#	ARTICLE	IF	CITATIONS
1	Optimising growth in very preterm infants: reviewing the evidence. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2023, 108, 2-9.	1.4	8
2	Coeliac disease: making the diagnosis. Archives of Disease in Childhood, 2022, 107, 536-537.	1.0	2
3	Infliximab at diagnosis: moving towards personalisation in paediatric inflammatory bowel disease. Gut, 2022, 71, gutjnl-2021-324214.	6.1	3
4	Deleterious Genetic Variation Across the NOD Signaling Pathway Is Associated With Reduced NFKB Signaling Transcription and Upregulation of Alternative Inflammatory Transcripts in Pediatric Inflammatory Bowel Disease. Inflammatory Bowel Diseases, 2022, , .	0.9	10
5	Feeding children with neurodisability: challenges and practicalities. Archives of Disease in Childhood, 2022, 107, 967-972.	1.0	3
6	Time to normalisation of tissue transglutaminase in paediatric coeliac disease is dependent on initial titre and half of patients will normalise within 12 months. Archives of Disease in Childhood, 2022, 107, 660-664.	1.0	3
7	Highlights from this issue. Frontline Gastroenterology, 2022, 13, 1-2.	0.9	1
8	Growth failure is rare in a contemporary cohort of paediatric inflammatory bowel disease patients. Acta Paediatrica, International Journal of Paediatrics, 2021, 110, 326-334.	0.7	0
9	Ileal Transcriptomic Analysis in Paediatric Crohn's Disease Reveals IL17- and NOD- signalling Expression Signatures in Treatment-naïve Patients and Identifies Epithelial Cells Driving Differentially Expressed Genes. Journal of Crohn's and Colitis, 2021, 15, 774-786.	0.6	11
10	Adaptations to the current ECCO/ESPGHAN guidelines on the management of paediatric acute severe colitis in the context of the COVID-19 pandemic: a RAND appropriateness panel. Gut, 2021, 70, 1044-1052.	6.1	13
11	The impact of national lockdown on nutritional status of children with inflammatory bowel disease. Journal of Human Nutrition and Dietetics, 2021, 34, 656-659.	1.3	10
12	Total body water in full-term and preterm newborns: systematic review and meta-analysis. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2021, 106, 542-548.	1.4	15
13	Routine abdominal magnetic resonance imaging can determine psoas muscle area in paediatric Crohn's disease and correlates with bioelectrical impedance spectroscopy measures of lean mass. Clinical Nutrition ESPEN, 2021, 42, 233-238.	0.5	10
14	P60...Ustekinumab is an effective drug for steroid-free remission in children with refractory IBD and anti TNF-alpha induced psoriasis. , 2021, , .		0
15	Bioelectrical spectroscopy impedance phase angle is not associated with nutritional status in a stable cohort of paediatric inflammatory bowel disease patients. Clinical Nutrition ESPEN, 2021, 44, 276-281.	0.5	3
16	Temporal Trends in Ileoanal Pouch Surgery for Paediatric Onset Ulcerative Colitis in England from 1997 to 2015 Using Hospital Episode Statistics. Journal of Pediatric Surgery, 2021, , .	0.8	0
17	Highlights from this issue. Frontline Gastroenterology, 2021, 12, 541-542.	0.9	0
18	Analysis and Hierarchical Clustering of Blood Results Before Diagnosis in Pediatric Inflammatory Bowel Disease. Inflammatory Bowel Diseases, 2020, 26, 469-475.	0.9	9

#	ARTICLE	IF	CITATIONS
19	Feeding intolerance in children with critical illness. <i>Clinical Nutrition</i> , 2020, 39, 609-611.	2.3	7
20	Improving growth of infants with congenital heart disease using a consensus-based nutritional pathway. <i>Clinical Nutrition</i> , 2020, 39, 2455-2462.	2.3	31
21	TTC7A Variants Previously Described to Cause Enteropathy Are Observed on a Single Haplotype and Appear Non-pathogenic in Pediatric Inflammatory Bowel Disease Patients. <i>Journal of Clinical Immunology</i> , 2020, 40, 245-247.	2.0	1
22	Impact of COVID-19 on diagnosis and management of paediatric inflammatory bowel disease during lockdown: a UK nationwide study. <i>Archives of Disease in Childhood</i> , 2020, 105, 1186-1191.	1.0	26
23	COVID-19 and the gastrointestinal tract: recent data. <i>Frontline Gastroenterology</i> , 2020, 11, 371-374.	0.9	6
24	Organisational changes and challenges for inflammatory bowel disease services in the UK during the COVID-19 pandemic. <i>Frontline Gastroenterology</i> , 2020, 11, 343-350.	0.9	37
25	Generating longitudinal growth charts from preterm infants fed to current recommendations. <i>Archives of Disease in Childhood: Fetal and Neonatal Edition</i> , 2020, 105, 646-651.	1.4	4
26	Beyond bedside measures of malnutrition in paediatric Crohn's disease – Should we be thinking of sarcopenia. <i>Clinical Nutrition</i> , 2020, 39, 1639-1642.	2.3	2
27	Investigating coeliac disease in adults. <i>BMJ</i> , The, 2020, 369, m2176.	3.0	2
28	Adaptations to the British Society of Gastroenterology guidelines on the management of acute severe UC in the context of the COVID-19 pandemic: a RAND appropriateness panel. <i>Gut</i> , 2020, 69, gutjnl-2020-321927.	6.1	28
29	Genetic Sequencing of Pediatric Patients Identifies Mutations in Monogenic Inflammatory Bowel Disease Genes that Translate to Distinct Clinical Phenotypes. <i>Clinical and Translational Gastroenterology</i> , 2020, 11, e00129.	1.3	21
30	Functional abdominal pain: what clinicians need to know. <i>Archives of Disease in Childhood</i> , 2020, 105, 938-944.	1.0	12
31	Can risk stratification help reduce negative appendectomy rates?. <i>The Lancet Child and Adolescent Health</i> , 2020, 4, 252-253.	2.7	1
32	Children and young people with inflammatory bowel disease attend less school than their healthy peers. <i>Archives of Disease in Childhood</i> , 2020, 105, 671-676.	1.0	9
33	COVID-19 and the gastrointestinal tract: emerging clinical data. <i>Frontline Gastroenterology</i> , 2020, 11, 290-292.	0.9	7
34	British Society of Gastroenterology guidance for management of inflammatory bowel disease during the COVID-19 pandemic. <i>Gut</i> , 2020, 69, 984-990.	6.1	232
35	Challenges in chronic paediatric disease during the COVID-19 pandemic: diagnosis and management of inflammatory bowel disease in children. <i>Archives of Disease in Childhood</i> , 2020, 105, 706-706.	1.0	6
36	Impact of COVID-19 on the diagnosis, assessment and management of children with inflammatory bowel disease in the UK: implications for practice. <i>BMJ Paediatrics Open</i> , 2020, 4, e000786.	0.6	8

#	ARTICLE	IF	CITATIONS
37	Early postnatal growth failure in preterm infants is not inevitable. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2019, 104, F235-F241.	1.4	48
38	Handheld 3D scanning as a minimally invasive measuring technique for neonatal anthropometry. Clinical Nutrition ESPEN, 2019, 33, 279-282.	0.5	7
39	Review article: the genetics of the human leucocyte antigen region in inflammatory bowel disease. Alimentary Pharmacology and Therapeutics, 2019, 50, 885-900.	1.9	18
40	Inflammatory bowel disease: long-term therapeutic challenges. Expert Review of Gastroenterology and Hepatology, 2019, 13, 1049-1063.	1.4	8
41	Letter: anti-TNF therapy and intestinal resections in Crohn's disease "are we just delaying the inevitable?". Alimentary Pharmacology and Therapeutics, 2019, 50, 842-843.	1.9	2
42	Treatment of Active Crohn's Disease With an Ordinary Food-Based Diet That Replicates Exclusive Enteral Nutrition. Gastroenterology, 2019, 157, 1160-1161.	0.6	1
43	Should I publish in an open access journal?. BMJ: British Medical Journal, 2019, 365, l1544.	2.4	8
44	Conflict, candour and reflection. Archives of Disease in Childhood, 2019, 104, 309-310.	1.0	0
45	Personalised therapy for inflammatory bowel disease. Lancet, The, 2019, 393, 1672-1674.	6.3	5
46	Screen time in children and adolescents: is there evidence to guide parents and policy?. The Lancet Child and Adolescent Health, 2019, 3, 292-294.	2.7	42
47	Personalising medicine in inflammatory bowel disease "current and future perspectives. Translational Pediatrics, 2019, 8, 56-69.	0.5	43
48	Measuring body composition in the preterm infant: Evidence base and practicalities. Clinical Nutrition, 2019, 38, 2521-2530.	2.3	39
49	Searching for the missing link in coeliac disease. BMJ: British Medical Journal, 2019, 364, l696.	2.4	0
50	"Catch-up" growth of infants with IUGR does not significantly contribute to the whole-cohort weight gain pattern. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2019, 104, F663-F664.	1.4	2
51	Survey of healthcare professional and parental experience in accessing support for breastfeeding during an acute hospital admission. Acta Paediatrica, International Journal of Paediatrics, 2019, 108, 175-177.	0.7	0
52	Increased prevalence of anti-TNF therapy in paediatric inflammatory bowel disease is associated with a decline in surgical resections during childhood. Alimentary Pharmacology and Therapeutics, 2019, 49, 398-407.	1.9	35
53	Exclusive enteral nutrition in Crohn's disease: Evidence and practicalities. Clinical Nutrition, 2019, 38, 80-89.	2.3	90
54	Making body composition measurement a part of routine care in children. Clinical Nutrition, 2018, 37, 763-764.	2.3	5

#	ARTICLE	IF	CITATIONS
55	Is the incidence of paediatric inflammatory bowel disease still increasing?. Archives of Disease in Childhood, 2018, 103, archdischild-2018-315038.	1.0	12
56	Improved Medical Treatment and Surgical Surveillance of Children and Adolescents with Ulcerative Colitis in the United Kingdom. Inflammatory Bowel Diseases, 2018, 24, 1520-1530.	0.9	3
57	Infants on Parenteral Nutrition: Getting the Calories Right. Journal of Parenteral and Enteral Nutrition, 2018, 42, 268-269.	1.3	0
58	Faecal Calprotectin. Journal of Pediatric Gastroenterology and Nutrition, 2018, 66, e115.	0.9	1
59	Use of Infliximab Biosimilar Versus Originator in a Pediatric United Kingdom Inflammatory Bowel Disease Induction Cohort. Journal of Pediatric Gastroenterology and Nutrition, 2018, 67, 513-519.	0.9	23
60	Endoscopic and Histological Assessment of Paediatric Inflammatory Bowel Disease Over a 3-Year Follow-up Period. Journal of Pediatric Gastroenterology and Nutrition, 2018, 66, 402-409.	0.9	13
61	Nutritional support in paediatric Crohn's disease: outcome at 12 months. Acta Paediatrica, International Journal of Paediatrics, 2018, 107, 156-162.	0.7	18
62	Paediatric inflammatory bowel disease: improving early diagnosis. Archives of Disease in Childhood, 2018, 103, 307-308.	1.0	29
63	Compliance with nutrition screening in a children's hospital. Archives of Disease in Childhood, 2018, 103, 798-800.	1.0	4
64	Real-life Anti-tumor Necrosis Factor Experience in More Than 500 Patients. Journal of Pediatric Gastroenterology and Nutrition, 2018, 66, 274-280.	0.9	9
65	Paediatric inflammatory bowel disease- brief update on current practice. Paediatrics and Child Health (United Kingdom), 2018, 28, 507-514.	0.2	3
66	Celiac disease in children. BMJ: British Medical Journal, 2018, 363, k3932.	2.4	7
67	Patient, parent and professional perception of the use of maintenance enteral nutrition in Paediatric Crohn's Disease. Acta Paediatrica, International Journal of Paediatrics, 2018, 107, 2199-2206.	0.7	7
68	Intestinal failure: the evolving demographic and patient outcomes on home parenteral nutrition. Acta Paediatrica, International Journal of Paediatrics, 2018, 107, 2207-2211.	0.7	20
69	Gastro-oesophageal reflux in infants: what are we treating?. The Lancet Child and Adolescent Health, 2018, 2, 475-476.	2.7	0
70	Hypophosphataemia in infants with CHD treated with amino acid infant formula. Cardiology in the Young, 2018, 28, 1370-1374.	0.4	4
71	De novo and rare mutations in the HSPA1L heat shock gene associated with inflammatory bowel disease. Genome Medicine, 2017, 9, 8.	3.6	27
72	Assessing the growth of preterm infants using detailed anthropometry. Acta Paediatrica, International Journal of Paediatrics, 2017, 106, 889-896.	0.7	11

#	ARTICLE	IF	CITATIONS
73	Is HLA testing for coeliac disease helpful in associated autoimmune conditions?. Archives of Disease in Childhood, 2017, 102, 595-596.	1.0	4
74	Exome Analysis of Rare and Common Variants within the NOD Signaling Pathway. Scientific Reports, 2017, 7, 46454.	1.6	15
75	Improving remission rates in newly diagnosed paediatric ulcerative colitis. The Lancet Gastroenterology and Hepatology, 2017, 2, 838-839.	3.7	1
76	Early-onset paediatric inflammatory bowel disease. The Lancet Child and Adolescent Health, 2017, 1, 147-158.	2.7	31
77	16S sequencing and functional analysis of the fecal microbiome during treatment of newly diagnosed pediatric inflammatory bowel disease. Medicine (United States), 2017, 96, e7347.	0.4	30
78	Epidemiology, management and outcome of ultrashort bowel syndrome in infancy. Archives of Disease in Childhood: Fetal and Neonatal Edition, 2017, 102, F551-F556.	1.4	48
79	Pharmacological treatment of children with gastro-oesophageal reflux. The Cochrane Library, 2016, 2016, CD008550.	1.5	56
80	Analysis and Interpretation of the Human Microbiome. Inflammatory Bowel Diseases, 2016, 22, 1713-1722.	0.9	12
81	Identification of Variants in Genes Associated with Single-gene Inflammatory Bowel Disease by Whole-exome Sequencing. Inflammatory Bowel Diseases, 2016, 22, 2317-2327.	0.9	39
82	Endoscopic Versus Histological Disease Extent at Presentation of Paediatric Inflammatory Bowel Disease. Journal of Pediatric Gastroenterology and Nutrition, 2016, 62, 246-251.	0.9	15
83	Colectomy in pediatric ulcerative colitis: A single center experience of indications, outcomes, and complications. Journal of Pediatric Surgery, 2016, 51, 277-281.	0.8	26
84	Women, children, and global public health: beyond the millennium development goals. BMJ, The, 2015, 350, h1755-h1755.	3.0	8
85	Presenting phenotype of paediatric inflammatory bowel disease in Wessex, Southern England 2010-2013. Acta Paediatrica, International Journal of Paediatrics, 2015, 104, 831-837.	0.7	12
86	Exome Analysis of Patients with Concurrent Pediatric Inflammatory Bowel Disease and Autoimmune Disease. Inflammatory Bowel Diseases, 2015, 21, 1.	0.9	18
87	The Millennium Development Goals: taking stock as the first phase ends. Archives of Disease in Childhood, 2015, 100, 117-118.	1.0	2
88	How to use: nutritional assessment in children. Archives of Disease in Childhood: Education and Practice Edition, 2015, 100, 204-209.	0.3	4
89	Parental knowledge of coeliac disease. Informatics for Health and Social Care, 2015, 40, 240-253.	1.4	13
90	How to use: nutritional assessment in neonates. Archives of Disease in Childhood: Education and Practice Edition, 2015, 100, 147-154.	0.3	8

#	ARTICLE	IF	CITATIONS
91	Rising incidence of paediatric inflammatory bowel disease (PIBD) in Wessex, Southern England. Archives of Disease in Childhood, 2014, 99, 659-664.	1.0	36
92	Total Colonic Aganglionosis: A 15-Year Single Center Experience. European Journal of Pediatric Surgery, 2014, 24, 488-491.	0.7	12
93	Immuno-Genomic Profiling of Patients with Inflammatory Bowel Disease. Inflammatory Bowel Diseases, 2014, 20, 1813-1819.	0.9	10
94	Complication of percutaneous endoscopic gastrostomy. Archives of Disease in Childhood, 2014, 99, 788-788.	1.0	5
95	Nutritional Support in Crohn's Disease. , 2013, , 65-75.		0
96	Next generation exome sequencing of paediatric inflammatory bowel disease patients identifies rare and novel variants in candidate genes. Gut, 2013, 62, 977-984.	6.1	104
97	No Relation Between Disease Activity Measured by Multiple Methods and REE in Childhood Crohn Disease. Journal of Pediatric Gastroenterology and Nutrition, 2012, 54, 271-276.	0.9	17
98	Anaemia and iron deficiency in children with inflammatory bowel disease. Journal of Crohn's and Colitis, 2012, 6, 687-691.	0.6	67
99	A very high amylase can be benign in paediatric Crohn's disease. BMJ Case Reports, 2012, 2012, bcr0220125917-bcr0220125917.	0.2	9
100	Ten-year experience of home parenteral nutrition in a single centre. Acta Paediatrica, International Journal of Paediatrics, 2012, 101, 524-527.	0.7	21
101	Gastro-oesophageal reflux in infancy. Paediatrics and Child Health (United Kingdom), 2011, 21, 394-400.	0.2	5
102	Body composition in childhood inflammatory bowel disease. Clinical Nutrition, 2011, 30, 112-115.	2.3	47
103	EWTD: incompatible with subspecialty training?. Archives of Disease in Childhood, 2011, 96, 699-700.	1.0	1
104	Guidelines for the Management of Inflammatory Bowel Disease in Children in the United Kingdom. Journal of Pediatric Gastroenterology and Nutrition, 2010, 50, S1-13.	0.9	129
105	Connective tissue growth factor expression is increased in collagenous colitis and coeliac disease. Histopathology, 2010, 57, 427-435.	1.6	19
106	Current Pharmacological Management of Gastro-Esophageal Reflux in Children. Paediatric Drugs, 2009, 11, 185-202.	1.3	76
107	Cow's milk allergy in children. BMJ: British Medical Journal, 2009, 339, b2275-b2275.	2.4	13
108	Guidelines for the management of growth failure in childhood inflammatory bowel disease. Inflammatory Bowel Diseases, 2008, 14, 839-849.	0.9	188

#	ARTICLE	IF	CITATIONS
109	Latent coeliac disease in childhood?. <i>Gut</i> , 2008, 57, 715-716.	6.1	1
110	Energy Requirements in Children With Inflammatory Bowel Disease. <i>Journal of Pediatric Gastroenterology and Nutrition</i> , 2008, 47, 672-672.	0.9	4
111	Infliximab at Diagnosis: A Sledgehammer to Crack a Walnut?. <i>Journal of Pediatric Gastroenterology and Nutrition</i> , 2007, 45, 130-134.	0.9	0
112	Management of Chronic Functional Constipation in Childhood. <i>Paediatric Drugs</i> , 2007, 9, 33-46.	1.3	26
113	Sonographic evaluation of inflammatory bowel disease: a prospective, blinded, comparative study. <i>Pediatric Radiology</i> , 2006, 36, 947-953.	1.1	97
114	Crohn's disease post-cardiac transplantation presenting with severe growth failure and delayed onset of puberty. <i>Pediatric Allergy and Immunology</i> , 2004, 15, 186-189.	1.1	7
