#	ARTICLE	IF	CITATIONS
1	Ethics Considerations Regarding Artificial Womb Technology for the Fetotate. American Journal of Bioethics, 2023, 23, 67-78.	0.5	36
2	Development of standard definitions and grading for Maternal and Fetal Adverse Event Terminology. Prenatal Diagnosis, 2022, 42, 15-26.	1.1	16
3	Fetal surgery for moderate and severe CDH – The TOTAL trials. Journal of Pediatric Surgery, 2022, 57, 552-553.	0.8	2
4	A supportive physiologic environment for the extreme premature infant: Improving life outside the womb. Journal of Pediatric Surgery, 2022, 57, 167-171.	0.8	13
5	How should fetal surgery for congenital diaphragmatic hernia be implemented in the post-TOTAL trial era: A discussion. Prenatal Diagnosis, 2022, 42, 301-309.	1.1	10
6	The EXTrauterine Environment for Neonatal Development: Present and Future. Pediatric and Developmental Pathology, 2022, 25, 253-262.	0.5	3
7	Radiographic and histologic characterisation of white matter injury in a sheep model of CHD. Cardiology in the Young, 2022, , 1-5.	0.4	0
8	Chronic Hypoxemia Induces Mitochondrial Respiratory Complex Gene Expression in the Fetal Sheep Brain. JTCVS Open, 2022, , .	0.2	0
9	Addition of glycerol enhances the flexibility of gelatin hydrogel sheets; application for in utero tissue engineering. Journal of Biomedical Materials Research - Part B Applied Biomaterials, 2021, 109, 921-931.	1.6	8
10	Artificial placenta and womb technology: Past, current, and future challenges towards clinical translation. Prenatal Diagnosis, 2021, 41, 145-158.	1.1	35
11	Quantitative contrast-enhanced ultrasound of the brain on twin fetal lambs maintained by the extrauterine environment for neonatal development (EXTEND): initial experience. Pediatric Radiology, 2021, 51, 103-111.	1.1	0
12	Fetoscopic insufflation modeled in the extrauterine environment for neonatal development (EXTEND): Fetoscopic insufflation is safe for the fetus. Journal of Pediatric Surgery, 2021, 56, 170-179.	0.8	7
13	Contrast-enhanced ultrasound imaging can be used to evaluate fetal cerebral perfusion: potential implications for fetal surgery. Translational Medicine Communications, 2021, 6, .	0.5	0
14	Initial Laparotomy Versus Peritoneal Drainage in Extremely Low Birthweight Infants With Surgical Necrotizing Enterocolitis or Isolated Intestinal Perforation. Annals of Surgery, 2021, 274, e370-e380.	2.1	62
15	Chronic foetal hypoxaemia does not cause elevation of serum markers of brain injury. Cardiology in the Young, 2021, , 1-6.	0.4	0
16	Evaluation of umbilical venous flow volume measured using ultrasound compared to circuit flow volume in the EXTrauterine Environment for Neonatal Development (EXTEND) system in fetal sheep. Prenatal Diagnosis, 2021, , .	1.1	1
17	Pharmacokinetics and pharmacodynamics of sildenafil in fetal lambs on extracorporeal support. Biomedicine and Pharmacotherapy, 2021, 143, 112161.	2.5	4
18	Contrast-Enhanced Brain Ultrasound Perfusion Metrics in the EXTrauterine Environment for Neonatal Development ( EXTEND ). Journal of Ultrasound in Medicine, 2021, 40, 2571-2579.	0.8	0

#	ARTICLE	IF	CITATIONS
19	Improved Postoperative Metrics with Modified Myofascial Closure in Fetal Myelomeningocele Repair. <i>Operative Neurosurgery</i> , 2020, 18, 158-165.	0.4	14
20	Benchmarking against the MOMS Trial: Zurich Results of Open Fetal Surgery for Spina Bifida. <i>Fetal Diagnosis and Therapy</i> , 2020, 47, 91-97.	0.6	41
21	Prenatal hypoxemia alters microglial morphology in fetal sheep. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 2020, 159, 270-277.	0.4	17
22	Ex Utero Extracorporeal Support as a Model for Fetal Hypoxia and Brain Dysmaturity. <i>Annals of Thoracic Surgery</i> , 2020, 109, 810-819.	0.7	13
23	Simple Approach to Increase Donor Hematopoietic Stem Cell Dose and Improve Engraftment in the Murine Model of Allogeneic In Utero Hematopoietic Cell Transplantation. <i>Biology of Blood and Marrow Transplantation</i> , 2020, 26, e21-e24.	2.0	4
24	Detailed Analysis of Hydrocephalus and Hindbrain Herniation After Prenatal and Postnatal Myelomeningocele Closure: Report From a Single Institution. <i>Neurosurgery</i> , 2020, 86, 637-645.	0.6	20
25	Fetal surgical intervention for myelomeningocele: lessons learned, outcomes, and future implications. <i>Developmental Medicine and Child Neurology</i> , 2020, 62, 417-425.	1.1	23
26	The EXTrauterine Environment for Neonatal Development Supports Normal Intestinal Maturation and Development. <i>Cellular and Molecular Gastroenterology and Hepatology</i> , 2020, 10, 623-637.	2.3	8
27	A Rabbit Model for Optimization of Amniotic Fluid Components in the EXTrauterine Environment for Newborn Development (EXTEND) System. <i>Fetal Diagnosis and Therapy</i> , 2020, 47, 939-946.	0.6	2
28	Open Fetal Surgical Outcomes for Myelomeningocele Closure Stratified by Maternal Body Mass Index in a Large Single-Center Cohort. <i>Fetal Diagnosis and Therapy</i> , 2020, 47, 889-893.	0.6	3
29	Regulatory T cells promote alloengraftment in a model of late-gestation in utero hematopoietic cell transplantation. <i>Blood Advances</i> , 2020, 4, 1102-1114.	2.5	12
30	The Effects of Nitric Oxide in Oxygenator Sweep Gas During Extracorporeal Circulation in a Neonatal Ovine Model. <i>ASAIO Journal</i> , 2020, 66, 671-676.	0.9	9
31	Imaging of fetal tumors and other dysplastic lesions: A review with emphasis on MR imaging. <i>Prenatal Diagnosis</i> , 2020, 40, 84-99.	1.1	10
32	The Future of In Utero Gene Therapy. <i>Molecular Diagnosis and Therapy</i> , 2020, 24, 135-142.	1.6	27
33	Neurologic outcomes of the premature lamb in an extrauterine environment for neonatal development. <i>Journal of Pediatric Surgery</i> , 2020, 55, 2115-2123.	0.8	17
34	Technical feasibility of umbilical cannulation in midgestation lambs supported by the EXTrauterine Environment for Neonatal Development (EXTEND). <i>Artificial Organs</i> , 2019, 43, 1154-1161.	1.0	26
35	3434 The Study of Fetal Tracheal Occlusion to Treat Congenital Diaphragmatic Hernia in the EXTEND Model. <i>Journal of Clinical and Translational Science</i> , 2019, 3, 156-157.	0.3	0
36	The Artificial Womb. , 2019, , 83-90.		3

#	ARTICLE	IF	CITATIONS
37	Donor cell engineering with GSK3 inhibitor-“loaded nanoparticles enhances engraftment after in utero transplantation. <i>Blood</i> , 2019, 134, 1983-1995.	0.6	13
38	Fetoscopic versus Ultrasound-Guided Intravascular Delivery of Maternal Bone Marrow Cells in Fetal Macaques: A Technical Model for Intrauterine Haemopoietic Cell Transplantation. <i>Fetal Diagnosis and Therapy</i> , 2019, 46, 175-186.	0.6	2
39	Erythropoietin Prevents Anemia and Transfusions in Extremely Premature Lambs Supported by an EXTrauterine Environment for Neonatal Development (EXTEND). <i>Fetal Diagnosis and Therapy</i> , 2019, 46, 231-237.	0.6	11
40	Autism spectrum disorder and neurodevelopmental delays in children with giant omphalocele. <i>Journal of Pediatric Surgery</i> , 2019, 54, 1771-1777.	0.8	3
41	In Utero Transplantation of Expanded Autologous Amniotic Fluid Stem Cells Results in Long-Term Hematopoietic Engraftment. <i>Stem Cells</i> , 2019, 37, 1176-1188.	1.4	13
42	Fetal Surgery. <i>Pediatric Clinics of North America</i> , 2019, 66, 295-308.	0.9	21
43	Open fetal surgery for neural tube defects. <i>Best Practice and Research in Clinical Obstetrics and Gynaecology</i> , 2019, 58, 121-132.	1.4	20
44	Premature Lambs Exhibit Normal Mitochondrial Respiration after Long-Term Extrauterine Support. <i>Fetal Diagnosis and Therapy</i> , 2019, 46, 306-312.	0.6	7
45	Chronic intrauterine hypoxia alters neurodevelopment in fetal sheep. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 2019, 157, 1982-1991.	0.4	36
46	Parental Attitudes Towards Prenatal Genetic Testing For Sickle Cell Disease. <i>Journal of Pediatric Hematology/Oncology</i> , 2019, 41, 579-585.	0.3	8
47	Contrast-Enhanced Ultrasound in Extracorporeal Support: In Vitro Studies and Initial Experience and Safety Data in the Extreme Premature Fetal Lamb Maintained by the Extrauterine Environment for Neonatal Development. <i>Journal of Ultrasound in Medicine</i> , 2019, 38, 1971-1978.	0.8	9
48	High Tumor Volume to Fetal Weight Ratio Is Associated with Worse Fetal Outcomes and Increased Maternal Risk in Fetuses with Sacrococcygeal Teratoma. <i>Fetal Diagnosis and Therapy</i> , 2019, 45, 94-101.	0.6	18
49	Sildenafil for Antenatal Treatment of Congenital Diaphragmatic Hernia: From Bench to Bedside. <i>Current Pharmaceutical Design</i> , 2019, 25, 601-608.	0.9	20
50	Short-Term Neurodevelopmental Outcome in Children Born With High-Risk Congenital Lung Lesions. <i>Annals of Thoracic Surgery</i> , 2018, 105, 1827-1834.	0.7	7
51	Congenital pulmonary airway malformation: advances and controversies. <i>The Lancet Child and Adolescent Health</i> , 2018, 2, 290-297.	2.7	47
52	Umbilical cannulation optimizes circuit flows in premature lambs supported by the EXTrauterine Environment for Neonatal Development (EXTEND). <i>Journal of Physiology</i> , 2018, 596, 1575-1585.	1.3	34
53	Rate and Risk Factors Associated with Autism Spectrum Disorder in Congenital Diaphragmatic Hernia. <i>Journal of Autism and Developmental Disorders</i> , 2018, 48, 2112-2121.	1.7	15
54	The influence of gestational age, mode of delivery and abdominal wall closure method on the surgical outcome of neonates with uncomplicated gastroschisis. <i>Pediatric Surgery International</i> , 2018, 34, 415-419.	0.6	19

#	ARTICLE	IF	CITATIONS
55	Development of the Artificial Womb. <i>Current Stem Cell Reports</i> , 2018, 4, 69-73.	0.7	4
56	Safety and efficacy of fetal surgery techniques to close a spina bifida defect in the fetal lamb model: A systematic review. <i>Prenatal Diagnosis</i> , 2018, 38, 231-242.	1.1	24
57	Lung function and pulmonary artery blood flow following prenatal maternal retinoic acid and imatinib in the nitrofen model of congenital diaphragmatic hernia. <i>Journal of Pediatric Surgery</i> , 2018, 53, 1681-1687.	0.8	7
58	Pumpless arteriovenous extracorporeal membrane oxygenation: A novel mode of respiratory support in a lamb model of congenital diaphragmatic hernia. <i>Journal of Pediatric Surgery</i> , 2018, 53, 1453-1460.	0.8	11
59	Complex gastroschisis: Clinical spectrum and neonatal outcomes at a referral center. <i>Journal of Pediatric Surgery</i> , 2018, 53, 1904-1907.	0.8	24
60	Intravenous and Intra-amniotic &em&gt;In Utero&/em&gt; Transplantation in the Murine Model. <i>Journal of Visualized Experiments</i> , 2018, , .	0.2	8
61	Preclinical Canine Model of Graft-versus-Host Disease after In Utero Hematopoietic Cell Transplantation. <i>Biology of Blood and Marrow Transplantation</i> , 2018, 24, 1795-1801.	2.0	5
62	Fetal surgery for spina bifida aperta. <i>Archives of Disease in Childhood: Fetal and Neonatal Edition</i> , 2018, 103, F589-F595.	1.4	25
63	Reduced oxygen concentration for the resuscitation of infants with congenital diaphragmatic hernia. <i>Journal of Perinatology</i> , 2018, 38, 834-843.	0.9	24
64	Fetal hypoxemia causes abnormal myocardial development in a preterm ex utero fetal ovine model. <i>JCI Insight</i> , 2018, 3, .	2.3	13
65	An extra-uterine system to physiologically support the extreme premature lamb. <i>Nature Communications</i> , 2017, 8, 15112.	5.8	240
66	Responsible surgical innovation and research in maternal&acircfetal surgery. <i>Seminars in Fetal and Neonatal Medicine</i> , 2017, 22, 423-427.	1.1	16
67	An EXTrauterine environment for neonatal development: EXTENDING fetal physiology beyond the womb. <i>Seminars in Fetal and Neonatal Medicine</i> , 2017, 22, 404-409.	1.1	30
68	Growth trajectory and neurodevelopmental outcome in infants with congenital diaphragmatic hernia. <i>Journal of Pediatric Surgery</i> , 2017, 52, 1944-1948.	0.8	24
69	Attitudes of paediatric and obstetric specialists towards prenatal surgery for lethal and non-lethal conditions. <i>Journal of Medical Ethics</i> , 2017, 44, medethics-2017-104377.	1.0	4
70	Fetal intervention: Improving evidence and expanding applications. <i>Seminars in Fetal and Neonatal Medicine</i> , 2017, 22, 359.	1.1	2
71	Fetoscopic Open Neural Tube Defect Repair: Development and Refinement of a Two-Port, Carbon Dioxide Insufflation Technique. <i>Obstetrics and Gynecology</i> , 2017, 130, 648-648.	1.2	12
72	Amniotic fluid transcriptomics reflects novel disease mechanisms in fetuses with myelomeningocele. <i>American Journal of Obstetrics and Gynecology</i> , 2017, 217, 587.e1-587.e10.	0.7	22

#	ARTICLE	IF	CITATIONS
73	Weighing the Social and Ethical Considerations of Maternal-Fetal Surgery. <i>Pediatrics</i> , 2017, 140, .	1.0	20
74	Acceptability of In Utero Hematopoietic Cell Transplantation for Sickle Cell Disease. <i>Medical Decision Making</i> , 2017, 37, 914-921.	1.2	4
75	Neurodevelopmental outcomes at 5years of age in congenital diaphragmatic hernia. <i>Journal of Pediatric Surgery</i> , 2017, 52, 437-443.	0.8	49
76	Induction of Immune Tolerance to Foreign Protein via Adeno-Associated Viral Vector Gene Transfer in Mid-Gestation Fetal Sheep. <i>PLoS ONE</i> , 2017, 12, e0171132.	1.1	22
77	Improved pulmonary function in the nitrofen model of congenital diaphragmatic hernia following prenatal maternal dexamethasone and/or sildenafil. <i>Pediatric Research</i> , 2016, 80, 577-585.	1.1	29
78	Enhanced in utero allogeneic engraftment in mice after mobilizing fetal HSCs by $\hat{1}\pm 4\hat{1}^{21}/7$ inhibition. <i>Blood</i> , 2016, 128, 2457-2461.	0.6	26
79	Younger gestational age is associated with increased risk of adverse neurodevelopmental outcome during infancy in congenital diaphragmatic hernia. <i>Journal of Pediatric Surgery</i> , 2016, 51, 1084-1090.	0.8	22
80	Rate of increase of lung-to-head ratio over the course of gestation is predictive of survival in left-sided congenital diaphragmatic hernia. <i>Journal of Pediatric Surgery</i> , 2016, 51, 703-705.	0.8	4
81	Right- versus left-sided congenital diaphragmatic hernia: a comparative outcomes analysis. <i>Journal of Pediatric Surgery</i> , 2016, 51, 900-902.	0.8	44
82	Management and outcomes of scoliosis in children with congenital diaphragmatic hernia. <i>Journal of Pediatric Surgery</i> , 2016, 51, 1921-1925.	0.8	5
83	Fetal intrapericardial teratoma: natural history and management including successful in utero surgery. <i>American Journal of Obstetrics and Gynecology</i> , 2016, 215, 780.e1-780.e7.	0.7	48
84	How to treat a neonate with duodenal atresia and intrapancreatic choledochocoele causing persistent hyperbilirubinemia: A case report. <i>International Journal of Surgery Case Reports</i> , 2016, 19, 11-13.	0.2	2
85	The Intravenous Route of Injection Optimizes Engraftment and Survival in the Murine Model of In Utero Hematopoietic Cell Transplantation. <i>Biology of Blood and Marrow Transplantation</i> , 2016, 22, 991-999.	2.0	33
86	Complete tissue coverage achieved by scaffold-based tissue engineering in the fetal sheep model of Myelomeningocele. <i>Biomaterials</i> , 2016, 76, 133-143.	5.7	54
87	Delayed abdominal closure after congenital diaphragmatic hernia repair. <i>Journal of Pediatric Surgery</i> , 2016, 51, 240-243.	0.8	19
88	Vector serotype screening for use in ovine perinatal lung gene therapy. <i>Journal of Pediatric Surgery</i> , 2016, 51, 879-884.	0.8	9
89	In utero stem cell transplantation and gene therapy: Recent progress and the potential for clinical application. <i>Best Practice and Research in Clinical Obstetrics and Gynaecology</i> , 2016, 31, 88-98.	1.4	38
90	Characterizing and Augmenting Peripheral Tolerance in in Utero Hematopoietic Cell Transplantation. <i>Blood</i> , 2016, 128, 4540-4540.	0.6	0

#	ARTICLE	IF	CITATIONS
91	Correction of murine hemoglobinopathies by prenatal tolerance induction and postnatal nonmyeloablative allogeneic BM transplants. <i>Blood</i> , 2015, 126, 1245-1254.	0.6	42
92	Life-Long Transgene Expression in Skeletal Muscle Without Transduction of Satellite Cells Following Embryonic Myogenic Progenitor Transduction by Lentivirus Administered in Utero. <i>Stem Cells and Development</i> , 2015, 24, 1878-1887.	1.1	1
93	Brain-type natriuretic peptide levels correlate with pulmonary hypertension and requirement for extracorporeal membrane oxygenation in congenital diaphragmatic hernia. <i>Journal of Pediatric Surgery</i> , 2015, 50, 263-266.	0.8	24
94	Patient characteristics are important determinants of neurodevelopmental outcome during infancy in giant omphalocele. <i>Early Human Development</i> , 2015, 91, 187-193.	0.8	31
95	Prenatal diagnosis of esophageal bronchus " first report of a rare foregut malformation in utero. <i>Journal of Pediatric Surgery</i> , 2015, 50, 306-310.	0.8	15
96	Timing of repair of congenital diaphragmatic hernia in patients supported by extracorporeal membrane oxygenation (ECMO). <i>Journal of Pediatric Surgery</i> , 2015, 50, 260-262.	0.8	58
97	Ex utero intrapartum treatment (EXIT) in the management of cervical lymphatic malformation. <i>Journal of Pediatric Surgery</i> , 2015, 50, 311-314.	0.8	60
98	Axillary lymphatic malformations: Prenatal evaluation and postnatal outcomes. <i>Journal of Pediatric Surgery</i> , 2015, 50, 1711-1715.	0.8	6
99	The first 100 infant thoracoscopic lobectomies: Observations through the learning curve and comparison to open lobectomy. <i>Journal of Pediatric Surgery</i> , 2015, 50, 1811-1816.	0.8	29
100	Frequency and complications of inguinal hernia repair in giant omphalocele. <i>Journal of Pediatric Surgery</i> , 2015, 50, 1673-1675.	0.8	7
101	Consensus statement from the first international conference for in utero stem cell transplantation and gene therapy. <i>Frontiers in Pharmacology</i> , 2015, 6, 15.	1.6	35
102	Immunological considerations in in utero hematopoietic stem cell transplantation (IUHCT). <i>Frontiers in Pharmacology</i> , 2015, 5, 282.	1.6	9
103	Experience with Thoracoscopic Repair of Long Gap Esophageal Atresia in Neonates. <i>Journal of Laparoendoscopic and Advanced Surgical Techniques - Part A</i> , 2015, 25, 932-935.	0.5	37
104	Immune Tolerance Induction Using Fetal Directed Placental Injection in Rodent Models: A Murine Model. <i>PLoS ONE</i> , 2015, 10, e0123712.	1.1	7
105	Mechanisms of B Cell Tolerance after in Utero Hematopoietic Cell Transplantation. <i>Blood</i> , 2015, 126, 4289-4289.	0.6	0
106	Developmental stage determines efficiency of gene transfer to muscle satellite cells by in utero delivery of adeno-associated virus vector serotype 2/9. <i>Molecular Therapy - Methods and Clinical Development</i> , 2014, 1, 14040.	1.8	19
107	Pulmonary hypertension in giant omphalocele infants. <i>Journal of Pediatric Surgery</i> , 2014, 49, 1767-1770.	0.8	44
108	In Utero Stem Cell and Gene Therapy: Current Status and Future Perspectives. <i>European Journal of Pediatric Surgery</i> , 2014, 24, 237-245.	0.7	25

#	ARTICLE	IF	CITATIONS
109	The contribution of hiatal hernia to severe gastroesophageal reflux disease in patients with gastroschisis. <i>Journal of Pediatric Surgery</i> , 2014, 49, 395-398.	0.8	14
110	Urologic and anorectal complications of sacrococcygeal teratomas: Prenatal and postnatal predictors. <i>Journal of Pediatric Surgery</i> , 2014, 49, 139-143.	0.8	48
111	Incidence and factors associated with sensorineural and conductive hearing loss among survivors of congenital diaphragmatic hernia. <i>Journal of Pediatric Surgery</i> , 2014, 49, 890-894.	0.8	31
112	Stable long-term mixed chimerism achieved in a canine model of allogeneic in utero hematopoietic cell transplantation. <i>Blood</i> , 2014, 124, 1987-1995.	0.6	59
113	Hematopoietic Engraftment of Amniotic Fluid Stem Cells Following in Utero Transplantation. <i>Blood</i> , 2014, 124, 3809-3809.	0.6	1
114	Cell Engineering with Glycogen Synthase Kinase-3 Beta Inhibitor-Loaded Synthetic Nanoparticles Enhances Hematopoietic Engraftment of Bone Marrow Mononuclear Cells Following in Utero Transplantation. <i>Blood</i> , 2014, 124, 2414-2414.	0.6	0
115	Differential Development of Donor Bone Marrow-Derived Thymocytes after Allogeneic in Utero Hematopoietic Cell Transplantation in the Murine Model. <i>Blood</i> , 2014, 124, 5800-5800.	0.6	0
116	Fetal Surgery in Zurich: Key Features of Our First Open in utero Repair of Myelomeningocele. <i>European Journal of Pediatric Surgery</i> , 2013, 23, 494-498.	0.7	17
117	Differential Development Of Donor Bone Marrow-Derived Thymocytes After Allogeneic In Utero Hematopoietic Cell Transplantation In The Murine Model. <i>Blood</i> , 2013, 122, 4458-4458.	0.6	0
118	Preconditioning with AMD3100 Mobilization Promotes Homing and Long-Term Engraftment of Hematopoietic Stem Cells During Syngeneic Transplantation in the Murine Model. <i>Blood</i> , 2012, 120, 1886-1886.	0.6	0
119	Regulation of Cytokine Signal Transduction in Hematopoietic Stem Cells by Mammalian Target of Rapamycin. <i>Blood</i> , 2012, 120, 1239-1239.	0.6	1
120	Prostaglandin E2 Provides a Selective Donor Cell Competitive Advantage and Improves Long-Term Engraftment After in Utero Hematopoietic Cell Transplantation.. <i>Blood</i> , 2012, 120, 2993-2993.	0.6	0
121	A Preclinical Canine Model of in Utero Hematopoietic Cell Transplantationâ€œInduced Graft Vs. Host Disease.. <i>Blood</i> , 2012, 120, 3002-3002.	0.6	0
122	Altered Thymocyte Development in Allogeneic in Utero Hematopoietic Cell Transplantation in the Mouse Model. <i>Blood</i> , 2012, 120, 4668-4668.	0.6	0
123	Acute Gvhd Induced by In Utero Hematopoietic Cell Transplantation Is Reversed by a Regulatory Response Resulting in a Potent Graft Vs. Hematopoietic Effect without Clinical Gvhd. <i>Blood</i> , 2011, 118, 1904-1904.	0.6	0
124	Consistent Achievement of Improved Levels of Hematopoietic Chimerism in the Canine Model Following Optimization of Haploidentical In Utero Transplantation. <i>Blood</i> , 2011, 118, 2962-2962.	0.6	0
125	The making of fetal surgery. <i>Prenatal Diagnosis</i> , 2010, 30, 653-667.	1.1	144
126	Haploidentical In Utero Hematopoietic Cell Transplantation Improves Phenotype and Can Induce Tolerance for Postnatal Same-Donor Transplants in the Canine Leukocyte Adhesion Deficiency Model. <i>Biology of Blood and Marrow Transplantation</i> , 2009, 15, 293-305.	2.0	51

#	ARTICLE	IF	CITATIONS
127	Maternal alloantibodies induce a postnatal immune response that limits engraftment following in utero hematopoietic cell transplantation in mice. <i>Journal of Clinical Investigation</i> , 2009, 119, 2590-600.	3.9	72
128	Murine bone marrow derived stromal progenitor cells fail to prevent or treat acute graft-versus-host disease. <i>British Journal of Haematology</i> , 2008, 141, 224-234.	1.2	43
129	Fixing bones before birth. <i>Blood</i> , 2008, 111, 978-979.	0.6	2
130	Evidence for an immune barrier after in utero hematopoietic-cell transplantation. <i>Blood</i> , 2007, 109, 1331-1333.	0.6	85
131	Pulmonary arteriole muscularization in lambs with diaphragmatic hernia after combined tracheal occlusion/glucocorticoid therapy. <i>American Journal of Obstetrics and Gynecology</i> , 2007, 197, 381.e1-381.e7.	0.7	17
132	CD26 inhibition enhances allogeneic donor-cell homing and engraftment after in utero hematopoietic-cell transplantation. <i>Blood</i> , 2006, 108, 4268-4274.	0.6	94
133	Prenatal Glucocorticoids and Exogenous Surfactant Therapy Improve Respiratory Function in Lambs with Severe Diaphragmatic Hernia Following Fetal Tracheal Occlusion. <i>Pediatric Research</i> , 2006, 60, 131-135.	1.1	26
134	Long-Term Expression of ADAMTS13 at Therapeutic Levels in Mice by In Utero Administration of Lentiviral Vector Encoding the Human ADAMTS13 Gene.. <i>Blood</i> , 2006, 108, 3281-3281.	0.6	1
135	In Utero Hematopoietic Cell Transplantation Using Haploidentical Parental Donors Reverses the Lethal Phenotype in Dogs with Canine Leukocyte Adhesion Deficiency.. <i>Blood</i> , 2006, 108, 624-624.	0.6	1
136	DEVELOPMENT OF NOVEL APPROACH FOR GENE TRANSFER OF RODENT FETAL LUNG. <i>FASEB Journal</i> , 2006, 20, A408.	0.2	1
137	Evidence for an Adaptive Immune Barrier after in Utero Hematopoietic Cell Transplantation.. <i>Blood</i> , 2006, 108, 3179-3179.	0.6	4
138	Absence of P21 Gene Augments Proliferation of Mesenchymal Stem Cells.. <i>Blood</i> , 2005, 106, 3039-3039.	0.6	0
139	CD26 Inhibition Enhances Allogeneic Donor Cell Homing and Engraftment after In Utero Bone Marrow Transplantation.. <i>Blood</i> , 2005, 106, 1275-1275.	0.6	1
140	In utero Hematopoietic Cell Transplantation: What Are the Important Questions?. <i>Fetal Diagnosis and Therapy</i> , 2004, 19, 9-12.	0.6	15
141	Complete allogeneic hematopoietic chimerism achieved by in utero hematopoietic cell transplantation and cotransplantation of LLME-treated, MHC-sensitized donor lymphocytes. <i>Experimental Hematology</i> , 2004, 32, 290-299.	0.2	36
142	In utero stem cell transplantation. <i>Best Practice and Research in Clinical Obstetrics and Gynaecology</i> , 2004, 18, 941-958.	1.4	38
143	The conceptual application of systems theory to stem cell biology: a matter of context. <i>Blood Cells, Molecules, and Diseases</i> , 2004, 32, 58-64.	0.6	15
144	Pattern of Ly49A Receptor Downregulation in Low-Level Prenatal Allogeneic Chimeras Suggests Threshold of Chimerism Needed for Long-Term Engraftment.. <i>Blood</i> , 2004, 104, 1201-1201.	0.6	3
