Version: 2024-02-01

32 papers	2,122 citations	586496 16 h-index	511568 30 g-index
32 all docs	32 docs citations	32 times ranked	3381 citing authors

#	Article	IF	Citations
1	Parentsâ€™ perspectives on managing risk in play for children with developmental disabilities. Disability and Society, 2022, 37, 1272-1292.	1.4	5
2	The effects of exercise during pregnancy on placental composition: A systematic review and meta-analysis. Placenta, 2022, 117, 39-46.	0.7	10
3	Effect of a 3-Year Lifestyle Intervention in Patients with Chronic Kidney Disease: A Randomized Clinical Trial. Journal of the American Society of Nephrology: JASN, 2022, 33, 431-441.	3.0	26
4	Authorsâ€™ Reply: More Research is Still Needed to Support the Real-World Generalizability of the Benefits of Lifestyle Interventions for Chronic Kidney Disease. Journal of the American Society of Nephrology: JASN, 2022, , ASN.2022030244.	3.0	0
5	â€œWorn-out but happyâ€• Postpartum Women's Mental Health and Well-Being During COVID-19 Restrictions in Australia. Frontiers in Global Women S Health, 2021, 2, 793602.	1.1	2
6	Creating play opportunities on the school playground: Educator experiences of the Sydney playground project. Australian Occupational Therapy Journal, 2020, 67, 62-73.	0.6	12
7	A 12-month lifestyle intervention does not improve cardiac autonomic function in patients with chronic kidney disease. Autonomic Neuroscience: Basic and Clinical, 2020, 224, 102642.	1.4	7
8	Reframing risk: Working with caregivers of children with disabilities to promote risk-taking in play. International Review of Research in Developmental Disabilities, 2020, , 1-45.	0.6	1
9	The effects of vigorous intensity exercise in the third trimester of pregnancy: a systematic review and meta-analysis. BMC Pregnancy and Childbirth, 2019, 19, 281.	0.9	76
10	Lower parent tolerance of risk in play for children with disability than typically developing children. International Journal of Play, 2019, 8, 174-185.	0.3	3
11	Guidelines for the delivery and monitoring of high intensity interval training in clinical populations. Progress in Cardiovascular Diseases, 2019, 62, 140-146.	1.6	119
12	Highâ€intensity interval training in chronic kidney disease: A randomized pilot study. Scandinavian Journal of Medicine and Science in Sports, 2019, 29, 1197-1204.	1.3	22
13	An observation-based instrument to measure what children with disabilities do on the playground: a Rasch analysis. International Journal of Play, 2019, 8, 79-93.	0.3	5
14	Construct Validity and Testâ€“Retest Reliability of the Coping Inventory (CI) for Children With Developmental Disabilities. American Journal of Occupational Therapy, 2019, 73, 7304205100p1-7304205100p10.	0.1	1
15	Agreement between cystatin-C and creatinine based eGFR estimates after a 12-month exercise intervention in patients with chronic kidney disease. BMC Nephrology, 2018, 19, 366.	0.8	15
16	Oxidative stress is associated with decreased heart rate variability in patients with chronic kidney disease. Redox Report, 2017, 22, 197-204.	1.4	25
17	Effects of exercise and lifestyle intervention on oxidative stress in chronic kidney disease. Redox Report, 2017, 22, 127-136.	1.4	17
18	Low-Volume High-Intensity Interval Training Is Sufficient to Ameliorate the Severity of Metabolic Syndrome. Metabolic Syndrome and Related Disorders, 2017, 15, 319-328.	0.5	49

#	Article	IF	Citations
19	High-intensity interval training and cardiac autonomic control in individuals with metabolic syndrome: A randomised trial. International Journal of Cardiology, 2017, 245, 245-252.	0.8	23
20	Feasibility of higher intensity exercise in patients with chronic kidney disease. Journal of Sports Medicine and Physical Fitness, 2017, 58, 127-134.	0.4	5
21	Association between left ventricular global longitudinal strain, healthâ€related quality of life and functional capacity in chronic kidney disease patients with preserved ejection fraction. Nephrology, 2016, 21, 108-115.	0.7	12
22	12â€Šmin/week of high-intensity interval training reduces aortic reservoir pressure in individuals with metabolic syndrome. Journal of Hypertension, 2016, 34, 1977-1987.	0.3	19
23	Uncertainty in the school playground: shifting rationalities and teachersâ€™ sense-making in the management of risks for children with disabilities. Health, Risk and Society, 2016, 18, 301-317.	0.9	11
24	Outdoor Play Decisions by Caregivers of Children with Disabilities: a Systematic Review of Qualitative Studies. Journal of Developmental and Physical Disabilities, 2016, 28, 931-957.	1.0	26
25	The Sydney playground project- levelling the playing field: a cluster trial of a primary school-based intervention aiming to promote manageable risk-taking in children with disability. BMC Public Health, 2015, 15, 1125.	1.2	16
26	Oxidative stress contributes to muscle atrophy in chronic kidney disease patients. Redox Report, 2015, 20, 126-132.	1.4	20
27	The Impact of High-Intensity Interval Training Versus Moderate-Intensity Continuous Training on Vascular Function: a Systematic Review and Meta-Analysis. Sports Medicine, 2015, 45, 679-692.	3.1	472
28	Left ventricular global longitudinal strain is associated with cardiovascular risk factors and arterial stiffness in chronic kidney disease. BMC Nephrology, 2015, 16, 106.	0.8	28
29	Cardiorespiratory fitness and cardiovascular burden in chronic kidney disease. Journal of Science and Medicine in Sport, 2015, 18, 492-497.	0.6	40
30	Protein-bound Uremic Toxins, Inflammation and Oxidative Stress: A Cross-sectional Study in Stage 3â€“4 Chronic Kidney Disease. Archives of Medical Research, 2014, 45, 309-317.	1.5	137
31	High-intensity interval training in patients with lifestyle-induced cardiometabolic disease: a systematic review and meta-analysis. British Journal of Sports Medicine, 2014, 48, 1227-1234.	3.1	909
32	Contribution of autonomic dysfunction to abnormal exercise blood pressure in type 2 diabetes mellitus. Journal of Science and Medicine in Sport, 2013, 16, 8-12.	0.6	9
