

# Benjamin C Storm

## List of Publications by Citations

**Source:** <https://exaly.com/author-pdf/9590828/benjamin-c-storm-publications-by-citations.pdf>

**Version:** 2024-04-24

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

37

#	Paper	IF	Citations
37	A progress report on the inhibitory account of retrieval-induced forgetting. <i>Memory and Cognition</i> , <b>2012</b> , 40, 827-43	2.2	142
36	Forgetting as a consequence of retrieval: a meta-analytic review of retrieval-induced forgetting. <i>Psychological Bulletin</i> , <b>2014</b> , 140, 1383-409	19.1	130
35	Is retrieval success a necessary condition for retrieval-induced forgetting?. <i>Psychonomic Bulletin and Review</i> , <b>2006</b> , 13, 1023-7	4.1	120
34	Overcoming fixation. Creative problem solving and retrieval-induced forgetting. <i>Psychological Science</i> , <b>2010</b> , 21, 1263-5	7.9	80
33	Saving-enhanced memory: the benefits of saving on the learning and remembering of new information. <i>Psychological Science</i> , <b>2015</b> , 26, 182-8	7.9	66
32	When intended remembering leads to unintended forgetting. <i>Quarterly Journal of Experimental Psychology</i> , <b>2007</b> , 60, 909-15	1.8	53
31	Thinking can cause forgetting: memory dynamics in creative problem solving. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , <b>2011</b> , 37, 1287-93	2.2	52
30	ADHD and retrieval-induced forgetting: evidence for a deficit in the inhibitory control of memory. <i>Memory</i> , <b>2010</b> , 18, 265-71	1.8	43
29	Accelerated relearning after retrieval-induced forgetting: the benefit of being forgotten. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , <b>2008</b> , 34, 230-6	2.2	43
28	Examining the costs and benefits of inhibition in memory retrieval. <i>Cognition</i> , <b>2014</b> , 133, 358-70	3.5	41
27	Using the Internet to access information inflates future use of the Internet to access other information. <i>Memory</i> , <b>2017</b> , 25, 717-723	1.8	41
26	Successful inhibition, unsuccessful retrieval: manipulating time and success during retrieval practice. <i>Memory</i> , <b>2010</b> , 18, 99-114	1.8	35
25	Retrieval-induced forgetting predicts failure to recall negative autobiographical memories. <i>Psychological Science</i> , <b>2012</b> , 23, 1356-63	7.9	34
24	On the durability of retrieval-induced forgetting. <i>Journal of Cognitive Psychology</i> , <b>2012</b> , 24, 617-629	0.9	32
23	Exposure to Product Placement in Text Can Influence Consumer Judgments. <i>Applied Cognitive Psychology</i> , <b>2015</b> , 29, 20-31	2.1	12
22	A Review of Retrieval-Induced Forgetting in the Contexts of Learning, Eyewitness Memory, Social Cognition, Autobiographical Memory, and Creative Cognition. <i>Psychology of Learning and Motivation - Advances in Research and Theory</i> , <b>2015</b> , 62, 141-194	1.4	12
21	Remembering the past and imagining the future: examining the consequences of mental time travel on memory. <i>Memory</i> , <b>2012</b> , 20, 224-35	1.8	11

20	Selective cues to forget can fail to cause forgetting. <i>Quarterly Journal of Experimental Psychology</i> , <b>2013</b> , 66, 29-36	1.8	11
19	Retrieval-induced forgetting is associated with increased positivity when imagining the future. <i>Quarterly Journal of Experimental Psychology</i> , <b>2016</b> , 69, 351-60	1.8	9
18	Thinking about the future can cause forgetting of the past. <i>Quarterly Journal of Experimental Psychology</i> , <b>2016</b> , 69, 339-50	1.8	9
17	Mental fixation and metacognitive predictions of insight in creative problem solving. <i>Quarterly Journal of Experimental Psychology</i> , <b>2015</b> , 68, 802-13	1.8	8
16	Retrieval-practice task affects relationship between working memory capacity and retrieval-induced forgetting. <i>Memory</i> , <b>2016</b> , 24, 1407-18	1.8	8
15	Unblocking memory through directed forgetting. <i>Journal of Cognitive Psychology</i> , <b>2012</b> , 24, 901-907	0.9	6
14	Beyond the pretesting effect: What happens to the information that is not pretested?. <i>Journal of Experimental Psychology: Applied</i> , <b>2019</b> , 25, 576-587	1.8	6
13	Explaining retrieval-induced forgetting: A change in mental context between the study and restudy practice phases is not sufficient to cause forgetting. <i>Quarterly Journal of Experimental Psychology</i> , <b>2016</b> , 69, 1197-209	1.8	5
12	Putting a negative spin on it: Using a fidget spinner can impair memory for a video lecture. <i>Applied Cognitive Psychology</i> , <b>2020</b> , 34, 277-284	2.1	5
11	That's a good idea, but let's keep thinking! Can we prevent our initial ideas from being forgotten as a consequence of thinking of new ideas?. <i>Psychological Research</i> , <b>2017</b> , 81, 678-689	2.5	4
10	Improving encoding strategies as a function of test knowledge and experience. <i>Memory and Cognition</i> , <b>2016</b> , 44, 660-70	2.2	4
9	Do learners predict a shift from recency to primacy with delay?. <i>Memory and Cognition</i> , <b>2016</b> , 44, 1204-1214	2.1	2
8	Explanation can cause Forgetting: Memory Dynamics in the Generation of New Arguments. <i>Psychonomic Bulletin and Review</i> , <b>2017</b> , 24, 1426-1435	4.1	1
7	Cognitive consequences of asymmetrical visual distraction. <i>Journal of General Psychology</i> , <b>2007</b> , 134, 415-34	1	1
6	Remembering what was said and done: The activation and facilitation of memory for gesture as a consequence of retrieval. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , <b>2019</b> , 45, 526-534	2.2	1
5	Overcoming fixation with repeated memory suppression		1
4	Pretesting can be beneficial even when using the internet to answer questions. <i>Memory</i> , <b>2021</b> , 1-8	1.8	1
3	Saved information is remembered less well than deleted information, if the saving process is perceived as reliable. <i>Memory</i> , <b>2021</b> , 29, 1101-1110	1.8	1

2	A little can go a long way: giving learners some context can enhance the benefits of pretesting. <i>Memory</i> , <b>2021</b> , 29, 1206-1215	1.8	1
1	Relearning can eliminate the effect of retrieval-induced forgetting. <i>Psychological Research</i> , <b>2021</b> , 1	2.5	0
