| #  | Article                                                                                                                                                                 | IF  | CITATIONS |
|----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Artificial compressibility method for strongly anisothermal low Mach number flows. Physical Review E, 2021, 103, 013314.                                                | 2.1 | 2         |
| 2  | Analysis of artificial pressure equations in numerical simulations of a turbulent channel flow. Journal of Computational Physics, 2020, 411, 109407.                    | 3.8 | 14        |
| 3  | A priori tests of subgrid-scale models in an anisothermal turbulent channel flow at low mach number. International Journal of Thermal Sciences, 2019, 145, 105999.      | 4.9 | 12        |
| 4  | Study of the large-eddy simulation subgrid terms of a low Mach number anisothermal channel flow. International Journal of Thermal Sciences, 2019, 135, 221-234.         | 4.9 | 10        |
| 5  | Turbulence kinetic energy exchanges in flows with highly variable fluid properties. Journal of Fluid Mechanics, 2018, 834, 5-54.                                        | 3.4 | 28        |
| 6  | Spectral analysis of turbulence in anisothermal channel flows. Computers and Fluids, 2017, 151, 115-131.                                                                | 2.5 | 30        |
| 7  | Energy transfer process of anisothermal wall-bounded flows. Physics Letters, Section A: General, Atomic and Solid State Physics, 2015, 379, 1520-1526.                  | 2.1 | 21        |
| 8  | Turbulence statistics in a fully developed channel flow submitted to a high temperature gradient. International Journal of Thermal Sciences, 2013, 74, 104-118.         | 4.9 | 40        |
| 9  | Thermal Large Eddy Simulation in a Very Simplified Geometry of a Solar Receiver. Heat Transfer Engineering, 2012, 33, 505-524.                                          | 1.9 | 36        |
| 10 | High-temperature gradient effect on a turbulent channel flow using thermal large-eddy simulation in physical and spectral spaces. Journal of Turbulence, 2012, 13, N49. | 1.4 | 21        |
