#	Article	IF	CITATIONS
1	Respective Mediating Effects of Social Position and Work Environment on the Incidence of Common Cardiovascular Risk Factors. Journal of the American Heart Association, 2022, 11, e021373.	3.7	4
2	Association between FIASMA psychotropic medications and reduced risk of intubation or death in individuals with psychiatric disorders hospitalized for severe COVID-19: an observational multicenter study. Translational Psychiatry, 2022, 12, 90.	4.8	23
3	Retirement age does not modify the association of prior working conditions with self-rated health and mortality in retirees: results from a prospective study of retired French workers. International Archives of Occupational and Environmental Health, 2022, 95, 1921-1934.	2.3	3
4	Association Between FIASMAs and Reduced Risk of Intubation or Death in Individuals Hospitalized for Severe COVIDâ€19: An Observational Multicenter Study. Clinical Pharmacology and Therapeutics, 2021, 110, 1498-1511.	4.7	59
5	Depressive symptoms and non-adherence to treatable cardiovascular risk factors' medications in the CONSTANCES cohort. European Heart Journal - Cardiovascular Pharmacotherapy, 2021, 7, 280-286.	3.0	5
6	Hydroxyzine Use and Mortality in Patients Hospitalized for COVID-19: A Multicenter Observational Study. Journal of Clinical Medicine, 2021, 10, 5891.	2.4	9
7	Association between unemployment and the co-occurrence and clustering of common risky health behaviors: Findings from the Constances cohort. PLoS ONE, 2020, 15, e0232262.	2.5	10
8	Hostility, depression and incident cardiac events in the GAZEL cohort. Journal of Affective Disorders, 2020, 266, 381-386.	4.1	2
9	Longer schooling but not better off? A quasi-experimental study of the effect of compulsory schooling on biomarkers in France. Social Science and Medicine, 2019, 220, 379-386.	3.8	26
10	Depression, treatable cardiovascular risk factors and incident cardiac events in the Gazel cohort. International Journal of Cardiology, 2019, 284, 90-95.	1.7	20
11	Cardiovascular risk goes up as your mood goes down: Interaction of depression and socioeconomic status in determination of cardiovascular risk in the CONSTANCES cohort. International Journal of Cardiology, 2018, 262, 99-105.	1.7	17
12	Work environment mediates a large part of social inequalities in the incidence of several common cardiovascular risk factors: Findings from the Gazel cohort. Social Science and Medicine, 2018, 216, 59-66.	3.8	24
13	Le chômageÂ: un problème de santé publique majeur. La Revue De L Ires, 2018, nº 91-92, 141-154.	0.3	13
14	Primary Cardiovascular Disease Risk Factors Predicted by Poor Working Conditions in the GAZEL Cohort. American Journal of Epidemiology, 2017, 186, 815-823.	3.4	9
15	A Global View of the Relationships between the Main Behavioural and Clinical Cardiovascular Risk Factors in the GAZEL Prospective Cohort. PLoS ONE, 2016, 11, e0162386.	2.5	14
16	Unemployment is associated with high cardiovascular event rate and increased all-cause mortality in middle-aged socially privileged individuals. International Archives of Occupational and Environmental Health, 2015, 88, 707-716.	2.3	55
17	Distinctive unhealthy eating pattern in free-living middle-aged hypertensives when compared with dyslipidemic or overweight patients. Journal of Hypertension, 2013, 31, 1554-1563.	0.5	3
18	Health insurance coverage is the single most prominent socioeconomic factor associated with cardiovascular drug delivery in the French population. Journal of Hypertension, 2012, 30, 617-623.	0.5	7

#	Article	IF	CITATIONS
19	Evaluation of the agreement between guidelines and initial antihypertensive drug treatment using a national health care reimbursement database. Journal of Evaluation in Clinical Practice, 2012, 18, 623-629.	1.8	8
20	Dietary sources and correlates of sodium and potassium intakes in the French general population. European Journal of Clinical Nutrition, 2009, 63, 1169-1175.	2.9	80
