

# Dallas Abbott

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/9437919/dallas-abbott-publications-by-year.pdf>

**Version:** 2024-04-25

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

34  
papers

1,256  
citations

17

#	Paper	IF	Citations
34	Crustal Heating and Lithospheric Alteration and Erosion Associated With Asthenospheric Upwelling Beneath Southern New England (USA). <i>Journal of Geophysical Research: Solid Earth</i> , <b>2018</b> , 123, 8995-9008	3.6	16
33	New historical records and relationships among 14C production rates, abundance and color of low latitude auroras and sunspot abundance. <i>Advances in Space Research</i> , <b>2016</b> , 58, 2181-2246	2.4	5
32	Impacts, mega-tsunami, and other extraordinary claims: COMMENT. <i>GSA Today</i> , <b>2008</b> , e12-e12	2.8	2
31	Using magnetic susceptibility to find Precambrian impact ejecta: A proposal. <i>Gondwana Research</i> , <b>2007</b> , 12, 571-575	5.1	1
30	Tsunami geology and its role in hazard mitigation. <i>Eos</i> , <b>2005</b> , 86, 400	1.5	2
29	Reply to Comment on Extraterrestrial influences on mantle plume activity by Andrew Glikson. <i>Earth and Planetary Science Letters</i> , <b>2003</b> , 215, 429-432	5.3	1
28	Cold Cratonic Roots and Thermal Blankets: How Continents Affect Mantle Convection. <i>International Geology Review</i> , <b>2003</b> , 45, 479-496	2.3	27
27	Implications of the Temporal Distribution of High-Mg Magmas for Mantle Plume Volcanism through Time. <i>Journal of Geology</i> , <b>2002</b> , 110, 141-158	2	59
26	Extraterrestrial influences on mantle plume activity. <i>Earth and Planetary Science Letters</i> , <b>2002</b> , 205, 53-63	3.3	51
25	The intensity, occurrence, and duration of superplume events and eras over geological time. <i>Journal of Geodynamics</i> , <b>2002</b> , 34, 265-307	2.2	103
24	Precambrian superplumes and supercontinents: a record in black shales, carbon isotopes, and paleoclimates?. <i>Precambrian Research</i> , <b>2001</b> , 106, 239-260	3.9	191
23	Oceanic upwelling and mantle-plume activity: Paleomagnetic tests of ideas on the source of the Fe in early Precambrian iron formations <b>2001</b> ,		2
22	Quantifying Precambrian crustal extraction: the root is the answer. <i>Tectonophysics</i> , <b>2000</b> , 322, 163-190	3.1	27
21	Geologic evidence for a mantle superplume event at 1.9 Ga. <i>Geochemistry, Geophysics, Geosystems</i> , <b>2000</b> , 1, n/a-n/a	3.6	35
20	Gravity signatures of terrane accretion. <i>Lithos</i> , <b>1999</b> , 46, 5-15	2.9	7
19	Subduction obstruction and the crack-up of the Pacific plate. <i>Geology</i> , <b>1998</b> , 26, 795	5	8
18	Continents as lithological icebergs: the importance of buoyant lithospheric roots. <i>Earth and Planetary Science Letters</i> , <b>1997</b> , 149, 15-27	5.3	60

17	Increased mantle convection during the mid-Cretaceous: A comparative study of mantle potential temperature. <i>Journal of Geophysical Research</i> , <b>1996</b> , 101, 8673-8684		5
16	Influence of the tectosphere upon plate motion. <i>Journal of Geophysical Research</i> , <b>1996</b> , 101, 5425-5433		37
15	The structural and geochemical evolution of the continental crust: Support for the oceanic plateau model of continental growth. <i>Reviews of Geophysics</i> , <b>1995</b> , 33, 231	23.1	69
14	An empirical thermal history of the Earth's upper mantle. <i>Journal of Geophysical Research</i> , <b>1994</b> , 99, 13835-13850		50
13	Flat to steep transition in subduction style. <i>Geology</i> , <b>1994</b> , 22, 937	5	84
12	The case for accretion of the tectosphere by buoyant subduction. <i>Geophysical Research Letters</i> , <b>1991</b> , 18, 585-588	4.9	35
11	Length of the global plate boundary at 2.4 Ga. <i>Geology</i> , <b>1990</b> , 18, 58	5	31
10	Has the Wharton Basin's Heat flow been perturbed by the formation of a diffuse plate boundary in the Indian Ocean?. <i>Geophysical Research Letters</i> , <b>1988</b> , 15, 455-458	4.9	11
9	Scientific Rationale for Establishing Long-Term Ocean Bottom Observatory/Laboratory Systems <b>1987</b> , 389-411		8
8	Heat flow measurements on a hydrothermally-active, slow-spreading ridge: The Escanaba Trough. <i>Geophysical Research Letters</i> , <b>1986</b> , 13, 678-680	4.9	17
7	Tectonically controlled origin of three unusual rock suites in the Woodlark Basin. <i>Tectonics</i> , <b>1986</b> , 5, 1145-1160	4.3	15
6	Correlated sediment thickness, temperature gradient and excess pore pressure in a marine fault block basin. <i>Geophysical Research Letters</i> , <b>1984</b> , 11, 485-488	4.9	11
5	Age of oceanic plates at subduction and volatile recycling. <i>Geophysical Research Letters</i> , <b>1984</b> , 11, 951-954	4.9	26
4	Archaean plate tectonics revisited 2. Paleo-sea level changes, continental area, oceanic heat loss and the area-age distribution of the ocean basins. <i>Tectonics</i> , <b>1984</b> , 3, 709-722	4.3	15
3	Anomalous heat flow in the northwest Atlantic: A case for continued hydrothermal circulation in 80-M.Y. crust. <i>Journal of Geophysical Research</i> , <b>1983</b> , 88, 1067		54
2	Evidence for excess pore pressures in southwest Indian Ocean sediments. <i>Journal of Geophysical Research</i> , <b>1981</b> , 86, 1813		21
1	Paleobathymetry and Sediments of the Indian Ocean <b>1977</b> , 25-59		15
