#	ARTICLE	IF	CITATIONS
1	The generalized continuous wavelet transform associated with the fractional Fourier transform. Journal of Computational and Applied Mathematics, 2014, 259, 660-671.	2.0	64
2	Fractional Fourier transform of tempered distributions and generalized pseudo-differential operator. Journal of Pseudo-Differential Operators and Applications, 2012, 3, 239-254.	0.7	42
3	Color image encoding using fractional Fourier transformation associated with wavelet transformation. Optics Communications, 2012, 285, 1005-1009.	2.1	40
4	Product of two generalized pseudo-differential operators involving fractional Fourier transform. Journal of Pseudo-Differential Operators and Applications, 2011, 2, 355-365.	0.7	34
5	The quadratic-phase Fourier wavelet transform. Mathematical Methods in the Applied Sciences, 2020, 43, 1953-1969.	2.3	20
6	Continuous Wavelet Transform Involving Linear Canonical Transform. The National Academy of Sciences, India, 2019, 42, 337-344.	1.3	17
7	The fractional wavelet transform on spaces of type S. Integral Transforms and Special Functions, 2012, 23, 237-249.	1.2	16
8	PSEUDO-DIFFERENTIAL OPERATORS INVOLVING HANKEL-CLIFFORD TRANSFORMATION. Asian-European Journal of Mathematics, 2012, 05, 1250040.	0.5	16
9	Two versions of fractional powers of Hankel-type transformations and pseudo-differential operators. Rendiconti Del Circolo Matematico Di Palermo, 2016, 65, 209-241.	1.3	16
10	Composition of pseudodifferential operators associated with fractional Hankel-Clifford integral transformations. Applicable Analysis, 2016, 95, 1792-1807.	1.3	15
11	PSEUDO-DIFFERENTIAL OPERATORS ASSOCIATED TO A PAIR OF HANKEL-CLIFFORD TRANSFORMATIONS ON CERTAIN BEURLING TYPE FUNCTION SPACES. Asian-European Journal of Mathematics, 2013, 06, 1350039.	0.5	13
12	The continuous fractional wave packet transform. AIP Conference Proceedings, 2013, , .	0.4	13
13	The convolution for zero-order Mehler-Fock transform and pseudo-differential operator. Integral Transforms and Special Functions, 2018, 29, 189-206.	1.2	13
14	Approximation of linear canonical wavelet transform on the generalized Sobolev spaces. Journal of Pseudo-Differential Operators and Applications, 2019, 10, 855-881.	0.7	13
15	Two versions of pseudo-differential operators involving the Kontorovich-Lebedev transform in $L^2(\mathbb{R}^n, dx)$. Forum Mathematicum, 2018, 30, 31-42.	0.7	12
16	A pair of linear canonical Hankel transformations and associated pseudo-differential operators. Applicable Analysis, 2018, 97, 2727-2742.	1.3	12
17	Linear canonical wave packet transform. Integral Transforms and Special Functions, 2021, 32, 893-911.	1.2	12
18	Composition of the Continuous Fractional Wavelet Transforms. The National Academy of Sciences, India, 2016, 39, 115-120.	1.3	11

#	ARTICLE	IF	CITATIONS
19	Boundedness of pseudo-differential operators involving Kontorovichâ€“Lebedev transform. Integral Transforms and Special Functions, 2017, 28, 300-314.	1.2	11
20	The fractional Hankel wavelet transformation. Asian-European Journal of Mathematics, 2015, 08, 1550030.	0.5	10
21	Wavelet Transformation Associated with Second Hankelâ€“Clifford Transformation. The National Academy of Sciences, India, 2015, 38, 493-496.	1.3	9
22	A couple of fractional powers of Hankel-type integral transformations and pseudo-differential operators. SeMA Journal, 2017, 74, 181-211.	2.0	9
23	Lebedevâ€“Skalskaya transforms on certain function spaces and associated pseudo-differential operators. Integral Transforms and Special Functions, 2021, 32, 113-133.	1.2	9
24	Fractional Continuous Wavelet Transform on Some Function Spaces. Proceedings of the National Academy of Sciences India Section A - Physical Sciences, 2016, 86, 57-64.	1.2	8
25	Wavelet transforms associated with the Kontorovichâ€“Lebedev transform. International Journal of Wavelets, Multiresolution and Information Processing, 2017, 15, 1750011.	1.3	8
26	The fractional wavelet transform on spaces of type W . Integral Transforms and Special Functions, 2013, 24, 239-250.	1.2	7
27	Two variants of fractional powers of Hankel integral transforms of arbitrary order. Annali Dell'Universita Di Ferrara, 2015, 61, 309-331.	1.3	7
28	Continuous wavelet transform associated with zero-order Mehlerâ€“Fock transform and its composition. International Journal of Wavelets, Multiresolution and Information Processing, 2018, 16, 1850050.	1.3	7
29	Convolution with the linear canonical Hankel transformation. Boletin De La Sociedad Matematica Mexicana, 2019, 25, 195-213.	0.7	7
30	Pseudo-differential operators associated with the Jacobi differential operator and Fourier-cosine wavelet transform. Asian-European Journal of Mathematics, 2015, 08, 1550010.	0.5	6
31	The continuous fractional wavelet transform on generalized weighted Sobolev spaces. Asian-European Journal of Mathematics, 2015, 08, 1550054.	0.5	6
32	Convolution and product theorems for the quadratic-phase Fourier transform. Georgian Mathematical Journal, 2022, 29, 595-602.	0.6	6
33	Continuity of Pseudo-differential Operators Associated with the Bessel Operator in Some Gevrey Spaces. Applicable Analysis, 2002, 81, 637-662.	1.3	5
34	Continuity of pseudo-differential operator $h^{1/4}$ involving Hankel translation and Hankel convolution on some Gevrey spaces. Integral Transforms and Special Functions, 2010, 21, 465-477.	1.2	5
35	The fractional Hankel transform of certain tempered distributions and pseudo-differential operators. Annali Dell'Universita Di Ferrara, 2013, 59, 141-158.	1.3	5
36	On the Sobolev boundedness results of the product of pseudo-differential operators involving a couple of fractional Hankel transforms. Acta Mathematica Sinica, English Series, 2018, 34, 221-232.	0.6	5

#	ARTICLE	IF	CITATIONS
37	The Kontorovich–Lebedev transform and its associated pseudodifferential operator. <i>Mathematical Methods in the Applied Sciences</i> , 2018, 41, 46-57.	2.3	5
38	The continuous fractional wavelet transform on a generalized Sobolev space. <i>International Journal of Wavelets, Multiresolution and Information Processing</i> , 2016, 14, 1650046.	1.3	4
39	The Kontorovich–Lebedev Transform and Sobolev Type Space. <i>Complex Analysis and Operator Theory</i> , 2018, 12, 669-681.	0.6	4
40	Characterization of Weyl operator in terms of Mehler–Fock transform. <i>Mathematical Methods in the Applied Sciences</i> , 2020, 43, 9119-9128.	2.3	4
41	Pseudo-differential operator in the framework of linear canonical transform domain. <i>Asian-European Journal of Mathematics</i> , 2021, 14, 2150117.	0.5	4
42	Wavelet transforms associated with the index Whittaker transform. <i>Mathematical Methods in the Applied Sciences</i> , 2021, 44, 10734-10752.	2.3	4
43	Lebedev–Skalskaya transforms and allied operators on certain function spaces. <i>Integral Transforms and Special Functions</i> , 2022, 33, 320-340.	1.2	4
44	Uncertainty principles associated with quaternion linear canonical transform and their estimates. <i>Mathematical Methods in the Applied Sciences</i> , 2022, 45, 4772-4790.	2.3	4
45	Hankel–Clifford transformations on some ultradifferentiable function spaces and pseudo-differential operators. <i>Journal of Pseudo-Differential Operators and Applications</i> , 2013, 4, 551-567.	0.7	3
46	Two variants of fractional powers of Hankel–Clifford transformations and pseudo-differential operators. <i>Journal of Pseudo-Differential Operators and Applications</i> , 2014, 5, 411-454.	0.7	3
47	Composition of pseudo-differential operators associated with Kontorovich–Lebedev transform. <i>Integral Transforms and Special Functions</i> , 2016, 27, 878-892.	1.2	3
48	A couple of fractional powers of Hankel-type integral transformations of arbitrary order. <i>Bolletino Dell'Unione Matematica Italiana</i> , 2016, 9, 323-339.	1.0	3
49	The wavelet transformation involving the fractional powers of Hankel-type integral transformation. <i>Afrika Matematika</i> , 2017, 28, 189-198.	0.8	3
50	Product of continuous fractional wave packet transforms. <i>International Journal of Wavelets, Multiresolution and Information Processing</i> , 2019, 17, 1950021.	1.3	3
51	Convolution, correlation and spectrum of functions associated with linear canonical transform. <i>Optik</i> , 2022, 249, 168256.	2.9	3
52	The Pseudo-differential Operator $\rho^{\frac{1}{4}}$ on Hankel Invariant Spaces. <i>Applicable Analysis</i> , 2003, 82, 187-196.	1.3	2
53	Boundedness of pseudo-differential operator associated with fractional Hankel transform. <i>Fractional Calculus and Applied Analysis</i> , 2014, 17, 154-170.	2.2	2
54	Fractional wavelet packet transformations involving Hankel–Clifford integral transformations. <i>Acta Mathematica Sinica, English Series</i> , 2016, 32, 783-796.	0.6	2
