#	ARTICLE	IF	CITATIONS
1	Addressing the yield gap in rainfed crops: a review. <i>Agronomy for Sustainable Development</i> , 2016, 36, 1.	2.2	70
2	The role of management in yield improvement of the wheat crop—a review with special emphasis on Western Australia. <i>Australian Journal of Agricultural Research</i> , 2005, 56, 1137.	1.5	56
3	Variability of optimum sowing time for wheat yield in Western Australia. <i>Australian Journal of Agricultural Research</i> , 2008, 59, 958.	1.5	40
4	Rainfall, sowing time, soil type, and cultivar influence optimum plant population for wheat in Western Australia. <i>Australian Journal of Agricultural Research</i> , 2004, 55, 921.	1.5	36
5	Small grain screenings in wheat: interactions of cultivars with season, site, and management practices. <i>Australian Journal of Agricultural Research</i> , 2004, 55, 797.	1.5	34
6	Assessing specific agronomic responses of wheat cultivars in a winter rainfall environment. <i>Crop and Pasture Science</i> , 2011, 62, 115.	0.7	13
7	Grain yield increases in wheat and barley to nitrogen applied after transient waterlogging in the high rainfall cropping zone of western Australia. <i>Journal of Plant Nutrition</i> , 2016, 39, 974-992.	0.9	10
8	Dryland Agriculture in Australia: Experiences and Innovations. , 2016, , 299-319.		9
9	Success of diagnostic approach to rainfed, wheat-based cropping systems in Western Australia. <i>Agricultural Systems</i> , 2014, 123, 22-33.	3.2	7
10	Small grain screenings in wheat—using the grain size distribution for predicting cultivar responses. <i>Australian Journal of Agricultural Research</i> , 2006, 57, 771.	1.5	5
11	Use of grain size distribution parameters to explain variation in small grain screenings of wheat in multi-environment trials involving new cultivars. <i>Crop and Pasture Science</i> , 2009, 60, 658.	0.7	2
