#	ARTICLE	IF	CITATIONS
1	Physical Activity During School Recess. <i>American Journal of Preventive Medicine</i> , 2012, 43, 320-328.	1.6	262
2	A collaborative approach to adopting/adapting guidelines - The Australian 24-Hour Movement Guidelines for the early years (Birth to 5 years): an integration of physical activity, sedentary behavior, and sleep. <i>BMC Public Health</i> , 2017, 17, 869.	1.2	261
3	Correlates of Total Sedentary Time and Screen Time in 9-11 Year-Old Children around the World: The International Study of Childhood Obesity, Lifestyle and the Environment. <i>PLoS ONE</i> , 2015, 10, e0129622.	1.1	211
4	The Effect of School Recess Interventions on Physical Activity. <i>Sports Medicine</i> , 2013, 43, 287-299.	3.1	135
5	Correlates of children's time-specific physical activity: A review of the literature. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2012, 9, 50.	2.0	79
6	Children's Physical Activity Assessed with Wrist- and Hip-Worn Accelerometers. <i>Medicine and Science in Sports and Exercise</i> , 2014, 46, 2308-2316.	0.2	74
7	Voices in the playground: A qualitative exploration of the barriers and facilitators of lunchtime play. <i>Journal of Science and Medicine in Sport</i> , 2012, 15, 44-51.	0.6	69
8	Comparability of Measured Acceleration from Accelerometry-Based Activity Monitors. <i>Medicine and Science in Sports and Exercise</i> , 2015, 47, 201-210.	0.2	55
9	Identifying correlates and determinants of physical activity in youth: How can we advance the field?. <i>Preventive Medicine</i> , 2016, 87, 167-169.	1.6	46
10	Tummy Time and Infant Health Outcomes: A Systematic Review. <i>Pediatrics</i> , 2020, 145, .	1.0	46
11	A collaborative approach to adopting/adapting guidelines. The Australian 24-hour movement guidelines for children (5-12 years) and young people (13-17 years): An integration of physical activity, sedentary behaviour, and sleep. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2022, 19, 2.	2.0	42
12	In Search of Consistent Predictors of Children's Physical Activity. <i>International Journal of Environmental Research and Public Health</i> , 2017, 14, 1258.	1.2	32
13	A Qualitative Exploration of the "Critical Window" Factors Affecting Australian Children's After-School Physical Activity. <i>Journal of Physical Activity and Health</i> , 2013, 10, 33-41.	1.0	29
14	Increasing physical activity among young children from disadvantaged communities: study protocol of a group randomised controlled effectiveness trial. <i>BMC Public Health</i> , 2016, 16, 1095.	1.2	27
15	Sleep characteristics and health-related quality of life in 9- to 11-year-old children from 12 countries. <i>Sleep Health</i> , 2020, 6, 4-14.	1.3	24
16	Correlates of tummy time in infants aged 0-12 months old: A systematic review. , 2017, 49, 310-321.		22
17	The type and prevalence of activities performed by Australian children during the lunchtime and after school periods. <i>Journal of Science and Medicine in Sport</i> , 2011, 14, 227-232.	0.6	19
18	Culture and healthy lifestyles: a qualitative exploration of the role of food and physical activity in three urban Australian Indigenous communities. <i>Australian and New Zealand Journal of Public Health</i> , 2017, 41, 411-416.	0.8	18

#	ARTICLE	IF	CITATIONS
19	Child care centre adherence to infant physical activity and screen time recommendations in Australia, Canada and the United States: An observational study. , 2018, 50, 88-97.		17
20	â€œJump startâ€™ childcare-based intervention to promote physical activity in pre-schoolers: six-month findings from a cluster randomised trial. International Journal of Behavioral Nutrition and Physical Activity, 2020, 17, 6.	2.0	17
21	Objective measurement of tummy time in infants (0-6 months): A validation study. PLoS ONE, 2019, 14, e0210977.	1.1	15
22	Physical activity and screen time in out of school hours care: an observational study. BMC Pediatrics, 2019, 19, 283.	0.7	12
23	Increasing Specificity of Correlate Research: Exploring Correlates of Childrenâ€™s Lunchtime and After-School Physical Activity. PLoS ONE, 2014, 9, e96460.	1.1	10
24	Development and psychometric properties of the Y-PASS questionnaire to assess correlates of lunchtime and after-school physical activity in children. BMC Public Health, 2014, 14, 412.	1.2	10
25	Enhancing the Effectiveness of Early Childhood Educators and Researchers Working Together to Achieve Common Aims. Australasian Journal of Early Childhood, 2017, 42, 81-84.	0.8	10
26	Exploring Stakeholdersâ€™ Perceptions of the Acceptability, Usability, and Dissemination of the Australian 24-Hour Movement Guidelines for the Early Years. Journal of Physical Activity and Health, 2020, 17, 120-125.	1.0	10
27	The Concurrent Validity of the 3-Day Physical Activity Recall in Australian Youth. Pediatric Exercise Science, 2015, 27, 262-267.	0.5	9
28	Perceived Facilitators and Barriers in Response to a Walking Intervention in Rural Cancer Survivors: A Qualitative Exploration. International Journal of Environmental Research and Public Health, 2018, 15, 2824.	1.2	9
29	Weekly group tummy time classes are feasible and acceptable to mothers with infants: a pilot cluster randomized controlled trial. Pilot and Feasibility Studies, 2020, 6, 155.	0.5	9
30	Modelling the contribution of walking between home and school to daily physical activity in primary age children. BMC Public Health, 2015, 15, 445.	1.2	8
31	Promoting Physical Activity and Executive Functions Among Children: A Cluster Randomized Controlled Trial of an After-School Program in Australia. Journal of Physical Activity and Health, 2020, 17, 940-946.	1.0	8
32	Steps toward improving diet and exercise for cancer survivors (STRIDE): a quasi-randomised controlled trial protocol. BMC Cancer, 2014, 14, 428.	1.1	7
33	Support to Enhance Level of Implementation in Physical Activity Interventions: An Observational Study. Australasian Journal of Early Childhood, 2018, 43, 25-33.	0.8	5
34	Accelerometer wear-site detection: When one site does not suit all, all of the time. Journal of Science and Medicine in Sport, 2017, 20, 368-372.	0.6	4
35	Healthy eating and physical activity environments in out-of-school hours care: an observational study protocol. BMJ Open, 2020, 10, e036397.	0.8	4
36	The concurrent validity of the 3-day Physical Activity Recall questionnaire administered to female adolescents aged 12?14 years. Australian Occupational Therapy Journal, 2007, 54, 070620173412003-???.	0.6	3

#	ARTICLE	IF	CITATIONS
37	The association between staff intention and pre-schoolersâ€™ physical activity in early childhood education and care services. <i>Early Child Development and Care</i> , 2020, 190, 2032-2040.	0.7	2
38	Validity of GENEActiv Accelerometer Wear and Nonwear Time for Use in Infants. <i>Journal of Physical Activity and Health</i> , 2021, 18, 488-494.	1.0	2
39	Physical activity in out of school hours care: an observational study. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2021, 18, 127.	2.0	2
40	Systematic observation of healthy eating environments in after-school services: a cross-sectional study. <i>Public Health Nutrition</i> , 2021, 24, 6067-6074.	1.1	1
41	Foods and beverages provided in out of school hours care services: an observational study. <i>BMC Public Health</i> , 2022, 22, 277.	1.2	1
