#	Article	IF	Citations
1	The Burr XII Distribution in Reliability Analysis. Journal of Quality Technology, 1998, 30, 386-394.	1.8	189
2	The best vendor selection for conducting the recycled material based on a hybrid MCDM model combining DANP with VIKOR. Resources, Conservation and Recycling, 2012, 66, 95-111.	5.3	180
3	A new model with bathtub-shaped failure rate using an additive Burr XII distribution. Reliability Engineering and System Safety, 2000, 70, 305-312.	5.1	126
4	An evaluation of freight consolidation policies in global third party logistics. Omega, 2003, 31, 55-62.	3.6	123
5	Using principal component analysis in process performance for multivariate data. Omega, 2000, 28, 185-194.	3.6	117
6	Applying Lean Six Sigma and TRIZ methodology in banking services. Total Quality Management and Business Excellence, 2010, 21, 301-315.	2.4	101
7	CAPABILITY INDEX USING PRINCIPAL COMPONENTS ANALYSIS. Quality Engineering, 1998, 11, 21-27.	0.7	96
8	Comparison of Three Multivariate Process Capability Indices. Journal of Quality Technology, 2000, 32, 263-275.	1.8	91
9	A hybrid model based on support vector regression and differential evolution for remaining useful lifetime prediction of lithium-ion batteries. Journal of Power Sources, 2018, 401, 49-54.	4.0	91
10	Simulation analysis of dispatching rules for an automated interbay material handling system in wafer fab. International Journal of Production Research, 2001, 39, 1221-1238.	4.9	89
11	Lifetime predictions of LED-based light bars by accelerated degradation test. Microelectronics Reliability, 2012, 52, 1332-1336.	0.9	77
12	Using adaptive network-based fuzzy inference system to forecast automobile sales. Expert Systems With Applications, 2011, 38, 10587-10593.	4.4	70
13	A real-time vehicle-dispatching system for consolidating milk runs. Transportation Research, Part E: Logistics and Transportation Review, 2007, 43, 565-577.	3.7	61
14	Applying Six-Sigma to Supplier Development. Total Quality Management and Business Excellence, 2004, 15, 1217-1229.	2.4	56
15	Bi-directional long short-term memory recurrent neural network with attention for stack voltage degradation from proton exchange membrane fuel cells. Journal of Power Sources, 2020, 461, 228170.	4.0	56
16	Maximum likelihood estimation of the Burr XII parameters with censored and uncensored data. Microelectronics Reliability, 1996, 36, 359-362.	0.9	55
17	Useful lifetime analysis for high-power white LEDs. Microelectronics Reliability, 2014, 54, 1307-1315.	0.9	53
18	Using the design for Six Sigma approach with TRIZ for new product development. Computers and Industrial Engineering, 2016, 98, 522-530.	3.4	53

#	Article	IF	Citations
19	Application of Lean Six Sigma to a panel equipment manufacturer. Total Quality Management and Business Excellence, 2012, 23, 417-429.	2.4	49
20	Online remaining useful life prediction of lithium-ion batteries using bidirectional long short-term memory with attention mechanism. Energy, 2022, 254, 124344.	4.5	46
21	Evaluating the efficiency of implementing total productive maintenance. Total Quality Management and Business Excellence, 2006, 17, 655-667.	2.4	45
22	Stacked long short-term memory model for proton exchange membrane fuel cell systems degradation. Journal of Power Sources, 2020, 448, 227591.	4.0	44
23	Applying collaborative transportation management models in global third-party logistics. International Journal of Computer Integrated Manufacturing, 2003, 16, 283-291.	2.9	43
24	Learning curve analysis in total productive maintenance. Omega, 2001, 29, 491-499.	3.6	42
25	Performance evaluation of an automated material handling system for a wafer fab. Robotics and Computer-Integrated Manufacturing, 2004, 20, 91-100.	6.1	42
26	Quality Evaluation of a Manufactured Product with Multiple Characteristics. Quality and Reliability Engineering International, 2006, 22, 225-236.	1.4	40
27	Simulation analysis of the connecting transport AMHS in a wafer fab. IEEE Transactions on Semiconductor Manufacturing, 2003, 16, 555-564.	1.4	39
28	Connecting transport AMHS in a wafer fab. International Journal of Production Research, 2003, 41, 529-544.	4.9	37
29	Long Short-Term Memory With Attention Mechanism for State of Charge Estimation of Lithium-Ion Batteries. IEEE Access, 2020, 8, 94140-94151.	2.6	33
30	Capacity-constrained scheduling for a logic IC final test facility. International Journal of Production Research, 2004, 42, 79-99.	4.9	31
31	Measuring Process Yield for Nonlinear Profiles. Quality and Reliability Engineering International, 2014, 30, 1333-1339.	1.4	31
32	A hybrid push/pull-dispatching rule for a photobay in a 300mm wafer fab. Robotics and Computer-Integrated Manufacturing, 2006, 22, 47-55.	6.1	30
33	Development of a state-dependent dispatch rule using theory of constraints in near-real-world wafer fabrication. Production Planning and Control, 2002, 13, 253-261.	5.8	29
34	Measuring production yield for processes with multiple quality characteristics. International Journal of Production Research, 2006, 44, 4649-4661.	4.9	29
35	Process-oriented basis representation for a multivariate gauge study. Computers and Industrial Engineering, 2010, 58, 143-150.	3.4	29
36	A Process Yield for Simple Linear Profiles. Quality Engineering, 2014, 26, 311-318.	0.7	29

#	Article	IF	Citations
37	Gradient boosted regression model for the degradation analysis of prismatic cells. Computers and Industrial Engineering, 2020, 144, 106494.	3.4	29
38	Weibull Maximum Likelihood Parameter Estimates with Censored Data. Journal of Quality Technology, 1997, 29, 105-110.	1.8	28
39	Hybrid approach for remaining useful life prediction of ball bearings. Quality and Reliability Engineering International, 2019, 35, 2494-2505.	1.4	28
40	Multivariate Capability Indices: Distributional and Inferential Properties. Journal of Applied Statistics, 2007, 34, 941-962.	0.6	27
41	Confidence interval for the mean of non-normal data. Quality and Reliability Engineering International, 2001, 17, 257-267.	1.4	26
42	The performance of the number of vehicles in a dynamic connecting transport AMHS. International Journal of Production Research, 2005, 43, 2263-2276.	4.9	24
43	Process yield analysis for autocorrelation between linear profiles. Computers and Industrial Engineering, 2014, 71, 50-56.	3.4	24
44	Lot release times and dispatching rule for a TFT-LCD cell process. Robotics and Computer-Integrated Manufacturing, 2008, 24, 228-238.	6.1	23
45	Implementing particle swarm optimization algorithm to estimate the mixture of two Weibull parameters with censored data. Journal of Statistical Computation and Simulation, 2014, 84, 1975-1989.	0.7	23
46	Measuring the Process Yield for Simple Linear Profiles with one‐Sided Specification. Quality and Reliability Engineering International, 2014, 30, 1145-1151.	1.4	23
47	Confidence intervals in repeatability and reproducibility using the Bootstrap method. Total Quality Management and Business Excellence, 2003, 14, 341-354.	2.4	21
48	The performance of EWMA median and CUSUM median control charts for a normal process with measurement errors. Quality and Reliability Engineering International, 2018, 34, 203-213.	1.4	21
49	Improved percentile estimation for the two-parameter Weibull distribution. Microelectronics Reliability, 1995, 35, 883-892.	0.9	20
50	Virtual vehicle in the connecting transport automated material-handling system (AMHS). International Journal of Production Research, 2004, 42, 2599-2610.	4.9	20
51	An extended optimal replacement model for a deteriorating system with inspections. Reliability Engineering and System Safety, 2015, 139, 33-49.	5.1	20
52	Modified diffusion model with multiple products using a hybrid GA approach. Expert Systems With Applications, 2009, 36, 12613-12620.	4.4	19
53	EM algorithm for estimating the Burr XII parameters with multiple censored data. Quality and Reliability Engineering International, 2010, 26, 615-630.	1.4	19
54	Applying Six Sigma methodology to collaborative forecasting. International Journal of Advanced Manufacturing Technology, 2008, 39, 1033-1044.	1.5	18

#	Article	IF	Citations
55	Implementing support vector regression with differential evolution to forecast motherboard shipments. Expert Systems With Applications, 2014, 41, 3850-3855.	4.4	18
56	VSSI median control chart with estimated parameters and measurement errors. Quality and Reliability Engineering International, 2018, 34, 867-881.	1.4	18
57	A parameterized-dispatching rule for a Logic IC sort in a wafer fabrication. Production Planning and Control, 2005, 16, 426-436.	5.8	17
58	Applying Capability Index to the Supply Network Analysis. Total Quality Management and Business Excellence, 2007, 18, 425-434.	2.4	17
59	Product mix in the TFT-LCD industry. Production Planning and Control, 2007, 18, 584-591.	5.8	17
60	Applying a Hybrid MCDM Model for Six Sigma Project Selection. Mathematical Problems in Engineering, 2014, 2014, 1-13.	0.6	17
61	A comparison study of control charts for Weibull distributed time between events. Quality and Reliability Engineering International, 2017, 33, 2747-2759.	1.4	17
62	Variables Sampling Plan for Resubmitted Lots in a Process with Linear Profiles. Quality and Reliability Engineering International, 2016, 32, 1029-1040.	1.4	16
63	New control charts for monitoring the Weibull percentiles under complete data and Type‑II censoring. Quality and Reliability Engineering International, 2018, 34, 403-416.	1.4	16
64	A multiple dependent state repetitive sampling plan for linear profiles. Journal of the Operational Research Society, 2018, 69, 467-473.	2.1	16
65	Analysis of the supply and demand in the TFT–LCD market. Technological Forecasting and Social Change, 2006, 73, 422-435.	6.2	15
66	A General Procedure for Process Yield With Multiple Characteristics. IEEE Transactions on Semiconductor Manufacturing, 2010, 23, 503-508.	1.4	15
67	One‑sided control chart based on support vector machines with differential evolution algorithm. Quality and Reliability Engineering International, 2019, 35, 1634-1645.	1.4	15
68	APPLYING PRINCIPAL COMPONENT ANALYSIS TO A GR&R STUDY. Journal of the Chinese Institute of Industrial Engineers, 2007, 24, 182-189.	0.5	13
69	MaxEWMA Control Chart for a Weibull Process with Individual Measurements. Quality and Reliability Engineering International, 2017, 33, 369-379.	1.4	13
70	Estimating the Burr XII Parameters in Constant-Stress Partially Accelerated Life Tests Under Multiple Censored Data. Communications in Statistics Part B: Simulation and Computation, 2012, 41, 1711-1727.	0.6	12
71	Process yield analysis for multivariate linear profiles. Quality Technology and Quantitative Management, 2016, 13, 124-138.	1.1	12
72	The Difference Test Statistic for Two Suppliers with Linear Profiles. Quality and Reliability Engineering International, 2016, 32, 69-78.	1.4	12

#	Article	IF	Citations
73	Partially Accelerated Life Tests for the Weibull Distribution Under Multiply Censored Data. Communications in Statistics Part B: Simulation and Computation, 2012, 41, 1667-1678.	0.6	11
74	Using BBPSO Algorithm to Estimate the Weibull Parameters with Censored Data. Communications in Statistics Part B: Simulation and Computation, 2014, 43, 2614-2627.	0.6	11
75	Lower Confidence Bound for Process-Yield Index S_{pk} with Autocorrelated Process Data. Quality Technology and Quantitative Management, 2015, 12, 253-267.	1.1	11
76	Multiple comparisons with the best for supplier selection with linear profiles. International Journal of Production Research, 2016, 54, 1388-1397.	4.9	11
77	Dependent Mixed and Mixed Repetitive Sampling Plans for Linear Profiles. Quality and Reliability Engineering International, 2017, 33, 1669-1683.	1.4	11
78	Acceptance sampling plans for linear profiles with one-sided specifications. Journal of Statistical Computation and Simulation, 2017, 87, 806-816.	0.7	11
79	Ensemble Model Based on Stacked Long Short-Term Memory Model for Cycle Life Prediction of Lithium–Ion Batteries. Applied Sciences (Switzerland), 2020, 10, 3549.	1.3	11
80	A hybrid method for online cycle life prediction of lithium–ion batteries. International Journal of Energy Research, 2022, 46, 9080-9096.	2.2	11
81	A simple data transformation of auto-correlated data for SPC. International Journal of Production Research, 2005, 43, 981-989.	4.9	10
82	Forecasting for the LCD monitor market. Journal of Forecasting, 2008, 27, 341-356.	1.6	10
83	Adaptive neuro-fuzzy inference system for combined forecasts in a panel manufacturer. Expert Systems With Applications, 2010, 37, 8119-8126.	4.4	10
84	Process Yield for Multivariate Linear Profiles with One-sided Specification Limits. Quality and Reliability Engineering International, 2016, 32, 1281-1293.	1.4	10
85	Ensemble model for the degradation prediction of proton exchange membrane fuel cell stacks. Quality and Reliability Engineering International, 2021, 37, 34-46.	1.4	10
86	The maximum loading and the optimum number of vehicles in a double-loop of an interbay material handling system. Production Planning and Control, 2004, 15, 247-255.	5.8	9
87	Process Selection for Linear Profiles with One–sided Specifications Based on the Ratio Test Statistic. Quality and Reliability Engineering International, 2015, 31, 1575-1585.	1.4	9
88	Process Yield Analysis for Linear Within–Profile Autocorrelation. Quality and Reliability Engineering International, 2015, 31, 1053-1061.	1.4	9
89	A Single Sampling Plan Based on Exponentially Weighted Moving Average Model for Linear Profiles. Quality and Reliability Engineering International, 2016, 32, 1795-1805.	1.4	9
90	Sampling plans for the zero-inflated Poisson distribution in the food industry. Food Control, 2018, 85, 359-368.	2.8	9

#	Article	IF	Citations
91	Comparison of different control charts for a Weibull process with type-I censoring. Communications in Statistics Part B: Simulation and Computation, 2019, 48, 1088-1100.	0.6	9
92	Quality Evaluation of Geometric Tolerance Regions in Form and Location. Quality Engineering, 2002, 14, 205-211.	0.7	8
93	Implementing a diffusion model optimized by a hybrid evolutionary algorithm to forecast notebook shipments. Applied Soft Computing Journal, 2013, 13, 1147-1151.	4.1	8
94	A New Model for Repairable Systems with Nonmonotone Intensity Function. Quality and Reliability Engineering International, 2015, 31, 1553-1563.	1.4	8
95	Measuring the Process Yield for Circular Profiles. Quality and Reliability Engineering International, 2015, 31, 579-588.	1.4	8
96	Integrating quality function deployment and failure mode and effect analysis in subcontractor selection. Total Quality Management and Business Excellence, 2020, 31, 697-716.	2.4	8
97	Exponentially weighted moving average chart with a likelihood ratio test for monitoring autocorrelated processes. Quality and Reliability Engineering International, 2020, 36, 753-764.	1.4	8
98	A Deep convolutional neural network with residual blocks for wafer map defect pattern recognition. Quality and Reliability Engineering International, 2022, 38, 343-357.	1.4	8
99	A Hybrid Method for Remaining Useful Life Prediction of Proton Exchange Membrane Fuel Cell Stack. IEEE Access, 2021, 9, 40486-40495.	2.6	8
100	Robust regression for estimating the Burr XII parameters with outliers. Journal of Applied Statistics, 2010, 37, 807-819.	0.6	7
101	Useful lifetime of white OLED under a constant stress accelerated life testing. Optical and Quantum Electronics, 2015, 47, 323-329.	1.5	7
102	Sampling Plan based on the Exponentially Weighted Moving Average Yield Index for Autocorrelation within Linear Profiles. Quality and Reliability Engineering International, 2016, 32, 1757-1768.	1.4	7
103	Supplier Selection for Multiple Linear Profiles with One-Sided Specifications. Quality and Reliability Engineering International, 2016, 32, 257-268.	1.4	7
104	Sampling plans by variables for inflated-Pareto data in the food industry. Food Control, 2018, 84, 97-105.	2.8	7
105	Attention-Based Long Short-Term Memory Recurrent Neural Network for Capacity Degradation of Lithium-Ion Batteries. Batteries, 2021, 7, 66.	2.1	7
106	Process Yield With Measurement Errors in Semiconductor Manufacturing. IEEE Transactions on Semiconductor Manufacturing, 2008, 21, 279-284.	1.4	6
107	Process Yield for a Manufactured Product. Quality Technology and Quantitative Management, 2013, 10, 483-494.	1.1	6
108	Implementing EWMA Yield Index for Simple Linear Profiles with One-sided Specifications in Product Acceptance Determination. Quality and Reliability Engineering International, 2017, 33, 401-412.	1.4	6

#	Article	IF	Citations
109	Acceptance sampling plan based on an exponentially weighted moving average statistic with the yield index for autocorrelation between polynomial profiles. Communications in Statistics - Theory and Methods, 2018, 47, 4859-4871.	0.6	6
110	An M-Estimator for Estimating the Extended Burr Type III Parameters with Outliers. Communications in Statistics - Theory and Methods, 2010, 40, 304-322.	0.6	5
111	Evaluating Management Consultants for Six Sigma Projects. Arabian Journal for Science and Engineering, 2014, 39, 2371-2379.	1.1	5
112	Evaluating the efficiency of green vehicles and diesel vehicles. International Journal of Green Energy, 2016, 13, 1163-1174.	2.1	5
113	Acceptance sampling plans based on EWMA yield index for the first order autoregressive process. Journal of the Operational Research Society, 2019, 70, 1179-1192.	2.1	5
114	M-estimator with asymmetric influence function for estimating the Burr type III parameters with outliers. Computers and Mathematics With Applications, 2011, 62, 1896-1907.	1.4	4
115	An exponentially weighted moving average chart based on likelihood-ratio test for monitoring <scp>Weibull</scp> mean and variance with subgroups. Quality and Reliability Engineering International, 2017, 33, 2409-2421.	1.4	4
116	Sampling Schemes by Variables Inspection for the First-Order Autoregressive Model between Linear Profiles. Mathematical Problems in Engineering, 2017, 2017, 1-11.	0.6	4
117	Selecting better process based on difference statistic using double sampling plan. Communications in Statistics - Theory and Methods, 2019, 48, 2641-2656.	0.6	4
118	An Assessment of Gauge Repeatability and Reproducibility with Multiple Characteristics. Journal of Testing and Evaluation, 2013, 41, 651-658.	0.4	4
119	Evaluation of Two Process Yields in Acceptance Sampling Plans. Journal of Testing and Evaluation, 2018, 46, 756-763.	0.4	4
120	Operating Characteristic Curves for the Exponential Bayes-Truncated Test. Quality and Reliability Engineering International, 2004, 20, 337-342.	1.4	3
121	The mean time between failures for an LCD panel. Quality and Reliability Engineering International, 2011, 27, 203-208.	1.4	3
122	Optimal number of minimal repairs before replacement of a deteriorating system with inspections. International Journal of Systems Science, 0, , 1-13.	3.7	3
123	Single Mixed Sampling Plan Based on Yield Index for Linear Profiles. Quality and Reliability Engineering International, 2016, 32, 1535-1543.	1.4	3
124	Multiple Comparisons with the Best for Process Selection for Linear Profiles with One-sided Specifications. Quality and Reliability Engineering International, 2016, 32, 697-704.	1.4	3
125	Process Yield for Multiple Stream Processes with Individual Observations and Subsamples. Quality and Reliability Engineering International, 2016, 32, 335-344.	1.4	3
126	Two New Independent Mixed Sampling Plans for Inspecting a Product with Linear Profiles. Quality and Reliability Engineering International, 2016, 32, 2999-3009.	1.4	3

#	ARTICLE	IF	CITATIONS
127	Applying Bootstrap method to the types I–II errors in the measurement system. Quality and Reliability Engineering International, 2008, 24, 83-97.	1.4	2
128	Confidence intervals for two-dimensional data with circular tolerances in a gauge R&R study. Quality and Quantity, 2012, 46, 55-69.	2.0	2
129	M-estimator for estimating the Burr type III parameters with outliers. Mathematics and Computers in Simulation, 2014, 105, 144-159.	2.4	2
130	A Comparison Study of Replenishment Strategies in Vendor-Managed Inventory. Arabian Journal for Science and Engineering, 2014, 39, 5253-5264.	1.1	2
131	Process Yield Analysis for Nonlinear Profiles in the Presence of Gauge Measurement Errors. Quality and Reliability Engineering International, 2016, 32, 2435-2442.	1.4	2
132	EWMA chart with variable sample size and sampling interval for monitoring Pareto data with estimated parameters. Quality and Reliability Engineering International, 2018, 34, 1775-1784.	1.4	2
133	Sampling plans for the zero–inflated negative binomial distribution in the food industry. Quality and Reliability Engineering International, 2018, 34, 1174-1184.	1.4	2
134	A double exponentially weighted moving average chart based on likelihood ratio for monitoring an inflated Pareto process. Quality and Reliability Engineering International, 2019, 35, 1698-1715.	1.4	2
135	The effect of the Bootstrap method on additive fixed data perturbation in statistical database. Omega, 2002, 30, 367-379.	3.6	1
136	Combining Diffusion and Grey Models Based on Evolutionary Optimization Algorithms to Forecast Motherboard Shipments. Mathematical Problems in Engineering, 2012, 2012, 1-10.	0.6	1
137	Estimating the Process Yield of Multiple Characteristics With One-Sided Specifications. IEEE Transactions on Semiconductor Manufacturing, 2012, 25, 57-62.	1.4	1
138	A new bounded intensity function for repairable systems. Journal of Industrial and Production Engineering, 2014, 31, 36-40.	2.1	1
139	A New Decision Model for Reducing Trim Loss and Inventory in the Paper Industry. Journal of Applied Mathematics, 2014, 2014, 1-10.	0.4	1
140	Flexible Stock Allocation and Trim Loss Control for Cutting Problem in the Industrial-Use Paper Production. Mathematical Problems in Engineering, 2014, 2014, 1-9.	0.6	1
141	New Reliability Model in the Development Phase of a System. Quality Technology and Quantitative Management, 2014, 11, 297-306.	1.1	1
142	Implementing the Ratio Test Statistic to Compare Two Suppliers for Linear Profiles. Quality and Reliability Engineering International, 2016, 32, 1191-1203.	1.4	1
143	Applying grey model to predict the useful lifetime for high-power white LEDs. Optical and Quantum Electronics, 2016, 48, 1.	1.5	1
144	Exponentially weighted moving average control charts based on the moving average statistic and $\ln S^2$ for monitoring a Weibull process with subgroups. Quality and Reliability Engineering International, 2017, 33, 1901-1913.	1.4	1

#	Article	IF	Citations
145	EWMA chart based on Bayes–conditional pivotal quantity for Weibull percentiles under complete data and type–I censoring. Quality and Reliability Engineering International, 2018, 34, 707-717.	1.4	1
146	A New Approach for Product Acceptance Determination for Multiple Manufacturing Lines. IEEE Transactions on Components, Packaging and Manufacturing Technology, 2018, 8, 317-325.	1.4	1
147	A Gauge Study for Dynamic Light Scattering and Differential Mobility Analyzer Instruments. Journal of Testing and Evaluation, 2012, 40, 580-585.	0.4	1
148	Defect Prediction for New Products During the Development Phase. Journal of Testing and Evaluation, 2014, 42, 989-995.	0.4	1
