citing authors

#	ARTICLE	IF	CITATIONS
1	Selective modulator of nuclear receptor PPAR $\beta$ with reduced adipogenic potential ameliorates experimental nephrotic syndrome. <i>Science</i> , 2022, 25, 104001.	4.1	3
2	Moderate-intensity aerobic exercise vs desmopressin in adolescent males with mild hemophilia A: a randomized trial. <i>Blood</i> , 2022, 140, 1156-1166.	1.4	2
3	Tracing oral Na <sup>+</sup> and K <sup>+</sup> in sweat during exercise and recovery in horses. <i>Experimental Physiology</i> , 2021, 106, 972-982.	2.0	4
4	Preloading large volume oral electrolytes: tracing fluid and ion fluxes in horses during rest, exercise and recovery. <i>Journal of Physiology</i> , 2021, 599, 3879-3896.	2.9	4
5	A pilot randomized trial of atorvastatin as adjunct therapy in patients with acute venous thromboembolism. <i>Blood Coagulation and Fibrinolysis</i> , 2021, 32, 16-22.	1.0	5
6	Limited Role of Antithrombin Deficiency in Hypercoagulopathy Associated with Nephrotic Syndrome. <i>Blood</i> , 2021, 138, 294-294.	1.4	0
7	A Novel Assay Using Enzyme Capture - ELISA for Accurate Determination of Factor XIII Activity. <i>Blood</i> , 2020, 136, 23-24.	1.4	0
8	Direct Oral Anticoagulants Reduce Hypercoagulopathy and Preserve Podocyte Function in an Experimental Model of Glomerular Disease. <i>Blood</i> , 2020, 136, 26-26.	1.4	0
9	The Hypofibrinolytic Defect of Nephrotic Syndrome Is Directly Proportional to Fibrin Network Density. <i>Blood</i> , 2018, 132, 1218-1218.	1.4	2
10	A Novel Enzyme Capture - ELISA for the Direct Determination of Factor XIII Activity. <i>Blood</i> , 2018, 132, 1174-1174.	1.4	0
11	Thrombin-Induced Podocyte Injury Is Protease-Activated Receptor Dependent. <i>Journal of the American Society of Nephrology: JASN</i> , 2017, 28, 2618-2630.	6.1	34
12	Endogenous Thrombin Potential is Directly Correlated with Proteinuria Severity in Both Nephrotic Syndrome Patients and an Animal Model of Nephrotic Syndrome. <i>Blood</i> , 2014, 124, 4243-4243.	1.4	1
13	Thrombin Induces Apoptosis in Human and Rat Podocytes in a Protease Activated Receptor (PAR)-Dependent Manner. <i>Blood</i> , 2014, 124, 2808-2808.	1.4	0
14	Thrombin Generation Is Directly Correlated To Proteinuria Severity In An Experimental Model Of Nephrotic Syndrome. <i>Blood</i> , 2013, 122, 3615-3615.	1.4	0
15	Fluid and electrolyte supplementation after prolonged moderate-intensity exercise enhances muscle glycogen resynthesis in Standardbred horses. <i>Journal of Applied Physiology</i> , 2009, 106, 91-100.	2.5	31
16	Daily variation in plasma electrolyte and acid-base status in fasted horses over a 25 h period of rest. <i>Equine and Comparative Exercise Physiology</i> , 2006, 3, 29-36.	0.4	4
17	Time course and magnitude of fluid and electrolyte shifts during recovery from high-intensity exercise in Standardbred racehorses. <i>Equine and Comparative Exercise Physiology</i> , 2005, 2, 77-87.	0.4	17
18	Physicochemical analysis of acid-base status during recovery from high-intensity exercise in Standardbred racehorses. <i>Equine and Comparative Exercise Physiology</i> , 2005, 2, 119-127.	0.4	10

#	ARTICLE	IF	CITATIONS
19	Cyclical plasma electrolyte and acid-base responses to meal feeding in horses over a 24-h period. Equine and Comparative Exercise Physiology, 2005, 2, 159-169.	0.4	9
