#	ARTICLE	IF	CITATIONS
1	Investigating the formation and diagnostic value of <i>n</i> -alkylphenylalkanoic acids in ancient pottery. <i>Archaeometry</i> , 2021, 63, 594-608.	0.6	31
2	A Neolithic without dairy? Chemical evidence from the content of ceramics from the Pendimoun rock-shelter (Castellar, France, 5750–5150 BCE). <i>Journal of Archaeological Science: Reports</i> , 2021, 35, 102682.	0.2	15
3	What do “barbarians” eat? Integrating ceramic use-wear and residue analysis in the study of food and society at the margins of Bronze Age China. <i>PLoS ONE</i> , 2021, 16, e0250819.	1.1	16
4	Lipid residue analysis on Swifterbant pottery (c. 5000–3800 cal BC) in the Lower Rhine-Meuse area (the Tj ETQq0 0 0 rgBT /Overlock process. <i>Journal of Archaeological Science: Reports</i> , 2021, 36, 102812.	0.2	2
5	Neolithic farmers or Neolithic foragers? Organic residue analysis of early pottery from Rakushechny Yar on the Lower Don (Russia). <i>Archaeological and Anthropological Sciences</i> , 2021, 13, 141.	0.7	12
6	Hunter-fisher-gatherer pottery production and use at the Neolithic shell-midden of RiĀĀĀukalns, Latvia. <i>Antiquity</i> , 2021, 95, 1446-1463.	0.5	8
7	The use of early pottery by hunter-gatherers of the Eastern European forest-steppe. <i>Quaternary Science Reviews</i> , 2021, 269, 107143.	1.4	12
8	Fruits, fish and the introduction of pottery in the Eastern European plain: Lipid residue analysis of ceramic vessels from Zamostje 2. <i>Quaternary International</i> , 2020, 541, 104-114.	0.7	21
9	Leftovers: The presence of manufacture-derived aquatic lipids in Alaskan pottery. <i>Archaeometry</i> , 2020, 62, 346-361.	0.6	5
10	Late Glacial hunter-gatherer pottery in the Russian Far East: Indications of diversity in origins and use. <i>Quaternary Science Reviews</i> , 2020, 229, 106124.	1.4	27
11	Resource processing, early pottery and the emergence of Kitoi culture in Cis-Baikal: Insights from lipid residue analysis of an Early Neolithic ceramic assemblage from the Gorelyi Les habitation site, Eastern Siberia. <i>Archaeological Research in Asia</i> , 2020, 24, 100225.	0.2	12
12	The adoption of pottery on Kodiak Island: Insights from organic residue analysis. <i>Quaternary International</i> , 2020, 554, 128-142.	0.7	11
13	No pottery at the western periphery of Europe: why was the Final Mesolithic of Britain and Ireland aceramic?. <i>Antiquity</i> , 2020, 94, 1152-1167.	0.5	9
14	Walnuts, salmon and sika deer: Exploring the evolution and diversification of JĀmon “culinary” traditions in prehistoric HokkaidĀ. <i>Journal of Anthropological Archaeology</i> , 2020, 60, 101225.	0.7	11
15	Fishers of The Corded Ware Culture in The Eastern Baltic. <i>Acta Archaeologica</i> , 2020, 91, 95-120.	0.3	11
16	First lipid residue analysis of Early Neolithic pottery from Swifterbant (the Netherlands, ca.) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 142 Td	0.7	11
17	Latitudinal gradient in dairy production with the introduction of farming in Atlantic Europe. <i>Nature Communications</i> , 2020, 11, 2036.	5.8	52
18	Organic residue analysis shows sub-regional patterns in the use of pottery by Northern European hunter-gatherers. <i>Royal Society Open Science</i> , 2020, 7, 192016.	1.1	33

#	ARTICLE	IF	CITATIONS
19	Investigating the function of prehistoric stone bowls and griddle stones in the Aleutian Islands by lipid residue analysis. <i>Quaternary Research</i> , 2019, 91, 1003-1015.	1.0	6
20	Something fishy in the Great Lakes? A reappraisal of early pottery use in north-eastern North America. <i>Antiquity</i> , 2019, 93, 1339-1349.	0.5	3
21	Diet, cuisine and consumption practices of the first farmers in the southeastern Baltic. <i>Archaeological and Anthropological Sciences</i> , 2019, 11, 4011-4024.	0.7	35
22	Investigating the function of prehistoric stone bowls and griddle stones in the Aleutian Islands by lipid residue analysis – CORRIGENDUM. <i>Quaternary Research</i> , 2019, 91, 1075.	1.0	0
23	Long-term dietary change in Atlantic and Mediterranean Iberia with the introduction of agriculture: a stable isotope perspective. <i>Archaeological and Anthropological Sciences</i> , 2019, 11, 3825-3836.	0.7	31
24	Vaso con decoraci3n cardial de Cova Eir3s (Triacastela, Lugo). <i>Trabajos De Prehistoria</i> , 2019, 76, 147.	0.2	5
25	Upper Volga culture pottery chronology, typology and use (based on Sakhtysh II, Ila, VIII sites). , 2019, , .		0
26	Geochemical intra-site mapping:. , 2019, , 134-143.		1
27	Reconstruction of prehistoric pottery use from fatty acid carbon isotope signatures using Bayesian inference. <i>Organic Geochemistry</i> , 2018, 117, 31-42.	0.9	15
28	The use of Lapita pottery: Results from the first analysis of lipid residues. <i>Journal of Archaeological Science: Reports</i> , 2018, 17, 712-722.	0.2	8
29	Calling all archaeologists: guidelines for terminology, methodology, data handling, and reporting when undertaking and reviewing stable isotope applications in archaeology. <i>Rapid Communications in Mass Spectrometry</i> , 2018, 32, 361-372.	0.7	62
30	Molecular and isotopic evidence for the processing of starchy plants in Early Neolithic pottery from China. <i>Scientific Reports</i> , 2018, 8, 17044.	1.6	27
31	Ancient proteins from ceramic vessels at 4k West reveal the hidden cuisine of early farmers. <i>Nature Communications</i> , 2018, 9, 4064.	5.8	105
32	The impact of environmental change on the use of early pottery by East Asian hunter-gatherers. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2018, 115, 7931-7936.	3.3	49
33	Pine traces at Star Carr: Evidence from residues on stone tools. <i>Journal of Archaeological Science: Reports</i> , 2018, 21, 21-31.	0.2	3
34	The Corded Ware culture in the Eastern Baltic: New evidence on chronology, diet, beaker, bone and flint tool function. <i>Journal of Archaeological Science: Reports</i> , 2018, 21, 538-552.	0.2	11
35	Illuminating the prehistory of Northern Europe: organic residue analysis of lamps. , 2018, , .		1
36	Investigating the function of early Hunter-Gatherer pottery at the Neolithic at site of Zamostje 2, Central Russia. , 2018, , .		0

#	ARTICLE	IF	CITATIONS
37	What is for dinner tonight? Research on the innovation, dispersal and use of hunter-gatherer pottery in NE Europe (INDUCE). , 2018, , .		0
38	The identification of poultry processing in archaeological ceramic vessels using in-situ isotope references for organic residue analysis. <i>Journal of Archaeological Science</i> , 2017, 78, 179-192.	1.2	32
39	The adoption of pottery by north-east European hunter-gatherers: Evidence from lipid residue analysis. <i>Journal of Archaeological Science</i> , 2017, 78, 112-119.	1.2	51
40	New criteria for the molecular identification of cereal grains associated with archaeological artefacts. <i>Scientific Reports</i> , 2017, 7, 6633.	1.6	63
41	Pottery use by early Holocene hunter-gatherers of the Korean peninsula closely linked with the exploitation of marine resources. <i>Quaternary Science Reviews</i> , 2017, 170, 164-173.	1.4	41
42	LATE MESOLITHIC NARVA STAGE IN ESTONIA: POTTERY, SETTLEMENT TYPES AND CHRONOLOGY. <i>Estonian Journal of Archaeology</i> , 2017, 21, 52.	0.8	26
43	Exploring the emergence of an "Aquatic" Neolithic in the Russian Far East: organic residue analysis of early hunter-gatherer pottery from Sakhalin Island. <i>Antiquity</i> , 2017, 91, 1484-1500.	0.5	35
44	Chemical Analysis of Pottery Demonstrates Prehistoric Origin for High-Altitude Alpine Dairying. <i>PLoS ONE</i> , 2016, 11, e0151442.	1.1	49
45	First molecular and isotopic evidence of millet processing in prehistoric pottery vessels. <i>Scientific Reports</i> , 2016, 6, 38767.	1.6	71
46	Utilising phytanic acid diastereomers for the characterisation of archaeological lipid residues in pottery samples. <i>Tetrahedron Letters</i> , 2016, 57, 703-707.	0.7	59
47	Untangling complex organic mixture in prehistoric hearths. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 10456-10457.	3.3	3
48	Ancient lipids document continuity in the use of early hunter-gatherer pottery through 9,000 years of Japanese prehistory. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2016, 113, 3991-3996.	3.3	122
49	Technological Analysis of the World's Earliest Shamanic Costume: A Multi-Scalar, Experimental Study of a Red Deer Headdress from the Early Holocene Site of Star Carr, North Yorkshire, UK. <i>PLoS ONE</i> , 2016, 11, e0152136.	1.1	18
50	Another brick in the wall: fifth millennium BC earthen-walled architecture on the Channel shores. <i>Antiquity</i> , 2015, 89, 800-817.	0.5	4
51	Archaeological bone lipids as palaeodietary markers. <i>Rapid Communications in Mass Spectrometry</i> , 2015, 29, 611-618.	0.7	58
52	Specialized Processing of Aquatic Resources in Prehistoric Alaskan Pottery? A Lipid-Residue Analysis of Ceramic Sherds from the Thule-Period Site of Nunalleq, Alaska. <i>Arctic Anthropology</i> , 2014, 51, 86-100.	0.7	29
53	Processes of Formation and Alteration of Archaeological Fire Structures: Complexity Viewed in the Light of Experimental Approaches. <i>Journal of Archaeological Method and Theory</i> , 2014, 21, 1-45.	1.4	61
54	Long-Term Resilience of Late Holocene Coastal Subsistence System in Southeastern South America. <i>PLoS ONE</i> , 2014, 9, e93854.	1.1	67

#	ARTICLE	IF	CITATIONS
55	Earliest evidence for the use of pottery. <i>Nature</i> , 2013, 496, 351-354.	13.7	253
56	Analysis of adhering organic residues of two "coupes-À-socles" from the Neolithic funerary site "La Hougue Bie" in Jersey: evidences of birch bark tar utilisation. <i>Journal of Archaeological Science</i> , 2007, 34, 704-710.	1.2	37
