

Michal Florczyk

List of Publications by Citations

Source: <https://exaly.com/author-pdf/9572963/michal-florczyk-publications-by-citations.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
19	Serum N-terminal brain natriuretic peptide as a prognostic parameter in patients with pulmonary hypertension. <i>Chest</i> , 2006 , 129, 1313-21	5.3	299
18	Detectable serum cardiac troponin T as a marker of poor prognosis among patients with chronic precapillary pulmonary hypertension. <i>Circulation</i> , 2003 , 108, 844-8	16.7	226
17	Pulmonary artery dilatation correlates with the risk of unexpected death in chronic arterial or thromboembolic pulmonary hypertension. <i>Chest</i> , 2012 , 142, 1406-1416	5.3	73
16	Improvement in Quality of Life and Hemodynamics in Chronic Thromboembolic Pulmonary Hypertension Treated With Balloon Pulmonary Angioplasty. <i>Circulation Journal</i> , 2017 , 81, 552-557	2.9	32
15	In-hospital major bleeding predicts mortality in patients with pulmonary embolism: an analysis of ZATPOL Registry data. <i>International Journal of Cardiology</i> , 2013 , 168, 3543-9	3.2	31
14	Characteristics and prognosis of patients with decompensated right ventricular failure during the course of pulmonary hypertension. <i>Kardiologia Polska</i> , 2008 , 66, 1033-9; discussion 1040-1	0.9	31
13	Recurrent hemoptysis: an emerging life-threatening complication in idiopathic pulmonary arterial hypertension. <i>Chest</i> , 2011 , 139, 690-693	5.3	27
12	Sequential treatment with sildenafil and riociguat in patients with persistent or inoperable chronic thromboembolic pulmonary hypertension improves functional class and pulmonary hemodynamics. <i>International Journal of Cardiology</i> , 2018 , 269, 283-288	3.2	14
11	Acute and chronic dissection of pulmonary artery: new challenges in pulmonary arterial hypertension?. <i>Pulmonary Circulation</i> , 2018 , 8, 2045893217749114	2.7	8
10	Changes in Estimated Glomerular Filtration after Balloon Pulmonary Angioplasty for Chronic Thromboembolic Pulmonary Hypertension. <i>CardioRenal Medicine</i> , 2020 , 10, 22-31	2.8	7
9	Fear of COVID-19, Anxiety and Depression in Patients with Pulmonary Arterial Hypertension and Chronic Thromboembolic Pulmonary Hypertension during the Pandemic. <i>Journal of Clinical Medicine</i> , 2021 , 10,	5.1	5
8	Assessment of electrocardiographic markers of acute and long-term hemodynamic improvement in patients with pulmonary hypertension. <i>Annals of Noninvasive Electrocardiology</i> , 2020 , 25, e12758	1.5	4
7	COVID-19 Vaccination in Patients with Pulmonary Arterial Hypertension and Chronic Thromboembolic Pulmonary Hypertension: Safety Profile and Reasons for Opting against Vaccination.. <i>Vaccines</i> , 2021 , 9,	5.3	3
6	Soluble ST2 protein as a new biomarker in patients with precapillary pulmonary hypertension. <i>Archives of Medical Science</i> , 2020 ,	2.9	3
5	Circulating Blood-Based Biomarkers in Pulmonary Hypertension.. <i>Journal of Clinical Medicine</i> , 2022 , 11,	5.1	2
4	The evolution of electrocardiographic signs of right ventricular overload after balloon pulmonary angioplasty in chronic thromboembolic pulmonary hypertension. <i>Polish Archives of Internal Medicine</i> , 2019 , 129, 451-459	1.9	2
3	Soluble ST2 as a Biomarker for Early Complications in Patients with Chronic Thromboembolic Pulmonary Hypertension Treated with Balloon Pulmonary Angioplasty. <i>Diagnostics</i> , 2021 , 11,	3.8	1

- 2 Predictive value of chest HRCT for survival in idiopathic pulmonary arterial hypertension. *Respiratory Research*, **2021**, 22, 293 7.3
- 1 Response to letter from dr Altmayer regarding publication "Sequential treatment with sildenafil and riociguat in patients with persistent or inoperable chronic thromboembolic pulmonary hypertension improves functional class and pulmonary hemodynamics". *International Journal of Cardiology*, **2019**, 276, 240-241 3.2
