citing authors

#	ARTICLE	IF	CITATIONS
1	Ambulatory heart rate variability in overweight and obese men after high-intensity interval exercise versus moderate-intensity continuous exercise. <i>European Journal of Sport Science</i> , 2022, 22, 1113-1121.	1.4	3
2	Carotid intima-media thickness and flow-mediated dilation do not predict acute in-hospital outcomes in patients hospitalized with COVID-19. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2022, 322, H906-H913.	1.5	3
3	In-depth cardiovascular and pulmonary assessments in children with multisystem inflammatory syndrome after SARS-CoV-2 infection: A case series study. <i>Physiological Reports</i> , 2022, 10, e15201.	0.7	9
4	P216 Promoting physical activity using mobile health technology in people living with rheumatoid arthritis: MOTIVATE RA. <i>Rheumatology</i> , 2022, 61, .	0.9	0
5	Acute Exercise Increases the Ambulatory Cardiac Modulation of Young Men With Overweight/Obesity. <i>Research Quarterly for Exercise and Sport</i> , 2021, 92, 796-804.	0.8	1
6	Activation of Mechanoreflex, but not Central Command, Delays Heart Rate Recovery after Exercise in Healthy Men. <i>International Journal of Sports Medicine</i> , 2021, 42, 602-609.	0.8	2
7	Consistency of hemodynamic and autonomic mechanisms underlying post-exercise hypotension. <i>Journal of Human Hypertension</i> , 2021, 35, 1003-1011.	1.0	2
8	Increased sympathetic and haemodynamic responses to exercise and muscle metaboreflex activation in postmenopausal women with rheumatoid arthritis. <i>Journal of Physiology</i> , 2021, 599, 927-941.	1.3	12
9	Exercise Enhances the Effect of Bariatric Surgery in Markers of Cardiac Autonomic Function. <i>Obesity Surgery</i> , 2021, 31, 1381-1386.	1.1	10
10	Effects of resistance training on metabolic and cardiovascular responses to a maximal cardiopulmonary exercise test in Parkinson's disease. <i>Einstein (Sao Paulo, Brazil)</i> , 2021, 19, eAO5940.	0.3	3
11	Effects of physical activity on vascular function in autoimmune rheumatic diseases: a systematic review and meta-analysis. <i>Rheumatology</i> , 2021, 60, 3107-3120.	0.9	5
12	Comparison of morning versus evening aerobic-exercise training on heart rate recovery in treated hypertensive men: a randomized controlled trial. <i>Blood Pressure Monitoring</i> , 2021, 26, 388-392.	0.4	10
13	Efficacy of home-based physical activity interventions in patients with autoimmune rheumatic diseases: A systematic review and meta-analysis. <i>Seminars in Arthritis and Rheumatism</i> , 2021, 51, 576-587.	1.6	20
14	Potential Mechanisms Behind the Blood Pressure-Lowering Effect of Dynamic Resistance Training. <i>Current Hypertension Reports</i> , 2021, 23, 35.	1.5	3
15	Acute cardiometabolic effects of brief active breaks in sitting for patients with rheumatoid arthritis. <i>American Journal of Physiology - Endocrinology and Metabolism</i> , 2021, 321, E782-E794.	1.8	7
16	Association of health vulnerability with adverse outcomes in older people with COVID-19: a prospective cohort study. <i>Clinics</i> , 2021, 76, e3369.	0.6	3
17	A call for attention: Is it time to revise the exercise guidelines for hypertension in African and Asian populations?. <i>European Journal of Preventive Cardiology</i> , 2020, 27, 455-456.	0.8	0
18	Clinical safety of blood flow-restricted training? A comprehensive review of altered muscle metaboreflex in cardiovascular disease during ischemic exercise. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2020, 318, H90-H109.	1.5	59

#	ARTICLE	IF	CITATIONS
19	Ultra-processed food consumption associates with higher cardiovascular risk in rheumatoid arthritis. <i>Clinical Rheumatology</i> , 2020, 39, 1423-1428.	1.0	15
20	Effects of postexercise cooling on heart rate recovery in normotensive and hypertensive men. <i>Clinical Physiology and Functional Imaging</i> , 2020, 40, 114-121.	0.5	3
21	Poor sleep quality is associated with cardiac autonomic dysfunction in treated hypertensive men. <i>Journal of Clinical Hypertension</i> , 2020, 22, 1484-1490.	1.0	9
22	Acute effects of moderate-intensity and high-intensity exercise on hemodynamic and autonomic reactivity to the cold pressor test in young adults with excess body weight. <i>Blood Pressure Monitoring</i> , 2020, 25, 82-88.	0.4	5
23	Social isolation during the COVID-19 pandemic can increase physical inactivity and the global burden of cardiovascular disease. <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2020, 318, H1441-H1446.	1.5	308
24	Reproducibility of Heart Rate Variability Indices at Post-maximal Exercise. <i>International Journal of Sports Medicine</i> , 2020, 41, 512-519.	0.8	10
25	Effects of ACEi and ARB on post-exercise hypotension induced by exercises conducted at different times of day in hypertensive men. <i>Clinical and Experimental Hypertension</i> , 2020, 42, 722-727.	0.5	9
26	A randomized controlled trial to reduce sedentary time in rheumatoid arthritis: protocol and rationale of the Take a STAND for Health study. <i>Trials</i> , 2020, 21, 171.	0.7	2
27	Post-exercise hypotension and its hemodynamic determinants depend on the calculation approach. <i>Journal of Human Hypertension</i> , 2020, 34, 719-726.	1.0	10
28	HRV: a Pythonic package for Heart Rate Variability Analysis. <i>Journal of Open Source Software</i> , 2020, 5, 1867.	2.0	15
29	Recommendations in Post-exercise Hypotension: Concerns, Best Practices and Interpretation. <i>International Journal of Sports Medicine</i> , 2019, 40, 487-497.	0.8	49
30	Cardiac Autonomic Modulation Is Associated with Arterial Stiffness in Patients with Symptomatic Peripheral Artery Disease. <i>Annals of Vascular Surgery</i> , 2019, 61, 72-77.	0.4	6
31	Reproducibility of post-exercise heart rate recovery indices: A systematic review. <i>Autonomic Neuroscience: Basic and Clinical</i> , 2019, 221, 102582.	1.4	12
32	Sex and exercise-mode differences in post-exercise blood pressure and heart rate variability responses during a workday. <i>Motriz Revista De Educacao Fisica</i> , 2019, 25, .	0.3	3
33	Morning versus Evening Aerobic Training Effects on Blood Pressure in Treated Hypertension. <i>Medicine and Science in Sports and Exercise</i> , 2019, 51, 653-662.	0.2	41
34	Reproducibility of Hemodynamic, Cardiac Autonomic Modulation, and Blood Flow Assessments in Patients with Intermittent Claudication. <i>Annals of Vascular Surgery</i> , 2019, 57, 144-151.	0.4	0
35	Sympathetic Overactivity and Increased Cardiovascular Responses to Muscle Metaboreflex Activation in Postmenopausal Women with Rheumatoid Arthritis. <i>FASEB Journal</i> , 2019, 33, 696.13.	0.2	1
36	Reproducibility of heart rate recovery in patients with intermittent claudication. <i>Clinical Physiology and Functional Imaging</i> , 2018, 38, 603-609.	0.5	4

#	ARTICLE	IF	CITATIONS
37	Heart rate recovery fast-to-slow phase transition: Influence of physical fitness and exercise intensity. <i>Annals of Noninvasive Electrocardiology</i> , 2018, 23, e12521.	0.5	5
38	Postexercise hypotension as a clinical tool: a "single brick" in the wall. <i>Journal of the American Society of Hypertension</i> , 2018, 12, e59-e64.	2.3	60
39	Reversal of Improved Endothelial Function After Bariatric Surgery Is Mitigated by Exercise Training. <i>Journal of the American College of Cardiology</i> , 2018, 72, 2278-2279.	1.2	21
40	Cardiovascular Responses During Resistance Exercise in Patients With Parkinson Disease. <i>PM and R</i> , 2018, 10, 1145-1152.	0.9	16
41	Chronotropic Incompetence and Reduced Heart Rate Recovery in Rheumatoid Arthritis. <i>Journal of Clinical Rheumatology</i> , 2018, 24, 375-380.	0.5	9
42	Effects of active recovery on autonomic and haemodynamic responses after aerobic exercise. <i>Clinical Physiology and Functional Imaging</i> , 2017, 37, 62-67.	0.5	6
43	Patients with Parkinson disease present high ambulatory blood pressure variability. <i>Clinical Physiology and Functional Imaging</i> , 2017, 37, 530-535.	0.5	19
44	Inflammation and cardiovascular autonomic dysfunction in rheumatoid arthritis: a bidirectional pathway leading to cardiovascular disease. <i>Journal of Physiology</i> , 2017, 595, 1025-1026.	1.3	8
45	Cardiac Autonomic Dysfunction in Offspring of Hypertensive Parents During Exercise. <i>International Journal of Sports Medicine</i> , 2017, 38, 1105-1110.	0.8	6
46	Different times of day do not change heart rate variability recovery after light exercise in sedentary subjects: 24-hour Holter monitoring. <i>Chronobiology International</i> , 2017, 34, 1354-1365.	0.9	11
47	Additive effects of heating and exercise on baroreflex control of heart rate in healthy males. <i>Journal of Applied Physiology</i> , 2017, 123, 1555-1562.	1.2	10
48	Reproducibility (Reliability and Agreement) of Post-exercise Hypotension. <i>International Journal of Sports Medicine</i> , 2017, 38, 1029-1034.	0.8	14
49	Effects of Progressive Resistance Training on Cardiovascular Autonomic Regulation in Patients With Parkinson Disease: A Randomized Controlled Trial. <i>Archives of Physical Medicine and Rehabilitation</i> , 2017, 98, 2134-2141.	0.5	32
50	Methods of assessment of the post-exercise cardiac autonomic recovery: A methodological review. <i>International Journal of Cardiology</i> , 2017, 227, 795-802.	0.8	120
51	Passive Heating Attenuates Post-exercise Cardiac Autonomic Recovery in Healthy Young Males. <i>Frontiers in Neuroscience</i> , 2017, 11, 727.	1.4	16
52	SinusCor: an advanced tool for heart rate variability analysis. <i>BioMedical Engineering OnLine</i> , 2017, 16, 110.	1.3	29
53	Power spectrum analysis of cardiovascular variability during passive heating in conscious rats. <i>Journal of Thermal Biology</i> , 2016, 62, 20-29.	1.1	4
54	Metaboreflex activation delays heart rate recovery after aerobic exercise in never-treated hypertensive men. <i>Journal of Physiology</i> , 2016, 594, 6211-6223.	1.3	28

#	ARTICLE	IF	CITATIONS
55	Blunted Maximal and Submaximal Responses to Cardiopulmonary Exercise Tests in Patients With Parkinson Disease. <i>Archives of Physical Medicine and Rehabilitation</i> , 2016, 97, 720-725.	0.5	36
56	Cardiac autonomic responses after resistance exercise in treated hypertensive subjects. <i>Frontiers in Physiology</i> , 2015, 6, 258.	1.3	13
57	Time of day affects heart rate recovery and variability after maximal exercise in pre-hypertensive men. <i>Chronobiology International</i> , 2015, 32, 1385-1390.	0.9	13
58	Can a first-order exponential decay model fit heart rate recovery after resistance exercise?. <i>Clinical Physiology and Functional Imaging</i> , 2015, 35, 98-103.	0.5	18
59	Metaboreflex Activation Delays Heart Rate Recovery after Aerobic Exercise. <i>FASEB Journal</i> , 2015, 29, 1054.4.	0.2	1
60	Cardiac Autonomic Responses at Onset of Exercise: Effects of Aerobic Fitness. <i>International Journal of Sports Medicine</i> , 2014, 35, 879-885.	0.8	17
61	Water Intake Accelerates Parasympathetic Reactivation After High-Intensity Exercise. <i>International Journal of Sport Nutrition and Exercise Metabolism</i> , 2014, 24, 489-496.	1.0	14
62	24-h Cardiac Autonomic Profile after Exercise in Sedentary Subjects. <i>International Journal of Sports Medicine</i> , 2014, 35, 245-252.	0.8	15
63	Effects of load and type of physical training on resting and postexercise cardiac autonomic control. <i>Clinical Physiology and Functional Imaging</i> , 2014, 34, 114-120.	0.5	16
64	Heart rate recovery: autonomic determinants, methods of assessment and association with mortality and cardiovascular diseases. <i>Clinical Physiology and Functional Imaging</i> , 2014, 34, 327-339.	0.5	161
65	Efeito da ingestão hídrica sobre a recuperação cardiovascular pós-exercício. <i>Revista Brasileira De Cineantropometria E Desempenho Humano</i> , 2014, 16, .	0.5	2
66	Absence of parasympathetic reactivation after maximal exercise. <i>Clinical Physiology and Functional Imaging</i> , 2013, 33, 143-149.	0.5	24
67	Post-exercise heart rate variability recovery: a time-frequency analysis. <i>Acta Cardiologica</i> , 2013, 68, 607-613.	0.3	15
68	Influência do grupamento muscular na recuperação da frequência cardíaca após o exercício resistido. <i>Revista Brasileira De Medicina Do Esporte</i> , 2013, 19, 275-279.	0.1	3
69	A ingestão hídrica acelera a recuperação da frequência cardíaca pós-exercício. <i>Revista Da Educação Física</i> , 2012, 23, .	0.0	2
70	Post-exercise heart rate variability recovery: a time-frequency analysis. , 0, .		2
