| #  | ARTICLE                                                                                                                                                                                                                                                               | IF  | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | A Newly Isolated Reovirus Has the Simplest Genomic and Structural Organization of Any Reovirus. <i>Journal of Virology</i> , 2015, 89, 676-687.                                                                                                                       | 3.4 | 50        |
| 2  | Seasonal shifts of biodiversity patterns and species' elevation ranges of butterflies and moths along a complete rainforest elevational gradient on Mount Cameroon. <i>Journal of Biogeography</i> , 2020, 47, 342-354.                                               | 3.0 | 49        |
| 3  | Determination of the predictive factors of long-lasting insecticide-treated net ownership and utilisation in the Bamenda Health District of Cameroon. <i>BMC Public Health</i> , 2017, 17, 263.                                                                       | 2.9 | 31        |
| 4  | Flying between raindrops: Strong seasonal turnover of several Lepidoptera groups in lowland rainforests of Mount Cameroon. <i>Ecology and Evolution</i> , 2018, 8, 12761-12772.                                                                                       | 1.9 | 29        |
| 5  | Assessment of the usage and effectiveness of intermittent preventive treatment and insecticide-treated nets on the indicators of malaria among pregnant women attending antenatal care in the Buea Health District, Cameroon. <i>Malaria Journal</i> , 2016, 15, 172. | 2.3 | 28        |
| 6  | Physical integrity and residual bio-efficacy of used LLINs in three cities of the South-West region of Cameroon 4 years after the first national mass-distribution campaign. <i>Malaria Journal</i> , 2017, 16, 31.                                                   | 2.3 | 19        |
| 7  | Distribution modeling and lineage diversity of the chytrid fungus <i>Batrachochytrium dendrobatidis</i> (Bd) in a central African amphibian hotspot. <i>PLoS ONE</i> , 2018, 13, e0199288.                                                                            | 2.5 | 19        |
| 8  | The role of ultraviolet reflectance and pattern in the pollination system of <i>Hypoxis camerooniana</i> (Hypoxidaceae). <i>AoB PLANTS</i> , 2019, 11, plz057.                                                                                                        | 2.3 | 17        |
| 9  | Communities of flower visitors of <i>Uvariopsis dioica</i> (Annonaceae) in lowland forests of Mt. Cameroon, with notes on its potential pollinators. <i>African Journal of Ecology</i> , 2018, 56, 146-152.                                                           | 0.9 | 16        |
| 10 | The Effect of Long Lasting Insecticide Bed Net Use on Malaria Prevalence in the Tombel Health District, South West Region-Cameroon. <i>Malaria Research and Treatment</i> , 2016, 2016, 1-6.                                                                          | 2.0 | 14        |
| 11 | Precipitation and vegetation shape patterns of genomic and craniometric variation in the central African rodent <i>Praomys misonnei</i> . <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2020, 287, 20200449.                                       | 2.6 | 13        |
| 12 | Changes in pollinator community of <i>Scadoxus cinnabarinus</i> (Amaryllidaceae) along its elevational range on Mount Cameroon. <i>Arthropod-Plant Interactions</i> , 2020, 14, 215-226.                                                                              | 1.1 | 11        |
| 13 | Insecticide susceptibility status of <i>Anopheles gambiae</i> (s.l.) in South-West Cameroon four years after long-lasting insecticidal net mass distribution. <i>Parasites and Vectors</i> , 2018, 11, 391.                                                           | 2.5 | 10        |
| 14 | Evolutionary history of the Cameroon radiation of puddle frogs (Phrynobatrachidae: <i>Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 227 Td</i> (Phrynobatrachidae) Cameroon Volcanic Line. <i>PeerJ</i> , 2020, 8, e8393.                                                      | 2.0 | 9         |
| 15 | Effects of disturbances by forest elephants on diversity of trees and insects in tropical rainforests on Mount Cameroon. <i>Scientific Reports</i> , 2020, 10, 21618.                                                                                                 | 3.3 | 8         |
| 16 | Gene flow in phylogenomics: Sequence capture resolves species limits and biogeography of Afromontane forest endemic frogs from the Cameroon Highlands. <i>Molecular Phylogenetics and Evolution</i> , 2021, 163, 107258.                                              | 2.7 | 8         |
| 17 | Chytrid Pathogen ( <i>Batrachochytrium dendrobatidis</i> ) in African Amphibians: A Continental Analysis of Occurrences and Modeling of Its Potential Distribution. <i>Herpetologica</i> , 2020, 76, 201.                                                             | 0.4 | 8         |
| 18 | Elevational and Possible Bushmeat Exploitation Effects on Dung Beetle (Scarabaeidae: Scarabaeinae) Communities on Mount Cameroon, West Central Africa. <i>Environmental Entomology</i> , 2018, 47, 1072-1082.                                                         | 1.4 | 5         |

| #  | ARTICLE                                                                                                                                                                                                  | IF  | CITATIONS |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | First records of 31 species of butterflies and moths (Lepidoptera) in Cameroon, with remarks on their elevational ranges. <i>Biodiversity Data Journal</i> , 2020, 8, e50543.                            | 0.8 | 4         |
| 20 | Recognition of a new generic-level swallow taxon from central Africa. <i>Journal of Avian Biology</i> , 2018, 49, e01698.                                                                                | 1.2 | 2         |
| 21 | Conserving the forgotten: New insights from a Central African biodiversity hotspot on the anthropogenic perception of nocturnal primates (Mammalia: Strepsirrhini). <i>Primates</i> , 2021, 62, 537-546. | 1.1 | 2         |
| 22 | Altitudinal and Seasonal Variation in the Structure of Nocturnal Primate Assemblages on Mount Cameroon. <i>International Journal of Primatology</i> , 2020, 41, 714-731.                                 | 1.9 | 1         |
