#	ARTICLE	IF	CITATIONS
1	Diverse bioerosion structures in lower Pliocene deposits from a volcanic oceanic island: Baãa de Nossa Senhora section, Santa Maria Island, Azores (central North Atlantic). <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 2021, 569, 110284.	1.0	3
2	Megatsunamis Induced by Volcanic Landslides in the Canary Islands: Age of the Tsunami Deposits and Source Landslides. <i>GeoHazards</i> , 2021, 2, 228-256.	0.8	1
3	The bicentenary of Georg Hartung, a German pioneer geologist, explorer, and illustrator. <i>History of Geo- and Space Sciences</i> , 2021, 12, 217-223.	0.1	0
4	A geological record of multiple Pleistocene tsunami inundations in an oceanic island: The case of Maio, Cape Verde. <i>Sedimentology</i> , 2020, 67, 1529-1552.	1.6	32
5	Oceanic Island forests buried by Holocene (Meghalayan) explosive eruptions: palaeobiodiversity in pre-anthropogenic volcanic charcoal from Faial Island (Azores, Portugal) and its palaeoecological implications. <i>Review of Palaeobotany and Palynology</i> , 2020, 273, 104116.	0.8	6
6	Evidence for late Pleistocene volcanism at Santa Maria Island, Azores?. <i>Journal of Volcanology and Geothermal Research</i> , 2020, 394, 106829.	0.8	11
7	Physical volcanology and emplacement mechanism of the Central Atlantic Magmatic Province (CAMP) lava flows from the Central High Atlas, Morocco. <i>Comptes Rendus - Geoscience</i> , 2020, 352, 455-473.	0.4	1
8	The Loss of a Unique Palaeobotanical Site in Terceira Island Within the Azores UNESCO Global Geopark (Portugal). <i>Geoheritage</i> , 2019, 11, 1817-1825.	1.5	5
9	<i>Eurya stigmosa</i> (Theaceae), a new and extinct record for the Calabrian stage of Madeira Island (Portugal): ⁴⁰ Ar/ ³⁹ Ar dating, palaeoecological and oceanic island palaeobiogeographical implications. <i>Quaternary Science Reviews</i> , 2019, 206, 129-140.	1.4	11
10	The first Ichneumonid fossil from the Early Pleistocene of Madeira Island (Portugal). <i>Zootaxa</i> , 2019, 4612, zootaxa.4612.3.13.	0.2	5
11	Tracing insular woodiness in giant <i>Daucus</i> (s.l.) fruit fossils from the Early Pleistocene of Madeira Island (Portugal). <i>Taxon</i> , 2019, 68, 1314-1320.	0.4	6
12	Volcano-tectonic evolution of a linear volcanic ridge (Pico-Faial Ridge, Azores Triple Junction) assessed by paleomagnetic studies. <i>Journal of Volcanology and Geothermal Research</i> , 2018, 352, 78-91.	0.8	12
13	Investigating collapse structures in oceanic islands using magnetotelluric surveys: The case of Fogo Island in Cape Verde. <i>Journal of Volcanology and Geothermal Research</i> , 2018, 357, 152-162.	0.8	34
14	Genesis and morphological evolution of coastal talus-platforms (fajãs) with lagoons: The case study of the newly-formed Fajã dos Milagres (Corvo Island, Azores). <i>Geomorphology</i> , 2018, 310, 138-152.	1.1	8
15	Inventory and review of the Mio-Pleistocene São Jorge flora (Madeira Island, Portugal): palaeoecological and biogeographical implications. <i>Journal of Systematic Palaeontology</i> , 2018, 16, 159-177.	0.6	17
16	Mega-tsunami conglomerates and flank collapses of ocean island volcanoes. <i>Marine Geology</i> , 2018, 395, 168-187.	0.9	51
17	Gravitational, erosional and depositional processes on volcanic ocean islands: Insights from the submarine morphology of Madeira Archipelago. <i>Earth and Planetary Science Letters</i> , 2018, 482, 288-299.	1.8	39
18	Silicic, high- to extremely high-grade ignimbrites and associated deposits from the Paraná; Magmatic Province, southern Brazil. <i>Journal of Volcanology and Geothermal Research</i> , 2018, 355, 270-286.	0.8	25

#	ARTICLE	IF	CITATIONS
19	Vertical land motion and sea level change in Macaronesia. <i>Geophysical Journal International</i> , 2017, 210, 1264-1280.	1.0	4
20	The 2014-15 eruption and the short-term geochemical evolution of the Fogo volcano (Cape Verde): Evidence for small-scale mantle heterogeneity. <i>Lithos</i> , 2017, 288-289, 91-107.	0.6	68
21	Emergence and evolution of Santa Maria Island (Azores) – The conundrum of uplifted islands revisited. <i>Bulletin of the Geological Society of America</i> , 2017, 129, 372-390.	1.6	92
22	Environmental implication of subaqueous lava flows from a continental Large Igneous Province: Examples from the Moroccan Central Atlantic Magmatic Province (CAMP). <i>Journal of African Earth Sciences</i> , 2017, 127, 211-221.	0.9	9
23	Extrusive carbonatite outcrops – A source of chemical elements imbalance in topsoils of oceanic volcanic islands. <i>Catena</i> , 2017, 157, 333-343.	2.2	5
24	Water prospection in volcanic islands by Time Domain Electromagnetic (TDEM) surveying: The case study of the islands of Fogo and Santo Antão in Cape Verde. <i>Journal of Applied Geophysics</i> , 2016, 134, 226-234.	0.9	13
25	Geochemical fingerprints in topsoils of the volcanic Brava Island, Cape Verde. <i>Catena</i> , 2016, 147, 522-535.	2.2	12
26	Environmental Implication of Subaqueous Lava Flows from A Continental Large Igneous Province: Examples from the Moroccan Central Atlantic Magmatic Province (CAMP). <i>Acta Geologica Sinica</i> , 2016, 90, 117-117.	0.8	0
27	Reply to comment by Marques et al. on “The insular shelves of the Faial-Pico Ridge (Azores)”. <i>Journal of Applied Geophysics</i> , 2016, 134, 633-641.	1.0	20
28	Reply to Comment on “The Jurassic-Cretaceous basaltic magmatism of the Oued El-Abid syncline (High Atlas, Morocco)”. <i>Journal of African Earth Sciences</i> , 2016, 118, 320-323.	0.9	2
29	The insular shelves of the Faial-Pico Ridge (Azores). <i>Journal of Applied Geophysics</i> , 2016, 134, 1401-1420.	1.0	49
30	Palaeoecology, taphonomy, and preservation of a lower Pliocene shell bed (coquina) from a volcanic oceanic island (Santa Maria Island, Azores). <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 2015, 430, 57-73.	1.0	44
31	The emergence of volcanic oceanic islands on a slow-moving plate: The example of Madeira Island, NE Atlantic. <i>Geochemistry, Geophysics, Geosystems</i> , 2015, 16, 522-537.	1.0	58
32	Hazard potential of volcanic flank collapses raised by new megatsunami evidence. <i>Science Advances</i> , 2015, 1, e1500456.	4.7	103
33	Chapter 3 Active tectonics in the central and eastern Azores islands along the Eurasia-Nubia boundary: a review. <i>Geological Society Memoir</i> , 2015, 44, 15-32.	0.9	35
34	Chapter 6 Volcano-tectonic structures of São Miguel Island, Azores. <i>Geological Society Memoir</i> , 2015, 44, 65-86.	0.9	31
35	Paleomagnetism of the Central Atlantic Magmatic Province in the Algarve basin, Portugal: First insights. <i>Tectonophysics</i> , 2015, 663, 364-377.	0.9	8
36	⁴⁰ Ar/ ³⁹ Ar ages and petrogenesis of the West Iberian Margin onshore magmatism at the Jurassic-Cretaceous transition: Geodynamic implications and assessment of open-system processes involving saline materials. <i>Lithos</i> , 2015, 236-237, 156-172.	0.6	31

#	ARTICLE	IF	CITATIONS
37	New insights on the occurrence of peperites and sedimentary deposits within the silicic volcanic sequences of the Paran Magmatic Province, Brazil. <i>Solid Earth</i> , 2014, 5, 121-130.	1.2	20
38	Enriched mantle source for the Central Atlantic magmatic province: New supporting evidence from southwestern Europe. <i>Lithos</i> , 2014, 188, 15-32.	0.6	61
39	Intraplate seismicity across the Cape Verde swell: A contribution from a temporary seismic network. <i>Tectonophysics</i> , 2014, 636, 325-337.	0.9	17
40	The morphology of insular shelves as a key for understanding the geological evolution of volcanic islands: Insights from Terceira Island (Azores). <i>Geochemistry, Geophysics, Geosystems</i> , 2014, 15, 1801-1826.	1.0	75
41	Incorporating Descriptive Metadata into Seismic Source Zone Models for Seismic-Hazard Assessment: A Case Study of the Azores-West Iberian Region. <i>Bulletin of the Seismological Society of America</i> , 2014, 104, 1212-1229.	1.1	22
42	Neotectonics of Graciosa island (Azores): a contribution to seismic hazard assessment of a volcanic area in a complex geodynamic setting. <i>Annals of Geophysics</i> , 2014, 56, .	0.5	6
43	Paleoseismological evidence for historical surface faulting in So Miguel island (Azores). <i>Annals of Geophysics</i> , 2014, 56, .	0.5	4
44	Geochemical evidence for melting of carbonated peridotite on Santa Maria Island, Azores. <i>Contributions To Mineralogy and Petrology</i> , 2013, 165, 823-841.	1.2	42
45	The JurassicCretaceous basaltic magmatism of the Oued El-Abid syncline (High Atlas, Morocco): Physical volcanology, geochemistry and geodynamic implications. <i>Journal of African Earth Sciences</i> , 2013, 81, 60-81.	0.9	40
46	Condor seamount (Azores, NE Atlantic): A morpho-tectonic interpretation. <i>Deep-Sea Research Part II: Topical Studies in Oceanography</i> , 2013, 98, 7-23.	0.6	34
47	Large-scale active slump of the southeastern flank of Pico Island, Azores: COMMENT. <i>Geology</i> , 2013, 41, e301-e301.	2.0	11
48	Present-day deformation in So Jorge Island, Azores, from episodic GPS measurements (20012011). <i>Advances in Space Research</i> , 2013, 51, 1581-1592.	1.2	24
49	Depositional processes on oceanic island shelves  Evidence from stormgenerated Neogene deposits from the midNorth Atlantic. <i>Sedimentology</i> , 2013, 60, 1769-1785.	1.6	52
50	Gmar and La Orotava Mega-Landslides (Tenerife) and Tsunamis Deposits in Canary Islands. , 2013, , 27-33.		4
51	Geochemical temporal evolution of Brava Island magmatism: Constraints on the variability of Cape Verde mantle sources and on carbonatitesilicate magma link. <i>Chemical Geology</i> , 2012, 334, 44-61.	1.4	34
52	Primary and secondary processes constraining the noble gas isotopic signatures of carbonatites and silicate rocks from Brava Island: evidence for a lower mantle origin of the Cape Verde plume. <i>Contributions To Mineralogy and Petrology</i> , 2012, 163, 995-1009.	1.2	18
53	Constraints on the structure of Maio Island (Cape Verde) by a three-dimensional gravity model: imaging partially exhumed magma chambers. <i>Geophysical Journal International</i> , 2012, 190, 931-940.	1.0	16
54	Assessing landslide movements in volcanic islands using near-shore marine geophysical data: south Pico island, Azores. <i>Bulletin of Volcanology</i> , 2012, 74, 483-496.	1.1	33

#	ARTICLE	IF	CITATIONS
55	Morphology, internal architecture and emplacement mechanisms of lava flows from the Central Atlantic Magmatic Province (CAMP) of Argana Basin (Morocco). Geological Society Special Publication, 2011, 357, 167-193.	0.8	25
56	Volcano-stratigraphic and structural evolution of Brava Island (Cape Verde) based on $^{40}\text{Ar}/^{39}\text{Ar}$, ^{238}U and field constraints. Journal of Volcanology and Geothermal Research, 2010, 196, 219-235.	0.8	67
57	Quaternary extrusive calciocarbonatite volcanism on Brava Island (Cape Verde): A nephelinite-carbonatite immiscibility product. Journal of African Earth Sciences, 2010, 56, 59-74.	0.9	42
58	Active tectonics and first paleoseismological results in Faial, Pico and S. Jorge islands (Azores). Tectonophysics, 2007, 445, 301-317.	0.5	104
59	Rift-related magmatism of the Central Atlantic magmatic province in Algarve, Southern Portugal. Lithos, 2008, 101, 102-124.	0.6	84
60	Crustal seismic velocity structure near Faial and Pico Islands (AZORES), from local earthquake tomography. Tectonophysics, 2007, 445, 301-317.	0.9	54
61	The 9th of July 1998 Faial Island (Azores, North Atlantic) seismic sequence. Journal of Seismology, 2007, 11, 275-298.	0.6	55
62	Definition of the Portuguese frameworks with international relevance as an input for the European geological heritage characterisation. Episodes, 2005, 28, 177-186.	0.8	63
63	The Late Triassic-Early Jurassic volcanism of Morocco and Portugal in the framework of the Central Atlantic Magmatic Province: An overview. Geophysical Monograph Series, 2003, , 179-207.	0.1	25
64	Title is missing!. Marine Geophysical Researches, 1998, 20, 141-156.	0.5	182
65	Radiocarbon Dating Recent Volcanic Activity on Faial Island (Azores). Radiocarbon, 1995, 37, 139-147.	0.8	23
66	Geodynamic models for the Azores triple junction: A contribution from tectonics. Tectonophysics, 1990, 184, 405-415.	0.9	90
67	The Quaternary plant fossil record from the volcanic Azores Archipelago (Portugal, North Atlantic). Tectonophysics, 2007, 445, 301-317.	0.7	90
