citing authors

| # | ARTICLE | IF | CITATIONS |
|----|---|-----|-----------|
| 1 | The response of sugarcane canopy development to water stress. <i>Field Crops Research</i> , 2006, 98, 91-97. | 2.3 | 120 |
| 2 | A new method of simulating dry matter partitioning in the Canegro sugarcane model. <i>Field Crops Research</i> , 2002, 78, 151-164. | 2.3 | 98 |
| 3 | Climate change impacts on sugarcane attainable yield in southern Brazil. <i>Climatic Change</i> , 2013, 117, 227-239. | 1.7 | 95 |
| 4 | Enhanced risk management and decision-making capability across the sugarcane industry value chain based on seasonal climate forecasts. <i>Agricultural Systems</i> , 2002, 74, 459-477. | 3.2 | 90 |
| 5 | Biomass accumulation in sugarcane: unravelling the factors underpinning reduced growth phenomena. <i>Journal of Experimental Botany</i> , 2010, 61, 2877-2887. | 2.4 | 78 |
| 6 | Improving biomass production and partitioning in sugarcane: theory and practice. <i>Field Crops Research</i> , 2005, 92, 291-303. | 2.3 | 61 |
| 7 | The effect of crop start date, crop class and cultivar on sugarcane canopy development and radiation interception. <i>Field Crops Research</i> , 2005, 92, 249-260. | 2.3 | 58 |
| 8 | Predicting Climate Change Impacts on Sugarcane Production at Sites in Australia, Brazil and South Africa Using the Canegro Model. <i>Sugar Tech</i> , 2014, 16, 347-355. | 0.9 | 57 |
| 9 | Simulated impacts of climate change on water use and yield of irrigated sugarcane in South Africa. <i>Agricultural Systems</i> , 2015, 139, 260-270. | 3.2 | 49 |
| 10 | Increasing water use efficiency of irrigated sugarcane production in South Africa through better agronomic practices. <i>Field Crops Research</i> , 2015, 176, 87-98. | 2.3 | 39 |
| 11 | Refining the Canegro model for improved simulation of climate change impacts on sugarcane. <i>European Journal of Agronomy</i> , 2018, 100, 76-86. | 1.9 | 34 |
| 12 | Operational forecasting of South African sugarcane production: Part 1 “ System description. <i>Agricultural Systems</i> , 2007, 92, 23-38. | 3.2 | 33 |
| 13 | Sugarcane response to row spacing-induced competition for light. <i>Field Crops Research</i> , 2009, 113, 149-155. | 2.3 | 33 |
| 14 | A process-based model to simulate changes in tiller density and light interception of sugarcane crops. <i>Agricultural Systems</i> , 2003, 76, 589-599. | 3.2 | 25 |
| 15 | Modelling water uptake, growth and sucrose accumulation of sugarcane subjected to water stress. <i>Field Crops Research</i> , 2010, 117, 59-69. | 2.3 | 25 |
| 16 | Modelling crop growth and crop water relations in South Africa: Past achievements and lessons for the future. <i>South African Journal of Plant and Soil</i> , 2010, 27, 49-65. | 0.4 | 23 |
| 17 | Operational forecasting of South African sugarcane production: Part 2 “ System evaluation. <i>Agricultural Systems</i> , 2007, 92, 39-51. | 3.2 | 20 |
| 18 | Predicting genotypic differences in irrigated sugarcane yield using the Canegro model and independent trait parameter estimates. <i>European Journal of Agronomy</i> , 2018, 96, 13-21. | 1.9 | 18 |

| # | ARTICLE | IF | CITATIONS |
|----|---|-----|-----------|
| 19 | Negative effects of lodging on irrigated sugarcane productivity – An experimental and crop modelling assessment. <i>Field Crops Research</i> , 2015, 180, 135-142. | 2.3 | 17 |
| 20 | Modelling and monitoring for strategic yield gap diagnosis in the South African sugar belt. <i>Field Crops Research</i> , 2013, 143, 143-150. | 2.3 | 16 |
| 21 | Water relations of two contrasting sugarcane genotypes. <i>Field Crops Research</i> , 2014, 168, 86-100. | 2.3 | 16 |
| 22 | The relationship between ENSO and rainfall and yield in the South African sugar industry. <i>South African Journal of Plant and Soil</i> , 1999, 16, 96-101. | 0.4 | 14 |
| 23 | Assessing the fidelity of Landsat-based fAPAR models in two diverse sugarcane growing regions. <i>Computers and Electronics in Agriculture</i> , 2020, 170, 105248. | 3.7 | 14 |
| 24 | Integrating soil water monitoring technology and weather based crop modelling to provide improved decision support for sugarcane irrigation management. <i>Computers and Electronics in Agriculture</i> , 2014, 105, 44-53. | 3.7 | 13 |
| 25 | Water and radiation use efficiency of sugarcane for bioethanol production in South Africa, benchmarked against other selected crops. <i>South African Journal of Plant and Soil</i> , 2016, 33, 1-11. | 0.4 | 13 |
| 26 | Exploring process-level genotypic and environmental effects on sugarcane yield using an international experimental dataset. <i>Field Crops Research</i> , 2019, 244, 107622. | 2.3 | 12 |
| 27 | Refinement and validation of the PUTU wheat crop growth model 2. Leaf area expansion. <i>South African Journal of Plant and Soil</i> , 1991, 8, 67-72. | 0.4 | 11 |
| 28 | Modelling genetic and environmental control of biomass partitioning at plant and phytomer level of sugarcane grown in controlled environments. <i>Crop and Pasture Science</i> , 2011, 62, 66. | 0.7 | 11 |
| 29 | Analysing yield trends in the South African sugar industry. <i>Agricultural Systems</i> , 2015, 141, 24-35. | 3.2 | 9 |
| 30 | Refinement and validation of the PUTU wheat crop growth model 1. Phenology. <i>South African Journal of Plant and Soil</i> , 1991, 8, 59-66. | 0.4 | 8 |
| 31 | Evaluating wheat planting strategies using a growth model. <i>Agricultural Systems</i> , 1992, 38, 175-184. | 3.2 | 8 |
| 32 | Farm level decision support for sugarcane irrigation management during drought. <i>Agricultural Water Management</i> , 2019, 222, 274-285. | 2.4 | 8 |
| 33 | Refinement and validation of the PUTU wheat crop growth model 3. Grain growth. <i>South African Journal of Plant and Soil</i> , 1991, 8, 73-77. | 0.4 | 7 |
| 34 | Evaluating different wheat production strategies for the Orange Free State using stochastic dominance techniques and a crop growth model. <i>South African Journal of Plant and Soil</i> , 1991, 8, 113-118. | 0.4 | 6 |
| 35 | Determination of optimum wheat cultivar characteristics using a growth model. <i>Agricultural Systems</i> , 1991, 37, 25-38. | 3.2 | 5 |
| 36 | Sugarcane. , 2021, , 674-713. | | 5 |

| # | ARTICLE | IF | CITATIONS |
|----|--|-----|-----------|
| 37 | Evaluating process-based sugarcane models for simulating genotypic and environmental effects observed in an international dataset. <i>Field Crops Research</i> , 2021, 260, 107983. | 2.3 | 3 |
| 38 | Bepaling van optimale blom en plantdatums vir koring in die sentrale besproeiingsgebiede van die RSA met behulp van 'n groeimodel. <i>South African Journal of Plant and Soil</i> , 1993, 10, 77-84. | 0.4 | 1 |
| 39 | Simulation of main stem mature leaf area of maize. <i>South African Journal of Plant and Soil</i> , 1995, 12, 50-54. | 0.4 | 1 |
| 40 | Crop modelling to support sustainable sugarcane cultivation. <i>Burleigh Dodds Series in Agricultural Science</i> , 2017, , 21-44. | 0.1 | 1 |
| 41 | Risk analysis of wheat production in the central Orange Free State using a growth model. <i>South African Journal of Plant and Soil</i> , 1988, 5, 37-39. | 0.4 | 0 |
