#	ARTICLE	IF	CITATIONS
1	Numerical and experimental study of suffosion/clogging in deformable porous media. E3S Web of Conferences, 2019, 98, 03003.	0.5	0
2	Numerical Model of Two-Phase Flow in Dissolvable Porous Media and Simulation of Reservoir Acidizing. Natural Resources Research, 2018, 27, 531-537.	4.7	4
3	Modeling of non-equilibrium mass-exchange processes in geo-systems. International Journal of Rock Mechanics and Minings Sciences, 2016, 86, 1-4.	5.8	2
4	Rheological aspects of underground fluid dynamics and mass exchange processes. <i>Журнал силикатных и композитных материалов</i> : Journal of Silicate Based and Composite Materials, 2016, 68, 34-38.	0.2	1
5	A new approach for development of rheological relations for saturated porous media. Journal of Physics: Conference Series, 2015, 602, 012005.	0.4	0
6	Numerical Simulation of Rheological, Chemical and Hydromechanical Processes of Thrombolysis. Journal of Physics: Conference Series, 2015, 602, 012042.	0.4	1
7	A new approach to obtain rheological relations for saturated porous media. International Journal of Rock Mechanics and Minings Sciences, 2014, 72, 49-53.	5.8	7
8	Mathematical modeling of the formation of clots in blood vessels. Journal of Engineering Physics and Thermophysics, 2012, 85, 668-674.	0.6	0
9	Mathematical modeling of the lysis of clots in blood vessels. Journal of Engineering Physics and Thermophysics, 2011, 84, 1026-1033.	0.6	1
10	Modeling of underground disposal of liquid wastes. Journal of Engineering Physics and Thermophysics, 2008, 81, 680-685.	0.6	0
11	Model of water influx to a perfect well with allowance for the water loss by the overlying clay layer. Journal of Engineering Physics and Thermophysics, 2007, 80, 511-516.	0.6	1
12	Mathematical modeling of the rheology of swelling systems. Journal of Engineering Physics and Thermophysics, 2005, 78, 1142-1148.	0.6	1
