

Krzysztof Chmiel

List of Publications by Citations

Source: <https://exaly.com/author-pdf/9351284/krzysztof-chmiel-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
23	Co-Stabilization of Amorphous Pharmaceuticals-The Case of Nifedipine and Nimodipine. <i>Molecular Pharmaceutics</i> , 2018 , 15, 2455-2465	5.6	31
22	Planetary ball milling and supercritical fluid technology as a way to enhance dissolution of bicalutamide. <i>International Journal of Pharmaceutics</i> , 2017 , 533, 470-479	6.5	29
21	A New Method To Identify Physically Stable Concentration of Amorphous Solid Dispersions (I): Case of Flutamide + Kollidon VA64. <i>Molecular Pharmaceutics</i> , 2017 , 14, 3370-3380	5.6	29
20	Broadband dielectric spectroscopy as an experimental alternative to calorimetric determination of the solubility of drugs into polymer matrix: Case of flutamide and various polymeric matrixes. <i>European Journal of Pharmaceutics and Biopharmaceutics</i> , 2019 , 136, 231-239	5.7	16
19	Influence of Polymeric Additive on the Physical Stability and Viscoelastic Properties of Aripiprazole. <i>Molecular Pharmaceutics</i> , 2019 , 16, 1742-1750	5.6	13
18	Enhanced dissolution of solid dispersions containing bicalutamide subjected to mechanical stress. <i>International Journal of Pharmaceutics</i> , 2018 , 542, 18-26	6.5	13
17	Can Storage Time Improve the Physical Stability of Amorphous Pharmaceuticals with Tautomerization Ability Exposed to Compression? The Case of a Chloramphenicol Drug. <i>Molecular Pharmaceutics</i> , 2018 , 15, 1928-1940	5.6	13
16	How can we improve the physical stability of co-amorphous system containing flutamide and bicalutamide? The case of ternary amorphous solid dispersions. <i>European Journal of Pharmaceutical Sciences</i> , 2019 , 136, 104947	5.1	12
15	The Self-Assembly Phenomenon of Poloxamers and Its Effect on the Dissolution of a Poorly Soluble Drug from Solid Dispersions Obtained by Solvent Methods. <i>Pharmaceutics</i> , 2019 , 11,	6.4	12
14	Physical Stability and Viscoelastic Properties of Co-Amorphous Ezetimibe/Simvastatin System. <i>Pharmaceutics</i> , 2019 , 12,	5.2	10
13	Peculiar relaxation dynamics of propylene carbonate derivatives. <i>Journal of Chemical Physics</i> , 2019 , 150, 044504	3.9	9
12	How does the high pressure affects the solubility of the drug within the polymer matrix in solid dispersion systems. <i>European Journal of Pharmaceutics and Biopharmaceutics</i> , 2019 , 143, 8-17	5.7	9
11	Glass Transition Dynamics and Physical Stability of Amorphous Griseofulvin in Binary Mixtures with Low- Excipients. <i>Molecular Pharmaceutics</i> , 2019 , 16, 3626-3635	5.6	9
10	Compression-Induced Phase Transitions of Bicalutamide. <i>Pharmaceutics</i> , 2020 , 12,	6.4	8
9	Importance of Mesoporous Silica Particle Size in the Stabilization of Amorphous Pharmaceuticals-The Case of Simvastatin. <i>Pharmaceutics</i> , 2020 , 12,	6.4	7
8	Molecular dynamics, viscoelastic properties and physical stability studies of a new amorphous dihydropyridine derivative with T-type calcium channel blocking activity. <i>European Journal of Pharmaceutical Sciences</i> , 2020 , 141, 105083	5.1	6
7	Ternary Eutectic Ezetimibe-Simvastatin-Fenofibrate System and the Physical Stability of Its Amorphous Form. <i>Molecular Pharmaceutics</i> , 2021 , 18, 3588-3600	5.6	5

6	Enhancement of the Physical Stability of Amorphous Sildenafil in a Binary Mixture, with either a Plasticizing or Antiplasticizing Compound. <i>Pharmaceutics</i> , 2020 , 12,	6.4	4
5	Molecular Dynamics and Physical Stability of Ibuprofen in Binary Mixtures with an Acetylated Derivative of Maltose. <i>Molecular Pharmaceutics</i> , 2020 , 17, 3087-3105	5.6	2
4	Isochronal Conditions-The Key To Maintain the Given Solubility Limit, of a Small Molecule within the Polymer Matrix, at Elevated Pressure. <i>Molecular Pharmaceutics</i> , 2020 , 17, 3730-3739	5.6	2
3	High-Pressure Dielectric Studies-a Way to Experimentally Determine the Solubility of a Drug in the Polymer Matrix at Low Temperatures. <i>Molecular Pharmaceutics</i> , 2021 , 18, 3050-3062	5.6	2
2	Studies on the Vitrified and Cryomilled Bosentan. <i>Molecular Pharmaceutics</i> , 2021 ,	5.6	1
1	Crystallization of Amorphous Pharmaceuticals at Ambient and Elevated Pressure Conditions. <i>Advances in Dielectrics</i> , 2020 , 55-87	0.6	1
