|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Leukocytapheresis variables and transit time for allogeneic cryopreserved hpc: better safe than sorry. Bone Marrow Transplantation, 2022, 57, 1531-1538.                                                                                                                                                                          | 1.3 | 5         |
| 2  | Estudio prospectivo del seguimiento de pacientes largos supervivientes a un trasplante alogénico de progenitores hematopoyéticos. Medicina Clínica, 2021, 157, 281-284.                                                                                                                                                           | 0.3 | 2         |
| 3  | Post-transplant cyclophosphamide for GVHD prophylaxis compared to ATG-based prophylaxis in unrelated donor transplantation. Annals of Hematology, 2021, 100, 541-553.                                                                                                                                                             | 0.8 | 25        |
| 4  | Risk factors and outcomes of follicular lymphoma after allogeneic hematopoietic stem cell transplantation using HLA-matched sibling, unrelated, and haploidentical-related donors. Bone Marrow Transplantation, 2021, 56, 992-996.                                                                                                | 1.3 | 3         |
| 5  | Allogeneic stem cell transplantation as a curative option in relapse/refractory diffuse large B cell lymphoma: Spanish multicenter GETH/GELTAMO study. Bone Marrow Transplantation, 2021, 56, 1919-1928.                                                                                                                          | 1.3 | 13        |
| 6  | Severe infections and infection-related mortality in a large series of haploidentical hematopoietic stem cell transplantation with post-transplant cyclophosphamide. Bone Marrow Transplantation, 2021, 56, 2432-2444.                                                                                                            | 1.3 | 33        |
| 7  | Cryopreservation of unrelated donor hematopoietic stem cells: the right answer for transplantations during the COVID-19 pandemic?. Bone Marrow Transplantation, 2021, 56, 2489-2496.                                                                                                                                              | 1.3 | 15        |
| 8  | Impact of risk scores in outcome of patients with myeloid neoplasms after allogeneic stem cell transplant. Medicina Clínica, 2021, , .                                                                                                                                                                                            | 0.3 | 1         |
| 9  | Gemtuzumab ozogamicina a bajas dosis en adultos con leucemia mieloide aguda. Medicina Clínica, 2021, 157, 325-328.                                                                                                                                                                                                                | 0.3 | 1         |
| 10 | Ruxolitinib in refractory acute and chronic graft-versus-host disease: a multicenter survey study. Bone Marrow Transplantation, 2020, 55, 641-648.                                                                                                                                                                                | 1.3 | 58        |
| 11 | Prospective Randomized Study Comparing Myeloablative Unrelated Umbilical Cord Blood Transplantation versus HLA-Haploidentical Related Stem Cell Transplantation for Adults with Hematologic Malignancies. Biology of Blood and Marrow Transplantation, 2020, 26, 358-366.                                                         | 2.0 | 36        |
| 12 | Impact of previous admission to an intensive care unit on stem cell transplantation outcome. Medicina Clínica, 2020, 155, 382-387.                                                                                                                                                                                                | 0.3 | 1         |
| 13 | FMOD expression in whole blood aids in distinguishing between chronic lymphocytic leukemia and other leukemic lymphoproliferative disorders. A pilot study. Cytometry Part B - Clinical Cytometry, 2020, 98, 421-428.                                                                                                             | 0.7 | 9         |
| 14 | Mobilization of Hematopoietic Stem Cells into Peripheral Blood for Autologous Transplantation Seems Less Efficacious in Poor Mobilizers with the Use of a Biosimilar of Filgrastim and Plerixafor: A Retrospective Comparative Analysis. Oncology and Therapy, 2020, 8, 311-324.                                                  | 1.0 | 1         |
| 15 | GVHD prophylaxis plus ATLG after myeloablative allogeneic haemopoietic peripheral blood stem-cell transplantation from HLA-identical siblings in patients with acute leukaemia in remission: final results of quality of life and long-term outcome analysis of a phase 3 randomised study. Lancet Haematology, 2019, 6, e89-e99. | 2.2 | 47        |
| 16 | Changes in critically ill cancer patients' short-term outcome over the last decades: results of systematic review with meta-analysis on individual data. Intensive Care Medicine, 2019, 45, 977-987.                                                                                                                              | 3.9 | 100       |
| 17 | Donor lymphocyte infusions for B-cell malignancies relapse after T-cell replete allogeneic hematopoietic cell transplantation. Bone Marrow Transplantation, 2019, 54, 1133-1137.                                                                                                                                                  | 1.3 | 0         |
| 18 | Enfermedad del injerto contra el receptor tras infección por Rickettsia conorii inducida por la picadura de una garrapata. Medicina Clínica, 2019, 152, 119-120.                                                                                                                                                                  | 0.3 | 0         |

| #  | ARTICLE                                                                                                                                                                                                                                                                                                            | IF   | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 19 | Tratamiento de rescate de pacientes con leucemia aguda en recaída despuÃs de un primer trasplante alogÃnico de progenitores hematopoyÃticos. Medicina ClÃnica, 2018, 151, 376-377.                                                                                                                                 | 0.3  | 0         |
| 20 | Analysis of relapse after transplantation in acute leukemia: A comparative on second allogeneic hematopoietic cell transplantation and donor lymphocyte infusions. Experimental Hematology, 2018, 62, 24-32.                                                                                                       | 0.2  | 15        |
| 21 | Segundas neoplasias en pacientes adultos receptores de un trasplante de progenitores hematopoyÃticos. Medicina ClÃnica, 2018, 150, 421-427.                                                                                                                                                                        | 0.3  | 0         |
| 22 | Influence of neutropenia on mortality of critically ill cancer patients: results of a meta-analysis on individual data. Critical Care, 2018, 22, 326.                                                                                                                                                              | 2.5  | 37        |
| 23 | Utilidad del lavado broncoalveolar y la citometrÃa de flujo en pacientes con hemopatÃas malignas e insuficiencia respiratoria. Medicina ClÃnica, 2017, 148, 297-302.                                                                                                                                               | 0.3  | 0         |
| 24 | Incidence and prognostic significance of nephrotoxicity in patients receiving eshap as salvage therapy for lymphoma. Leukemia Research, 2017, 58, 98-101.                                                                                                                                                          | 0.4  | 3         |
| 25 | Monosomal karyotype in chronic lymphocytic leukemia: Association with clinical and biological features and potential prognostic significance. American Journal of Hematology, 2017, 92, E132-E135.                                                                                                                 | 2.0  | 1         |
| 26 | Relapse risk after autologous stem cell transplantation in patients with lymphoma based on CD34+ cell dose. Leukemia and Lymphoma, 2017, 58, 916-922.                                                                                                                                                              | 0.6  | 5         |
| 27 | Early and Long-Term Impaired T Lymphocyte Immune Reconstitution after Cord Blood Transplantation with Antithymocyte Globulin. Biology of Blood and Marrow Transplantation, 2017, 23, 491-497.                                                                                                                      | 2.0  | 37        |
| 28 | Single umbilical cord blood with or without CD34+ cells from a third-party donor in adults with leukemia. Blood Advances, 2017, 1, 1047-1055.                                                                                                                                                                      | 2.5  | 6         |
| 29 | Patients with chronic lymphocytic leukemia and complex karyotype show an adverse outcome even in absence of <i>TP53/ATM FISH</i> deletions. Oncotarget, 2017, 8, 54297-54303.                                                                                                                                      | 0.8  | 44        |
| 30 | Cord Blood Units with High CD3 + Cell Counts Predict Early Lymphocyte Recovery After InÃvivo T Cell-Depleted Single Cord Blood Transplantation. Biology of Blood and Marrow Transplantation, 2016, 22, 1073-1079.                                                                                                  | 2.0  | 11        |
| 31 | Antilymphocyte Globulin for Prevention of Chronic Graft-versus-Host Disease. New England Journal of Medicine, 2016, 374, 43-53.                                                                                                                                                                                    | 13.9 | 436       |
| 32 | Outcome of Second Allogeneic Hematopoietic Cell Transplantation after Relapse of Myeloid Malignancies following Allogeneic Hematopoietic Cell Transplantation: A Retrospective Cohort on Behalf of the Grupo EspaÃol de Trasplante Hematopoyetico. Biology of Blood and Marrow Transplantation, 2016, 22, 584-588. | 2.0  | 45        |
| 33 | Impact of Refined Disease Risk Index after Single and Double Umbilical Cord Blood Transplantation in Adults with Hematological Malignancies. Blood, 2016, 128, 3484-3484.                                                                                                                                          | 0.6  | 0         |
| 34 | Few and Nonsevere Adverse Infusion Events Using an Automated Method for Diluting and Washing before Unrelated Single Cord Blood Transplantation. Biology of Blood and Marrow Transplantation, 2015, 21, 682-687.                                                                                                   | 2.0  | 7         |
| 35 | Allogeneic haematopoietic stem cell transplantation for mitochondrial neurogastrointestinal encephalomyopathy. Brain, 2015, 138, 2847-2858.                                                                                                                                                                        | 3.7  | 128       |
| 36 | Post-Thaw Viable CD45 + Cells and Clonogenic Efficiency are Associated with Better Engraftment and Outcomes after Single Cord Blood Transplantation in Adult Patients with Malignant Diseases.
