#	ARTICLE	IF	CITATIONS
1	A chitosan-vitamin C based injectable hydrogel improves cell survival under oxidative stress. International Journal of Biological Macromolecules, 2022, 202, 102-111.	3.6	25
2	Determination of nootkatone in rat plasma by LC-MS/MS and its application in a pharmacokinetic study. Biomedical Chromatography, 2021, 35, e5197.	0.8	3
3	<p></p>Transdermal permeability of triamcinolone acetonide lipid nanoparticles</p>. International Journal of Nanomedicine, 2019, Volume 14, 2485-2495.	3.3	10
4	LC-MS/MS-based method for simultaneous quantification of known chemicals and metabolites of Alpiniae oxyphyllae Fructus extract in rat plasma and its application in a pharmacokinetic study. Analytical Methods, 2016, 8, 2069-2081.	1.3	13
5	Determination of \pm -hederin in rat plasma using liquid chromatography electrospray ionization tandem mass spectrometry (LC-ESI-MS/MS) and its application to a pharmacokinetic study. Analytical Methods, 2015, 7, 2155-2161.	1.3	9
6	Differential systemic exposure to galangin after oral and intravenous administration to rats. Chemistry Central Journal, 2015, 9, 14.	2.6	22
7	Different Accumulation Profiles of Multiple Components Between Pericarp and Seed of Alpinia oxyphylla Capsular Fruit as Determined by UFLC-MS/MS. Molecules, 2014, 19, 4510-4523.	1.7	29
8	A sensitive and cost-effective LC-ESI-MS/MS method for quantitation of euscaphic acid in rat plasma using optimized formic acid concentration in the mobile phase. Analytical Methods, 2014, 6, 8713-8721.	1.3	12
9	Identification of known chemicals and their metabolites from Alpinia oxyphylla fruit extract in rat plasma using liquid chromatography/tandem mass spectrometry (LC-MS/MS) with selected reaction monitoring. Journal of Pharmaceutical and Biomedical Analysis, 2014, 97, 166-177.	1.4	28
