|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Prediction of chronic thromboembolic pulmonary hypertension with standardised evaluation of initial computed tomography pulmonary angiography performed for suspected acute pulmonary embolism. <i>European Radiology</i> , 2022, 32, 2178-2187.                                     | 2.3 | 18        |
| 2  | Determinants and Management of the Post-PE Pulmonary Embolism Syndrome. <i>Seminars in Respiratory and Critical Care Medicine</i> , 2021, 42, 299-307.                                                                                                                               | 0.8 | 22        |
| 3  | Construct validity of the Post-COVID-19 Functional Status Scale in adult subjects with COVID-19. <i>Health and Quality of Life Outcomes</i> , 2021, 19, 40.                                                                                                                          | 1.0 | 79        |
| 4  | Non-invasive early exclusion of chronic thromboembolic pulmonary hypertension after acute pulmonary embolism: the InShape II study. <i>Thorax</i> , 2021, 76, 1002-1009.                                                                                                             | 2.7 | 41        |
| 5  | Computed tomography pulmonary perfusion imaging and 3-months clinical outcomes after acute pulmonary embolism. <i>Thrombosis Research</i> , 2021, 199, 32-34.                                                                                                                        | 0.8 | 3         |
| 6  | Evolution of CT findings after anticoagulant treatment for acute pulmonary embolism in patients with and without an ultimate diagnosis of chronic thromboembolic pulmonary hypertension. <i>European Respiratory Journal</i> , 2021, 58, 2100699.                                    | 3.1 | 16        |
| 7  | Identification of chronic thromboembolic pulmonary hypertension on CTPAs performed for diagnosing acute pulmonary embolism depending on level of expertise. <i>European Journal of Internal Medicine</i> , 2021, 93, 64-70.                                                          | 1.0 | 15        |
| 8  | A model for estimating the health economic impact of earlier diagnosis of chronic thromboembolic pulmonary hypertension. <i>ERJ Open Research</i> , 2021, 7, 00719-2020.                                                                                                             | 1.1 | 14        |
| 9  | Efficacy and safety of a 12-week outpatient pulmonary rehabilitation program in Post-PE Syndrome. <i>Thrombosis Research</i> , 2021, 206, 66-75.                                                                                                                                     | 0.8 | 24        |
| 10 | Why, Whom, and How to Screen for Chronic Thromboembolic Pulmonary Hypertension after Acute Pulmonary Embolism. <i>Seminars in Thrombosis and Hemostasis</i> , 2021, 47, 692-701.                                                                                                     | 1.5 | 10        |
| 11 | Essential aspects of the follow-up after acute pulmonary embolism: An illustrated review. <i>Research and Practice in Thrombosis and Haemostasis</i> , 2020, 4, 958-968.                                                                                                             | 1.0 | 33        |
| 12 | The Post-COVID-19 Functional Status scale: a tool to measure functional status over time after COVID-19. <i>European Respiratory Journal</i> , 2020, 56, 2001494.                                                                                                                    | 3.1 | 368       |
| 13 | Quality of initial anticoagulant treatment and risk of CTEPH after acute pulmonary embolism. <i>PLoS ONE</i> , 2020, 15, e0232354.                                                                                                                                                   | 1.1 | 9         |
| 14 | Measuring functional limitations after venous thromboembolism: Optimization of the Post-VTE Functional Status (PVFS) Scale. <i>Thrombosis Research</i> , 2020, 190, 45-51.                                                                                                           | 0.8 | 44        |
| 15 | Differential effect of anticoagulant treatment on vascular morphology in patients with acute pulmonary embolism. <i>European Heart Journal</i> , 2020, 41, .                                                                                                                         | 1.0 | 0         |
| 16 | Accurate and efficient non-invasive strategy for early identification of chronic thromboembolic pulmonary hypertension after acute pulmonary embolism (InShape II study). <i>European Heart Journal</i> , 2020, 41, .                                                                | 1.0 | 0         |
| 17 | Usefulness of standard computed tomography pulmonary angiography performed for acute pulmonary embolism for identification of chronic thromboembolic pulmonary hypertension: results of the InShape III study. <i>Journal of Heart and Lung Transplantation</i> , 2019, 38, 731-738. | 0.3 | 54        |
| 18 | Linking Convolutional Neural Networks with Graph Convolutional Networks: Application in Pulmonary Artery-Vein Separation. <i>Lecture Notes in Computer Science</i> , 2019, , 36-43.                                                                                                  | 1.0 | 19        |

| #  | ARTICLE                                                                                                                  | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Management and treatment of deep vein thrombosis in special populations. Expert Review of Hematology, 2018, 11, 685-695. | 1.0 | 20        |
