#	ARTICLE	IF	CITATIONS
1	Revisiting dynamics and models of microsegregation during polycrystalline solidification of binary alloy. <i>Journal of Materials Science and Technology</i> , 2021, 74, 155-167.	5.6	11
2	Equiaxed dendritic growth in nearly isothermal conditions: A study combining in situ and real-time experiment with large-scale phase-field simulation. <i>Materials Today Communications</i> , 2021, 28, 102467.	0.9	3
3	Investigation of subgrains in directionally solidified cast mono-seeded silicon and their interactions with twin boundaries. <i>Solar Energy Materials and Solar Cells</i> , 2020, 218, 110817.	3.0	6
4	Combined growth of $\hat{\pm}$ -Al and Bi in a Al-Bi-Cu monotectic alloy analyzed by in situ X-ray radiography. <i>Journal of Crystal Growth</i> , 2020, 536, 125592.	0.7	4
5	Impact of solute flow during directional solidification of a Ni-based alloy: In-situ and real-time X-radiography. <i>Acta Materialia</i> , 2020, 194, 68-79.	3.8	45
6	Simultaneous X-ray radiography and diffraction topography imaging applied to silicon for defect analysis during melting and crystallization. <i>Journal of Applied Crystallography</i> , 2019, 52, 1312-1320.	1.9	10
7	Scaling laws governing the growth and interaction of equiaxed Al-Cu dendrites: A study combining experiments with phase-field simulations. <i>Materialia</i> , 2018, 1, 62-69.	1.3	22
8	On the impact of twinning on the formation of the grain structure of multi-crystalline silicon for photovoltaic applications during directional solidification. <i>Journal of Crystal Growth</i> , 2015, 418, 38-44.	0.7	29
9	Twinning occurrence and grain competition in multi-crystalline silicon during solidification. <i>Comptes Rendus Physique</i> , 2013, 14, 141-148.	0.3	30
10	On the interest of synchrotron X-ray imaging for the study of solidification in metallic alloys. <i>Comptes Rendus Physique</i> , 2012, 13, 237-245.	0.3	68
11	Measurement of Solute Profiles by Means of Synchrotron X-Ray Radiography during Directional Solidification of Al-4 wt% Cu Alloys. <i>Materials Science Forum</i> , 0, 649, 331-336.	0.3	37
