#	ARTICLE	IF	CITATIONS
1	ERS guidelines on the diagnosis and treatment of chronic cough in adults and children. <i>European Respiratory Journal</i> , 2020, 55, 1901-1936.	6.7	426
2	Expert opinion on the cough hypersensitivity syndrome in respiratory medicine. <i>European Respiratory Journal</i> , 2014, 44, 1132-1148.	6.7	294
3	A worldwide survey of chronic cough: a manifestation of enhanced somatosensory response. <i>European Respiratory Journal</i> , 2014, 44, 1149-1155.	6.7	202
4	Relationship Between Self-Reported Odor Intolerance and Sensitivity to Inhaled Capsaicin. <i>Chest</i> , 2006, 129, 1623-1628.	0.8	64
5	Sensitivity to methacholine and capsaicin in patients with unclear respiratory symptoms. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2002, 57, 501-507.	5.7	63
6	Quality of Life and Capsaicin Sensitivity in Patients with Airway Symptoms Induced by Chemicals and Scents: A Longitudinal Study. <i>Environmental Health Perspectives</i> , 2007, 115, 425-429.	6.0	63
7	Changes in Levels of Nerve Growth Factor in Nasal Secretions after Capsaicin Inhalation in Patients with Airway Symptoms from Scents and Chemicals. <i>Environmental Health Perspectives</i> , 2005, 113, 849-852.	6.0	54
8	Inhalation of menthol reduces capsaicin cough sensitivity and influences inspiratory flows in chronic cough. <i>Respiratory Medicine</i> , 2013, 107, 433-438.	2.9	54
9	Cough reduction using capsaicin. <i>Respiratory Medicine</i> , 2015, 109, 27-37.	2.9	46
10	Inhalation method determines outcome of capsaicin inhalation in patients with chronic cough due to sensory hyperreactivity. <i>Pulmonary Pharmacology and Therapeutics</i> , 2006, 19, 172-178.	2.6	40
11	The airway sensory hyperreactivity syndrome. <i>Pulmonary Pharmacology and Therapeutics</i> , 2011, 24, 263-266.	2.6	35
12	Symptoms induced by environmental irritants and health-related quality of life in patients with chronic cough - A cross-sectional study. <i>Cough</i> , 2011, 7, 6.	2.7	33
13	Capsaicin cough threshold test in diagnostics. <i>Respiratory Medicine</i> , 2014, 108, 1371-1376.	2.9	33
14	TRPV1 and TRPM8 in Treatment of Chronic Cough. <i>Pharmaceuticals</i> , 2016, 9, 45.	3.8	26
15	Cough hypersensitivity syndrome: clinical measurement is the key to progress. <i>European Respiratory Journal</i> , 2015, 45, 1509-1510.	6.7	25
16	Inhaled ethanol potentiates the cough response to capsaicin in patients with airway sensory hyperreactivity. <i>Pulmonary Pharmacology and Therapeutics</i> , 2008, 21, 794-797.	2.6	21
17	Sensitivity to Environmental Irritants and Capsaicin Cough Reaction in Patients with a Positive Methacholine Provocation Test before and after Treatment with Inhaled Corticosteroids. <i>Journal of Asthma</i> , 2011, 48, 482-489.	1.7	20
18	Mechanisms of increased airway sensitivity to occupational chemicals and odors. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2008, 8, 135-139.	2.3	18

#	ARTICLE	IF	CITATIONS
19	Capsaicin sensitivity in patients with chronic cough— results from a cross-sectional study. <i>Cough</i> , 2013, 9, 5.	2.7	18
20	TRP channels and temperature in airway disease—clinical significance. <i>Temperature</i> , 2015, 2, 172-177.	3.0	17
21	Dyspnea from Exercise in Cold Air is Not Always Asthma. <i>Journal of Asthma</i> , 2008, 45, 705-709.	1.7	16
22	Role of the upper airways in patients with chronic cough. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2006, 6, 7-11.	2.3	15
23	New understanding in the treatment of cough (NEUROCOUGH) ERS Clinical Research Collaboration: improving care and treatment for patients with cough. <i>European Respiratory Journal</i> , 2019, 53, 1900787.	6.7	12
24	Relative frequencies of symptoms and risk factors among patients with chronic rhinosinusitis with nasal polyps using a case-control study. <i>Acta Oto-Laryngologica</i> , 2018, 138, 46-49.	0.9	10
25	Small and large airways— reactions to inhaled capsaicin in patients with chronic idiopathic cough, or asthma and in healthy control subjects. <i>Experimental Lung Research</i> , 2019, 45, 55-64.	1.2	9
26	Two-Year follow-up with Acoustic Rhinometry in Children. <i>American Journal of Rhinology & Allergy</i> , 2006, 20, 203-205.	2.2	8
27	The Problem of Treating Unexplained Chronic Cough. <i>Chest</i> , 2016, 149, 613-614.	0.8	5
28	Small and large airway reactions to osmotic stimuli in asthma and chronic idiopathic cough. <i>Pulmonary Pharmacology and Therapeutics</i> , 2018, 49, 112-118.	2.6	5
29	New ERS cough guidelines: A clinical framework for refining the patient management strategy. <i>Asia Pacific Allergy</i> , 2019, 9, e36.	1.3	5
30	Physical Therapy Treatment of Impaired Chest Mobility in Patients with Airway Sensory Hyperreactivity. <i>Physiotherapy Research International</i> , 2017, 22, e1658.	1.5	3
31	Two-year follow-up with acoustic rhinometry in children. <i>American Journal of Rhinology & Allergy</i> , 2006, 20, 203-4.	2.2	3
32	Objective cough frequency monitoring in real-world practice. <i>ERJ Open Research</i> , 2021, 7, 00545-2021.	2.6	1
33	Development and validation of the self-administered Falun health instrument (SAFHI) using data from health promoted workplaces in Sweden. <i>Scandinavian Journal of Public Health</i> , 2018, 46, 735-743.	2.3	0
34	Diagnostic and Therapeutic Trials for Chronic Cough in Adults: An Overview. , 2021, , 21-27.		0
35	Rhinitis as a part of sensory hyperreactivity characterized by increased capsaicin cough sensitivity. <i>Clinical Allergy and Immunology</i> , 2007, 19, 401-10.	0.7	0
