#	ARTICLE	IF	CITATIONS
1	Exposure to Parental Aggression and the Development of Psychopathology in Young Children: The Mediating Role of Early Dissociative Symptoms. <i>Journal of Interpersonal Violence</i> , 2022, 37, NP6988-NP7013.	1.3	3
2	Early executive and school functioning: Protective roles of home environment by income. <i>Journal of Applied Developmental Psychology</i> , 2022, 78, 101369.	0.8	1
3	Integrating dynamic and developmental time scales: Emotion-specific autonomic coordination predicts baseline functioning over time. <i>International Journal of Psychophysiology</i> , 2022, 171, 29-37.	0.5	2
4	<scp>Fatherâ€child</scp> physiological concordance on two timescales is differentially associated with paternal characteristics. <i>Psychophysiology</i> , 2022, , e14073.	1.2	1
5	An eventâ€based analysis of maternal physiological reactivity following aversive child behaviors. <i>Psychophysiology</i> , 2022, 59, e14093.	1.2	4
6	A dynamic systems account of parental selfâ€regulation processes in the context of challenging child behavior. <i>Child Development</i> , 2022, 93, .	1.7	8
7	Decision-making in uncertain contexts: The role of autonomic markers in resolving indecision. <i>International Journal of Psychophysiology</i> , 2022, 177, 220-229.	0.5	4
8	Proximity to sources of airborne lead is associated with reductions in Children's executive function in the first four years of life. <i>Health and Place</i> , 2021, 68, 102517.	1.5	10
9	Concordance of mother-child respiratory sinus arrhythmia is continually moderated by dynamic changes in emotional content of film stimuli. <i>Biological Psychology</i> , 2021, 161, 108053.	1.1	13
10	The developmental cascade of early parenting, emergence of executive functioning, and emotional symptoms across childhood. <i>Infant Mental Health Journal</i> , 2021, 42, 331-345.	0.7	1
11	Capturing emotion coherence in daily life: Using ambulatory physiology measures and ecological momentary assessments to examine within-person associations and individual differences. <i>Biological Psychology</i> , 2021, 162, 108074.	1.1	10
12	The reliability of visual ERP components in children across the first year of school. <i>Developmental Psychobiology</i> , 2021, 63, e22150.	0.9	2
13	Association between EEG asymmetry and the error-related negativity across middle childhood. <i>Biological Psychology</i> , 2021, 163, 108137.	1.1	0
14	Association Between Dynamic Parasympathetic Reactivity to Frustration and Childrenâ€™s Social Success with Peers in Kindergarten. <i>Research on Child and Adolescent Psychopathology</i> , 2021, 49, 1537-1549.	1.4	1
15	A biopsychosocial approach to emotion-related parenting: Physiological responses to child frustration among urban Chinese parents.. <i>Journal of Family Psychology</i> , 2021, 35, 639-648.	1.0	3
16	Developmental changes in external and internal performance monitoring across middle childhood: An ERP study. <i>International Journal of Psychophysiology</i> , 2021, 169, 20-33.	0.5	1
17	When you go low, I go high: Negative coordination of physiological synchrony among parents and children. <i>Developmental Psychobiology</i> , 2020, 62, 310-323.	0.9	31
18	Association between environmental tobacco smoke exposure across the first four years of life and manifestation of externalizing behavior problems in schoolâ€aged children. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2020, 61, 1243-1252.	3.1	15

#	ARTICLE	IF	CITATIONS
19	Neurophysiological evidence for distinct biases in emotional face processing associated with internalizing and externalizing symptoms in children. <i>Biological Psychology</i> , 2020, 150, 107829.	1.1	8
20	A registered report format for <i>Psychophysiology</i>. <i>Psychophysiology</i> , 2020, 57, .	1.2	6
21	SPR statement on racial justice. <i>Psychophysiology</i> , 2020, 57, e13634.	1.2	0
22	Cortical and affective regulation of autonomic coordination. <i>Psychophysiology</i> , 2020, 57, e13544.	1.2	10
23	Predictors of Developmental Patterns of Obesity in Young Children. <i>Frontiers in Pediatrics</i> , 2020, 8, 109.	0.9	7
24	Conducting Event-Related Potential (ERP) Research With Young Children. <i>Journal of Psychophysiology</i> , 2020, 34, 137-158.	0.3	37
25	Parental support of self-regulation among children at risk for externalizing symptoms: Developmental trajectories of physiological regulation and behavioral adjustment.. <i>Developmental Psychology</i> , 2020, 56, 528-540.	1.2	20
26	Physiological Regulation among Caregivers and their Children: Relations with Trauma History, Symptoms, and Parenting Behavior. <i>Journal of Child and Family Studies</i> , 2019, 28, 3098-3109.	0.7	5
27	Magnitude and Chronicity of Environmental Smoke Exposure Across Infancy and Early Childhood in a Sample of Low-Income Children. <i>Nicotine and Tobacco Research</i> , 2019, 21, 1665-1672.	1.4	15
28	The association between perinatal hypoxia exposure and externalizing symptoms and childrenâ€™s decision making in conditions of uncertainty is moderated by DRD2 genotype. <i>Developmental Psychobiology</i> , 2019, 61, 56-68.	0.9	0
29	Children's Sensitivity to Cost and Reward in Decision Making across Distinct Domains of Probability, Effort, and Delay. <i>Journal of Behavioral Decision Making</i> , 2018, 31, 12-24.	1.0	11
30	Differential Effects of Family Stress Exposure and Harsh Parental Discipline on Child Social Competence. <i>Journal of Child and Family Studies</i> , 2018, 27, 483-493.	0.7	11
31	Developmental dynamics of autonomic function in childhood. <i>Psychophysiology</i> , 2018, 55, e13218.	1.2	40
32	Quantifying respiratory sinus arrhythmia: Effects of misspecifying breathing frequencies across development. <i>Development and Psychopathology</i> , 2018, 30, 351-366.	1.4	116
33	Resting sympathetic arousal moderates the association between parasympathetic reactivity and working memory performance in adults reporting high levels of life stress. <i>Psychophysiology</i> , 2017, 54, 1195-1208.	1.2	31
34	Unsealing Fate: Policy Practices Aimed at Reducing the Intergenerational Transmission of Poverty. <i>Policy Insights From the Behavioral and Brain Sciences</i> , 2017, 4, 115-122.	1.4	1
35	The dynamics of internalizing and externalizing comorbidity across the early school years. <i>Development and Psychopathology</i> , 2016, 28, 1033-1052.	1.4	159
36	Research and Policy on Disability. <i>Policy Insights From the Behavioral and Brain Sciences</i> , 2016, 3, 138-145.	1.4	11

#	ARTICLE	IF	CITATIONS
37	Diversity and representation: Key issues for psychophysiological science. <i>Psychophysiology</i> , 2016, 53, 3-13.	1.2	66
38	Emotional Reactivity, Behavior Problems, and Social Adjustment at School Entry in a High-risk Sample. <i>Journal of Abnormal Child Psychology</i> , 2016, 44, 1527-1541.	3.5	39
39	Electrodermal responding predicts responses to, and may be altered by, preschool intervention for ADHD.. <i>Journal of Consulting and Clinical Psychology</i> , 2015, 83, 293-303.	1.6	42
40	Relevance of a neurophysiological marker of attention allocation for children's learning-related behaviors and academic performance.. <i>Developmental Psychology</i> , 2015, 51, 1148-1162.	1.2	24
41	Estimating time-varying RSA to examine psychophysiological linkage of marital dyads. <i>Psychophysiology</i> , 2015, 52, 1059-1065.	1.2	79
42	Children's Parasympathetic Reactivity to Specific Emotions Moderates Response to Intervention for Early-Onset Aggression. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2015, 44, 291-304.	2.2	48
43	Implications of ongoing neural development for the measurement of the error-related negativity in childhood. <i>Developmental Science</i> , 2015, 18, 452-468.	1.3	44
44	How does reactivity to frustrative non-reward increase risk for externalizing symptoms?. <i>International Journal of Psychophysiology</i> , 2015, 98, 300-309.	0.5	32
45	Early adversity, RSA, and inhibitory control: Evidence of children's neurobiological sensitivity to social context. <i>Developmental Psychobiology</i> , 2014, 56, 964-978.	0.9	92
46	The role of resting frontal EEG asymmetry in psychopathology: Afferent or efferent filter?. <i>Developmental Psychobiology</i> , 2014, 56, 73-85.	0.9	50
47	EEG asymmetry in borderline personality disorder and depression following rejection.. <i>Personality Disorders: Theory, Research, and Treatment</i> , 2014, 5, 178-185.	1.0	81
48	Associations between respiratory sinus arrhythmia reactivity and internalizing and externalizing symptoms are emotion specific. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2013, 13, 238-251.	1.0	91
49	Sympathetic- and parasympathetic-linked cardiac function and prediction of externalizing behavior, emotion regulation, and prosocial behavior among preschoolers treated for ADHD.. <i>Journal of Consulting and Clinical Psychology</i> , 2013, 81, 481-493.	1.6	131
50	Social and Biological Changes During Adolescence That Precipitate the Onset of Antisocial Behavior. , 2013, , 447-461.		2
51	Neuroanatomical Correlates of Heterotypic Comorbidity in Externalizing Male Adolescents. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2012, 41, 346-352.	2.2	32
52	Instantiating the multiple levels of analysis perspective in a program of study on externalizing behavior. <i>Development and Psychopathology</i> , 2012, 24, 1003-1018.	1.4	101
53	Aggression as an equifinal outcome of distinct neurocognitive and neuroaffective processes. <i>Development and Psychopathology</i> , 2012, 24, 985-1002.	1.4	30
54	The canary in the coalmine: The sensitivity of mesolimbic dopamine to environmental adversity during development. <i>Neuroscience and Biobehavioral Reviews</i> , 2011, 35, 794-803.	2.9	103

#	ARTICLE	IF	CITATIONS
55	Preschool Children's Cardiac Reactivity Moderates Relations Between Exposure to Family Violence and Emotional Adjustment. <i>Child Maltreatment</i> , 2011, 16, 205-215.	2.0	25
56	Mapping cardiac physiology and parenting processes in maltreating mother-child dyads. <i>Journal of Family Psychology</i> , 2011, 25, 663-674.	1.0	58
57	Disrupted Effective Connectivity Between the Medial Frontal Cortex and the Caudate in Adolescent Boys With Externalizing Behavior Disorders. <i>Criminal Justice and Behavior</i> , 2009, 36, 1141-1157.	1.1	54
58	Multifinality in the development of personality disorders: A Biology – Sex – Environment interaction model of antisocial and borderline traits. <i>Development and Psychopathology</i> , 2009, 21, 735-770.	1.4	218
59	Correspondence between physiological and self-report measures of emotion dysregulation: A longitudinal investigation of youth with and without psychopathology. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2009, 50, 1357-1364.	3.1	183
60	Neurological correlates of reward responding in adolescents with and without externalizing behavior disorders. <i>Journal of Abnormal Psychology</i> , 2009, 118, 203-213.	2.0	119
61	Ten good reasons to consider biological processes in prevention and intervention research. <i>Development and Psychopathology</i> , 2008, 20, 745-774.	1.4	198
62	Familial and temperamental predictors of resilience in children at risk for conduct disorder and depression. <i>Development and Psychopathology</i> , 2007, 19, 701-727.	1.4	123
63	Polyvagal Theory and developmental psychopathology: Emotion dysregulation and conduct problems from preschool to adolescence. <i>Biological Psychology</i> , 2007, 74, 174-184.	1.1	601
64	Patterns of Psychopathology in the Families of Children with Conduct Problems, Depression, and both Psychiatric Conditions. <i>Journal of Abnormal Child Psychology</i> , 2007, 35, 301-312.	3.5	42
65	Direct and Passive Prenatal Nicotine Exposure and the Development of Externalizing Psychopathology. <i>Child Psychiatry and Human Development</i> , 2007, 38, 255-269.	1.1	96
66	Autonomic correlates of attention-deficit/hyperactivity disorder and oppositional defiant disorder in preschool children. <i>Journal of Abnormal Psychology</i> , 2006, 115, 174-178.	2.0	188
67	The reactive-proactive aggression questionnaire: differential correlates of reactive and proactive aggression in adolescent boys. <i>Aggressive Behavior</i> , 2006, 32, 159-171.	1.5	1,232
68	Serious delinquent behavior, sensation seeking, and electrodermal arousal. <i>Journal of Abnormal Child Psychology</i> , 2002, 30, 477-486.	3.5	90
69	Temporal Lobe Deficits in Murderers. <i>Journal of Neuropsychiatry and Clinical Neurosciences</i> , 2001, 13, 486-491.	0.9	27
