

Nuria De Diego

List of Publications by Citations

Source: <https://exaly.com/author-pdf/9354717/nuria-de-diego-publications-by-citations.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
44	Phytohormones and polyamines regulate plant stress responses by altering GABA pathway. <i>New Biotechnology</i> , 2019 , 48, 53-65	6.4	105
43	Volatile compounds emitted by diverse phytopathogenic microorganisms promote plant growth and flowering through cytokinin action. <i>Plant, Cell and Environment</i> , 2016 , 39, 2592-2608	8.4	59
42	Physiological response to drought in radiata pine: phytohormone implication at leaf level. <i>Tree Physiology</i> , 2012 , 32, 435-49	4.2	52
41	Enhancing initiation and proliferation in radiata pine (<i>Pinus radiata</i> D. Don) somatic embryogenesis through seed family screening, zygotic embryo staging and media adjustments. <i>Acta Physiologiae Plantarum</i> , 2012 , 34, 451-460	2.6	47
40	Solute accumulation and elastic modulus changes in six radiata pine breeds exposed to drought. <i>Tree Physiology</i> , 2013 , 33, 69-80	4.2	45
39	Bottlenecks in <i>Pinus radiata</i> somatic embryogenesis: improving maturation and germination. <i>Trees - Structure and Function</i> , 2010 , 24, 1061-1071	2.6	44
38	Immunolocalization of IAA and ABA in roots and needles of radiata pine (<i>Pinus radiata</i>) during drought and rewatering. <i>Tree Physiology</i> , 2013 , 33, 537-49	4.2	35
37	Characterization of Biostimulant Mode of Action Using Novel Multi-Trait High-Throughput Screening of Germination and Rosette Growth. <i>Frontiers in Plant Science</i> , 2018 , 9, 1327	6.2	33
36	Metabolites and hormones are involved in the intraspecific variability of drought hardening in radiata pine. <i>Journal of Plant Physiology</i> , 2015 , 188, 64-71	3.6	31
35	Use of cytokinins as agrochemicals. <i>Bioorganic and Medicinal Chemistry</i> , 2016 , 24, 484-92	3.4	30
34	In vitro regeneration of adult <i>Pinus sylvestris</i> L. trees. <i>South African Journal of Botany</i> , 2010 , 76, 158-162	2.9	30
33	<i>Arabidopsis</i> Responds to <i>Alternaria alternata</i> Volatiles by Triggering Plastid Phosphoglucose Isomerase-Independent Mechanisms. <i>Plant Physiology</i> , 2016 , 172, 1989-2001	6.6	30
32	In vitro regeneration of <i>Pinus pinaster</i> adult trees. <i>Canadian Journal of Forest Research</i> , 2008 , 38, 2607-2615	2.15	28
31	High nitrate supply reduces growth in maize, from cell to whole plant. <i>Journal of Plant Physiology</i> , 2015 , 173, 120-9	3.6	27
30	Testing novel cytokinins for improved in vitro adventitious shoots formation and subsequent ex vitro performance in <i>Pinus radiata</i> . <i>Forestry</i> , 2011 , 84, 363-373	2.2	24
29	A combined pathway of somatic embryogenesis and organogenesis to regenerate radiata pine plants. <i>Plant Biotechnology Reports</i> , 2011 , 5, 177-186	2.5	23
28	An Automated Method for High-Throughput Screening of Rosette Growth in Multi-Well Plates and Its Validation in Stress Conditions. <i>Frontiers in Plant Science</i> , 2017 , 8, 1702	6.2	22

27	Micropropagation of adult Stone Pine (<i>Pinus pinea</i> L.). <i>Trees - Structure and Function</i> , 2009 , 23, 835-842	2.6	21
26	Plastidic phosphoglucose isomerase is an important determinant of starch accumulation in mesophyll cells, growth, photosynthetic capacity, and biosynthesis of plastidic cytokinins in <i>Arabidopsis</i> . <i>PLoS ONE</i> , 2015 , 10, e0119641	3.7	19
25	Plant responses to fungal volatiles involve global posttranslational thiol redox proteome changes that affect photosynthesis. <i>Plant, Cell and Environment</i> , 2019 , 42, 2627-2644	8.4	18
24	Phenolic Compounds and Biological Activity of Selected Species. <i>Plants</i> , 2021 , 10,	4.5	17
23	Improved micropropagation protocol for maritime pine using zygotic embryos. <i>Scandinavian Journal of Forest Research</i> , 2011 , 26, 202-211	1.7	16
22	The imbalance between C and N metabolism during high nitrate supply inhibits photosynthesis and overall growth in maize (<i>Zea mays</i> L.). <i>Plant Physiology and Biochemistry</i> , 2017 , 120, 213-222	5.4	15
21	Exogenous application of ZnO nanoparticles and ZnSO distinctly influence the metabolic response in <i>Phaseolus vulgaris</i> L. <i>Science of the Total Environment</i> , 2021 , 778, 146331	10.2	15
20	Diphenylurea-derived cytokinin oxidase/dehydrogenase inhibitors for biotechnology and agriculture. <i>Journal of Experimental Botany</i> , 2021 , 72, 355-370	7	10
19	Volatiles from the fungal phytopathogen <i>Penicillium aurantiogriseum</i> modulate root metabolism and architecture through proteome resetting. <i>Plant, Cell and Environment</i> , 2020 , 43, 2551-2570	8.4	9
18	A Novel Image-Based Screening Method to Study Water-Deficit Response and Recovery of Barley Populations Using Canopy Dynamics Phenotyping and Simple Metabolite Profiling. <i>Frontiers in Plant Science</i> , 2019 , 10, 1252	6.2	9
17	Hormopriming to Mitigate Abiotic Stress Effects: A Case Study of -Substituted Cytokinin Derivatives With a Fluorinated Carbohydrate Moiety. <i>Frontiers in Plant Science</i> , 2020 , 11, 599228	6.2	8
16	The trans and cis zeatin isomers play different roles in regulating growth inhibition induced by high nitrate concentrations in maize. <i>Plant Growth Regulation</i> , 2018 , 85, 199-209	3.2	7
15	Plastidial Phosphoglucose Isomerase Is an Important Determinant of Seed Yield through Its Involvement in Gibberellin-Mediated Reproductive Development and Storage Reserve Biosynthesis in <i>Arabidopsis</i> . <i>Plant Cell</i> , 2018 , 30, 2082-2098	11.6	6
14	Seed Priming With Protein Hydrolysates Improves <i>Arabidopsis</i> Growth and Stress Tolerance to Abiotic Stresses. <i>Frontiers in Plant Science</i> , 2021 , 12, 626301	6.2	6
13	Bayesian approach for analysis of time-to-event data in plant biology. <i>Plant Methods</i> , 2020 , 16, 14	5.8	5
12	IN VITRO REGENERATION OF PINUS SPP. ADULT TREES: NEW METHOD FOR OBTAINING CLONAL PLANTS. <i>Acta Horticulturae</i> , 2010 , 361-365	0.3	3
11	Genes and , Coding for Cytokinin Biosynthesis Enzymes, Are Essential for Tumorigenesis and Growth by pv. savastanoi NCPPB 3335. <i>Frontiers in Plant Science</i> , 2020 , 11, 1294	6.2	3
10	Proteostatic Regulation of MEP and Shikimate Pathways by Redox-Activated Photosynthesis Signaling in Plants Exposed to Small Fungal Volatiles. <i>Frontiers in Plant Science</i> , 2021 , 12, 637976	6.2	3

9	Elevated CO Improves the Physiology but Not the Final Yield in Spring Wheat Genotypes Subjected to Heat and Drought Stress During Anthesis.. <i>Frontiers in Plant Science</i> , 2022 , 13, 824476	6.2	3
8	Use of Plant Metabolites to Mitigate Stress Effects in Crops 2020 , 261-300		2
7	Interplay between 1-aminocyclopropane-1-carboxylic acid, β -aminobutyrate and D-glucose in the regulation of high nitrate-induced root growth inhibition in maize. <i>Plant Science</i> , 2020 , 293, 110418	5.3	2
6	Optimizing growing conditions for hydroponic farming of selected medicinal and aromatic plants.. <i>Food Chemistry</i> , 2021 , 375, 131845	8.5	2
5	Enhanced Yield of Pepper Plants Promoted by Soil Application of Volatiles From Cell-Free Fungal Culture Filtrates Is Associated With Activation of the Beneficial Soil Microbiota. <i>Frontiers in Plant Science</i> , 2021 , 12, 752653	6.2	2
4	Drought-Tolerance Gene Identification Using Genome Comparison and Co-Expression Network Analysis of Chromosome Substitution Lines in Rice. <i>Genes</i> , 2020 , 11,	4.2	2
3	Phloem exudate metabolic content reflects the response to water-deficit stress in pea plants (<i>Pisum sativum</i> L.). <i>Plant Journal</i> , 2021 , 106, 1338-1355	6.9	1
2	Priming with Small Molecule-Based Biostimulants to Improve Abiotic Stress Tolerance in <i>Arabidopsis thaliana</i> . <i>Plants</i> , 2022 , 11, 1287	4.5	1
1	Integration of Phenomics and Metabolomics Datasets Reveals Different Mode of Action of Biostimulants Based on Protein Hydrolysates in L. and L. Under Salinity.. <i>Frontiers in Plant Science</i> , 2021 , 12, 808711	6.2	0
