citing authors

#	ARTICLE	IF	CITATIONS
1	Varenicline rescues nicotine-induced decrease in motivation for sucrose reinforcement. Behavioural Brain Research, 2021, 397, 112887.	1.2	0
2	Conditioned enhancement of the nicotine reinforcer.. Experimental and Clinical Psychopharmacology, 2021, 29, 385-394.	1.3	15
3	Inactivation of posterior but not anterior dorsomedial caudate-putamen impedes learning with self-administered nicotine stimulus in male rats. Behavioural Brain Research, 2021, 413, 113438.	1.2	1
4	Assessment of individual differences in response to acute bupropion or varenicline treatment using a long-access nicotine self-administration model and behavioral economics in female rats. Behavioural Brain Research, 2020, 385, 112558.	1.2	5
5	Individual Vulnerability to Stress Is Associated With Increased Demand for Intravenous Heroin Self-administration in Rats. Frontiers in Behavioral Neuroscience, 2019, 13, 134.	1.0	21
6	Individual differences in responding to bupropion or varenicline in a preclinical model of nicotine self-administration vary according to individual demand for nicotine. Neuropharmacology, 2019, 148, 139-150.	2.0	21
7	The effect of N-acetylcysteine or bupropion on methamphetamine self-administration and methamphetamine-triggered reinstatement of female rats. Neuropharmacology, 2018, 135, 487-495.	2.0	14
8	Double dissociation of the anterior and posterior dorsomedial caudate-putamen in the acquisition and expression of associative learning with the nicotine stimulus. Neuropharmacology, 2017, 121, 111-119.	2.0	13
9	The effect of sazetidine-A and other nicotinic ligands on nicotine controlled goal-tracking in female and male rats. Neuropharmacology, 2017, 113, 354-366.	2.0	15
10	We Know Very Little about the Subjective Effects of Drugs in Females. ACS Chemical Neuroscience, 2015, 6, 359-361.	1.7	13
11	lbidilast reverses the decrease in the synaptic signaling protein phosphatidylethanolamine-binding protein 1 (PEBP1) produced by chronic methamphetamine intake in rats. Drug and Alcohol Dependence, 2015, 152, 15-23.	1.6	21
12	Repeated aripiprazole treatment causes dopamine D2 receptor up-regulation and dopamine supersensitivity in young rats. Journal of Psychopharmacology, 2014, 28, 376-386.	2.0	23
13	Interoceptive conditioning with nicotine using extinction and re-extinction to assess stimulus similarity with bupropion. Neuropharmacology, 2014, 86, 181-191.	2.0	9
14	Iptakalim attenuates self-administration and acquired goal-tracking behavior controlled by nicotine. Neuropharmacology, 2013, 75, 138-144.	2.0	24
15	Conditioned Response Evoked by Nicotine Conditioned Stimulus Preferentially Induces c-Fos Expression in Medial Regions of Caudate-Putamen. Neuropsychopharmacology, 2012, 37, 876-884.	2.8	14
16	Disentangling the nature of the nicotine stimulus. Behavioural Processes, 2012, 90, 28-33.	0.5	21
17	Dopamine receptor inactivation in the caudate-putamen differentially affects the behavior of preweanling and adult rats. Neuroscience, 2012, 226, 427-440.	1.1	14
18	Post-training cocaine exposure facilitates spatial memory consolidation in C57BL/6 mice. Hippocampus, 2012, 22, 802-813.	0.9	40

#	ARTICLE	IF	CITATIONS
19	Importance of D1 and D2 receptors in the dorsal caudate-putamen for the locomotor activity and stereotyped behaviors of preweanling rats. <i>Neuroscience</i> , 2011, 183, 121-133.	1.1	20
20	Acute and long-term response of dopamine nigrostriatal synapses to a single, low-dose episode of 3-nitropropionic acid-mediated chemical hypoxia. <i>Synapse</i> , 2011, 65, 339-350.	0.6	8
21	Effects of repeated and acute aripiprazole or haloperidol treatment on dopamine synthesis in the dorsal striatum of young rats: comparison to adult rats. <i>Journal of Neural Transmission</i> , 2010, 117, 573-583.	1.4	8
22	Age-dependent effects of $\mu$ -opioid receptor stimulation on cocaine-induced stereotyped behaviors and dopamine overflow in the caudate-putamen: an in vivo microdialysis study. <i>Neuroscience</i> , 2010, 169, 203-213.	1.1	10
23	Persistence of one-trial cocaine-induced behavioral sensitization in young rats: regional differences in Fos immunoreactivity. <i>Psychopharmacology</i> , 2009, 203, 617-628.	1.5	15
24	Importance of environmental context for one- and three-trial cocaine-induced behavioral sensitization in preweanling rats. <i>Psychopharmacology</i> , 2009, 206, 377-388.	1.5	14
25	Effects of dorsal striatal infusions of R( $\alpha$ )-propylnorapomorphine on $\mu$ -opioid-mediated locomotor activity in the young rat: Possible role of the indirect pathway. <i>Neuroscience</i> , 2008, 155, 603-612.	1.1	7
