#	ARTICLE	IF	CITATIONS
1	An Initial Framework for Understanding the Resilience of Aquifers to Groundwater Pumping. <i>Water</i> (Switzerland), 2021, 13, 519.	2.7	3
2	Assessing the impacts of climate change on hydrological regimes and fish EQR in two Danish catchments. <i>Journal of Hydrology: Regional Studies</i> , 2021, 34, 100798.	2.4	7
3	High Resolution Water Table Modeling of the Shallow Groundwater Using a Knowledge-Guided Gradient Boosting Decision Tree Model. <i>Frontiers in Water</i> , 2021, 3, .	2.3	17
4	Relating wellfield drawdown and water quality to aquifer sustainability – A method for assessing safe groundwater abstraction. <i>Ecological Indicators</i> , 2020, 110, 105782.	6.3	9
5	Hydrogeological Studies Integrating the Climate, Freshwater Cycle, and Catchment Geography for the Benefit of Urban Resilience and Sustainability. <i>Water</i> (Switzerland), 2020, 12, 3324.	2.7	7
6	Understanding the impacts of groundwater abstraction through long-term trends in water quality. <i>Water Research</i> , 2019, 156, 241-251.	11.3	35
7	Modelling of the shallow water table at high spatial resolution using random forests. <i>Hydrology and Earth System Sciences</i> , 2019, 23, 4603-4619.	4.9	53
8	Resilience to natural hazards: An analysis of territorial governance in the Nordic countries. <i>International Journal of Disaster Risk Reduction</i> , 2018, 31, 1283-1294.	3.9	23
9	Participatory early warning and monitoring systems: A Nordic framework for web-based flood risk management. <i>International Journal of Disaster Risk Reduction</i> , 2018, 31, 1295-1306.	3.9	40
10	Integrating groundwater stress in life-cycle assessments – An evaluation of water abstraction. <i>Journal of Environmental Management</i> , 2018, 222, 112-121.	7.8	10
11	Designing a Hydrological Real-Time System for Surface Water and Groundwater in Denmark with Engagement of Stakeholders. <i>Water Resources Management</i> , 2016, 30, 1785-1802.	3.9	5
12	Identification and analysis of uncertainty in disaster risk reduction and climate change adaptation in South and Southeast Asia. <i>International Journal of Disaster Risk Reduction</i> , 2016, 16, 208-214.	3.9	41
13	The application of a groundwater/surface-water model to test the vulnerability of Bracciano Lake (near Rome, Italy) to climatic and water-use stresses. <i>Hydrogeology Journal</i> , 2015, 23, 1481-1498.	2.1	19
14	Brief Communication: CATALYST – a multi-regional stakeholder think tank for fostering capacity development in disaster risk reduction and climate change adaptation. <i>Natural Hazards and Earth System Sciences</i> , 2014, 14, 2157-2163.	3.6	5
15	Selecting among five common modelling approaches for integrated environmental assessment and management. <i>Environmental Modelling and Software</i> , 2013, 47, 159-181.	4.5	578
16	Evaluation of a typical hydrological model in relation to environmental flows. <i>Journal of Hydrology</i> , 2013, 507, 52-62.	5.4	27
17	Stakeholder driven update and improvement of a national water resources model. <i>Environmental Modelling and Software</i> , 2013, 40, 202-213.	4.5	77
18	On the importance of appropriate precipitation gauge catch correction for hydrological modelling at mid to high latitudes. <i>Hydrology and Earth System Sciences</i> , 2012, 16, 4157-4176.	4.9	73

#	ARTICLE	IF	CITATIONS
19	Bayesian networks in environmental and resource management. Integrated Environmental Assessment and Management, 2012, 8, 418-429.	2.9	131
20	An evolutionary Bayesian belief network methodology for participatory decision making under uncertainty: An application to groundwater management. Integrated Environmental Assessment and Management, 2012, 8, 456-461.	2.9	16
21	Use of Bayesian belief networks for dealing with ambiguity in integrated groundwater management. Integrated Environmental Assessment and Management, 2012, 8, 430-444.	2.9	29
22	More is not always better: Coping with ambiguity in natural resources management. Journal of Environmental Management, 2011, 92, 78-84.	7.8	97
23	Identifying Uncertainty Guidelines for Supporting Policy Making in Water Management Illustrated for Upper Guadiana and Rhine Basins. Water Resources Management, 2010, 24, 3901-3938.	3.9	17
24	Comparative reflections on the use of modelling tools in conflictive water management settings: The Mancha Occidental aquifer, Spain. Environmental Modelling and Software, 2010, 25, 1439-1449.	4.5	34
25	Harmonised Principles for Public Participation in Quality Assurance of Integrated Water Resources Modelling. Water Resources Management, 2009, 23, 2539-2554.	3.9	26
26	An evolutionary Bayesian belief network methodology for optimum management of groundwater contamination. Environmental Modelling and Software, 2009, 24, 303-310.	4.5	80
27	Identification of Major Sources of Uncertainty in Current IWRM Practice. Illustrated for the Rhine Basin. Water Resources Management, 2008, 22, 1677-1708.	3.9	58
28	Reflections on the use of Bayesian belief networks for adaptive management. Journal of Environmental Management, 2008, 88, 1025-1036.	7.8	92
29	Assessment of exploitable groundwater resources of Denmark by use of ensemble resource indicators and a numerical groundwater-surface water model. Journal of Hydrology, 2008, 348, 224-240.	5.4	115
30	Environmental benefits and social cost – an example of combining Bayesian networks and economic models for analysing pesticide management instruments. Hydrology Research, 2007, 38, 351-371.	2.7	6
31	Public participation modelling using Bayesian networks in management of groundwater contamination. Environmental Modelling and Software, 2007, 22, 1101-1113.	4.5	138
32	Quality assurance in model based water management – review of existing practice and outline of new approaches. Environmental Modelling and Software, 2005, 20, 1201-1215.	4.5	138
33	Modelling guidelines – terminology and guiding principles. Advances in Water Resources, 2004, 27, 71-82.	3.8	300
34	Capture zone, travel time, and solute-transport predictions using inverse modeling and different geological models. Hydrogeology Journal, 2003, 11, 536-548.	2.1	46
35	Transient modeling of regional groundwater flow using parameter estimates from steady-state automatic calibration. Journal of Hydrology, 2003, 273, 188-204.	5.4	56
36	Methodology for construction, calibration and validation of a national hydrological model for Denmark. Journal of Hydrology, 2003, 280, 52-71.	5.4	301

#	ARTICLE	IF	CITATIONS
37	Bayesian belief networks as a tool for participatory integrated assessment and adaptive groundwater management: the Upper Guadiana Basin, Spain. Geological Survey of Denmark and Greenland Bulletin, 0, 13, 69-72.	2.0	5
38	Evolutionary Bayesian Belief Networks for Participatory Water Resources Management under Uncertainty. , 0, , 156-171.		0
39	A hydrological early warning system for Denmark based on the national model. Geological Survey of Denmark and Greenland Bulletin, 0, 33, 29-32.	2.0	2
