citing authors

#	ARTICLE	IF	CITATIONS
1	Cotransport of titanium dioxide nanoparticles and formaldehyde in saturated and unsaturated columns packed with quartz sand. <i>Vadose Zone Journal</i> , 2023, 22, .	1.3	6
2	The role of nanoparticles (titanium dioxide, graphene oxide) on the inactivation of co-existing bacteria in the presence and absence of quartz sand. <i>Environmental Science and Pollution Research</i> , 2022, 29, 19199-19211.	2.7	6
3	Colloid transport through a variable-aperture fracture under unfavorable attachment conditions: Characterization with a continuous time random walk model. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2022, 644, 128822.	2.3	3
4	Zinc nanoparticles: Mode of action and efficacy against boscalid-resistant <i>Alternaria alternata</i> isolates. <i>Science of the Total Environment</i> , 2022, 829, 154638.	3.9	13
5	Metal nanoparticles against fungicide resistance: alternatives or partners?. <i>Pest Management Science</i> , 2022, 78, 3953-3956.	1.7	10
6	Effect of Mn(II) and Phytic Acid on Cr(VI) in the Ferrihydrite-Cr(VI) Co-precipitates: Implication for the Migration Behavior of Cr(VI). <i>ACS ES&amp;T Water</i> , 2022, 2, 1320-1331.	2.3	2
7	Modeling the Transport of Aggregating Nanoparticles in Porous Media. <i>Water Resources Research</i> , 2021, 57, .	1.7	37
8	Copper nanoparticles against benzimidazole-resistant <i>Monilinia fructicola</i> field isolates. <i>Pesticide Biochemistry and Physiology</i> , 2021, 173, 104796.	1.6	22
9	Editorial: Advances in Pollutant Transport in Critical Zone Environments. <i>Frontiers in Water</i> , 2021, 3, .	1.0	0
10	Interaction of Titanium Dioxide with Formaldehyde in the Presence of Quartz Sand under Static and Dynamic Conditions. <i>Water (Switzerland)</i> , 2021, 13, 1420.	1.2	6
11	Metal nanoparticles: Phytotoxicity on tomato and effect on symbiosis with the <i>Fusarium solani</i> FsK strain. <i>Science of the Total Environment</i> , 2021, 787, 147606.	3.9	15
12	Occurrence and distribution of pharmaceuticals and personal care products (PPCPs) detected in lakes around the world - A review. <i>Environmental Advances</i> , 2021, 6, 100131.	2.2	34
13	Interaction of graphene oxide nanoparticles with quartz sand and montmorillonite colloids. <i>Environmental Technology (United Kingdom)</i> , 2020, 41, 1127-1138.	1.2	26
14	Use of GreenZyme <sup>®</sup> for remediation of porous media polluted with jet fuel JP-5. <i>Environmental Technology (United Kingdom)</i> , 2020, 41, 277-286.	1.2	2
15	Estimation of urine volume in municipal sewage originating from patients receiving antibiotics at a private clinic in Crete, Greece. <i>Science of the Total Environment</i> , 2020, 705, 134858.	3.9	9
16	Synergy between Cu-NPs and fungicides against <i>Botrytis cinerea</i> . <i>Science of the Total Environment</i> , 2020, 703, 135557.	3.9	48
17	Use of silver nanoparticles to counter fungicide-resistance in <i>Monilinia fructicola</i> . <i>Science of the Total Environment</i> , 2020, 747, 141287.	3.9	26
18	Effect of Clay Colloid Particles on Formaldehyde Transport in Unsaturated Porous Media. <i>Water (Switzerland)</i> , 2020, 12, 3541.	1.2	10

#	ARTICLE	IF	CITATIONS
19	Influence of graphene oxide nanoparticles on the transport and cotransport of biocolloids in saturated porous media. <i>Colloids and Surfaces B: Biointerfaces</i> , 2020, 189, 110841.	2.5	41
20	Two-site colloid transport with reversible and irreversible attachment: Analytical solutions. <i>Advances in Water Resources</i> , 2019, 130, 29-36.	1.7	18
21	Bacteriophage MS2 and titanium dioxide heteroaggregation: Effects of ambient light and the presence of quartz sand. <i>Colloids and Surfaces B: Biointerfaces</i> , 2019, 180, 281-288.	2.5	12
22	Use of copper, silver and zinc nanoparticles against foliar and soil-borne plant pathogens. <i>Science of the Total Environment</i> , 2019, 670, 292-299.	3.9	170
23	Effect of salinity on formaldehyde interaction with quartz sand and kaolinite colloid particles: batch and column experiments. <i>Environmental Earth Sciences</i> , 2019, 78, 1.	1.3	7
24	Cotransport of Suspended Colloids and Nanoparticles in Porous Media. <i>Transport in Porous Media</i> , 2019, 128, 153-177.	1.2	3
25	Adsorption and Thermodynamics of Pharmaceuticals, Acyclovir and Fluconazole, onto Quartz Sand Under Static and Dynamic Conditions. <i>Environmental Engineering Science</i> , 2018, 35, 909-917.	0.8	12
26	Evaluation of Carbon Nanotubes and Quartz Sand for the Removal of Formaldehyde (2,4-Dinitrophenylhydrazine) from Aqueous Solutions. <i>Industrial &amp; Engineering Chemistry Research</i> , 2018, 57, 17003-17012.	1.8	12
27	Modeling colloid transport in fractures with spatially variable aperture and surface attachment. <i>Journal of Hydrology</i> , 2018, 566, 735-742.	2.3	18
28	Impact of Spatially Variable Collision Efficiency on the Transport of Biocolloids in Geochemically Heterogeneous Porous Media. <i>Water Resources Research</i> , 2018, 54, 3841-3862.	1.7	23
29	Fitting the Transport and Attachment of Dense Biocolloids in One-Dimensional Porous Media: ColloidFit. <i>Ground Water</i> , 2017, 55, 156-159.	0.7	21
30	Inactivation of MS2 bacteriophage by titanium dioxide nanoparticles in the presence of quartz sand with and without ambient light. <i>Journal of Colloid and Interface Science</i> , 2017, 497, 117-125.	5.0	52
31	Cotransport of human adenoviruses with clay colloids and TiO <sub>2</sub> nanoparticles in saturated porous media: Effect of flow velocity. <i>Science of the Total Environment</i> , 2017, 598, 160-167.	3.9	50
32	Heteroaggregation of graphene oxide nanoparticles and kaolinite colloids. <i>Science of the Total Environment</i> , 2017, 579, 736-744.	3.9	59
33	Cotransport of Graphene Oxide Nanoparticles and Kaolinite Colloids in Porous Media. <i>Transport in Porous Media</i> , 2017, 119, 181-204.	1.2	80
34	Experimental investigation of the effect of carbon dioxide on <i>Pseudomonas putida</i> biofilms in a two-dimensional glass network micromodel. <i>International Journal of Greenhouse Gas Control</i> , 2016, 46, 240-247.	2.3	3
35	Cotransport of clay colloids and viruses through water-saturated vertically oriented columns packed with glass beads: Gravity effects. <i>Science of the Total Environment</i> , 2016, 545-546, 210-218.	3.9	54
36	Colloid particle size-dependent dispersivity. <i>Water Resources Research</i> , 2015, 51, 4668-4683.	1.7	107

#	ARTICLE	IF	CITATIONS
37	Transport of Human Adenoviruses in Water Saturated Laboratory Columns. Food and Environmental Virology, 2015, 7, 122-131.	1.5	17
38	Interaction of human adenoviruses and coliphages with kaolinite and bentonite. Science of the Total Environment, 2015, 517, 86-95.	3.9	52
39	Interaction Between Graphene Oxide Nanoparticles and Quartz Sand. Environmental Science & Technology, 2015, 49, 13413-13421.	4.6	93
40	Modeling dense-colloid and virus cotransport in three-dimensional porous media. Journal of Contaminant Hydrology, 2015, 181, 102-113.	1.6	44
41	Special Issue on fate and transport of biocolloids and nanoparticles in soil and groundwater systems. Journal of Contaminant Hydrology, 2015, 181, 1-2.	1.6	2
42	Characterization of TiO <sub>2</sub> nanoparticle suspensions in aqueous solutions and TiO <sub>2</sub> nanoparticle retention in water-saturated columns packed with glass beads. Chemical Engineering Journal, 2015, 262, 823-830.	6.6	39
43	Experimental investigation of virus and clay particles cotransport in partially saturated columns packed with glass beads. Journal of Colloid and Interface Science, 2015, 440, 140-150.	5.0	60
44	Biosorption of Cu <sup>2+</sup> and Ni <sup>2+</sup> by Arthrospira platensis with different biochemical compositions. Chemical Engineering Journal, 2015, 259, 806-813.	6.6	74
45	Virus attachment onto quartz sand: Role of grain size and temperature. Journal of Environmental Chemical Engineering, 2014, 2, 796-801.	3.3	40
46	Mathematical modeling of colloid and virus cotransport in porous media: Application to experimental data. Advances in Water Resources, 2014, 68, 62-73.	1.7	71
47	Effect of Gravity on Colloid Transport through Water-Saturated Columns Packed with Glass Beads: Modeling and Experiments. Environmental Science & Technology, 2014, 48, 6805-6813.	4.6	150
48	Transport of colloids in unsaturated packed columns: Role of ionic strength and sand grain size. Chemical Engineering Journal, 2013, 232, 237-248.	6.6	101
49	Virus inactivation by high frequency ultrasound in combination with visible light. Colloids and Surfaces B: Biointerfaces, 2013, 107, 174-179.	2.5	31
50	Cotransport of clay colloids and viruses in water saturated porous media. Colloids and Surfaces A: Physicochemical and Engineering Aspects, 2013, 416, 56-65.	2.3	108
51	Transport of Pseudomonas putida in a 3-D Bench Scale Experimental Aquifer. Transport in Porous Media, 2012, 94, 617-642.	1.2	29
52	Removal of mercury from aqueous solutions by malt spent rootlets. Chemical Engineering Journal, 2012, 213, 135-141.	6.6	66
53	Virus inactivation in the presence of quartz sand under static and dynamic batch conditions at different temperatures. Journal of Hazardous Materials, 2012, 233-234, 148-157.	6.5	40
54	Assessment of the Effectiveness of a Solar System Heating an Anaerobic Bioreactor. Water, Air, and Soil Pollution, 2012, 223, 1443-1454.	1.1	0

#	ARTICLE	IF	CITATIONS
55	Attachment of bacteriophages MS2 and $\lambda$ X174 onto kaolinite and montmorillonite: Extended-DLVO interactions. <i>Colloids and Surfaces B: Biointerfaces</i> , 2012, 92, 74-83.	2.5	146
56	Erratum to "Transport of biocolloids in water saturated columns packed with sand: Effect of grain size and pore water velocity" [Journal of Contaminant Hydrology 126 (2011) 301-314]. <i>Journal of Contaminant Hydrology</i> , 2012, 129-130, 10.	1.6	1
57	Transport of biocolloids in water saturated columns packed with sand: Effect of grain size and pore water velocity. <i>Journal of Contaminant Hydrology</i> , 2012, 129-130, 11-24.	1.6	38
58	Cotransport of <i>Pseudomonas putida</i> and kaolinite particles through water-saturated columns packed with glass beads. <i>Water Resources Research</i> , 2011, 47, .	1.7	88
59	Monodisperse and polydisperse colloid transport in water-saturated fractures with various orientations: Gravity effects. <i>Advances in Water Resources</i> , 2011, 34, 1249-1255.	1.7	37
60	Degradation of PAHs by high frequency ultrasound. <i>Water Research</i> , 2011, 45, 2587-2594.	5.3	81
61	Mathematical Modelling of Bacterial Populations in Bio-remediation Processes. , 2011, , .		0
62	Transport of biocolloids in water saturated columns packed with sand: Effect of grain size and pore water velocity. <i>Journal of Contaminant Hydrology</i> , 2011, 126, 301-314.	1.6	77
63	Non-invasive in situ concentration determination of fluorescent or color tracers and pollutants in a glass pore network model. <i>Journal of Hazardous Materials</i> , 2011, 198, 299-306.	6.5	10
64	Attachment of <i>Pseudomonas putida</i> onto differently structured kaolinite minerals: A combined ATR-FTIR and $^1\text{H}$ NMR study. <i>Colloids and Surfaces B: Biointerfaces</i> , 2011, 84, 354-359.	2.5	45
65	A new method for in situ concentration measurements in packed-column transport experiments. <i>Chemical Engineering Science</i> , 2010, 65, 4285-4292.	1.9	12
66	Interaction between Viruses and Clays in Static and Dynamic Batch Systems. <i>Environmental Science &amp; Technology</i> , 2010, 44, 4539-4544.	4.6	92
67	Removal of Biocolloids Suspended in Reclaimed Wastewater by Injection into a Fractured Aquifer Model. <i>Environmental Science &amp; Technology</i> , 2010, 44, 971-977.	4.6	47
68	Transport of Viruses Through Saturated and Unsaturated Columns Packed with Sand. <i>Transport in Porous Media</i> , 2009, 76, 121-138.	1.2	56
69	Design and analysis of a solar reactor for anaerobic wastewater treatment. <i>Bioresource Technology</i> , 2008, 99, 7742-7749.	4.8	27
70	Fate and transport of pathogens in a fractured aquifer in the Salento area, Italy. <i>Water Resources Research</i> , 2008, 44, .	1.7	78
71	Experimental investigation of acoustically enhanced colloid transport in water-saturated packed columns. <i>Journal of Colloid and Interface Science</i> , 2007, 308, 200-207.	5.0	27
72	Evaluation of the Factors Controlling the Time-Dependent Inactivation Rate Coefficients of Bacteriophage MS2 and PRD1. <i>Environmental Science &amp; Technology</i> , 2006, 40, 3237-3242.	4.6	49

#	ARTICLE	IF	CITATIONS
73	Dissolution of a multicomponent DNAPL pool in an experimental aquifer. <i>Journal of Hazardous Materials</i> , 2006, 128, 218-226.	6.5	24
74	Acoustically Enhanced Ganglia Dissolution and Mobilization in a Monolayer of Glass Beads. <i>Transport in Porous Media</i> , 2006, 64, 103-121.	1.2	27
75	Contaminant transport in a fracture with spatially variable aperture in the presence of monodisperse and polydisperse colloids. <i>Stochastic Environmental Research and Risk Assessment</i> , 2005, 19, 266-279.	1.9	45
76	Virus fate and transport during artificial recharge with recycled water. <i>Water Resources Research</i> , 2005, 41, .	1.7	57
77	Estimation of time dependent virus inactivation rates by geostatistical and resampling techniques: application to virus transport in porous media. <i>Stochastic Environmental Research and Risk Assessment</i> , 2004, 18, 67-78.	1.9	22
78	An experimental study of acoustically enhanced NAPL dissolution in porous media. <i>AIChE Journal</i> , 2004, 50, 3271-3280.	1.8	14
79	Dense colloid transport in a bifurcating fracture. <i>Journal of Colloid and Interface Science</i> , 2004, 270, 250-254.	5.0	11
80	Longitudinal interpolation of parameters characterizing channel geometry by piece-wise polynomial and universal kriging methods: effect on flow modeling. <i>Advances in Water Resources</i> , 2004, 27, 1061-1073.	1.7	8
81	Non-aqueous phase liquid drop formation within a water saturated fracture. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2004, 240, 199-209.	2.3	7
82	Acoustically Enhanced Multicomponent NAPL Ganglia Dissolution in Water Saturated Packed Columns. <i>Environmental Science &amp; Technology</i> , 2004, 38, 2940-2945.	4.6	18
83	Early breakthrough of colloids and bacteriophage MS2 in a water-saturated sand column. <i>Water Resources Research</i> , 2004, 40, .	1.7	89
84	Title is missing!. <i>Transport in Porous Media</i> , 2003, 51, 191-210.	1.2	26
85	Effective velocity and effective dispersion coefficient for finite-sized particles flowing in a uniform fracture. <i>Journal of Colloid and Interface Science</i> , 2003, 263, 288-295.	5.0	65
86	Mass transfer coefficient and concentration boundary layer thickness for a dissolving NAPL pool in porous media. <i>Journal of Hazardous Materials</i> , 2003, 97, 245-255.	6.5	41
87	Analytical solutions for monodisperse and polydisperse colloid transport in uniform fractures. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 2003, 226, 101-118.	2.3	39
88	Measuring and modeling the dissolution of nonideally shaped dense nonaqueous phase liquid pools in saturated porous media. <i>Water Resources Research</i> , 2002, 38, 8-1-8-14.	1.7	19
89	Bootstrap estimation of the mass transfer coefficient of a dissolving nonaqueous phase liquid pool in porous media. <i>Water Resources Research</i> , 2002, 38, 8-1-8-6.	1.7	17
90	Experimental investigation of acoustically enhanced solute transport in porous media. <i>Geophysical Research Letters</i> , 2002, 29, 5-1-5-4.	1.5	33

#	ARTICLE	IF	CITATIONS
91	Dissolution of a well-defined trichloroethylene pool in saturated porous media: experimental results and model simulations. <i>Water Research</i> , 2002, 36, 3911-3918.	5.3	20
92	Dissolution of nonaqueous phase liquid pools in anisotropic aquifers. <i>Stochastic Environmental Research and Risk Assessment</i> , 2001, 15, 33-46.	1.9	11
93	An efficient particle tracking equation with specified spatial step for the solution of the diffusion equation. <i>Chemical Engineering Science</i> , 2001, 56, 6535-6543.	1.9	30
94	Title is missing!. <i>Transport in Porous Media</i> , 2000, 38, 167-187.	1.2	36
95	Title is missing!. <i>Transport in Porous Media</i> , 2000, 38, 93-115.	1.2	30
96	Transport of polydisperse colloids in a saturated fracture with spatially variable aperture. <i>Water Resources Research</i> , 2000, 36, 1457-1465.	1.7	67
97	Dissolution of a well-defined trichloroethylene pool in saturated porous media: Experimental design and aquifer characterization. <i>Water Resources Research</i> , 2000, 36, 1687-1696.	1.7	45
98	Virus transport in unsaturated porous media. <i>Water Resources Research</i> , 2000, 36, 173-179.	1.7	57
99	Cosolvent-Water Displacement in One-Dimensional Soil Column. <i>Journal of Environmental Engineering</i> , ASCE, 1999, 125, 87-91.	0.7	12
100	Analytical models for virus adsorption and inactivation in unsaturated porous media. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 1999, 155, 189-197.	2.3	26
101	Analytical solutions for solute transport in saturated porous media with semi-infinite or finite thickness. <i>Advances in Water Resources</i> , 1999, 22, 507-519.	1.7	40
102	Mass transfer correlations for nonaqueous phase liquid pool dissolution in saturated porous media. <i>Water Resources Research</i> , 1999, 35, 449-459.	1.7	52
103	Transport of polydisperse colloid suspensions in a single fracture. <i>Water Resources Research</i> , 1999, 35, 707-718.	1.7	57
104	Three-Dimensional Analytical Models for Virus Transport in Saturated Porous Media. <i>Transport in Porous Media</i> , 1998, 30, 87-112.	1.2	59
105	Contaminant transport resulting from multicomponent nonaqueous phase liquid pool dissolution in three-dimensional subsurface formations. <i>Journal of Contaminant Hydrology</i> , 1998, 31, 1-21.	1.6	43
106	NAPL Pool Dissolution in Stratified and Anisotropic Porous Formations. <i>Journal of Environmental Engineering</i> , ASCE, 1998, 124, 851-862.	0.7	27
107	Modeling colloid transport and deposition in saturated fractures. <i>Colloids and Surfaces A: Physicochemical and Engineering Aspects</i> , 1997, 121, 189-202.	2.3	60
108	Unsaturated flow in a quasi-three-dimensional fractured medium with spatially variable aperture. <i>Water Resources Research</i> , 1996, 32, 1531-1540.	1.7	20

#	ARTICLE	IF	CITATIONS
109	One-Dimensional Virus Transport in Porous Media With Time-Dependent Inactivation Rate Coefficients. <i>Water Resources Research</i> , 1996, 32, 2607-2611.	1.7	64
110	One-dimensional virus transport in homogeneous porous media with time-dependent distribution coefficient. <i>Journal of Hydrology</i> , 1996, 185, 199-219.	2.3	75
111	Modeling of colloid and colloid-facilitated contaminant transport in a two-dimensional fracture with spatially variable aperture. <i>Transport in Porous Media</i> , 1995, 20, 197-221.	1.2	62
112	Numerical modeling of three-dimensional contaminant migration from dissolution of multicomponent NAPL pools in saturated porous media. <i>Environmental Geology</i> , 1995, 26, 157-165.	1.2	36
113	Analysis of a model for contaminant transport in fractured media in the presence of colloids. <i>Journal of Hydrology</i> , 1995, 165, 261-281.	2.3	67
114	Effective parameters for flow in saturated heterogeneous porous media. <i>Journal of Hydrology</i> , 1995, 170, 181-197.	2.3	12
115	Three-Dimensional Analytical Models of Contaminant Transport From Nonaqueous Phase Liquid Pool Dissolution in Saturated Subsurface Formations. <i>Water Resources Research</i> , 1995, 31, 1137-1145.	1.7	73
116	Analytical Models for One-Dimensional Virus Transport in Saturated Porous Media. <i>Water Resources Research</i> , 1995, 31, 1429-1437.	1.7	68
117	Analytical solutions for one-dimensional colloid transport in saturated fractures. <i>Advances in Water Resources</i> , 1994, 17, 283-296.	1.7	54
118	Modeling of contaminant transport resulting from dissolution of nonaqueous phase liquid pools in saturated porous media. <i>Transport in Porous Media</i> , 1994, 16, 125-145.	1.2	53
119	Artificial tracers for geothermal reservoir studies. <i>Environmental Geology and Water Sciences</i> , 1993, 22, 60-70.	0.4	32
120	A three-dimensional steady-state atmospheric dispersion-deposition model for emissions from a ground-level area source. <i>Atmospheric Environment Part A General Topics</i> , 1992, 26, 747-757.	1.3	25
121	Modeling the emission and dispersion of volatile organics from surface aeration wastewater treatment facilities. <i>Water Research</i> , 1992, 26, 1045-1052.	5.3	9
122	Macrodispersion of sorbing solutes in heterogeneous porous formations with spatially periodic retardation factor and velocity field. <i>Water Resources Research</i> , 1992, 28, 1517-1529.	1.7	40
123	Generalized Taylor-Aris moment analysis of the transport of sorbing solutes through porous media with spatially-periodic retardation factor. <i>Transport in Porous Media</i> , 1992, 7, 163-185.	1.2	52
124	Comment on "An Analytical Solution for One-Dimensional Transport in Heterogeneous Porous Media" by S. R. Yates. <i>Water Resources Research</i> , 1991, 27, 2163-2163.	1.7	8
125	Analysis of one-dimensional solute transport through porous media with spatially variable retardation factor. <i>Water Resources Research</i> , 1990, 26, 437-446.	1.7	118
126	One-dimensional solute transport in porous media with partial well recirculation: Application to field experiments. <i>Water Resources Research</i> , 1990, 26, 1189-1195.	1.7	5

#	ARTICLE	IF	CITATIONS
127	One-dimensional solute transport in porous media with well-to-well recirculation: Application to field experiments. <i>Water Resources Research</i> , 1990, 26, 1189-1195.	1.7	28
128	Investigation of soluble indium chelates for groundwater and hydrothermal fluid tracing. <i>Applied Geochemistry</i> , 1987, 2, 329-335.	1.4	9
129	Nonaqueous Phase Liquid Pool Dissolution in Subsurface Formations. , 0, , 97-132.		1
