#	ARTICLE	IF	CITATIONS
1	An Event-Related Potential Investigation of Early Visual Processing Deficits During Face Perception in Youth at Clinical High Risk for Psychosis. Schizophrenia Bulletin, 2022, 48, 90-99.	4.3	4
2	Dissociations between performance and visual fixations after subordinate- and basic-level training with novel objects. Vision Research, 2022, 191, 107971.	1.4	4
3	More elaborate processing of own-race faces and less elaborate processing of other-race faces contribute to the other-race effect in face memory. British Journal of Psychology, 2022, 113, 1033-1055.	2.3	4
4	Bird expertise does not increase motion sensitivity to bird flight motion. Journal of Vision, 2021, 21, 5.	0.3	1
5	Neural and behavioral effects of subordinate-level training of novel objects across manipulations of color and spatial frequency. European Journal of Neuroscience, 2020, 52, 4468-4479.	2.6	11
6	A robust deep neural network for denoising task-based fMRI data: An application to working memory and episodic memory. Medical Image Analysis, 2020, 60, 101622.	11.6	23
7	The bimodality of saccade duration during the exploration of visual scenes. Visual Cognition, 2020, 28, 484-512.	1.6	5
8	Acute effects of naturalistic THC vs. CBD use on recognition memory: a preliminary study. Journal of Cannabis Research, 2020, 2, 28.	3.2	7
9	Color and spatial frequency differentially impact early stages of perceptual expertise training. Neuropsychologia, 2019, 122, 62-75.	1.6	12
10	Multivariate group-level analysis for task fMRI data with canonical correlation analysis. NeuroImage, 2019, 194, 25-41.	4.2	9
11	3D spatially-adaptive canonical correlation analysis: Local and global methods. NeuroImage, 2018, 169, 240-255.	4.2	10
12	Single-Trial EEG Predicts Memory Retrieval Using Leave-One-Subject-Out Classification. , 2018, , .		2
13	Neural evidence for the contribution of holistic processing but not attention allocation to the other-race effect on face memory. Cognitive, Affective and Behavioral Neuroscience, 2018, 18, 1015-1033.	2.0	4
14	MAO-A Phenotype Effects Response Sensitivity and the Parietal Old/New Effect during Recognition Memory. Frontiers in Human Neuroscience, 2018, 12, 53.	2.0	12
15	Single-Trial EEG Analysis Predicts Memory Retrieval and Reveals Source-Dependent Differences. Frontiers in Human Neuroscience, 2018, 12, 258.	2.0	17
16	Changes in Visual Scanning Strategies Accompany the Acquisition of Perceptual Expertise. Journal of Vision, 2018, 18, 390.	0.3	0
17	A family of locally constrained CCA models for detecting activation patterns in fMRI. NeuroImage, 2017, 149, 63-84.	4.2	18
18	Individual differences in EEG correlates of recognition memory due to DAT polymorphisms. Brain and Behavior, 2017, 7, e00870.	2.2	9

#	ARTICLE	IF	CITATIONS
19	A Dissociation Between Visual Strategy Use and Accuracy after Perceptual Expertise Training. Journal of Vision, 2017, 17, 473.	0.3	0
20	Examining the role of motion in expert object recognition.. Journal of Vision, 2017, 17, 65.	0.3	0
21	Subordinate-level training with novel objects differentially impacts neural and behavioral processing. Journal of Vision, 2017, 17, 512.	0.3	0
22	FN400 and LPC memory effects for concrete and abstract words. Psychophysiology, 2016, 53, 1669-1678.	2.4	35
23	The role of spatial frequency in expert object recognition.. Journal of Experimental Psychology: Human Perception and Performance, 2016, 42, 413-422.	0.9	12
24	A Meta-analytic Review of Auditory Event-Related Potential Components as Endophenotypes for Schizophrenia: Perspectives From First-Degree Relatives. Schizophrenia Bulletin, 2016, 42, 1504-1516.	4.3	68
25	Separating the FN400 and N400 potentials across recognition memory experiments. Brain Research, 2016, 1635, 41-60.	2.2	52
26	Deficits in Early Stages of Face Processing in Schizophrenia: A Systematic Review of the P100 Component. Schizophrenia Bulletin, 2016, 42, 519-527.	4.3	34
27	Co-registration of eye movements and EEG to study semantic congruency during scene perception. Journal of Vision, 2016, 16, 316.	0.3	0
28	Exploring the gaze strategies of expert object recognition by the means of eye-tracking.. Journal of Vision, 2016, 16, 1102.	0.3	0
29	The importance of color and spatial frequency information after laboratory-trained perceptual expertise. Journal of Vision, 2016, 16, 1109.	0.3	0
30	Metacognitive Processes in Executive Control Development: The Case of Reactive and Proactive Control. Journal of Cognitive Neuroscience, 2015, 27, 1125-1136.	2.3	136
31	Genetic variation in the serotonin transporter gene influences ERP old/new effects during recognition memory. Neuropsychologia, 2015, 78, 95-107.	1.6	13
32	The Role of Color and Spatial Frequency in Perceptual Expertise Training. Journal of Vision, 2015, 15, 234.	0.3	0
33	Multidimensional-expertise space: Multidimensional scaling changes after expertise training with objects. Journal of Vision, 2015, 15, 1141.	0.3	0
34	The role of color in expert object recognition. Journal of Vision, 2014, 14, 9-9.	0.3	19
35	Familiarity and recollection in heuristic decision making.. Journal of Experimental Psychology: General, 2014, 143, 2341-2365.	2.1	21
36	Single-trial identification of failed memory retrieval. , 2014, , .		1

#	ARTICLE	IF	CITATIONS
37	Classification of amnesic mild cognitive impairment using fMRI. , 2014, , .		2
38	Using single-trial EEG to predict and analyze subsequent memory. Neurolmage, 2014, 84, 712-723.	4.2	68
39	Classification aided analysis of oscillatory signatures in controlled retrieval. Neurolmage, 2014, 85, 749-760.	4.2	16
40	The persistent impact of incidental experience. Psychonomic Bulletin and Review, 2013, 20, 1221-1231.	2.8	8
41	ERP evidence for conceptual mappings and comparison processes during the comprehension of conventional and novel metaphors. Brain and Language, 2013, 127, 484-496.	1.6	67
42	ERPs and Neural Oscillations during Volitional Suppression of Memory Retrieval. Journal of Cognitive Neuroscience, 2013, 25, 1624-1633.	2.3	37
43	Effects of oxytocin on behavioral and ERP measures of recognition memory for own-race and other-race faces in women and men. Psychoneuroendocrinology, 2013, 38, 2140-2151.	2.7	40
44	Sequential effects in response time reveal learning mechanisms and event representations.. Psychological Review, 2013, 120, 628-666.	3.8	70
45	Neural Correlates of the In-Group Memory Advantage on the Encoding and Recognition of Faces. PLoS ONE, 2013, 8, e82797.	2.5	9
46	Midazolam-induced Amnesia Reduces Memory for Details and Affects the ERP Correlates of Recollection and Familiarity. Journal of Cognitive Neuroscience, 2012, 24, 416-427.	2.3	16
47	A within-subject ERP and fMRI investigation of orientation-specific recognition memory for pictures. Cognitive Neuroscience, 2012, 3, 174-192.	1.4	16
48	The Limits of Feedforward Vision: Recurrent Processing Promotes Robust Object Recognition when Objects Are Degraded. Journal of Cognitive Neuroscience, 2012, 24, 2248-2261.	2.3	110
49	Familiarity in source memory. Neuropsychologia, 2012, 50, 2546-2565.	1.6	64
50	Optimization of contrast detection power with probabilistic behavioral information. Neurolmage, 2012, 60, 1788-1799.	4.2	4
51	Investigation of changes in EEG complexity during memory retrieval: the effect of midazolam. Cognitive Neurodynamics, 2012, 6, 537-546.	4.0	18
52	Cognitive Control Reflects Context Monitoring, Not Motoric Stopping, in Response Inhibition. PLoS ONE, 2012, 7, e31546.	2.5	134
53	Optimizing the performance of local canonical correlation analysis in fMRI using spatial constraints. Human Brain Mapping, 2012, 33, 2611-2626.	3.6	12
54	Oxytocin can impair memory for social and non-social visual objects: A within-subject investigation of oxytocin's effects on human memory. Brain Research, 2012, 1451, 65-73.	2.2	40

#	ARTICLE	IF	CITATIONS
55	A preliminary study of functional abnormalities in aMCI subjects during different episodic memory tasks. Magnetic Resonance Imaging, 2012, 30, 459-470.	1.8	23
56	The N250 Brain Potential to Personally Familiar and Newly Learned Faces and Objects. Frontiers in Human Neuroscience, 2011, 5, 111.	2.0	58
57	Minimal Information for Neural Electromagnetic Ontologies (MINEMO): A standards-compliant method for analysis and integration of event-related potentials (ERP) data. Standards in Genomic Sciences, 2011, 5, 211-223.	1.5	20
58	The neural correlates of memory encoding and recognition for own-race and other-race faces. Neuropsychologia, 2011, 49, 3103-3115.	1.6	54
59	Expertsâ€™ memory: an ERP study of perceptual expertise effects on encoding and recognition. Memory and Cognition, 2011, 39, 412-432.	1.6	45
60	Picture Superiority Doubly Dissociates the ERP Correlates of Recollection and Familiarity. Journal of Cognitive Neuroscience, 2011, 23, 1247-1262.	2.3	91
61	Visual Expertise with Pictures of Cars Correlates with RT Magnitude of the Car Inversion Effect. Perception, 2010, 39, 173-183.	1.2	52
62	Functional role of gamma and theta oscillations in episodic memory. Neuroscience and Biobehavioral Reviews, 2010, 34, 1023-1035.	6.1	418
63	Neural inhibition enables selection during language processing. Proceedings of the National Academy of Sciences of the United States of America, 2010, 107, 16483-16488.	7.1	78
64	Event-related potential (ERP) correlates of memory blocking and priming during a word fragment test. International Journal of Psychophysiology, 2010, 78, 136-150.	1.0	7
65	Comprehending conventional and novel metaphors: An ERP study. Brain Research, 2009, 1284, 145-155.	2.2	154
66	Semantic and perceptual effects on recognition memory: Evidence from ERP. Brain Research, 2009, 1283, 102-114.	2.2	52
67	Expert image analysts show enhanced visual processing in change detection. Psychonomic Bulletin and Review, 2009, 16, 390-397.	2.8	17
68	Event-related potential correlates of interference effects on recognition memory. Psychonomic Bulletin and Review, 2008, 15, 36-43.	2.8	21
69	The preferred level of face categorization depends on discriminability. Psychonomic Bulletin and Review, 2008, 15, 623-629.	2.8	17
70	The role of category learning in the acquisition and retention of perceptual expertise: A behavioral and neurophysiological study. Brain Research, 2008, 1210, 204-215.	2.2	99
71	Effects of repetition priming on recognition memory: Testing a perceptual fluency-disfluency model.. Journal of Experimental Psychology: Learning Memory and Cognition, 2008, 34, 1305-1324.	0.9	55
72	Genetic triple dissociation reveals multiple roles for dopamine in reinforcement learning. Proceedings of the National Academy of Sciences of the United States of America, 2007, 104, 16311-16316.	7.1	614

#	ARTICLE	IF	CITATIONS
73	Long-term Expertise with Artificial Objects Increases Visual Competition with Early Face Categorization Processes. <i>Journal of Cognitive Neuroscience</i> , 2007, 19, 543-555.	2.3	71
74	Conflict and criterion setting in recognition memory.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2007, 33, 2-17.	0.9	41
75	Event-related potentials and recognition memory. <i>Trends in Cognitive Sciences</i> , 2007, 11, 251-257.	7.8	1,080
76	The FN400 indexes familiarity-based recognition of faces. <i>NeuroImage</i> , 2007, 36, 464-471.	4.2	159
77	Letter to the Editor. <i>NeuroImage</i> , 2007, 36, 488-489.	4.2	25
78	Prefrontal Regions Orchestrate Suppression of Emotional Memories via a Two-Phase Process. <i>Science</i> , 2007, 317, 215-219.	12.6	383
79	ERP correlates of familiarity and recollection processes in visual associative recognition. <i>Brain Research</i> , 2007, 1174, 97-109.	2.2	67
80	A Reevaluation of the Electrophysiological Correlates of Expert Object Processing. <i>Journal of Cognitive Neuroscience</i> , 2006, 18, 1453-1465.	2.3	181
81	EEG oscillations and recognition memory: Theta correlates of memory retrieval and decision making. <i>NeuroImage</i> , 2006, 32, 978-987.	4.2	254
82	Activation of Preexisting and Acquired Face Representations: The N250 Event-related Potential as an Index of Face Familiarity. <i>Journal of Cognitive Neuroscience</i> , 2006, 18, 1488-1497.	2.3	327
83	Combined Pharmacological and Electrophysiological Dissociation of Familiarity and Recollection. <i>Journal of Neuroscience</i> , 2006, 26, 1979-1985.	3.6	88
84	An early electrophysiological response associated with expertise in letter perception. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2005, 5, 306-318.	2.0	111
85	Error-Related Negativity Predicts Reinforcement Learning and Conflict Biases. <i>Neuron</i> , 2005, 47, 495-501.	8.1	364
86	Memory Strength and Repetition Suppression: Multimodal Imaging of Medial Temporal Cortical Contributions to Recognition. <i>Neuron</i> , 2005, 47, 751-761.	8.1	241
87	Effects of attention and confidence on the hypothesized ERP correlates of recollection and familiarity. <i>Neuropsychologia</i> , 2004, 42, 1088-1106.	1.6	218
88	ERP old/new effects at different retention intervals in recency discrimination tasks. <i>Cognitive Brain Research</i> , 2004, 18, 107-120.	3.0	52
89	Differentiating location- and distance-based processes in memory for time: An ERP study. <i>Psychonomic Bulletin and Review</i> , 2003, 10, 711-717.	2.8	40
90	Using ERPs to dissociate recollection from familiarity in picture recognition. <i>Cognitive Brain Research</i> , 2003, 15, 191-205.	3.0	289

#	ARTICLE	IF	CITATIONS
91	Perceptual interference supports a non-modular account of face processing. <i>Nature Neuroscience</i> , 2003, 6, 428-432.	14.8	400
92	Differentiating amodal familiarity from modality-specific memory processes: An ERP study. <i>Psychophysiology</i> , 2003, 40, 979-988.	2.4	120
93	Motor sequence learning and reading ability: Is poor reading associated with sequencing deficits?. <i>Journal of Experimental Child Psychology</i> , 2003, 84, 338-354.	1.4	58
94	Late frontal brain potentials distinguish true and false recognition. <i>NeuroReport</i> , 2003, 14, 1717-1720.	1.2	46
95	A Study of Parallel Implicit and Explicit Information Processing in Patients With Obsessive-Compulsive Disorder. <i>American Journal of Psychiatry</i> , 2002, 159, 1780-1782.	7.2	98
96	A defense of the subordinate-level expertise account for the N170 component. <i>Cognition</i> , 2002, 85, 189-196.	2.2	88
97	An electrophysiological comparison of visual categorization and recognition memory. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2002, 2, 1-18.	2.0	115
98	A Neural Basis for Expert Object Recognition. <i>Psychological Science</i> , 2001, 12, 43-47.	3.3	429
99	Implicit learning revealed by the method of opposition. <i>Trends in Cognitive Sciences</i> , 2001, 5, 503-504.	7.8	23
100	Memory for detail in item versus associative recognition. <i>Memory and Cognition</i> , 2001, 29, 413-423.	1.6	34
101	Effects of aging on visuospatial attention: an ERP study. <i>Neuropsychologia</i> , 2001, 39, 288-301.	1.6	112
102	Brain Potentials Reflect Behavioral Differences in True and False Recognition. <i>Journal of Cognitive Neuroscience</i> , 2001, 13, 201-216.	2.3	147
103	Brain potentials of recollection and familiarity. <i>Memory and Cognition</i> , 2000, 28, 923-938.	1.6	576
104	Abnormalities in the thalamus and prefrontal cortex during episodic object recognition in schizophrenia. <i>Biological Psychiatry</i> , 2000, 48, 651-657.	1.3	103
105	Medial temporal lobe activation during episodic encoding and retrieval: A PET study. , 1999, 9, 575-581.		55
106	Cross-Modal Priming and Explicit Memory in Patients with Verbal Production Deficits. <i>Brain and Cognition</i> , 1999, 39, 133-146.	1.8	30
107	Thalamic deactivation during early implicit sequence learning. <i>NeuroReport</i> , 1998, 9, 865-870.	1.2	61
108	Effects of size and orientation change on hippocampal activation during episodic recognition. <i>NeuroReport</i> , 1997, 8, 3993-3998.	1.2	41

#	ARTICLE	IF	CITATIONS
109	Comparing retrieval dynamics in recognition memory and lexical decision.. Journal of Experimental Psychology: General, 1997, 126, 228-247.	2.1	63
110	Higher-Order Associative Learning in Amnesia: Evidence from the Serial Reaction Time Task. Journal of Cognitive Neuroscience, 1997, 9, 522-533.	2.3	134
111	Effects of aging on implicit sequence learning: Accounting for sequence structure and explicit knowledge. Psychological Research, 1997, 60, 24-41.	1.7	157
112	Neuroanatomical Correlates of Veridical and Illusory Recognition Memory: Evidence from Positron Emission Tomography. Neuron, 1996, 17, 267-274.	8.1	258
113	False recognition and the right frontal lobe: A case study. Neuropsychologia, 1996, 34, 793-808.	1.6	252
114	A PET investigation of implicit and explicit sequence learning. Human Brain Mapping, 1995, 3, 271-286.	3.6	215
115	When encoding fails: Instructions, feedback, and registration without learning. Memory and Cognition, 1995, 23, 213-226.	1.6	46
116	The Cognitive Neuroscience of False Memories. Psychiatric Annals, 1995, 25, 726-730.	0.1	26
117	Cognitive Factors in Learning about Structured Sequences. Studies in Second Language Acquisition, 1994, 16, 205-230.	2.6	122
118	Retrieval constraints and the mirror effect.. Journal of Experimental Psychology: Learning Memory and Cognition, 1994, 20, 275-289.	0.9	26
119	Attentional and nonattentional forms of sequence learning.. Journal of Experimental Psychology: Learning Memory and Cognition, 1993, 19, 189-202.	0.9	430
120	Effects of similarity and repetition on memory: Registration without learning?. Journal of Experimental Psychology: Learning Memory and Cognition, 1992, 18, 667-680.	0.9	90
