#	ARTICLE	IF	CITATIONS
1	The Marinoan cap carbonate of Svalbard: Syngenetic marine dolomite with ^{17}O anomalous carbonate-associated sulphate. <i>Depositional Record</i> , 2023, 9, 482-507.	0.8	3
2	The Anthropocene: Comparing Its Meaning in Geology (Chronostratigraphy) with Conceptual Approaches Arising in Other Disciplines. <i>Earth's Future</i> , 2021, 9, e2020EF001896.	2.4	61
3	ISODRIP, a model to transfer the $\delta^{18}\text{O}$ signal of precipitation to drip water – Implementation of the model for Eagle Cave (central Spain). <i>Science of the Total Environment</i> , 2021, 797, 149188.	3.9	2
4	Hydrological and geochemical responses of fire in a shallow cave system. <i>Science of the Total Environment</i> , 2019, 662, 180-191.	3.9	12
5	A formal Anthropocene is compatible with but distinct from its diachronous anthropogenic counterparts: a response to W.F. Ruddiman's "three flaws in defining a formal Anthropocene". <i>Progress in Physical Geography</i> , 2019, 43, 319-333.	1.4	28
6	North Iberian temperature and rainfall seasonality over the Younger Dryas and Holocene. <i>Quaternary Science Reviews</i> , 2019, 226, 105998.	1.4	34
7	Constraining the Fluid History of a CO_2 - H_2S Reservoir: Insights From Stable Isotopes, REE, and Fluid Inclusion Microthermometry. <i>Geochemistry, Geophysics, Geosystems</i> , 2019, 20, 359-382.	1.0	6
8	Stable isotopes of oxygen and hydrogen in meteoric water during the Cryogenian Period. <i>Precambrian Research</i> , 2019, 320, 253-260.	1.2	1
9	Sulphate partitioning into calcite: Experimental verification of pH control and application to seasonality in speleothems. <i>Geochimica Et Cosmochimica Acta</i> , 2018, 226, 69-83.	1.6	22
10	Indicators of relative completeness of the glacial record of the Port Askaig Formation, Garvellach Islands, Scotland. <i>Precambrian Research</i> , 2018, 319, 65-78.	1.2	15
11	Global Boundary Stratotype Section and Point (GSSP) for the Anthropocene Series: Where and how to look for potential candidates. <i>Earth-Science Reviews</i> , 2018, 178, 379-429.	4.0	153
12	Tonian-Cryogenian boundary sections of Argyll, Scotland. <i>Precambrian Research</i> , 2018, 319, 37-64.	1.2	32
13	Assessing acid rain and climate effects on the temporal variation of dissolved organic matter in the unsaturated zone of a karstic system from southern China. <i>Journal of Hydrology</i> , 2018, 556, 475-487.	2.3	17
14	OBSOLETE: Geochemical records in speleothems. , 2018, , .		0
15	How to date natural archives of the Anthropocene. <i>Geology Today</i> , 2018, 34, 182-187.	0.3	14
16	The impact of fire on the geochemistry of speleothem-forming drip water in a sub-alpine cave. <i>Science of the Total Environment</i> , 2018, 642, 408-420.	3.9	9
17	Geochemistry of speleothems affected by aragonite to calcite recrystallization – Potential inheritance from the precursor mineral. <i>Geochimica Et Cosmochimica Acta</i> , 2017, 200, 310-329.	1.6	26
18	Laminated tufa sediments formed from overflow karst springs: Controls on their deposition and carbon-oxygen isotope records. <i>Sedimentology</i> , 2017, 64, 1274-1288.	1.6	1

#	ARTICLE	IF	CITATIONS
19	The Working Group on the Anthropocene: Summary of evidence and interim recommendations. <i>Anthropocene</i> , 2017, 19, 55-60.	1.6	310
20	Snowball Earth climate dynamics and Cryogenian geology-geobiology. <i>Science Advances</i> , 2017, 3, e1600983.	4.7	424
21	Making the case for a formal Anthropocene Epoch: an analysis of ongoing critiques. <i>Newsletters on Stratigraphy</i> , 2017, 50, 205-226.	0.5	100
22	A post-wildfire response in cave dripwater chemistry. <i>Hydrology and Earth System Sciences</i> , 2016, 20, 2745-2758.	1.9	23
23	ENSO's cave drip water hydrochemical relationship: a 7-year dataset from south-eastern Australia. <i>Hydrology and Earth System Sciences</i> , 2016, 20, 4625-4640.	1.9	28
24	Stratigraphic and Earth System approaches to defining the Anthropocene. <i>Earth's Future</i> , 2016, 4, 324-345.	2.4	162
25	Glacitectonism, subglacial and glaciallacustrine processes during a Neoproterozoic panglaciation, north-east Svalbard. <i>Sedimentology</i> , 2016, 63, 411-442.	1.6	19
26	Continental carbonate facies of a Neoproterozoic panglaciation, north-east Svalbard. <i>Sedimentology</i> , 2016, 63, 443-497.	1.6	37
27	Sedimentological perspectives on climatic, atmospheric and environmental change in the Neoproterozoic Era. <i>Sedimentology</i> , 2016, 63, 253-306.	1.6	75
28	The Late Cryogenian Warm Interval, NE Svalbard: Chemostratigraphy and genesis. <i>Precambrian Research</i> , 2016, 281, 128-154.	1.2	29
29	Neoproterozoic glass-bleeding. <i>Nature Geoscience</i> , 2016, 9, 192-193.	5.4	4
30	Effects of wildfire on long-term soil CO ₂ concentration: implications for karst processes. <i>Environmental Earth Sciences</i> , 2016, 75, 1.	1.3	15
31	Intra-Event Trends in Stable Isotopes: Exploring Midlatitude Precipitation Using a Vertically Pointing Micro Rain Radar. <i>Journal of Hydrometeorology</i> , 2015, 16, 194-213.	0.7	31
32	When did the Anthropocene begin? A mid-twentieth century boundary level is stratigraphically optimal. <i>Quaternary International</i> , 2015, 383, 196-203.	0.7	546
33	Regional temperature, atmospheric circulation, and sea-ice variability within the Younger Dryas Event constrained using a speleothem from northern Iberia. <i>Earth and Planetary Science Letters</i> , 2015, 419, 101-110.	1.8	75
34	Orbitally forced ice sheet fluctuations during the Marinoan Snowball Earth glaciation. <i>Nature Geoscience</i> , 2015, 8, 704-707.	5.4	59
35	Sulphate concentration in cave dripwater and speleothems: long-term trends and overview of its significance as proxy for environmental processes and climate changes. <i>Quaternary Science Reviews</i> , 2015, 127, 48-60.	1.4	19
36	Impacts of cave air ventilation and in-cave prior calcite precipitation on Golgotha Cave dripwater chemistry, southwest Australia. <i>Quaternary Science Reviews</i> , 2015, 127, 61-72.	1.4	52

#	ARTICLE	IF	CITATIONS
37	Is global warming affecting cave temperatures? Experimental and model data from a paradigmatic case study. <i>Climate Dynamics</i> , 2015, 45, 569-581.	1.7	49
38	Spatial variability and temporal trends in water-use efficiency of European forests. <i>Global Change Biology</i> , 2014, 20, 3700-3712.	4.2	175
39	Synchrotron X-ray distinction of seasonal hydrological and temperature patterns in speleothem carbonate. <i>Environmental Chemistry</i> , 2014, 11, 28.	0.7	24
40	Definition of the Anthropocene: a view from the underworld. <i>Geological Society Special Publication</i> , 2014, 395, 239-254.	0.8	9
41	Preservation of NOM-metal complexes in a modern hyperalkaline stalagmite: Implications for speleothem trace element geochemistry. <i>Geochimica Et Cosmochimica Acta</i> , 2014, 128, 29-43.	1.6	33
42	Biogeochemical cycling of sulphur in karst and transfer into speleothem archives at Grotta di Ernesto, Italy. <i>Biogeochemistry</i> , 2013, 114, 255-267.	1.7	43
43	Methane in underground air in Gibraltar karst. <i>Earth and Planetary Science Letters</i> , 2013, 374, 71-80.	1.8	39
44	Cave aerosols: distribution and contribution to speleothem geochemistry. <i>Quaternary Science Reviews</i> , 2013, 63, 23-41.	1.4	73
45	The chromium isotopic composition of seawater and marine carbonates. <i>Earth and Planetary Science Letters</i> , 2013, 382, 10-20.	1.8	144
46	Reconstruction of cave air temperature based on surface atmosphere temperature and vegetation changes: Implications for speleothem palaeoclimate records. <i>Earth and Planetary Science Letters</i> , 2013, 369-370, 158-168.	1.8	31
47	An isotopic and modelling study of flow paths and storage in Quaternary calcarenite, SW Australia: implications for speleothem paleoclimate records. <i>Quaternary Science Reviews</i> , 2013, 64, 90-103.	1.4	58
48	Microstructures in metasedimentary rocks from the Neoproterozoic Bonahaven Formation, Scotland: Microconcretions, impact spherules, or microfossils?. <i>Precambrian Research</i> , 2013, 233, 59-72.	1.2	14
49	Magnetic fabrics in the basal ice of a surge-type glacier. <i>Journal of Geophysical Research F: Earth Surface</i> , 2013, 118, 2263-2278.	1.0	18
50	A method to anchor floating chronologies in annually laminated speleothems with ^{230}Th dates. <i>Quaternary Geochronology</i> , 2012, 14, 57-66.	0.6	24
51	From soil to cave: Transport of trace metals by natural organic matter in karst dripwaters. <i>Chemical Geology</i> , 2012, 304-305, 68-82.	1.4	122
52	Millennial-length forward models and pseudoproxies of stalagmite $\delta^{18}\text{O}$: an example from NW Scotland. <i>Climate of the Past</i> , 2012, 8, 1153-1167.	1.3	40
53	The effect of visitors in a touristic cave and the resulting constraints on natural thermal conditions for palaeoclimate studies (Eagle Cave, central Spain). <i>Acta Carsologica</i> , 2012, 39, .	0.3	4
54	Carbon mass-balance modelling and carbon isotope exchange processes in dynamic caves. <i>Geochimica Et Cosmochimica Acta</i> , 2011, 75, 380-400.	1.6	173

#	ARTICLE	IF	CITATIONS
55	Size, speciation and lability of NOM metal complexes in hyperalkaline cave dripwater. <i>Geochimica Et Cosmochimica Acta</i> , 2011, 75, 7533-7551.	1.6	50
56	High resolution $\delta^{18}O$ and $\delta^{13}C$ records from an annually laminated Scottish stalagmite and relationship with last millennium climate. <i>Global and Planetary Change</i> , 2011, 79, 303-311.	1.6	45
57	A first evaluation of the spatial gradients in $\delta^{18}O$ recorded by European Holocene speleothems. <i>Global and Planetary Change</i> , 2011, 79, 275-287.	1.6	97
58	A 500 yr speleothem-derived reconstruction of late autumn winter precipitation, northeast Turkey. <i>Quaternary Research</i> , 2011, 75, 399-405.	1.0	23
59	Chapter 62 The Port Askaig Formation, Dalradian Supergroup, Scotland. <i>Geological Society Memoir</i> , 2011, 36, 635-642.	0.9	3
60	Fluorescent properties of organic carbon in cave dripwaters: Effects of filtration, temperature and pH. <i>Science of the Total Environment</i> , 2010, 408, 5940-5950.	3.9	23
61	New developments in process understanding and modelling in geomorphology: introduction and overview. <i>Earth Surface Processes and Landforms</i> , 2010, 35, 1247-1250.	1.2	0
62	Epikarst hydrology and implications for stalagmite capture of climate changes at Grotta di Ernesto (NE Italy): results from long-term monitoring. <i>Hydrological Processes</i> , 2010, 24, 3101-3114.	1.1	63
63	Role of glaciohydraulic supercooling in the formation of stratified facies basal ice: Svãnafellsjãrkvull and Skaftafellsjãrkvull, southeast Iceland. <i>Boreas</i> , 2010, 39, 24-38.	1.2	30
64	Petrology and geochemistry of annually laminated stalagmites from an Alpine cave (Obir, Austria): seasonal cave physiology. <i>Geological Society Special Publication</i> , 2010, 336, 295-321.	0.8	41
65	Seasonal microclimate control of calcite fabrics, stable isotopes and trace elements in modern speleothem from St Michaels Cave, Gibraltar. <i>Geological Society Special Publication</i> , 2010, 336, 323-344.	0.8	66
66	Calibration of speleothem $\delta^{18}O$ with instrumental climate records from Turkey. <i>Global and Planetary Change</i> , 2010, 71, 207-217.	1.6	44
67	High-resolution sulphur isotope analysis of speleothem carbonate by secondary ionisation mass spectrometry. <i>Chemical Geology</i> , 2010, 271, 101-107.	1.4	58
68	Investigation into clouds and precipitation over an urban area using micro rain radars, satellite remote sensing and fluorescence spectrophotometry. <i>Atmospheric Research</i> , 2010, 96, 241-255.	1.8	18
69	Stretching the Envelope of Past Surface Environments: Neoproterozoic Glacial Lakes from Svalbard. <i>Science</i> , 2009, 323, 119-122.	6.0	90
70	Oxygen isotope precipitation anomaly in the North Atlantic region during the 8.2 ka event. <i>Geology</i> , 2009, 37, 1095-1098.	2.0	55
71	The sulphur isotope and hydrochemical characteristics of Skeiãrsandur, Iceland: identification of solute sources and implications for weathering processes. <i>Hydrological Processes</i> , 2009, 23, 2212-2224.	1.1	19
72	Trace elements in speleothems as recorders of environmental change. <i>Quaternary Science Reviews</i> , 2009, 28, 449-468.	1.4	422

#	ARTICLE	IF	CITATIONS
73	Sulfur Fixation in Wood Mapped by Synchrotron X-ray Studies: Implications for Environmental Archives. <i>Environmental Science & Technology</i> , 2009, 43, 1310-1315.	4.6	51
74	Chronology building using objective identification of annual signals in trace element profiles of stalagmites. <i>Quaternary Geochronology</i> , 2009, 4, 11-21.	0.6	75
75	Analysis of rainwater dissolved organic carbon compounds using fluorescence spectrophotometry. <i>Atmospheric Environment</i> , 2008, 42, 8036-8045.	1.9	75
76	Isotopic archives of sulphate in speleothems. <i>Geochimica Et Cosmochimica Acta</i> , 2008, 72, 2465-2477.	1.6	54
77	Hydrogeological implications of glacial landscape evolution at Skeiðarárþírsandur, SE Iceland. <i>Geomorphology</i> , 2008, 97, 218-236.	1.1	28
78	Isotope hydrology of dripwaters in a Scottish cave and implications for stalagmite palaeoclimate research. <i>Hydrology and Earth System Sciences</i> , 2008, 12, 1065-1074.	1.9	43
79	Annually laminated speleothems: a review. <i>International Journal of Speleology</i> , 2008, 37, 193-206.	0.4	108
80	Neoproterozoic glaciation in the Earth System. <i>Journal of the Geological Society</i> , 2007, 164, 895-921.	0.9	196
81	Trace element distribution in annual stalagmite laminae mapped by micrometer-resolution X-ray fluorescence: Implications for incorporation of environmentally significant species. <i>Geochimica Et Cosmochimica Acta</i> , 2007, 71, 1494-1512.	1.6	205
82	Analysis of the climate signal contained within $\delta^{18}O$ and growth rate parameters in two Ethiopian stalagmites. <i>Geochimica Et Cosmochimica Acta</i> , 2007, 71, 2975-2988.	1.6	69
83	Speleothems as indicators of wet and dry periods. <i>International Journal of Speleology</i> , 2007, 36, 69-74.	0.4	60
84	Spatial variability in cave drip water hydrochemistry: Implications for stalagmite paleoclimate records. <i>Chemical Geology</i> , 2006, 235, 390-404.	1.4	124
85	Modelling of dripwater hydrology and hydrogeochemistry in a weakly karstified aquifer (Bath, UK): Implications for climate change studies. <i>Journal of Hydrology</i> , 2006, 321, 213-231.	2.3	100
86	Modification and preservation of environmental signals in speleothems. <i>Earth-Science Reviews</i> , 2006, 75, 105-153.	4.0	669
87	Reconstructing hemispheric-scale climates from multiple stalagmite records. <i>International Journal of Climatology</i> , 2006, 26, 1417-1424.	1.5	37
88	Annual trace element cycles in calcite-aragonite speleothems: evidence of drought in the western Mediterranean 1200-1100 yr BP. <i>Journal of Quaternary Science</i> , 2005, 20, 423-433.	1.1	110
89	An experimental study of incongruent dissolution of $CaCO_3$ under analogue glacial conditions. <i>Journal of Glaciology</i> , 2005, 51, 383-390.	1.1	33
90	Relative contributions of silicate and carbonate rocks to riverine Sr fluxes in the headwaters of the Ganges. <i>Geochimica Et Cosmochimica Acta</i> , 2005, 69, 2221-2240.	1.6	142

#	ARTICLE	IF	CITATIONS
91	Cave air control on dripwater geochemistry, Obir Caves (Austria): Implications for speleothem deposition in dynamically ventilated caves. <i>Geochimica Et Cosmochimica Acta</i> , 2005, 69, 2451-2468.	1.6	345
92	Variations in atmospheric sulphate recorded in stalagmites by synchrotron micro-XRF and XANES analyses. <i>Earth and Planetary Science Letters</i> , 2005, 235, 729-740.	1.8	108
93	Soil and karst aquifer hydrological controls on the geochemical evolution of speleothem-forming drip waters, Crag Cave, southwest Ireland. <i>Journal of Hydrology</i> , 2003, 273, 51-68.	2.3	232
94	Fluxes of Sr into the headwaters of the Ganges. <i>Geochimica Et Cosmochimica Acta</i> , 2003, 67, 2567-2584.	1.6	91
95	Structure of the 8200-Year Cold Event Revealed by a Speleothem Trace Element Record. <i>Science</i> , 2002, 296, 2203-2206.	6.0	179
96	Aragonite-Calcite Relationships in Speleothems (Grotte De Clamouse, France): Environment, Fabrics, and Carbonate Geochemistry. <i>Journal of Sedimentary Research</i> , 2002, 72, 687-699.	0.8	182
97	Partitioning of Sr ²⁺ and Mg ²⁺ into calcite under karst-analogue experimental conditions. <i>Geochimica Et Cosmochimica Acta</i> , 2001, 65, 47-62.	1.6	265
98	Seasonal variations in Sr, Mg and P in modern speleothems (Grotta di Ernesto, Italy). <i>Chemical Geology</i> , 2001, 175, 429-448.	1.4	186
99	Controls on the ⁸⁷ Sr/ ⁸⁶ Sr Ratio of Carbonates in the Garhwal Himalaya, Headwaters of the Ganges. <i>Journal of Geology</i> , 2001, 109, 737-753.	0.7	77
100	Annual to sub-annual resolution of multiple trace-element trends in speleothems. <i>Journal of the Geological Society</i> , 2001, 158, 831-841.	0.9	148
101	Hydrological characterisation of stalagmite dripwaters at Grotte de Villars, Dordogne, by the analysis of inorganic species and luminescent organic matter. <i>Hydrology and Earth System Sciences</i> , 2000, 4, 439-449.	1.9	75
102	Mg, Sr and Sr isotope geochemistry of a Belgian Holocene speleothem: implications for paleoclimate reconstructions. <i>Chemical Geology</i> , 2000, 169, 131-144.	1.4	103
103	Controls on trace element (Sr/Mg) compositions of carbonate cave waters: implications for speleothem climatic records. <i>Chemical Geology</i> , 2000, 166, 255-269.	1.4	470
104	Calcite Fabrics, Growth Mechanisms, and Environments of Formation in Speleothems from the Italian Alps and Southwestern Ireland. <i>Journal of Sedimentary Research</i> , 2000, 70, 1183-1196.	0.8	304
105	Celebration and consideration of citations. <i>Journal of the Geological Society</i> , 2000, 157, 1089-1091.	0.9	1
106	Solute generation and transfer from a chemically reactive alpine glacial-proglacial system. <i>Earth Surface Processes and Landforms</i> , 1999, 24, 1189-1211.	1.2	60
107	Holocene climate variability in Europe: Evidence from $\delta^{18}O$, textural and extension-rate variations in three speleothems. <i>Quaternary Science Reviews</i> , 1999, 18, 1021-1038.	1.4	200
108	Interactions of calcareous suspended sediment with glacial meltwater: a field test of dissolution behaviour. <i>Chemical Geology</i> , 1999, 155, 243-263.	1.4	44

#	ARTICLE	IF	CITATIONS
109	Widespread bacterial populations at glacier beds and their relationship to rock weathering and carbon cycling. <i>Geology</i> , 1999, 27, 107.	2.0	236
110	Segregation of solutes and gases in experimental freezing of dilute solutions: implications for natural glacial systems. <i>Geochimica Et Cosmochimica Acta</i> , 1998, 62, 3637-3655.	1.6	139
111	The significance of Himalayan rivers for silicate weathering rates: evidence from the Bhote Kosi tributary. <i>Chemical Geology</i> , 1998, 144, 205-220.	1.4	92
112	Possible seismic origin of molar tooth structures in Neoproterozoic carbonate ramp deposits, north China. <i>Sedimentology</i> , 1997, 44, 611-636.	1.6	53
113	Incoming editorial. <i>Journal of the Geological Society</i> , 1996, 153, 1-1.	0.9	8
114	Vendian basin evolution in East Greenland and NE Svalbard. <i>Precambrian Research</i> , 1995, 73, 217-233.	1.2	77
115	Hydrochemistry of carbonate terrains in alpine glacial settings. <i>Earth Surface Processes and Landforms</i> , 1994, 19, 33-54.	1.2	77
116	Diagenesis of an Upper Triassic reef complex, Wilde Kirche, Northern Calcareous Alps, Austria. <i>Sedimentology</i> , 1994, 41, 935-950.	1.6	26
117	Calcified Microbes in Neoproterozoic Carbonates: Implications for Our Understanding of the Proterozoic/Cambrian Transition. <i>Palaios</i> , 1993, 8, 512.	0.6	108
118	The Lower Cambrian Wrekin Quartzite and the age of its unconformity on the Ercall Granophyre. <i>Geological Magazine</i> , 1993, 130, 257-264.	0.9	15
119	Carbonate diagenesis in ice. <i>Geology</i> , 1993, 21, 901.	2.0	42
120	Coastal lithofacies and biofacies associated with syndepositional dolomitization and silicification (Draken Formation, Upper Riphean, Svalbard). <i>Precambrian Research</i> , 1991, 53, 165-197.	1.2	37
121	Origins of carbonate in Neoproterozoic stromatolites and the identification of modern analogues. <i>Precambrian Research</i> , 1991, 53, 281-299.	1.2	54
122	Kuwaiti dolomite: petrology, geochemistry and groundwater origin. <i>Sedimentary Geology</i> , 1991, 73, 59-75.	1.0	51
123	Carbonate minerals in glacial sediments: geochemical clues to palaeoenvironment. <i>Geological Society Special Publication</i> , 1990, 53, 201-216.	0.8	18
124	Late Proterozoic glacial carbonates in northeast Spitsbergen: new insights into the carbonate-tillite association. <i>Geological Magazine</i> , 1989, 126, 469-490.	0.9	58
125	A tempestite-stromatolite-evaporite association (late Vendian, East Greenland): a shoreface-lagoon model. <i>Precambrian Research</i> , 1989, 43, 101-127.	1.2	41
126	The Precambrian-Cambrian boundary. <i>Trends in Ecology and Evolution</i> , 1989, 4, 251-252.	4.2	0

#	ARTICLE	IF	CITATIONS
127	Carbonate shelf and slope facies evolution prior to Vendian glaciation, central East Greenland. , 1989, , 263-273.		11
128	Dolomitic stromatolite-bearing units with storm deposits from the Vendian of East Greenland and Scotland: a case of facies equivalence. , 1989, , 275-283.		7
129	Mixing zone dolomitization of Devonian carbonates, Guangxi, South China. Geological Society Special Publication, 1987, 36, 157-170.	0.8	7
130	Petrological and isotopic implications of some contrasting Late Precambrian carbonates, NE Spitsbergen. Sedimentology, 1987, 34, 973-989.	1.6	92
131	Comment and Reply on "Glaciomarine model for upper Precambrian diamictites of the Port Askaig Formation, Scotland". Geology, 1985, 13, 89.	2.0	8
