

# Federica Dell Annunziata

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/9595352/federica-dellannunziata-publications-by-year.pdf>

**Version:** 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
9	Pulsed laser ablation of magnetic nanoparticles as a novel antibacterial strategy against gram positive bacteria. <i>Applied Surface Science Advances</i> , <b>2022</b> , 7, 100213	2.6	4
8	Niclosamide as a Repurposing Drug against <i>Corynebacterium striatum</i> Multidrug-Resistant Infections. <i>Antibiotics</i> , <b>2022</b> , 11, 651	4.9	1
7	Gene Transfer Potential of Outer Membrane Vesicles of Gram-Negative Bacteria. <i>International Journal of Molecular Sciences</i> , <b>2021</b> , 22,	6.3	10
6	Evaluation of Antibiotic Resistance and Biofilm Production among Clinical Strain Isolated from Medical Devices. <i>International Journal of Microbiology</i> , <b>2021</b> , 2021, 9033278	3.6	7
5	Postmortem interval assessment by MALDI-TOF mass spectrometry analysis in murine cadavers. <i>Journal of Applied Microbiology</i> , <b>2021</b> ,	4.7	2
4	Outer Membrane Vesicles Derived from Are a Driving Force for Horizontal Gene Transfer. <i>International Journal of Molecular Sciences</i> , <b>2021</b> , 22,	6.3	5
3	Comparative analysis of peracetic acid (PAA) and permaleic acid (PMA) in disinfection processes. <i>Science of the Total Environment</i> , <b>2021</b> , 797, 149206	10.2	12
2	Outer Membrane Vesicles Derived from Influence the miRNA Expression Profile in Human Bronchial Epithelial BEAS-2B Cells. <i>Microorganisms</i> , <b>2020</b> , 8,	4.9	9
1	Isolation, characterization and analysis of pro-inflammatory potential of <i>Klebsiella pneumoniae</i> outer membrane vesicles. <i>Microbial Pathogenesis</i> , <b>2019</b> , 136, 103719	3.8	17
