#	ARTICLE	IF	CITATIONS
1	Efficient nickel and copper-based catalysts supported on modified graphite materials for the hydrogen production from formic acid decomposition. <i>Applied Catalysis A: General</i> , 2022, 629, 118419.	2.2	18
2	Effect of the Carbon Support and Conditions on the Carbothermal Synthesis of Cu-Molybdenum Carbide and Its Application on CO ₂ Hydrogenation to Methanol. <i>Nanomaterials</i> , 2022, 12, 1048.	1.9	3
3	Promotion of Ru or Ni on Alumina Catalysts with a Basic Metal for CO ₂ Hydrogenation: Effect of the Type of Metal (Na, K, Ba). <i>Nanomaterials</i> , 2022, 12, 1052.	1.9	6
4	Tandem catalysts for the selective hydrogenation of butadiene with hydrogen generated from the decomposition of formic acid. <i>Chemical Communications</i> , 2021, 57, 6479-6482.	2.2	3
5	Carbothermally generated copper-molybdenum carbide supported on graphite for the CO ₂ hydrogenation to methanol. <i>Catalysis Science and Technology</i> , 2021, 11, 4051-4059.	2.1	7
6	Preparation, Characterization, and Activity of Pd/PSS-Modified Membranes in the Low Temperature Dry Reforming of Methane with and without Addition of Extra Steam. <i>Membranes</i> , 2021, 11, 518.	1.4	1
7	Study of the Interaction of an Iron Phthalocyanine Complex over Surface Modified Carbon Nanotubes. <i>Materials</i> , 2021, 14, 4067.	1.3	4
8	Tunable selectivity of Ni catalysts in the hydrogenation reaction of 5-hydroxymethylfurfural in aqueous media: Role of the carbon supports. <i>Carbon</i> , 2021, 182, 265-275.	5.4	28
9	Effect of N-doping and carbon nanostructures on NiCu particles for hydrogen production from formic acid. <i>Applied Catalysis B: Environmental</i> , 2021, 298, 120604.	10.8	18
10	Ru nanoparticles supported on N-doped reduced graphene oxide as valuable catalyst for the selective aerobic oxidation of benzyl alcohol. <i>Catalysis Today</i> , 2020, 357, 8-14.	2.2	30
11	Tracking the paths for the sucrose transformations over bifunctional Ru-POM/AC catalysts. <i>Catalysis Today</i> , 2020, 357, 113-121.	2.2	4
12	Optimization of Cu-Ni-Mn-catalysts for the conversion of ethanol to butanol. <i>Catalysis Today</i> , 2020, 357, 132-142.	2.2	13
13	Effect of Mo promotion on the activity and selectivity of Ru/Graphite catalysts for Fischer-Tropsch synthesis. <i>Catalysis Today</i> , 2020, 357, 185-192.	2.2	6
14	Cu and Pd nanoparticles supported on a graphitic carbon material as bifunctional HER/ORR electrocatalysts. <i>Catalysis Today</i> , 2020, 357, 279-290.	2.2	31
15	Taking advantage of sulfur impurities present in commercial carbon nanofibers to generate selective palladium catalysts. <i>Carbon</i> , 2020, 157, 120-129.	5.4	5
16	Reductive degradation of 2,4-dichlorophenoxyacetic acid using Pd/carbon with bifunctional mechanism. <i>Catalysis Today</i> , 2020, 357, 361-367.	2.2	11
17	Effect of Cu and Cs in the $\hat{1}^2$ -Mo ₂ C System for CO ₂ Hydrogenation to Methanol. <i>Catalysts</i> , 2020, 10, 1213.	1.6	18
18	Selective hydrogen production from formic acid decomposition over Mo carbides supported on carbon materials. <i>Catalysis Science and Technology</i> , 2020, 10, 6790-6799.	2.1	22

#	ARTICLE	IF	CITATIONS
19	Comparative Study of Different Acidic Surface Structures in Solid Catalysts Applied for the Isobutene Dimerization Reaction. <i>Nanomaterials</i> , 2020, 10, 1235.	1.9	10
20	Application of New Nanoparticle Structures as Catalysts. <i>Nanomaterials</i> , 2020, 10, 1686.	1.9	0
21	Continuous Catalytic Condensation of Ethanol into 1-Butanol: The Role of Metallic Oxides (M = MgO,) <i>Tj ETQq1 1</i> 0.784314 <i>rgBT /Ov</i> 59, 16626-16636.	1.8	12
22	Adsorption capacity of different types of carbon nanotubes towards metronidazole and dimetridazole antibiotics from aqueous solutions: effect of morphology and surface chemistry. <i>Environmental Science and Pollution Research</i> , 2020, 27, 17123-17137.	2.7	35
23	Effect of surface area and physicalâ€“chemical properties of graphite and graphene-based materials on their adsorption capacity towards metronidazole and trimethoprim antibiotics in aqueous solution. <i>Chemical Engineering Journal</i> , 2020, 402, 126155.	6.6	67
24	Comparison of Pd and Pd4S based catalysts for partial hydrogenation of external and internal butynes. <i>Journal of Catalysis</i> , 2020, 383, 51-59.	3.1	17
25	Clean 3,4-Dihydropyrimidones Synthesis via Biginelli Reaction over Supported Molybdenum: Structural and Textural Characteristic of $\pm\text{MoO}_3$. <i>Bulletin of Chemical Reaction Engineering and Catalysis</i> , 2020, 15, 698-713.	0.5	4
26	Direct sulfation of a Zr-based metal-organic framework to attain strong acid catalysts. <i>Microporous and Mesoporous Materials</i> , 2019, 290, 109686.	2.2	24
27	Hydrogen Production by Formic Acid Decomposition over Ca Promoted Ni/SiO ₂ Catalysts: Effect of the Calcium Content. <i>Nanomaterials</i> , 2019, 9, 1516.	1.9	12
28	Cu-based N-doped/undoped graphene nanocomposites as electrocatalysts for the oxygen reduction. <i>Journal of Applied Electrochemistry</i> , 2019, 49, 693-703.	1.5	3
29	Comparative study of Cu, Ag and Ag-Cu catalysts over graphite in the ethanol dehydrogenation reaction: Catalytic activity, deactivation and regeneration. <i>Applied Catalysis A: General</i> , 2019, 576, 54-64.	2.2	28
30	Upgrading the Properties of Reduced Graphene Oxide and Nitrogen-Doped Reduced Graphene Oxide Produced by Thermal Reduction toward Efficient ORR Electrocatalysts. <i>Nanomaterials</i> , 2019, 9, 1761.	1.9	20
31	Effect of different promoter precursors in a model Ru-Cs/graphite system on the catalytic selectivity for Fischer-Tropsch reaction. <i>Applied Surface Science</i> , 2018, 447, 307-314.	3.1	8
32	Promoter effect of alkalis on CuO/CeO ₂ /carbon nanotubes systems for the PROx reaction. <i>Catalysis Today</i> , 2018, 301, 141-146.	2.2	17
33	Cooperative action of heteropolyacids and carbon supported Ru catalysts for the conversion of cellulose. <i>Catalysis Today</i> , 2018, 301, 65-71.	2.2	39
34	When the nature of surface functionalities on modified carbon dominates the dispersion of palladium hydrogenation catalysts. <i>Catalysis Today</i> , 2018, 301, 248-257.	2.2	20
35	Polyoxotungstate@Carbon Nanocomposites As Oxygen Reduction Reaction (ORR) Electrocatalysts. <i>Langmuir</i> , 2018, 34, 6376-6387.	1.6	41
36	Fructose Transformations in Ethanol using Carbon Supported Polyoxometalate Acidic Solids for 5â€“ethoxymethylfurfural Production. <i>ChemCatChem</i> , 2018, 10, 3746-3753.	1.8	10

#	ARTICLE	IF	CITATIONS
37	Continuous Gas-Phase Condensation of Bioethanol to 1-Butanol over Bifunctional Pd/Mg and Pd/Mg-Carbon Catalysts. <i>ChemSusChem</i> , 2018, 11, 3502-3511.	3.6	14
38	Optimization of ruthenium based catalysts for the aqueous phase hydrogenation of furfural to furfuryl alcohol. <i>Applied Catalysis A: General</i> , 2018, 563, 177-184.	2.2	45
39	New Insights in the Development of Carbon Supported Ruthenium Catalysts for Hydrogenation of Levulinic Acid. <i>Current Catalysis</i> , 2018, 7, 129-137.	0.5	3
40	Multifunctional mixed valence N-doped CNT@MFe ₂ O ₄ hybrid nanomaterials: from engineered one-pot coprecipitation to application in energy storage paper supercapacitors. <i>Nanoscale</i> , 2018, 10, 12820-12840.	2.8	26
41	Ruthenium particle size and cesium promotion effects in Fischer-Tropsch synthesis over high-surface-area graphite supported catalysts. <i>Catalysis Science and Technology</i> , 2017, 7, 1235-1244.	2.1	31
42	Effect of the metal precursor on the catalytic performance of the Ru/KL system for the ethanol transformation reactions. <i>Applied Catalysis A: General</i> , 2017, 535, 61-68.	2.2	4
43	Effect of lanthanum promoter on the catalytic performance of levulinic acid hydrogenation over Ru/carbon fiber catalyst. <i>Applied Catalysis A: General</i> , 2017, 540, 21-30.	2.2	22
44	Well-dispersed Rh nanoparticles with high activity for the dry reforming of methane. <i>International Journal of Hydrogen Energy</i> , 2017, 42, 16127-16138.	3.8	37
45	Comparative study of three heteropolyacids supported on carbon materials as catalysts for ethylene production from bioethanol. <i>Catalysis Science and Technology</i> , 2017, 7, 1892-1901.	2.1	39
46	Effect of surfactant concentration on the morphology of Mo _x S _y nanoparticles prepared by a solvothermal route. <i>Green Processing and Synthesis</i> , 2017, 6, 161-171.	1.3	4
47	Selective hydrogenation of mixed alkyne/alkene streams at elevated pressure over a palladium sulfide catalyst. <i>Journal of Catalysis</i> , 2017, 355, 40-52.	3.1	56
48	Direct catalytic effect of nitrogen functional groups exposed on graphenic materials when acting cooperatively with Ru nanoparticles. <i>RSC Advances</i> , 2017, 7, 44568-44577.	1.7	14
49	Understanding the role of oxygen surface groups: The key for a smart ruthenium-based carbon-supported heterogeneous catalyst design and synthesis. <i>Applied Catalysis A: General</i> , 2017, 544, 66-76.	2.2	15
50	PMo ₁₁ V@N-CNT electrochemical properties and its application as electrochemical sensor for determination of acetaminophen. <i>Journal of Solid State Electrochemistry</i> , 2017, 21, 1059-1068.	1.2	16
51	Development of highly efficient Cu versus Pd catalysts supported on graphitic carbon materials for the reduction of 4-nitrophenol to 4-aminophenol at room temperature. <i>Carbon</i> , 2017, 111, 150-161.	5.4	54
52	Palladium sulphide - A highly selective catalyst for the gas phase hydrogenation of alkynes to alkenes. <i>Journal of Catalysis</i> , 2016, 340, 10-16.	3.1	96
53	Selective hydrogenation of paracetamol to acetamidocyclohexanone with silylated SiO ₂ supported Pd-based catalysts. <i>RSC Advances</i> , 2016, 6, 41572-41579.	1.7	4
54	The promoter effect of potassium in CuO/CeO ₂ systems supported on carbon nanotubes and graphene for the CO-PROX reaction. <i>Catalysis Science and Technology</i> , 2016, 6, 6118-6127.	2.1	34

#	ARTICLE	IF	CITATIONS
55	Surface properties of amphiphilic carbon nanotubes and study of their applicability as basic catalysts. RSC Advances, 2016, 6, 54293-54298.	1.7	12
56	Time-Resolved XAS Investigation of the Local Environment and Evolution of Oxidation States of a Fischer-Tropsch Ru-Cs/C Catalyst. ACS Catalysis, 2016, 6, 1437-1445.	5.5	23
57	Preparation, Characterization, and Testing of a Carbon-Supported Catalyst Obtained by Slow Pyrolysis of Nickel Salt Impregnated Vegetal Material. Industrial & Engineering Chemistry Research, 2016, 55, 1491-1502.	1.8	16
58	The effect of Cu loading on Ni/carbon nanotubes catalysts for hydrodeoxygenation of guaiacol. RSC Advances, 2016, 6, 26658-26667.	1.7	50
59	H ₂ /D ₂ isotopic exchange: A tool to characterize complex hydrogen interaction with carbon-supported ruthenium catalysts. Catalysis Today, 2016, 259, 9-18.	2.2	13
60	Efficient hydrogen production from glycerol by steam reforming with carbon supported ruthenium catalysts. Carbon, 2016, 96, 578-587.	5.4	32
61	Comparative study of bioethanol transformation catalyzed by Ru or Pt nanoparticles supported on KL zeolite. Catalysis Science and Technology, 2016, 6, 521-529.	2.1	6
62	Role of Exposed Surfaces on Zinc Oxide Nanostructures in the Catalytic Ethanol Transformation. ChemSusChem, 2015, 8, 2223-2230.	3.6	17
63	Adsorption of emerging pollutants on functionalized multiwall carbon nanotubes. Chemosphere, 2015, 136, 174-180.	4.2	88
64	Comparative study of the hydrogenolysis of glycerol over Ru-based catalysts supported on activated carbon, graphite, carbon nanotubes and KL-zeolite. Chemical Engineering Journal, 2015, 262, 326-333.	6.6	59
65	Dry reforming of methane over Ni/CeO ₂ catalysts prepared by three different methods. Green Processing and Synthesis, 2015, 4, .	1.3	4
66	Selective 1,3-butadiene hydrogenation by gold nanoparticles on novel nano-carbon materials. Catalysis Today, 2015, 249, 117-126.	2.2	17
67	Improved performance of carbon nanofiber-supported palladium particles in the selective 1,3-butadiene hydrogenation: Influence of carbon nanostructure, support functionalization treatment and metal precursor. Catalysis Today, 2015, 249, 63-71.	2.2	26
68	Hydrocarbons adsorption on metal trimesate MOFs: Inverse gas chromatography and immersion calorimetry studies. Thermochimica Acta, 2015, 602, 36-42.	1.2	12
69	Detecting the Genesis of a High-Performance Carbon-Supported Pd Sulfide Nanophase and Its Evolution in the Hydrogenation of Butadiene. ACS Catalysis, 2015, 5, 5235-5241.	5.5	38
70	Facile solvothermal synthesis of bimetallic CoMoS ₂ and NiMoS ₂ nanospheres. Green Processing and Synthesis, 2015, 4, .	1.3	0
71	MnFe ₂ O ₄ @CNT-N as novel electrochemical nanosensor for determination of caffeine, acetaminophen and ascorbic acid. Sensors and Actuators B: Chemical, 2015, 218, 128-136.	4.0	83
72	Selective 1,3-butadiene hydrogenation by gold nanoparticles deposited & precipitated onto nano-carbon materials. RSC Advances, 2015, 5, 81583-81598.	1.7	13

#	ARTICLE	IF	CITATIONS
73	Efficient and stable Ni-Ce glycerol reforming catalysts: Chemical imaging using X-ray electron and scanning transmission microscopy. <i>Applied Catalysis B: Environmental</i> , 2015, 165, 139-148.	10.8	31
74	Exploring the insertion of ethylenediamine and bis(3-aminopropyl)amine into graphite oxide. <i>Nanoscience Methods</i> , 2014, 3, 28-39.	1.0	2
75	Design of surface sites for the selective hydrogenation of 1,3-butadiene on Pd nanoparticles: Cu bimetallic formation and sulfur poisoning. <i>Catalysis Science and Technology</i> , 2014, 4, 1446-1455.	2.1	39
76	Ceramic hollow fibres catalytic enhanced reactors for glycerol steam reforming. <i>Catalysis Today</i> , 2014, 233, 21-30.	2.2	9
77	High nitrogen doped graphenes and their applicability as basic catalysts. <i>Diamond and Related Materials</i> , 2014, 44, 26-32.	1.8	27
78	Effects of the reduction temperature over ex-chloride Ru Fischer-Tropsch catalysts supported on high surface area graphite and promoted by potassium. <i>Applied Catalysis A: General</i> , 2014, 480, 86-92.	2.2	16
79	Microwave-assisted silylation of graphite oxide and iron(III) porphyrin intercalation. <i>Polyhedron</i> , 2014, 81, 475-484.	1.0	15
80	Novel electrochemical sensor based on N-doped carbon nanotubes and Fe ₃ O ₄ nanoparticles: Simultaneous voltammetric determination of ascorbic acid, dopamine and uric acid. <i>Journal of Colloid and Interface Science</i> , 2014, 432, 207-213.	5.0	99
81	Effect of electrolytes nature and concentration on the morphology and structure of MoS ₂ nanomaterials prepared using one-pot solvothermal method. <i>Applied Surface Science</i> , 2014, 307, 319-326.	3.1	27
82	Bioethanol Transformations Over Active Surface Sites Generated on Carbon Nanotubes or Carbon Nanofibers Materials. <i>Open Catalysis Journal</i> , 2014, 7, 1-7.	0.9	8
83	Following the Evolution of Ru/Activated Carbon Catalysts during the Decomposition-Reduction of the Ru(NO)(NO) ₃ Precursor. <i>ChemCatChem</i> , 2013, 5, 2446-2452.	1.8	18
84	Effect of the functional groups of carbon on the surface and catalytic properties of Ru/C catalysts for hydrogenolysis of glycerol. <i>Applied Surface Science</i> , 2013, 287, 108-116.	3.1	50
85	Structural properties of alumina- and silica-supported Iridium catalysts and their behavior in the enantioselective hydrogenation of ethyl pyruvate. <i>Applied Catalysis A: General</i> , 2013, 451, 14-20.	2.2	12
86	Surface properties of Ru particles supported on carbon materials: A microcalorimetric study of the effects over the CO chemisorptions of residual anionic species. <i>Thermochimica Acta</i> , 2013, 567, 112-117.	1.2	11
87	Dry reforming of methane using Pd-based membrane reactors fabricated from different substrates. <i>Journal of Membrane Science</i> , 2013, 435, 218-225.	4.1	44
88	Preparation of nitrogen-containing carbon nanotubes and study of their performance as basic catalysts. <i>Applied Catalysis A: General</i> , 2013, 458, 155-161.	2.2	39
89	An immersion calorimetric study of the interactions between some organic molecules and functionalized carbon nanotube surfaces. <i>Thermochimica Acta</i> , 2013, 567, 107-111.	1.2	3
90	Promotional effect of Cu on the structure and chloronitrobenzene hydrogenation performance of carbon nanotube and activated carbon supported Pt catalysts. <i>Applied Catalysis A: General</i> , 2013, 464-465, 28-34.	2.2	24

#	ARTICLE	IF	CITATIONS
91	Transient studies of low-temperature dry reforming of methane over Ni-CaO/ZrO ₂ -La ₂ O ₃ . Applied Catalysis B: Environmental, 2013, 129, 450-459.	10.8	120
92	Building up Multiwall Carbon Nanotubes Nanostructures inside Millimetric Channels of Ceramic Monoliths. Journal of Nano Research, 2012, 18-19, 271-279.	0.8	1
93	Low Solvothermal Synthesis and Characterization of Hollow Nanospheres Molybdenum Sulfide. Journal of Nanoscience and Nanotechnology, 2012, 12, 6679-6685.	0.9	16
94	Nitrate reduction over a Pd-Cu/MWCNT catalyst: application to a polluted groundwater. Environmental Technology (United Kingdom), 2012, 33, 2353-2358.	1.2	37
95	An Easy Methodology for the Incorporation of Carbon Nanotubes on Surfaces of Components Applied as Electronic Devices. Journal of Nano Research, 2012, 18-19, 157-163.	0.8	0
96	Graphite oxide as support for the immobilization of Ru-BINAP: Application in the enantioselective hydrogenation of methylacetoacetate. Catalysis Communications, 2012, 26, 149-154.	1.6	16
97	Influence of the nature of support on Ru-supported catalysts for selective hydrogenation of citral. Chemical Engineering Journal, 2012, 204-206, 169-178.	6.6	32
98	Structural and surface modifications of carbon nanotubes when submitted to high temperature annealing treatments. Journal of Alloys and Compounds, 2012, 536, S460-S463.	2.8	21
99	Catalytic Removal of Water-Solved Aromatic Compounds by Carbon-Based Materials. , 2012, , 499-520.		2
100	An immersion calorimetry study of the interaction of organic compounds with carbon nanotube surfaces. Carbon, 2012, 50, 2731-2740.	5.4	19
101	Deposition of gold nanoparticles on ZnO and their catalytic activity for hydrogenation applications. Catalysis Communications, 2012, 22, 79-82.	1.6	22
102	Kinetic analysis of the Ru/SiO ₂ -catalyzed low temperature methane steam reforming. Applied Catalysis A: General, 2012, 413-414, 366-374.	2.2	15
103	TAP studies of ammonia decomposition over Ru and Ir catalysts. Physical Chemistry Chemical Physics, 2011, 13, 12892.	1.3	46
104	Catalytic activity of gold supported on ZnO tetrapods for the preferential oxidation of carbon monoxide under hydrogen rich conditions. Nanoscale, 2011, 3, 929-932.	2.8	22
105	Chemoselective hydrogenation of cinnamaldehyde: A comparison of the immobilization of Ru-phosphine complex on graphite oxide and on graphitic surfaces. Journal of Catalysis, 2011, 282, 299-309.	3.1	43
106	Thermodynamic and experimental study of combined dry and steam reforming of methane on Ru/ZrO ₂ -La ₂ O ₃ catalyst at low temperature. International Journal of Hydrogen Energy, 2011, 36, 15212-15220.	3.8	129
107	Phenol adsorption from water solutions over microporous and mesoporous carbon surfaces: a real time kinetic study. Adsorption, 2011, 17, 483-488.	1.4	13
