

# Katarna Kuricov

## List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/9477608/katarina-kuricova-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

16

papers

210

#	Paper	IF	Citations
16	AGR2 silencing contributes to metformin-dependent sensitization of colorectal cancer cells to chemotherapy. <i>Oncology Letters</i> , <b>2019</b> , 18, 4964-4973	2.6	3
15	Differences in food intake and genetic variability in taste receptors between Czech pregnant women with and without gestational diabetes mellitus. <i>European Journal of Nutrition</i> , <b>2018</b> , 57, 513-521 <sup>5.2</sup>	5	
14	Transketolase Activity but not Thiamine Membrane Transport Change in Response to Hyperglycaemia and Kidney Dysfunction. <i>Experimental and Clinical Endocrinology and Diabetes</i> , <b>2018</b> , 126, 255-262	2.3	4
13	Uric Acid and Xanthine Levels in Pregnancy Complicated by Gestational Diabetes Mellitus-The Effect on Adverse Pregnancy Outcomes. <i>International Journal of Molecular Sciences</i> , <b>2018</b> , 19,	6.3	6
12	Levels of heavy metals and their binding protein metallothionein in type 2 diabetics with kidney disease. <i>Journal of Biochemical and Molecular Toxicology</i> , <b>2017</b> , 31, e21891	3.4	5
11	Hyperuricemia contributes to the faster progression of diabetic kidney disease in type 2 diabetes mellitus. <i>Journal of Diabetes and Its Complications</i> , <b>2016</b> , 30, 1300-7	3.2	36
10	Dysfunctional protection against advanced glycation due to thiamine metabolism abnormalities in gestational diabetes. <i>Glycoconjugate Journal</i> , <b>2016</b> , 33, 591-8	3	7
9	Effect of glucose variability on pathways associated with glucotoxicity in diabetes: Evaluation of a novel in vitro experimental approach. <i>Diabetes Research and Clinical Practice</i> , <b>2016</b> , 114, 1-8	7.4	17
8	1,25-Dihydroxyvitamin D increases the gene expression of enzymes protecting from glucolipotoxicity in peripheral blood mononuclear cells and human primary endothelial cells. <i>Food and Function</i> , <b>2016</b> , 7, 2537-43	6.1	4
7	Serum carboxymethyl-lysine, a dominant advanced glycation end product, is increased in women with gestational diabetes mellitus. <i>Biomedical Papers of the Medical Faculty of the University Palacky&amp;#x0301;, Olomouc, Czechoslovakia</i> , <b>2016</b> , 160, 70-5	1.7	19
6	Vitamin D Status in Women with Gestational Diabetes Mellitus during Pregnancy and Postpartum. <i>BioMed Research International</i> , <b>2015</b> , 2015, 260624	3	18
5	Identification of AHK2- and AHK3-like cytokinin receptors in <i>Brassica napus</i> reveals two subfamilies of AHK2 orthologues. <i>Journal of Experimental Botany</i> , <b>2015</b> , 66, 339-53	7	20
4	Genetic variability in enzymes of metabolic pathways conferring protection against non-enzymatic glycation versus diabetes-related morbidity and mortality. <i>Clinical Chemistry and Laboratory Medicine</i> , <b>2014</b> , 52, 77-83	5.9	14
3	Evidence for altered thiamine metabolism in diabetes: Is there a potential to oppose gluco- and lipotoxicity by rational supplementation?. <i>World Journal of Diabetes</i> , <b>2014</b> , 5, 288-95	4.7	38
2	NOS3 894G>T polymorphism is associated with progression of kidney disease and cardiovascular morbidity in type 2 diabetic patients: NOS3 as a modifier gene for diabetic nephropathy?. <i>Kidney and Blood Pressure Research</i> , <b>2013</b> , 38, 92-8	3.1	3
1	ADMA, SDMA and L-arginine/ADMA ratio but not DDAH genetic polymorphisms are reliable predictors of diabetic nephropathy progression as identified by competing risk analysis. <i>Kidney and Blood Pressure Research</i> , <b>2012</b> , 36, 200-8	3.1	11
