#	ARTICLE	IF	CITATIONS
1	Advancing Research on Medical Image Perception by Strengthening Multidisciplinary Collaboration. JNCI Cancer Spectrum, 2022, 6, .	1.4	2
2	Conscientiousness protects visual search performance from the impact of fatigue. Cognitive Research: Principles and Implications, 2022, 7, .	1.1	1
3	Moving Beyond the Keypress: As Technology Advances, so Should Psychology Response Time Measurements. Perception, 2021, 50, 555-565.	0.5	3
4	You are the type of searcher you are instructed to be: The impact of task instructions on search in the absence of feedback. Journal of Vision, 2021, 21, 2895.	0.1	0
5	Transitions in daylight saving time negatively affect visual search performance. Journal of Vision, 2021, 21, 2750.	0.1	0
6	Recruiting from the shallow end of the pool: Differences in cognitive and compliance measures for subject pool participants based on enrollment time across an academic term. Visual Cognition, 2020, 28, 1-9.	0.9	3
7	Practicing Good Laboratory Hygiene, Even in a Pandemic. Psychological Science, 2020, 31, 483-487.	1.8	4
8	Visual search training via a consistency protocol: a pilot study. Visual Cognition, 2019, 27, 657-667.	0.9	3
9	Evaluation of strategies to train visual search performance in professional populations. Current Opinion in Psychology, 2019, 29, 113-118.	2.5	16
10	The Effect of Extended Target Concealment on Motion Extrapolation. Journal of Vision, 2019, 19, 12.	0.1	2
11	Accurately Quantifying the Subsequent Search Miss Effect in Multiple-Target Visual Search. Journal of Vision, 2019, 19, 255a.	0.1	0
12	A Big Data Approach to Revealing the Nature of Carryover Effects. Journal of Vision, 2019, 19, 76a.	0.1	0
13	Changes in target-distractor similarity space with experience in complex visual search. Journal of Vision, 2019, 19, 309.	0.1	0
14	Predicting Airport Screening Officers'™ Visual Search Competency With a Rapid Assessment. Human Factors, 2018, 60, 201-211.	2.1	15
15	Mammography to tomosynthesis: examining the differences between two-dimensional and segmented-three-dimensional visual search. Cognitive Research: Principles and Implications, 2018, 3, 17.	1.1	9
16	Using cognitive psychology research to inform professional visual search operations.. Journal of Applied Research in Memory and Cognition, 2018, 7, 189-198.	0.7	33
17	Get more out of your data: Breaking down response time to improve its usefulness. Journal of Vision, 2018, 18, 1033.	0.1	0
18	Predicting Ultimate Visual Search Competency from Initial Performance. Journal of Vision, 2018, 18, 4.	0.1	6

#	ARTICLE	IF	CITATIONS
19	An individual differences approach to multiple-target visual search errors: How search errors relate to different characteristics of attention. <i>Vision Research</i> , 2017, 141, 258-265.	0.7	20
20	Emergency department crowding associated with differences in CXR interpretations between emergency physicians and radiologists. <i>American Journal of Emergency Medicine</i> , 2017, 35, 793-794.	0.7	1
21	Who should be searching? Differences in personality can affect visual search accuracy. <i>Personality and Individual Differences</i> , 2017, 116, 353-358.	1.6	18
22	A Common Mechanism for Perceptual Reversals in Motion-Induced Blindness, the Troxler Effect, and Perceptual Filling-In. <i>Perception</i> , 2017, 46, 50-77.	0.5	7
23	Using big data to solve real problems through academic and industry partnerships. <i>Current Opinion in Behavioral Sciences</i> , 2017, 18, 91-96.	2.0	12
24	Visual Search: You Are Who You Are (+ A Learning Curve). <i>Perception</i> , 2017, 46, 1434-1441.	0.5	8
25	Estimates of a priori power and false discovery rates induced by post-hoc changes from thousands of independent replications. <i>Journal of Vision</i> , 2017, 17, 223.	0.1	3
26	Trait anxiety is associated with increased multiple-target visual search errors. <i>Journal of Vision</i> , 2017, 17, 687.	0.1	1
27	Lingering effects of response inhibition: Evidence for both control settings and memory association mechanisms. <i>Journal of Vision</i> , 2017, 17, 1139.	0.1	0
28	Contextual influences of room width and depth on egocentric distance judgments in natural scenes. <i>Journal of Vision</i> , 2017, 17, 1046.	0.1	0
29	Individual differences in susceptibility to irrelevant environmental influences predict visual search performance. <i>Journal of Vision</i> , 2017, 17, 923.	0.1	0
30	Repetition Priming Preferentially Benefits Infrequent Targets. <i>Journal of Vision</i> , 2017, 17, 1127.	0.1	0
31	Fear generalization gradients in visuospatial attention.. <i>Emotion</i> , 2016, 16, 1011-1018.	1.5	8
32	Sensorimotor Learning in a Computerized Athletic Training Battery. <i>Journal of Motor Behavior</i> , 2016, 48, 401-412.	0.5	23
33	Satisfaction at last: Evidence for the "satisfaction" hypothesis for multiple-target search errors. <i>Visual Cognition</i> , 2015, 23, 821-825.	0.9	6
34	Targets Need Their Own Personal Space: Effects of Clutter on Multiple-Target Search Accuracy. <i>Perception</i> , 2015, 44, 1203-1214.	0.5	24
35	Differences in multiple-target visual search performance between non-professional and professional searchers due to decision-making criteria. <i>British Journal of Psychology</i> , 2015, 106, 551-563.	1.2	9
36	Mo' Money, Mo' Problems: Monetary Motivation Can Exacerbate the Attentional Blink. <i>Perception</i> , 2015, 44, 410-422.	0.5	3

#	ARTICLE	IF	CITATIONS
37	What can 1 billion trials tell us about visual search?. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2015, 41, 1-5.	0.7	31
38	Mapping the structure of perceptual and visualâ€“motor abilities in healthy young adults. <i>Acta Psychologica</i> , 2015, 157, 74-84.	0.7	36
39	Cognitive Training Can Reduce Civilian Casualties in a Simulated Shooting Environment. <i>Psychological Science</i> , 2015, 26, 1164-1176.	1.8	49
40	Improving the Efficacy of Security Screening Tasks: A Review of Visual Search Challenges and Ways to Mitigate Their Adverse Effects. <i>Applied Cognitive Psychology</i> , 2015, 29, 142-148.	0.9	40
41	Improvement in Visual Search with Practice: Mapping Learning-Related Changes in Neurocognitive Stages of Processing. <i>Journal of Neuroscience</i> , 2015, 35, 5351-5359.	1.7	36
42	Multiple-Target Visual Search Errors. <i>Policy Insights From the Behavioral and Brain Sciences</i> , 2015, 2, 121-128.	1.4	19
43	For better or worse: Prior trial accuracy affects current trial accuracy in visual search. <i>Journal of Vision</i> , 2015, 15, 1371.	0.1	0
44	Long-term visual search: Examining trial-by-trial learning over extended visual search experiences. <i>Journal of Vision</i> , 2015, 15, 1108.	0.1	2
45	An individual differences approach to multiple-target search errors: Errors correlate with attentional deficits. <i>Journal of Vision</i> , 2015, 15, 1372.	0.1	0
46	The Ultra-Rare-Item Effect. <i>Psychological Science</i> , 2014, 25, 284-289.	1.8	69
47	Rare, but obviously there: Effects of target frequency and salience on visual search accuracy. <i>Acta Psychologica</i> , 2014, 152, 158-165.	0.7	29
48	Context matters: The structure of task goals affects accuracy in multiple-target visual search. <i>Applied Ergonomics</i> , 2014, 45, 528-533.	1.7	17
49	A little bit of history repeating: Splitting up multiple-target visual searches decreases second-target miss errors.. <i>Journal of Experimental Psychology: Applied</i> , 2014, 20, 112-125.	0.9	23
50	Face symmetry assessment abilities: Clinical implications for diagnosing asymmetry. <i>American Journal of Orthodontics and Dentofacial Orthopedics</i> , 2013, 144, 663-671.	0.8	28
51	A taxonomy of errors in multiple-target visual search. <i>Visual Cognition</i> , 2013, 21, 899-921.	0.9	76
52	Assessing visual search performance differences between Transportation Security Administration Officers and nonprofessional visual searchers. <i>Visual Cognition</i> , 2013, 21, 330-352.	0.9	63
53	Enhancing Ice Hockey Skills Through Stroboscopic Visual Training: A Pilot Study. <i>Athletic Training & Sports Health Care</i> , 2013, 5, 261-264.	0.4	48
54	Self-induced attentional blink: A cause of errors in multiple-target visual search. <i>Visual Cognition</i> , 2012, 20, 1003-1007.	0.9	2

#	ARTICLE	IF	CITATIONS
55	Links between multisensory processing and autism. <i>Experimental Brain Research</i> , 2012, 222, 377-387.	0.7	59
56	What is the identity of a sports spectator?. <i>Personality and Individual Differences</i> , 2012, 52, 422-427.	1.6	11
57	Stroboscopic Training Enhances Anticipatory Timing. <i>International Journal of Exercise Science</i> , 2012, 5, 344-353.	0.5	28
58	Dynamics of Population Response to Changes of Motion Direction in Primary Visual Cortex. <i>Journal of Neuroscience</i> , 2011, 31, 12767-12777.	1.7	8
59	Distractor Filtering in Media Multitaskers. <i>Perception</i> , 2011, 40, 1183-1192.	0.5	111
60	Age-related decline of visual processing components in change detection.. <i>Psychology and Aging</i> , 2010, 25, 356-368.	1.4	34
61	Generalized "satisfaction of search" Adverse influences on dual-target search accuracy.. <i>Journal of Experimental Psychology: Applied</i> , 2010, 16, 60-71.	0.9	100
62	Age-Related Preservation of Top-Down Control Over Distraction in Visual Search. <i>Experimental Aging Research</i> , 2010, 36, 249-272.	0.6	14
63	See an object, hear an object file: Object correspondence transcends sensory modality. <i>Visual Cognition</i> , 2010, 18, 492-503.	0.9	31
64	Staying in bounds: Contextual constraints on object-file coherence. <i>Visual Cognition</i> , 2009, 17, 195-211.	0.9	8
65	Generalization of conditioned fear along a dimension of increasing fear intensity. <i>Learning and Memory</i> , 2009, 16, 460-469.	0.5	165
66	Preserved visual representations despite change blindness in infants. <i>Developmental Science</i> , 2009, 12, 681-687.	1.3	17
67	Cohesion as a constraint on object persistence in infancy. <i>Developmental Science</i> , 2008, 11, 427-432.	1.3	87
68	Object Files Can Be Purely Episodic. <i>Perception</i> , 2007, 36, 1730-1735.	0.5	14
69	Space and time, not surface features, guide object persistence. <i>Psychonomic Bulletin and Review</i> , 2007, 14, 1199-1204.	1.4	83
70	Reversing How to Think about Ambiguous Figure Reversals: Spontaneous Alternating by Uninformed Observers. <i>Perception</i> , 2006, 35, 709-715.	0.5	28
71	The relationship between object files and conscious perception. <i>Cognition</i> , 2005, 96, 67-92.	1.1	65
72	Forming and updating object representations without awareness: evidence from motion-induced blindness. <i>Vision Research</i> , 2005, 45, 961-967.	0.7	63

#	ARTICLE	IF	CITATIONS
73	Seeing the Disappearance of Unseen Objects. <i>Perception</i> , 2004, 33, 1267-1273.	0.5	29
74	Changes are not localized before they are explicitly detected. <i>Visual Cognition</i> , 2002, 9, 937-968.	0.9	37
75	The siren song of implicit change detection. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2002, 28, 798-815.	0.7	39
