#	ARTICLE	IF	CITATIONS
1	Three-variable systems: An integrative moderation and mediation framework for developmental psychopathology. <i>Development and Psychopathology</i> , 2023, 35, 12-23.	1.4	6
2	The development of depressogenic self-schemas: Associations with children's regional grey matter volume in ventrolateral prefrontal cortex. <i>Development and Psychopathology</i> , 2023, 35, 1000-1010.	1.4	2
3	Dynamic risk for first onset of depressive disorders in adolescence: does change matter?. <i>Psychological Medicine</i> , 2023, 53, 2352-2360.	2.7	3
4	Is adult separation anxiety associated with offspring risk for internalizing psychiatric problems?. <i>Psychological Medicine</i> , 2023, 53, 3168-3177.	2.7	2
5	Is the distinction between tonic and phasic irritability meaningful in 3-year-old children?. <i>European Child and Adolescent Psychiatry</i> , 2023, 32, 1755-1763.	2.8	6
6	Peer Victimization in Late Childhood Moderates the Relationship between Childhood Fear/Inhibition & Adolescent Externalizing Symptoms. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2022, 51, 566-576.	2.2	1
7	Dynamic interplay between life events and course of psychotic disorders: 10-year longitudinal study following first admission. <i>Psychological Medicine</i> , 2022, 52, 2116-2123.	2.7	6
8	Increases in depression and anxiety symptoms in adolescents and young adults during the COVID-19 pandemic. <i>Psychological Medicine</i> , 2022, 52, 3222-3230.	2.7	354
9	Structural Connectivity Between Rostral Anterior Cingulate Cortex and Amygdala Predicts First Onset of Depressive Disorders in Adolescence. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2022, 7, 249-255.	1.1	4
10	Examination of developmental pathways from preschool temperament to early adolescent ADHD symptoms through initial responsiveness to reward. <i>Development and Psychopathology</i> , 2022, 34, 841-853.	1.4	11
11	Observational measures of early irritability predict children's psychopathology risk. <i>Development and Psychopathology</i> , 2022, 34, 1531-1543.	1.4	2
12	The role of environmental sensitivity in the development of rumination and depressive symptoms in childhood: a longitudinal study. <i>European Child and Adolescent Psychiatry</i> , 2022, 31, 1815-1825.	2.8	16
13	Bidirectional and transactional relationships between parenting styles and child symptoms of ADHD, ODD, depression, and anxiety over 6 years. <i>Development and Psychopathology</i> , 2022, 34, 1400-1411.	1.4	13
14	Preschool Irritability Predicts Adolescent Psychopathology and Functional Impairment: A 12-Year Prospective Study. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2022, 61, 554-564.e1.	0.3	24
15	Early Timing and Determinants of the Sexual Orientation Disparity in Internalizing Psychopathology: A Prospective Cohort Study from Ages 3 to 15. <i>Journal of Youth and Adolescence</i> , 2022, 51, 458-470.	1.9	15
16	Depression in 3/6-year-old children: clinical and psychosocial outcomes in later childhood and adolescence. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2022, 63, 984-991.	3.1	5
17	Temperament and psychopathology in early childhood predict body dissatisfaction and eating disorder symptoms in adolescence. <i>Behaviour Research and Therapy</i> , 2022, 151, 104039.	1.6	12
18	The Effect of Neighborhood-level Resources on Children's Physical Development: Trajectories of Body Mass Index and Pubertal Development and the Influence of Child Biological Sex. <i>Journal of Youth and Adolescence</i> , 2022, 51, 967-983.	1.9	7

#	ARTICLE	IF	CITATIONS
19	Is personality stable and symptoms fleeting? A longitudinal comparison in adolescence. <i>Journal of Research in Personality</i> , 2022, 97, 104190.	0.9	3
20	The influence of maternal anxiety and cortisol during pregnancy on childhood anxiety symptoms. <i>Psychoneuroendocrinology</i> , 2022, 139, 105704.	1.3	11
21	Offspring irritability: associations with parental psychopathology and personality. <i>European Child and Adolescent Psychiatry</i> , 2022, , .	2.8	2
22	Agreement, Stability, and Validity of Parent- and Youth-Reported Anxiety Symptoms from Childhood to Adolescence. <i>Research on Child and Adolescent Psychopathology</i> , 2022, 50, 1445-1455.	1.4	4
23	Greater Cumulative Lifetime Stressor Exposure Predicts Blunted Reward Positivity in Adolescent Girls Followed for 2 Years. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2022, 7, 1017-1024.	1.1	5
24	Structural Brain Correlates of Childhood Inhibited Temperament: An ENIGMA-Anxiety Mega-analysis. <i>Journal of the American Academy of Child and Adolescent Psychiatry</i> , 2022, 61, 1182-1188.	0.3	2
25	Developmental antecedents of social anhedonia: The roles of early temperament and sex. <i>Development and Psychopathology</i> , 2021, 33, 363-371.	1.4	5
26	Hippocampal subregion volume in high-risk offspring is associated with increases in depressive symptoms across the transition to adolescence. <i>Journal of Affective Disorders</i> , 2021, 281, 358-366.	2.0	7
27	Neural Response to Rewards, Stress and Sleep Interact to Prospectively Predict Depressive Symptoms in Adolescent Girls. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2021, 50, 131-140.	2.2	39
28	Developmental pathways from preschool irritability to multifinality in early adolescence: the role of diurnal cortisol. <i>Psychological Medicine</i> , 2021, 51, 761-769.	2.7	11
29	Reward processing and depression: Current findings and future directions. , 2021, , 425-433.		2
30	Latent Class Analysis of Adolescent Psychosocial Functioning and Course of Major Depression. <i>Research on Child and Adolescent Psychopathology</i> , 2021, 49, 963-973.	1.4	2
31	Differential outcomes of tonic and phasic irritability in adolescent girls. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2021, 62, 1220-1227.	3.1	24
32	Multiple domains of risk factors for first onset of depression in adolescent girls. <i>Journal of Affective Disorders</i> , 2021, 283, 20-29.	2.0	25
33	Mental health and clinical psychological science in the time of COVID-19: Challenges, opportunities, and a call to action.. <i>American Psychologist</i> , 2021, 76, 409-426.	3.8	408
34	Early Predictors of Adolescent Irritability. <i>Child and Adolescent Psychiatric Clinics of North America</i> , 2021, 30, 475-490.	1.0	9
35	A Brief Early Childhood Screening Tool for Psychopathology Risk in Primary Care: The Moderating Role of Poverty. <i>Journal of Pediatrics</i> , 2021, 236, 164-171.	0.9	1
36	A Transdiagnostic Perspective on Youth Irritability. <i>Current Directions in Psychological Science</i> , 2021, 30, 437-443.	2.8	36

#	ARTICLE	IF	CITATIONS
37	Reliability and Validity of Preschool Feelings Checklist. <i>Research on Child and Adolescent Psychopathology</i> , 2021, 49, 367-379.	1.4	3
38	Do Genes Explain Sexual Minority Mental Health Disparities?. <i>Archives of Sexual Behavior</i> , 2021, 50, 731-737.	1.2	17
39	Parsing between- and within-person effects: Longitudinal associations between irritability and internalizing and externalizing problems from early childhood through adolescence. <i>Development and Psychopathology</i> , 2021, , 1-11.	1.4	1
40	Childhood temperament as a predictor of adolescent nonsuicidal self-injury. <i>Development and Psychopathology</i> , 2021, , 1-8.	1.4	1
41	Early Childhood Psychopathology Prospectively Predicts Social Functioning in Early Adolescence. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2020, 49, 353-364.	2.2	17
42	Early Childhood Parenting Predicts Late Childhood Brain Functional Connectivity During Emotion Perception and Reward Processing. <i>Child Development</i> , 2020, 91, 110-128.	1.7	62
43	Developmental trajectory of the late positive potential: Using temporal-spatial PCA to characterize within-subject developmental changes in emotional processing. <i>Psychophysiology</i> , 2020, 57, e13478.	1.2	8
44	Persistent Depressive Disorder: Commentary on Parker and Malhi. <i>Canadian Journal of Psychiatry</i> , 2020, 65, 16-18.	0.9	4
45	Stressful life events moderate the effect of neural reward responsiveness in childhood on depressive symptoms in adolescence. <i>Psychological Medicine</i> , 2020, 50, 1548-1555.	2.7	40
46	Dimensions of irritability in adolescents: longitudinal associations with psychopathology in adulthood. <i>Psychological Medicine</i> , 2020, 50, 2759-2767.	2.7	35
47	Intrinsic neural circuitry of depression in adolescent females. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2020, 61, 480-491.	3.1	6
48	Life stress moderates the effects of preschool behavioral inhibition on anxiety in early adolescence. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2020, 61, 167-174.	3.1	5
49	Testing explanatory models of the interplay between depression, neuroticism, and stressful life events: a dynamic trait-stress generation approach. <i>Psychological Medicine</i> , 2020, 50, 2780-2789.	2.7	19
50	The number of biological parents with alcohol use disorder histories and risk to offspring through age 30. <i>Addictive Behaviors</i> , 2020, 102, 106196.	1.7	9
51	Are Parental Alcohol Use Disorder Histories Associated With Offspring Behavior Problems at Age 2?. <i>Journal of Studies on Alcohol and Drugs</i> , 2020, 81, 511-519.	0.6	2
52	Review of dysthymia and persistent depressive disorder: history, correlates, and clinical implications. <i>Lancet Psychiatry</i> , 2020, 7, 801-812.	3.7	94
53	Effects of Maternal Depression and Mother-Child Relationship Quality in Early Childhood on Neural Reactivity to Rejection and Peer Stress in Adolescence: A 9-Year Longitudinal Study. <i>Clinical Psychological Science</i> , 2020, 8, 657-672.	2.4	8
54	Psychotherapy or medication for depression? Using individual symptom meta-analyses to derive a Symptom-Oriented Therapy (SOrT) metric for a personalised psychiatry. <i>BMC Medicine</i> , 2020, 18, 170.	2.3	21

#	ARTICLE	IF	CITATIONS
55	Developmental trajectories to reduced activation of positive valence systems: A review of biological and environmental contributions. <i>Developmental Cognitive Neuroscience</i> , 2020, 43, 100791.	1.9	40
56	Best practices in research mentoring in clinical science.. <i>Journal of Abnormal Psychology</i> , 2020, 129, 70-81.	2.0	21
57	Reciprocal effects of maternal and child internalizing symptoms before and after a natural disaster.. <i>Journal of Family Psychology</i> , 2020, 34, 836-845.	1.0	10
58	Psychometric analysis of the adult separation anxiety symptom questionnaire: Item functioning and invariance across gender and time.. <i>Psychological Assessment</i> , 2020, 32, 582-593.	1.2	4
59	Offspring of Mothers With Histories of Chronic and Non-chronic Depression: Symptom Trajectories From Ages 6 to 15. <i>Frontiers in Psychiatry</i> , 2020, 11, 601779.	1.3	3
60	Reduced reward responsiveness moderates the effect of maternal depression on depressive symptoms in offspring: evidence across levels of analysis. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2019, 60, 82-90.	3.1	78
61	Stability and change in emotional processing across development: A 6â€year longitudinal investigation using eventâ€related potentials. <i>Psychophysiology</i> , 2019, 56, e13438.	1.2	21
62	The short-term reliability and long-term stability of salivary immune markers. <i>Brain, Behavior, and Immunity</i> , 2019, 81, 650-654.	2.0	23
63	Depression Severity Over 27 Months in Adolescent Girls Is Predicted by Stress-Linked Cortical Morphology. <i>Biological Psychiatry</i> , 2019, 86, 769-778.	0.7	16
64	Reactive and Regulatory Temperament: Longitudinal Associations with Internalizing and Externalizing Symptoms through Childhood. <i>Journal of Abnormal Child Psychology</i> , 2019, 47, 1771-1784.	3.5	11
65	Posterior parietal influences on visual network specialization during development: An fMRI study of functional connectivity in children ages 9 to 12. <i>Neuropsychologia</i> , 2019, 127, 158-170.	0.7	6
66	Parental depression moderates the relationships of cortisol and testosterone with children's symptoms. <i>Journal of Affective Disorders</i> , 2019, 251, 42-51.	2.0	9
67	Structural correlates of the orbitofrontal cortex and amygdala and personality in female adolescents. <i>Psychophysiology</i> , 2019, 56, e13376.	1.2	12
68	Parenting style moderates the effects of exposure to natural disaster-related stress on the neural development of reactivity to threat and reward in children. <i>Development and Psychopathology</i> , 2019, 31, 1589-1598.	1.4	11
69	Delineating and validating higher-order dimensions of psychopathology in the Adolescent Brain Cognitive Development (ABCD) study. <i>Translational Psychiatry</i> , 2019, 9, 261.	2.4	107
70	Family Aggregation of Substance Use Disorders: Substance Specific, Nonspecific, and Intrafamilial Sources of Risk. <i>Journal of Studies on Alcohol and Drugs</i> , 2019, 80, 462-471.	0.6	4
71	Sensitivity to Peer Feedback in Young Adolescents with Symptoms of ADHD: Examination of Neurophysiological and Self-Report Measures. <i>Journal of Abnormal Child Psychology</i> , 2019, 47, 605-617.	3.5	39
72	Positive and Negative Emotionality at Age 3 Predicts Change in Frontal EEG Asymmetry across Early Childhood. <i>Journal of Abnormal Child Psychology</i> , 2019, 47, 209-219.	3.5	9

#	ARTICLE	IF	CITATIONS
73	Reward processing and future life stress: Stress generation pathway to depression.. Journal of Abnormal Psychology, 2019, 128, 305-314.	2.0	32
74	Observer-rated environmental sensitivity moderates children's response to parenting quality in early childhood.. Developmental Psychology, 2019, 55, 2389-2402.	1.2	47
75	Personality Correlates of Self-Injury in Adolescent Girls: Disentangling the Effects of Lifetime Psychopathology. Journal of Abnormal Child Psychology, 2018, 46, 1677-1685.	3.5	11
76	Prospective predictors of first-onset depressive disorders in adolescent females with anxiety disorders. Journal of Affective Disorders, 2018, 235, 176-183.	2.0	6
77	Preschool psychiatric disorders: homotypic and heterotypic continuity through middle childhood and early adolescence. Psychological Medicine, 2018, 48, 2159-2168.	2.7	60
78	The Stability of Temperament from Early Childhood to Early Adolescence: A Multi-Method, Multi-Informant Examination. European Journal of Personality, 2018, 32, 128-145.	1.9	36
79	Temperament Distinguishes Persistent/Recurrent from Remitting Anxiety Disorders Across Early Childhood. Journal of Clinical Child and Adolescent Psychology, 2018, 47, 1004-1013.	2.2	14
80	Depression symptom dimensions and asymmetrical frontal cortical activity while anticipating reward. Psychophysiology, 2018, 55, e12892.	1.2	37
81	Reliability and validity of severity dimensions of psychopathology assessed using the Structured Clinical Interview for DSM-5 (SCID). International Journal of Methods in Psychiatric Research, 2018, 27, .	1.1	172
82	Time-Frequency Reward-Related Delta Prospectively Predicts the Development of Adolescent-Onset Depression. Biological Psychiatry: Cognitive Neuroscience and Neuroimaging, 2018, 3, 41-49.	1.1	27
83	Trait and facet-level predictors of first-onset depressive and anxiety disorders in a community sample of adolescent girls. Psychological Medicine, 2018, 48, 1282-1290.	2.7	45
84	Developmental Origins of Rumination in Middle Childhood: The Roles of Early Temperament and Positive Parenting. Journal of Clinical Child and Adolescent Psychology, 2018, 47, S409-S420.	2.2	21
85	Associations between observed temperament in preschoolers and parent psychopathology. Personality and Mental Health, 2018, 12, 131-144.	0.6	6
86	Is Parent-Child Disagreement on Child Anxiety Explained by Differences in Measurement Properties? An Examination of Measurement Invariance Across Informants and Time. Frontiers in Psychology, 2018, 9, 1295.	1.1	18
87	Extraversion, neuroticism, and the electrocortical response to monetary rewards in adolescent girls. Biological Psychology, 2018, 136, 111-118.	1.1	15
88	Cognitive-Behavioral Analysis System of Psychotherapy, Drug, or Their Combination for Persistent Depressive Disorder: Personalizing the Treatment Choice Using Individual Participant Data Network Metaregression. Psychotherapy and Psychosomatics, 2018, 87, 140-153.	4.0	68
89	Commentary: Frying pan to fire? Commentary on Stringaris et al. (2018). Journal of Child Psychology and Psychiatry and Allied Disciplines, 2018, 59, 740-743.	3.1	17
90	Patterns of neuroendocrine coupling in 9-year-old children: Effects of sex, body-mass index, and life stress. Biological Psychology, 2018, 132, 252-259.	1.1	11

#	ARTICLE	IF	CITATIONS
91	Comorbidity and continuity of depression and conduct problems from elementary school to adolescence.. <i>Journal of Abnormal Psychology</i> , 2018, 127, 326-337.	2.0	29
92	Clinical features associated with an increased risk for alcohol use disorders among family members.. <i>Psychology of Addictive Behaviors</i> , 2018, 32, 628-638.	1.4	5
93	Distinguishing types of social withdrawal in children: Internalizing and externalizing outcomes of conflicted shyness versus social disinterest across childhood. <i>Journal of Research in Personality</i> , 2017, 67, 27-35.	0.9	46
94	Parental Predictors of Children's Shame and Guilt at Age 6 in a Multimethod, Longitudinal Study. <i>Journal of Clinical Child and Adolescent Psychology</i> , 2017, 46, 721-731.	2.2	13
95	Convergence in patient's therapist therapeutic alliance ratings and its relation to outcome in chronic depression treatment. <i>Psychotherapy Research</i> , 2017, 27, 410-424.	1.1	47
96	Early childhood cortisol reactivity moderates the effects of parent-child relationship quality on the development of children's temperament in early childhood. <i>Developmental Science</i> , 2017, 20, e12378.	1.3	17
97	Alterations in visual cortical activation and connectivity with prefrontal cortex during working memory updating in major depressive disorder. <i>NeuroImage: Clinical</i> , 2017, 14, 43-53.	1.4	58
98	A comparison of structural connectivity in anxious depression versus non-anxious depression. <i>Journal of Psychiatric Research</i> , 2017, 89, 38-47.	1.5	30
99	Behavioral observations of positive and negative valence systems in early childhood predict physiological measures of emotional processing three years later. <i>Journal of Affective Disorders</i> , 2017, 216, 70-77.	2.0	15
100	Orbitofrontal Cortex Activity and Connectivity Predict Future Depression Symptoms in Adolescence. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2017, 2, 610-618.	1.1	21
101	Diurnal Cortisol Interacts With Stressful Events to Prospectively Predict Depressive Symptoms in Adolescent Girls. <i>Journal of Adolescent Health</i> , 2017, 61, 767-772.	1.2	22
102	Neural responses to social and monetary reward in early adolescence and emerging adulthood. <i>Psychophysiology</i> , 2017, 54, 1786-1799.	1.2	64
103	Social processing in early adolescence: Associations between neurophysiological, self-report, and behavioral measures. <i>Biological Psychology</i> , 2017, 128, 55-62.	1.1	42
104	The Stony Brook Temperament Study: Early Antecedents and Pathways to Emotional Disorders. <i>Child Development Perspectives</i> , 2017, 11, 257-263.	2.1	63
105	Gene-environment correlations in the cross-generational transmission of parenting: Grandparenting moderates the effect of child 5-HTTLPR genotype on mothers' parenting. <i>Social Development</i> , 2017, 26, 724-739.	0.8	10
106	Neurophysiological Processing of Emotion in Children of Mothers with a History of Depression: the Moderating Role of Preschool Persistent Irritability. <i>Journal of Abnormal Child Psychology</i> , 2017, 45, 1599-1608.	3.5	12
107	Etiologic specificity of waking Cortisol: Links with maternal history of depression and anxiety in adolescent girls. <i>Journal of Affective Disorders</i> , 2017, 208, 103-109.	2.0	6
108	The role of parental psychopathology and personality in adolescent non-suicidal self-injury. <i>Journal of Psychiatric Research</i> , 2017, 85, 15-23.	1.5	33

#	ARTICLE	IF	CITATIONS
109	Preschool negative emotionality predicts activity and connectivity of the fusiform face area and amygdala in later childhood. <i>Social Cognitive and Affective Neuroscience</i> , 2017, 12, 1511-1519.	1.5	19
110	Error-related brain activity is related to aversive potentiation of the startle response in children, but only the ERN is associated with anxiety disorders.. <i>Emotion</i> , 2017, 17, 487-496.	1.5	24
111	Self-criticism and dependency in female adolescents: Prediction of first onsets and disentangling the relationships between personality, stressful life events, and internalizing psychopathology.. <i>Journal of Abnormal Psychology</i> , 2017, 126, 1029-1043.	2.0	36
112	Side Effects to Antidepressant Treatment in Patients With Depression and Comorbid Panic Disorder. <i>Journal of Clinical Psychiatry</i> , 2017, 78, 433-440.	1.1	29
113	Blunted Neural Response to Rewards as a Prospective Predictor of the Development of Depression in Adolescent Girls. <i>American Journal of Psychiatry</i> , 2016, 173, 1223-1230.	4.0	194
114	Error-related negativity (ERN) and sustained threat: Conceptual framework and empirical evaluation in an adolescent sample. <i>Psychophysiology</i> , 2016, 53, 372-385.	1.2	143
115	Cognitive-Behavioural Analysis System of Psychotherapy (CBASP), a drug, or their combination: differential therapeutics for persistent depressive disorder: a study protocol of an individual participant data network meta-analysis. <i>BMJ Open</i> , 2016, 6, e011769.	0.8	15
116	Transdiagnostic factors and pathways to multifinality: The error-related negativity predicts whether preschool irritability is associated with internalizing versus externalizing symptoms at age 9. <i>Development and Psychopathology</i> , 2016, 28, 913-926.	1.4	32
117	Examining the concurrent and longitudinal relationship between diurnal cortisol rhythms and conduct problems during childhood. <i>Psychoneuroendocrinology</i> , 2016, 71, 147-154.	1.3	32
118	Loss of Temper and Irritability: The Relationship to Tantrums in a Community and Clinical Sample. <i>Journal of Child and Adolescent Psychopharmacology</i> , 2016, 26, 114-122.	0.7	42
119	Elevated cortisol in healthy female adolescent offspring of mothers with posttraumatic stress disorder. <i>Journal of Anxiety Disorders</i> , 2016, 40, 37-43.	1.5	12
120	Higher- and lower-order factor analyses of the Children's Behavior Questionnaire in early and middle childhood.. <i>Psychological Assessment</i> , 2016, 28, 92-108.	1.2	20
121	Depression risk and electrocortical reactivity during self-referential emotional processing in 8 to 14 year-old girls.. <i>Journal of Abnormal Psychology</i> , 2016, 125, 607-619.	2.0	61
122	Developmental changes in electroencephalographic frontal asymmetry in young children at risk for depression. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2016, 57, 1075-1082.	3.1	33
123	Longitudinal Associations Between Preschool Disruptive Mood Dysregulation Disorder Symptoms and Neural Reactivity to Monetary Reward During Preadolescence. <i>Journal of Child and Adolescent Psychopharmacology</i> , 2016, 26, 131-137.	0.7	40
124	Neural Reactivity to Emotional Stimuli Prospectively Predicts the Impact of a Natural Disaster on Psychiatric Symptoms in Children. <i>Biological Psychiatry</i> , 2016, 80, 381-389.	0.7	52
125	Load-related brain activation predicts spatial working memory performance in youth aged 9-12 and is associated with executive function at earlier ages. <i>Developmental Cognitive Neuroscience</i> , 2016, 17, 1-9.	1.9	20
126	Preschoolers' Psychopathology and Temperament Predict Mothers' Later Mood Disorders. <i>Journal of Abnormal Child Psychology</i> , 2016, 44, 421-432.	3.5	9

#	ARTICLE	IF	CITATIONS
127	Course of depression in a 10-year prospective study: Evidence for qualitatively distinct subgroups.. Journal of Abnormal Psychology, 2016, 125, 337-348.	2.0	42
128	Negative emotionality and its facets moderate the effects of exposure to Hurricane Sandy on children's postdisaster depression and anxiety symptoms.. Journal of Abnormal Psychology, 2016, 125, 471-481.	2.0	55
129	Change in patients' interpersonal impacts as a mediator of the alliance-outcome association in treatment for chronic depression.. Journal of Consulting and Clinical Psychology, 2016, 84, 1135-1144.	1.6	20
130	The structural and rank-order stability of temperament in young children based on a laboratory-observational measure.. Psychological Assessment, 2015, 27, 1388-1401.	1.2	32
