#	ARTICLE	IF	CITATIONS
1	Psychological impact of genetic testing for familial hypercholesterolemia within a previously aware population: A randomized controlled trial. <i>American Journal of Medical Genetics Part A</i> , 2004, 128A, 285-293.	2.4	172
2	Will genetic testing for predisposition for disease result in fatalism? A qualitative study of parents responses to neonatal screening for familial hypercholesterolaemia. <i>Social Science and Medicine</i> , 1999, 48, 1857-1860.	3.8	163
3	Self-Reported Adherence to Cholesterol-Lowering Medication in Patients with Familial Hypercholesterolaemia: The Role of Illness Perceptions. <i>Cardiovascular Drugs and Therapy</i> , 2004, 18, 475-481.	2.6	93
4	Causal attributions for heart disease: A systematic review. <i>Psychology and Health</i> , 2001, 16, 77-98.	2.2	87
5	Patients' perceptions of methicillin-resistant <i>Staphylococcus aureus</i> and source isolation: a qualitative analysis of source-isolated patients. <i>Journal of Hospital Infection</i> , 2001, 48, 275-280.	2.9	78
6	Impact of genetic testing on causal models of heart disease and arthritis: An analogue study. <i>Psychology and Health</i> , 2000, 14, 1077-1088.	2.2	74
7	Psychological distress amongst immigration detainees: A cross-sectional questionnaire study. <i>British Journal of Clinical Psychology</i> , 2009, 48, 275-286.	3.5	72
8	Making Sense of Risk: An Interpretative Phenomenological Analysis of Vulnerability to Heart Disease. <i>Journal of Health Psychology</i> , 2002, 7, 157-168.	2.3	70
9	Understanding why negative genetic test results sometimes fail to reassure. <i>American Journal of Medical Genetics Part A</i> , 2003, 119A, 340-347.	2.4	70
10	Mutational analysis in UK patients with a clinical diagnosis of familial hypercholesterolaemia: relationship with plasma lipid traits, heart disease risk and utility in relative tracing. <i>Journal of Molecular Medicine</i> , 2006, 84, 203-214.	3.9	61
11	A diary study of the risk perceptions of road users. <i>Health, Risk and Society</i> , 2001, 3, 261-279.	1.7	52
12	Public responses to precautionary information from the Department of Health (UK) about possible health risks from mobile phones. <i>Health Policy</i> , 2007, 82, 240-250.	3.0	50
13	Self-rated psychosocial consequences and quality of life in the acute porphyrias. <i>Journal of Inherited Metabolic Disease</i> , 2001, 24, 733-747.	3.6	43
14	Fetal fibronectin test predicts delivery before 30 weeks of gestation in high risk women, but increases anxiety. <i>BJOG: an International Journal of Obstetrics and Gynaecology</i> , 2005, 112, 293-298.	2.3	36
15	The structure of beliefs about the causes of heart attacks: A network analysis. <i>British Journal of Health Psychology</i> , 2002, 7, 463-479.	3.5	34
16	Towards an understanding of British public attitudes concerning human cloning. <i>Social Science and Medicine</i> , 2007, 65, 377-392.	3.8	33
17	Causal attributions for raised cholesterol and perceptions of effective risk-reduction: Self-regulation strategies for an increased risk of coronary heart disease. <i>Psychology and Health</i> , 2007, 22, 699-717.	2.2	28
18	Individuals' experience of chronic fatigue syndrome/myalgic encephalomyelitis: An interpretative phenomenological analysis. <i>Psychology and Health</i> , 2008, 23, 443-458.	2.2	28

#	ARTICLE	IF	CITATIONS
19	Perceptions of Multiple Risk Factors for Heart Attacks. <i>Psychological Reports</i> , 2000, 87, 681-687.	1.7	24
20	“Am I really ready to go home?”™: a qualitative study of patients’™ experience of early discharge following an enhanced recovery programme for liver resection surgery. <i>Supportive Care in Cancer</i> , 2016, 24, 3447-3454.	2.2	21
21	Factors influencing self-report of mobile phone use: the role of response prompt, time reference and mobile phone use in recall. <i>Applied Cognitive Psychology</i> , 2009, 23, 664-683.	1.6	20
22	The influence of perceived control over causes and responses to health threats: A vignette study. <i>British Journal of Health Psychology</i> , 2002, 7, 203-211.	3.5	19
23	Perceptions of control over heart disease in people with an inherited predisposition to raised cholesterol. <i>Psychology, Health and Medicine</i> , 2005, 10, 16-30.	2.4	13
24	Explaining differences in causal attributions of patient and non-patient samples. <i>Psychology, Health and Medicine</i> , 2004, 9, 259-272.	2.4	11
25	Eliciting Causal Beliefs about Heart Attacks: A Comparison of Implicit and Explicit Methods. <i>Journal of Health Psychology</i> , 2002, 7, 433-444.	2.3	8
26	How valid are measures of beliefs about the causes of illness? The example of myocardial infarction. <i>Psychology and Health</i> , 2005, 20, 615-635.	2.2	8
27	Journey to work: the potential for modal shift?. <i>Health Education Journal</i> , 1998, 57, 212-223.	1.2	7
28	The effect of visualisation and mindfulness-based decentering on chocolate craving. <i>Appetite</i> , 2021, 164, 105278.	3.7	4
29	“It gives you more to life, it's something new every day”™: an Interpretative Phenomenological Analysis of wellbeing in older care home residents who keep a personal pet. <i>Ageing and Society</i> , 2020, , 1-23.	1.7	3
30	Does pain acceptance predict physical and psychological outcomes in cancer outpatients with pain?. <i>Health Psychology Research</i> , 2013, 1, 35.	1.4	2
31	Dating experiences of Orthodox Jews in the shidduch system: a thematic analysis. <i>Mental Health, Religion and Culture</i> , 0, , 1-17.	0.9	2
32	Perceptions of risk may explain the discrepancy between patient and clinician-recorded symptoms. <i>Primary Care Respiratory Journal: Journal of the General Practice Airways Group</i> , 2012, 21, 124-126.	2.3	1
