citing authors

#	ARTICLE	IF	CITATIONS
1	Gaps in the Provision of Cognitive and Psychological Resources in Cardiac Arrest Survivors with Good Neurologic Recovery. <i>Therapeutic Hypothermia and Temperature Management</i> , 2022, 12, 61-67.	0.9	7
2	The evolution of hypothermia for neuroprotection after cardiac arrest: a history in the making. <i>Annals of the New York Academy of Sciences</i> , 2022, 1507, 60-69.	3.8	6
3	Mindfulness is inversely associated with psychological symptoms in long-term cardiac arrest survivors. <i>Journal of Behavioral Medicine</i> , 2022, , 1.	2.1	2
4	Does Physician Gender and Gender Composition of Clinical Teams Affect Guideline Concordance and Patient Outcomes in Out-of-Hospital Cardiac Arrest?. <i>Journal of Women's Health</i> , 2022, 31, 1800-1804.	3.3	2
5	Physician decision processes in post-cardiac arrest care: Can we describe how we decide?. <i>Resuscitation</i> , 2022, 173, 122-123.	3.0	0
6	OUP accepted manuscript. <i>European Heart Journal: Acute Cardiovascular Care</i> , 2022, , .	1.0	5
7	Associations between posttraumatic stress symptoms and quality of life in cardiac arrest survivors and informal caregivers: A pilot survey study. <i>Resuscitation Plus</i> , 2021, 5, 100085.	1.7	17
8	Closing the Gap: How Telephone Assisted Cardiopulmonary Resuscitation (TA-CPR) Can Aid in Reducing the Sex Disparity in the Provision of Bystander CPR. <i>Resuscitation</i> , 2021, 164, 139-141.	3.0	3
9	The relationship between vitamin C or thiamine levels and outcomes for severe sepsis patients admitted to the ICU. <i>Scientific Reports</i> , 2021, 11, 15114.	3.3	4
10	Women receive less targeted temperature management than men following out-of-hospital cardiac arrest due to early care limitations â€” A study from the CARES Investigators. <i>Resuscitation</i> , 2021, 169, 97-104.	3.0	9
11	Young at Heart. <i>Circulation: Cardiovascular Quality and Outcomes</i> , 2020, 13, e006970.	2.2	2
12	The sensitivity of qSOFA calculated at triage and during emergency department treatment to rapidly identify sepsis patients. <i>Scientific Reports</i> , 2020, 10, 20395.	3.3	18
13	Intention to Leave Emergency Medicine: Mid-career Women Are at Increased Risk. <i>Western Journal of Emergency Medicine</i> , 2020, 21, 1131-1139.	1.1	19
14	Response by Perman et al to Letter Regarding Article, â€œPublic Perceptions on Why Women Receive Less Bystander Cardiopulmonary Resuscitation Than Men in Out-of-Hospital Cardiac Arrestâ€. <i>Circulation</i> , 2019, 140, e511-e512.	1.6	0
15	Sex Differences in â€œDo Not Attempt Resuscitationâ€ Orders After Out-of-Hospital Cardiac Arrest and the Relationship to Critical Hospital Interventions. <i>Clinical Therapeutics</i> , 2019, 41, 1029-1037.	2.5	19
16	When the Female Heart Stops: Sex and Gender Differences in Out-of-Hospital Cardiac Arrest Epidemiology and Resuscitation. <i>Clinical Therapeutics</i> , 2019, 41, 1013-1019.	2.5	16
17	Impact of a Womenâ€focused Professional Organization on Academic Retention and Advancement: Perceptions From a Qualitative Study. <i>Academic Emergency Medicine</i> , 2019, 26, 303-316.	1.8	44
18	Public Perceptions on Why Women Receive Less Bystander Cardiopulmonary Resuscitation Than Men in Out-of-Hospital Cardiac Arrest. <i>Circulation</i> , 2019, 139, 1060-1068.	1.6	74

#	ARTICLE	IF	CITATIONS
19	Validation of an ICD code for accurately identifying emergency department patients who suffer an out-of-hospital cardiac arrest. <i>Resuscitation</i> , 2018, 125, 8-11.	3.0	31
20	Factors associated with post-arrest withdrawal of life-sustaining therapy. <i>Resuscitation</i> , 2017, 110, 114-119.	3.0	33
21	Duration of resuscitation efforts for in-hospital cardiac arrest by predicted outcomes: Insights from Get With The Guidelines <sup>®</sup> Resuscitation. <i>Resuscitation</i> , 2017, 113, 128-134.	3.0	24
22	Current State of Antimicrobial Stewardship in Children's Hospital Emergency Departments. <i>Infection Control and Hospital Epidemiology</i> , 2017, 38, 469-475.	1.8	24
23	Characteristics of Short-stay Critical Care Admissions From Emergency Departments in Maryland. <i>Academic Emergency Medicine</i> , 2017, 24, 1204-1211.	1.8	9
24	The Association Between Arterial Oxygen Tension and Neurological Outcome After Cardiac Arrest. Therapeutic Hypothermia and Temperature Management, 2017, 7, 36-41.	0.9	39
25	Out of Hospital Cardiac Arrest: A Current Review of the Literature that Informed the 2015 American Heart Association Guidelines Update. <i>Current Emergency and Hospital Medicine Reports</i> , 2016, 4, 164-171.	1.5	16
26	Response to Letter Regarding Article, "The Utility of Therapeutic Hypothermia for Post-Cardiac Arrest Syndrome Patients With an Initial Nonshockable Rhythm" • <i>Circulation</i> , 2016, 133, e612.	1.6	0
27	Inter-rater reliability of post-arrest cerebral performance category (CPC) scores. <i>Resuscitation</i> , 2016, 109, 21-24.	3.0	58
28	Impact of early do-not-attempt-resuscitation orders on procedures and outcomes of severe sepsis. <i>Journal of Critical Care</i> , 2016, 36, 134-139.	2.2	17
29	The association between hemoglobin concentration and neurologic outcome after cardiac arrest. <i>Journal of Critical Care</i> , 2016, 36, 218-222.	2.2	23
30	Right ventricular dysfunction after resuscitation predicts poor outcomes in cardiac arrest patients independent of left ventricular function. <i>Resuscitation</i> , 2015, 96, 186-191.	3.0	36
31	How long is long enough, and have we done everything we should?" Ethics of calling codes. <i>Journal of Medical Ethics</i> , 2015, 41, 663-666.	1.8	16
32	Shorter time to target temperature is associated with poor neurologic outcome in post-arrest patients treated with targeted temperature management. <i>Resuscitation</i> , 2015, 88, 114-119.	3.0	63
33	Alignment of Do-Not-Resuscitate Status With Patients' Likelihood of Favorable Neurological Survival After In-Hospital Cardiac Arrest. <i>JAMA - Journal of the American Medical Association</i> , 2015, 314, 1264.	7.4	27
34	Reply to Letter: Uneventful neurological outcome in case of late awakening after cardiac arrest treated with hypothermia. <i>Resuscitation</i> , 2014, 85, e41-e42.	3.0	0
35	The association between a quantitative computed tomography (CT) measurement of cerebral edema and outcomes in post-cardiac arrest: A validation study. <i>Resuscitation</i> , 2014, 85, 1348-1353.	3.0	66
