Hygiene, 2017, 14, 285-293.	1.0	19
10	Lack of respiratory improvement following remediation of a waterâ€damaged office building. American Journal of Industrial Medicine, 2011, 54, 269-277.	2.1	17
11	Microbial rRNA sequencing analysis of evaporative cooler indoor environments located in the Great Basin Desert region of the United States. Environmental Sciences: Processes and Impacts, 2017, 19, 101-110.	3.5	16
12	Investigation of bacterial and fungal communities in indoor and outdoor air of elementary school classrooms by 16S rRNA gene and ITS region sequencing. Indoor Air, 2021, 31, 1553-1562.	4.3	16
13	Bacteria in a water-damaged building: associations of actinomycetes and non-tuberculous mycobacteria with respiratory health in occupants. Indoor Air, 2017, 27, 24-33.	4.3	13
14	Bacterial community assemblages in classroom floor dust of 50 public schools in a large city: characterization using 16S rRNA sequences and associations with environmental factors. Microbiome, 2021, 9, 15.	11.1	11
15	Changes in respiratory and non-respiratory symptoms in occupants of a large office building over a period of moisture damage remediation attempts. PLoS ONE, 2018, 13, e0191165.	2.5	11
16	Evaluation of Matrix Effects in Quantifying Microbial Secondary Metabolites in Indoor Dust Using Ultraperformance Liquid Chromatographâ€“Tandem Mass Spectrometer. Safety and Health at Work, 2019, 10, 196-204.	0.6	10
17	Levels of microbial agents in floor dust during remediation of a water-damaged office building. Indoor Air, 2011, 21, 417-426.	4.3	9
18	Open database for international and national indoor environmental quality guidelines. Indoor Air, 2022, 32, e13028.	4.3	9

#	Article	IF	Citations
19	Evaluation of individual-based and group-based exposure estimation of microbial agents in health effects associated with a damp building. Journal of Exposure Science and Environmental Epidemiology, 2013, 23, 409-415.	3.9	8
20	Measurement of macrocyclic trichothecene in floor dust of water-damaged buildings using gas chromatography/tandem mass spectrometryâ€"dust matrix effects. Journal of Occupational and Environmental Hygiene, 2016, 13, 442-450.	1.0	6
21	Pre-sampling contamination of filters used in measurements of airborne (1 â†' 3)-Î²-d-glucan based on glucan-specific Limulus amebocyte lysate assay. Journal of Environmental Monitoring, 2011, 13, 1082.	2.1	4
22	Effect of storage temperature and duration on concentrations of 27 fungal secondary metabolites spiked into floor dust from an office building. Journal of Occupational and Environmental Hygiene, 2020, 17, 220-230.	1.0	2
