#	ARTICLE	IF	CITATIONS
1	Infant and child formula shortages: now is the time to prevent recurrences. <i>American Journal of Clinical Nutrition</i> , 2022, 116, 289-292.	2.2	30
2	Growth outcomes of small for gestational age preterm infants before and after implementation of an exclusive human milk-based diet. <i>Journal of Perinatology</i> , 2021, 41, 1859-1864.	0.9	7
3	Vitamin D and bone minerals in neonates. <i>Early Human Development</i> , 2021, 162, 105461.	0.8	6
4	Comment on "Human Milkâ€Derived Fortifiers Compared with Bovine Milkâ€Derived Fortifiers in Preterm Infants: A Systematic Review and Meta-Analysis". <i>Advances in Nutrition</i> , 2020, 11, 1712-1713.	2.9	2
5	Human milk fortifiers: corrigenda. <i>American Journal of Clinical Nutrition</i> , 2020, 111, 1301-1302.	2.2	0
6	Using stable isotope tracers to study bone metabolism in children. <i>Journal of Physiology</i> , 2019, 597, 1311-1319.	1.3	5
7	Long-Term Growth and Body Composition Consequences of Using Fortified Donor Milk or Preterm Formula for Very-Low-Birth-Weight Infants. <i>Journal of Nutrition</i> , 2019, 150, 188-189.	1.3	0
8	Protecting Vulnerable Infants by Ensuring Safe Infant Formula Use. <i>Journal of Pediatrics</i> , 2019, 211, 201-206.	0.9	13
9	Infant milk-feeding practices and food allergies, allergic rhinitis, atopic dermatitis, and asthma throughout the life span: a systematic review. <i>American Journal of Clinical Nutrition</i> , 2019, 109, 772S-799S.	2.2	86
10	Infant milk-feeding practices and childhood leukemia: a systematic review. <i>American Journal of Clinical Nutrition</i> , 2019, 109, 757S-771S.	2.2	15
11	Infant milk-feeding practices and diabetes outcomes in offspring: a systematic review. <i>American Journal of Clinical Nutrition</i> , 2019, 109, 817S-837S.	2.2	28
12	Infant milk-feeding practices and cardiovascular disease outcomes in offspring: a systematic review. <i>American Journal of Clinical Nutrition</i> , 2019, 109, 800S-816S.	2.2	18
13	Infant milk-feeding practices and diagnosed celiac disease and inflammatory bowel disease in offspring: a systematic review. <i>American Journal of Clinical Nutrition</i> , 2019, 109, 838S-851S.	2.2	23
14	Delaying Iron Therapy until 28 Days after Antimalarial Treatment Is Associated with Greater Iron Incorporation and Equivalent Hematologic Recovery after 56 Days in Children: A Randomized Controlled Trial. <i>Journal of Nutrition</i> , 2016, 146, 1769-1774.	1.3	18
15	Delayed Introduction of Parenteral Phosphorus Is Associated with Hypercalcemia in Extremely Preterm Infants. <i>Journal of Nutrition</i> , 2016, 146, 1212-1216.	1.3	12
16	What does it mean to target specific serum 25-hydroxyvitamin D concentrations in children and adolescents?. <i>American Journal of Clinical Nutrition</i> , 2016, 104, 1193-1194.	2.2	5
17	Beyond Necrotizing Enterocolitis Prevention: Improving Outcomes with an Exclusive Human Milkâ€Based Diet. <i>Breastfeeding Medicine</i> , 2016, 11, 70-74.	0.8	162
18	Fortifier and Cream Improve Fat Delivery in Continuous Enteral Infant Feeding of Breast Milk. <i>Nutrients</i> , 2015, 7, 1174-1183.	1.7	15

#	ARTICLE	IF	CITATIONS
19	Serum Phosphorus Levels in Premature Infants Receiving a Donor Human Milk Derived Fortifier. <i>Nutrients</i> , 2015, 7, 2562-2573.	1.7	8
20	A Novel Approach to Improving Fat Delivery in Neonatal Enteral Feeding. <i>Nutrients</i> , 2015, 7, 5051-5064.	1.7	8
21	Snacks, Sweetened Beverages, Added Sugars, and Schools. <i>Pediatrics</i> , 2015, 135, 575-583.	1.0	73
22	Is It Time to Put a Moratorium on New Infant Formulas that Are Not Adequately Investigated?. <i>Journal of Pediatrics</i> , 2015, 166, 756-760.	0.9	11
23	A Systematic Review of Controlled Trials of Lower-Protein or Energy-Containing Infant Formulas for Use by Healthy Full-Term Infants. <i>Advances in Nutrition</i> , 2015, 6, 178-188.	2.9	39
24	Free 25(OH)D and Calcium Absorption, PTH, and Markers of Bone Turnover. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2015, 100, 4140-4145.	1.8	55
25	The Role of the Pediatrician in Primary Prevention of Obesity. <i>Pediatrics</i> , 2015, 136, e275-e292.	1.0	298
26	Optimizing Bone Health in Children and Adolescents. <i>Pediatrics</i> , 2014, 134, e1229-e1243.	1.0	351
27	Greater Mortality and Morbidity in Extremely Preterm Infants Fed a Diet Containing Cow Milk Protein Products. <i>Breastfeeding Medicine</i> , 2014, 9, 281-285.	0.8	137
28	Bioavailability of enteric-coated microencapsulated calcium during pregnancy: a randomized crossover trial in Bangladesh. <i>American Journal of Clinical Nutrition</i> , 2014, 100, 1587-1595.	2.2	9
29	Isotope Concentrations from 24-h Urine and 3-h Serum Samples Can Be Used to Measure Intestinal Magnesium Absorption in Postmenopausal Women. <i>Journal of Nutrition</i> , 2014, 144, 533-537.	1.3	5
30	Reply. <i>Journal of Pediatrics</i> , 2014, 164, 947.	0.9	0
31	Vitamin D supplementation increases calcium absorption without a threshold effect. <i>American Journal of Clinical Nutrition</i> , 2014, 99, 624-631.	2.2	70
32	Increased Calcium Absorption From Synthetic Stable Amorphous Calcium Carbonate: Double-Blind Randomized Crossover Clinical Trial in Postmenopausal Women. <i>Journal of Bone and Mineral Research</i> , 2014, 29, 2203-2209.	3.1	18
33	Consumption of Raw or Unpasteurized Milk and Milk Products by Pregnant Women and Children. <i>Pediatrics</i> , 2014, 133, 175-179.	1.0	73
34	Randomized Trial of Human Milk Cream as a Supplement to Standard Fortification of an Exclusive Human Milk-Based Diet in Infants 750-1250g Birth Weight. <i>Journal of Pediatrics</i> , 2014, 165, 915-920.	0.9	55
35	Fish Oil-Based Lipid Emulsions in the Treatment of Parenteral Nutrition-Associated Liver Disease: An Ongoing Positive Experience. <i>Advances in Nutrition</i> , 2014, 5, 65-70.	2.9	52
36	Calcium kinetics during bed rest with artificial gravity and exercise countermeasures. <i>Osteoporosis International</i> , 2014, 25, 2237-2244.	1.3	8

#	ARTICLE	IF	CITATIONS
37	Micronutrient Requirements of High-Risk Infants. <i>Clinics in Perinatology</i> , 2014, 41, 347-361.	0.8	10
38	Fifty Years of Human Space Travel: Implications for Bone and Calcium Research. <i>Annual Review of Nutrition</i> , 2014, 34, 377-400.	4.3	85
39	Bone Densitometry in Infants and Young Children: The 2013 ISCD Pediatric Official Positions. <i>Journal of Clinical Densitometry</i> , 2014, 17, 243-257.	0.5	78
40	Magnesium Metabolism in 4-Year-Old to 8-Year-Old Children. <i>Journal of Bone and Mineral Research</i> , 2014, 29, 118-122.	3.1	27
41	Infant iron status affects iron absorption in Peruvian breastfed infants at 2 and 5 mo of age. <i>American Journal of Clinical Nutrition</i> , 2013, 98, 1475-1484.	2.2	17
42	Zinc for preterm infants: who needs it and how much is needed?. <i>American Journal of Clinical Nutrition</i> , 2013, 98, 1373-1374.	2.2	10
43	Vitamin D: effects on childhood health and disease. <i>Nature Reviews Endocrinology</i> , 2013, 9, 162-170.	4.3	34
44	Impact of New-Generation Parenteral Lipid Emulsions in Pediatric Nutrition. <i>Advances in Nutrition</i> , 2013, 4, 518-520.	2.9	7
45	Supplementation with 1000 IU vitamin D/d leads to parathyroid hormone suppression, but not increased fractional calcium absorption, in 4-8-y-old children: a double-blind randomized controlled trial. <i>American Journal of Clinical Nutrition</i> , 2013, 97, 217-223.	2.2	40
46	Inclusion of Guava Enhances Non-Heme Iron Bioavailability but Not Fractional Zinc Absorption from a Rice-Based Meal in Adolescents. <i>Journal of Nutrition</i> , 2013, 143, 852-858.	1.3	32
47	Targeting Dietary Vitamin D Intakes and Plasma 25-Hydroxyvitamin D in Healthy Infants. <i>JAMA - Journal of the American Medical Association</i> , 2013, 309, 1830.	3.8	5
48	Calcium and Vitamin D Requirements of Enterally Fed Preterm Infants. <i>Pediatrics</i> , 2013, 131, e1676-e1683.	1.0	262
49	Efficacy of a multi micronutrient-fortified drink in improving iron and micronutrient status among schoolchildren with low iron stores in India: a randomised, double-masked placebo-controlled trial. <i>European Journal of Clinical Nutrition</i> , 2013, 67, 36-41.	1.3	27
50	Genetic Defect in <i>CYP24A1</i> , the Vitamin D 24-Hydroxylase Gene, in a Patient with Severe Infantile Hypercalcemia. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2012, 97, E268-E274.	1.8	113
51	Serum 1,25-dihydroxyvitamin D and calcium intake affect rates of bone calcium deposition during pregnancy and the early postpartum period. <i>American Journal of Clinical Nutrition</i> , 2012, 96, 64-72.	2.2	20
52	Î±-Lactalbumin and Casein-Glycomacropeptide Do Not Affect Iron Absorption from Formula in Healthy Term Infants. <i>Journal of Nutrition</i> , 2012, 142, 1226-1231.	1.3	18
53	Hepcidin is the major predictor of erythrocyte iron incorporation in anemic African children. <i>Blood</i> , 2012, 119, 1922-1928.	0.6	149
54	Organic Foods: Health and Environmental Advantages and Disadvantages. <i>Pediatrics</i> , 2012, 130, e1406-e1415.	1.0	117

#	ARTICLE	IF	CITATIONS
55	Low Zinc Status and Absorption Exist in Infants with Jejunostomies or Ileostomies Which Persists after Intestinal Repair. <i>Nutrients</i> , 2012, 4, 1273-1281.	1.7	14
56	IOM Committee Members Respond to Endocrine Society Vitamin D Guideline. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2012, 97, 1146-1152.	1.8	492
57	Vitamin D requirements of children: "all my life's a circle". <i>Nutrition Reviews</i> , 2012, 70, 201-206.	2.6	7
58	The 2011 Report on Dietary Reference Intakes for Calcium and Vitamin D from the Institute of Medicine: What Clinicians Need to Know. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2011, 96, 53-58.	1.8	3,343
59	KnowaZaZ This article is a summary of the Institute of Medicine report entitled Dietary Reference Intakes for Calcium and Vitamin D (available at) Tj ETQq1 1 0.784314 rgBT /Overlock 10 Tf 50 587 Td (http://www.iom.edu/Reports/2010/DietaryReferenceIntakesforCalciumandVitaminD.aspx)		

#	ARTICLE	IF	CITATIONS
73	Fractional Absorption of Active Absorbable Algal Calcium (AAACa) and Calcium Carbonate Measured by a Dual Stable-Isotope Method. <i>Nutrients</i> , 2010, 2, 752-761.	1.7	14
74	Setting Dietary Reference Intakes with the use of bioavailability data: calcium. <i>American Journal of Clinical Nutrition</i> , 2010, 91, 1474S-1477S.	2.2	14
75	High Rates of Mortality and Morbidity Occur in Infants With Parenteral Nutritionâ€Associated Cholestasis. <i>Journal of Parenteral and Enteral Nutrition</i> , 2010, 34, 32-37.	1.3	111
76	An Inflection Point of Serum 25-Hydroxyvitamin D for Maximal Suppression of Parathyroid Hormone Is Not Evident from Multi-Site Pooled Data in Children and Adolescents ,. <i>Journal of Nutrition</i> , 2010, 140, 1983-1988.	1.3	51
77	Mineral homeostasis in young children consuming typical U.S. diets. <i>Pure and Applied Chemistry</i> , 2010, 82, 437-445.	0.9	0
78	Perturbed Zinc Homeostasis in Rural 3â€5-y-Old Malawian Children Is Associated With Abnormalities in Intestinal Permeability Attributed to Tropical Enteropathy. <i>Pediatric Research</i> , 2010, 67, 671-675.	1.1	62
79	A Simple Single Serum Method to Measure Fractional Calcium Absorption using Dual Stable Isotopes. <i>Experimental and Clinical Endocrinology and Diabetes</i> , 2010, 118, 653-656.	0.6	6
80	Diagnosis and Prevention of Iron Deficiency and Iron-Deficiency Anemia in Infants and Young Children (0â€3 Years of Age). <i>Pediatrics</i> , 2010, 126, 1040-1050.	1.0	761
81	Orange But Not Apple Juice Enhances Ferrous Fumarate Absorption in Small Children. <i>Journal of Pediatric Gastroenterology and Nutrition</i> , 2010, 50, 545-550.	0.9	13
82	Can lactoferrin prevent neonatal sepsis and necrotizing enterocolitis?. <i>Expert Review of Anti-Infective Therapy</i> , 2009, 7, 515-525.	2.0	8
83	Meals and Dephytinization Affect Calcium and Zinc Absorption in Nigerian Children with Rickets. <i>Journal of Nutrition</i> , 2009, 139, 926-932.	1.3	31
84	Higher Serum 25-Hydroxyvitamin D Levels in School-Age Children Are Inconsistently Associated with Increased Calcium Absorption. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2009, 94, 2421-2427.	1.8	75
85	Potassium Bicarbonate Attenuates the Urinary Nitrogen Excretion That Accompanies an Increase in Dietary Protein and May Promote Calcium Absorption. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2009, 94, 645-653.	1.8	81
86	The Effect of Vitamin D2 and Vitamin D3 on Intestinal Calcium Absorption in Nigerian Children with Rickets. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2009, 94, 3314-3321.	1.8	66
87	Iron supplementation does not affect copper and zinc absorption in breastfed infants. <i>American Journal of Clinical Nutrition</i> , 2009, 89, 185-190.	2.2	27
88	Docosahexaenoic Acid (DHA) Supplementation of Orange Juice Increases Plasma Phospholipid DHA Content of Children. <i>Journal of the American Dietetic Association</i> , 2009, 109, 708-712.	1.3	13
89	Assessing mineral metabolism in children using stable isotopes. <i>Pediatric Blood and Cancer</i> , 2008, 50, 438-441.	0.8	19
90	The efficacy of micronutrient supplementation in reducing the prevalence of anaemia and deficiencies of zinc and iron among adolescents in Sri Lanka. <i>European Journal of Clinical Nutrition</i> , 2008, 62, 856-865.	1.3	41

#	ARTICLE	IF	CITATIONS
91	Nutritional impact of elevated calcium transport activity in carrots. Proceedings of the National Academy of Sciences of the United States of America, 2008, 105, 1431-1435.	3.3	111
92	Postnatal Vitamin A Supplementation in Developing Countries: An Intervention Whose Time Has Come?. Pediatrics, 2008, 122, 180-181.	1.0	12
93	Adaptation of calcium absorption during treatment of nutritional rickets in Nigerian children. British Journal of Nutrition, 2008, 100, 387-392.	1.2	23
94	Iron Incorporation and Post-Malaria Anaemia. PLoS ONE, 2008, 3, e2133.	1.1	48
95	Effects of oligofructose-enriched inulin on intestinal absorption of calcium and magnesium and bone turnover markers in postmenopausal women. British Journal of Nutrition, 2007, 97, 365-372.	1.2	142
96	Zinc homeostasis in 14 year olds consuming diets typical of US children. British Journal of Nutrition, 2007, 98, 358-363.	1.2	13
97	Improving Rehydration Solutions With Human Milk Proteins: Are the Benefits Worth the Challenges?. Journal of Pediatric Gastroenterology and Nutrition, 2007, 44, 298-299.	0.9	1
98	Effect of Prebiotic Supplementation and Calcium Intake on Body Mass Index. Journal of Pediatrics, 2007, 151, 293-298.	0.9	109
99	Fractional Calcium Absorption Is Increased in Girls with Rett Syndrome. Journal of Pediatric Gastroenterology and Nutrition, 2006, 42, 419-426.	0.9	37
100	An Educational Program Enhances Food Label Understanding of Young Adolescents. Journal of the American Dietetic Association, 2006, 106, 913-916.	1.3	41
101	Vitamin D Receptor Fok1 Polymorphisms Affect Calcium Absorption, Kinetics, and Bone Mineralization Rates During Puberty. Journal of Bone and Mineral Research, 2005, 20, 945-953.	3.1	114
102	Relationships among Vitamin D Levels, Parathyroid Hormone, and Calcium Absorption in Young Adolescents. Journal of Clinical Endocrinology and Metabolism, 2005, 90, 5576-5581.	1.8	158
103	Height and Height Z-Score Are Related to Calcium Absorption in Five- to Fifteen-Year-Old Girls. Journal of Clinical Endocrinology and Metabolism, 2005, 90, 5077-5081.	1.8	19
104	Effects of Potassium Alkali and Calcium Supplementation on Bone Turnover in Postmenopausal Women. Journal of Clinical Endocrinology and Metabolism, 2005, 90, 3528-3533.	1.8	62
105	Absorption of calcium from the carbonated dairy soft drink is greater than that from fat-free milk and calcium-fortified orange juice in women. Nutrition Research, 2005, 25, 737-742.	1.3	6
106	Zinc Metabolism in Adolescents with Crohn's Disease. Pediatric Research, 2004, 56, 235-239.	1.1	38
107	Improved Estimation of the Calcium Content of Total Digestive Secretions. Journal of Clinical Endocrinology and Metabolism, 2004, 89, 1193-1195.	1.8	14
108	CALCIUM AND BONE MINERAL METABOLISM IN CHILDREN WITH CHRONIC ILLNESSES. Annual Review of Nutrition, 2004, 24, 13-32.	4.3	19
