| 106 | Third European Evidence-based Consensus on Diagnosis and Management of Ulcerative Colitis. Part 1: Definitions, Diagnosis, Extra-intestinal Manifestations, Pregnancy, Cancer Surveillance, Surgery, and Ileo-anal Pouch Disorders. <i>Journal of Crohnts and Colitis</i> , <b>2017</b> , 11, 649-670 | 1.5   | 837       |
| 105 | Third European Evidence-based Consensus on Diagnosis and Management of Ulcerative Colitis. Part 2: Current Management. <i>Journal of Crohnts and Colitis</i> , <b>2017</b> , 11, 769-784                                                                                                              | 1.5   | 599       |
| 104 | Small-bowel capsule endoscopy and device-assisted enteroscopy for diagnosis and treatment of small-bowel disorders: European Society of Gastrointestinal Endoscopy (ESGE) Clinical Guideline. <i>Endoscopy</i> , <b>2015</b> , 47, 352-76                                                             | 3.4   | 490       |
| 103 | ECCO-ESGAR Guideline for Diagnostic Assessment in IBD Part 1: Initial diagnosis, monitoring of known IBD, detection of complications. <i>Journal of Crohnts and Colitis</i> , <b>2019</b> , 13, 144-164                                                                                               | 1.5   | 427       |
| 102 | Curcumin in Combination With Mesalamine Induces Remission in Patients With Mild-to-Moderate Ulcerative Colitis in a Randomized Controlled Trial. <i>Clinical Gastroenterology and Hepatology</i> , <b>2015</b> , 13, 1444-9.e1                                                                        | 6.9   | 258       |
| 101 | Optimizing Anti-TNF-ITherapy: Serum Levels of Infliximab and Adalimumab Are Associated With Mucosal Healing in Patients With Inflammatory Bowel Diseases. <i>Clinical Gastroenterology and Hepatology</i> , <b>2016</b> , 14, 550-557.e2                                                              | 6.9   | 239       |
| 100 | The temporal evolution of antidrug antibodies in patients with inflammatory bowel disease treated with infliximab. <i>Gut</i> , <b>2014</b> , 63, 1258-64                                                                                                                                             | 19.2  | 214       |
| 99  | Levels of drug and antidrug antibodies are associated with outcome of interventions after loss of response to infliximab or adalimumab. <i>Clinical Gastroenterology and Hepatology</i> , <b>2015</b> , 13, 522-530.e2                                                                                | 6.9   | 210       |
| 98  | RNAi therapy targeting KRAS in combination with chemotherapy for locally advanced pancreatic cancer patients. <i>Oncotarget</i> , <b>2015</b> , 6, 24560-70                                                                                                                                           | 3.3   | 170       |
| 97  | ECCO-ESGAR Guideline for Diagnostic Assessment in IBD Part 2: IBD scores and general principles and technical aspects. <i>Journal of Crohnts and Colitis</i> , <b>2019</b> , 13, 273-284                                                                                                              | 1.5   | 132       |
| 96  | Cross-immunogenicity: antibodies to infliximab in Remicade-treated patients with IBD similarly recognise the biosimilar Remsima. <i>Gut</i> , <b>2016</b> , 65, 1132-8                                                                                                                                | 19.2  | 124       |
| 95  | ECCO-ESCP Consensus on Surgery for Crohn® Disease. Journal of Crohnts and Colitis, 2018, 12, 1-16                                                                                                                                                                                                     | 1.5   | 122       |
| 94  | Detection of Small Bowel Mucosal Healing and Deep Remission in Patients With Known Small Bowel Crohn® Disease Using Biomarkers, Capsule Endoscopy, and Imaging. <i>American Journal of Gastroenterology</i> , <b>2015</b> , 110, 1316-23                                                              | 0.7   | 104       |
| 93  | Vedolizumab in IBD-Lessons From Real-world Experience; A Systematic Review and Pooled Analysis. <i>Journal of Crohnts and Colitis</i> , <b>2018</b> , 12, 245-257                                                                                                                                     | 1.5   | 86        |
| 92  | Deep learning algorithms for automated detection of Crohnß disease ulcers by video capsule endoscopy. <i>Gastrointestinal Endoscopy</i> , <b>2020</b> , 91, 606-613.e2                                                                                                                                | 5.2   | 77        |
| 91  | Deep learning for wireless capsule endoscopy: a systematic review and meta-analysis. <i>Gastrointestinal Endoscopy</i> , <b>2020</b> , 92, 831-839.e8                                                                                                                                                 | 5.2   | 76        |
| 90  | Association of Vedolizumab Level, Anti-Drug Antibodies, and 🖾 Occupancy With Response in Patients With Inflammatory Bowel Diseases. <i>Clinical Gastroenterology and Hepatology</i> , <b>2018</b> , 16, 697-70                                                                                        | )5.ė7 | 70        |

### (2018-2017)

| 89 | contrast ultrasound in the evaluation of small bowel Crohn <b>B</b> disease: Systematic review and meta-analysis. <i>Digestive and Liver Disease</i> , <b>2017</b> , 49, 854-863                                                                                         | 3.3                 | 65              |  |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|-----------------|--|
| 88 | Association of Induction Infliximab Levels With Clinical Response in Perianal Crohnß Disease.<br>Journal of Crohnts and Colitis, <b>2017</b> , 11, 549-555                                                                                                               | 1.5                 | 60              |  |
| 87 | Video capsule endoscopy of the small bowel. <i>Current Opinion in Gastroenterology</i> , <b>2013</b> , 29, 133-9                                                                                                                                                         | 3                   | 57              |  |
| 86 | The Impact of Magnetic Resonance Enterography and Capsule Endoscopy on the Re-classification of Disease in Patients with Known Crohnß Disease: A Prospective Israeli IBD Research Nucleus (IIRN) Study. <i>Journal of Crohnts and Colitis</i> , <b>2016</b> , 10, 525-31 | 1.5                 | 55              |  |
| 85 | Use of patency capsule in patients with established Crohnß disease. <i>Endoscopy</i> , <b>2016</b> , 48, 373-9                                                                                                                                                           | 3.4                 | 52              |  |
| 84 | Capsule endoscopy is superior to small-bowel follow-through and equivalent to ileocolonoscopy in suspected Crohnß disease. <i>Clinical Gastroenterology and Hepatology</i> , <b>2014</b> , 12, 609-15                                                                    | 6.9                 | 47              |  |
| 83 | Clinical outcomes of negative small-bowel capsule endoscopy for small-bowel bleeding: a systematic review and meta-analysis. <i>Gastrointestinal Endoscopy</i> , <b>2017</b> , 85, 305-317.e2                                                                            | 5.2                 | 44              |  |
| 82 | Effectiveness and Safety of Vedolizumab in Anti-TNF-Naße Patients With Inflammatory Bowel Disease-A Multicenter Retrospective European Study. <i>Inflammatory Bowel Diseases</i> , <b>2018</b> , 24, 2442-245                                                            | 1 <sup>4·5</sup>    | 42              |  |
| 81 | Prospective Observational Evaluation of Time-Dependency of Adalimumab Immunogenicity and Drug Concentrations: The POETIC Study. <i>American Journal of Gastroenterology</i> , <b>2018</b> , 113, 890-898                                                                 | 0.7                 | 41              |  |
| 80 | Effectiveness and safety of Ustekinumab for Crohnß disease; systematic review and pooled analysis of real-world evidence. <i>Digestive and Liver Disease</i> , <b>2019</b> , 51, 1232-1240                                                                               | 3.3                 | 35              |  |
| 79 | Assessment of small bowel mucosal healing by video capsule endoscopy for the prediction of short-term and long-term risk of Crohn® disease flare: a prospective cohort study. <i>The Lancet Gastroenterology and Hepatology</i> , <b>2019</b> , 4, 519-528               | 18.8                | 35              |  |
| 78 | Systematic Review and Meta-analysis: Vedolizumab and Postoperative Complications in Inflammatory Bowel Disease. <i>Inflammatory Bowel Diseases</i> , <b>2018</b> , 24, 2327-2338                                                                                         | 4.5                 | 33              |  |
| 77 | Magnetic resonance enterography versus capsule endoscopy activity indices for quantification of small bowel inflammation in Crohnß disease. <i>Therapeutic Advances in Gastroenterology</i> , <b>2016</b> , 9, 655-63                                                    | 4.7                 | 31              |  |
| 76 | Capsule Endoscopy, Magnetic Resonance Enterography, and Small Bowel Ultrasound for Evaluation of Postoperative Recurrence in Crohn® Disease: Systematic Review and Meta-Analysis. <i>Inflammatory Bowel Diseases</i> , <b>2017</b> , 24, 93-100                          | 4.5                 | 30              |  |
| 75 | Imaging techniques in IBD and their role in follow-up and surveillance. <i>Nature Reviews Gastroenterology and Hepatology</i> , <b>2014</b> , 11, 722-36                                                                                                                 | 24.2                | 29              |  |
| 74 | Capsule Retention in Crohn® Disease: A Meta-analysis. <i>Inflammatory Bowel Diseases</i> , <b>2020</b> , 26, 33-42                                                                                                                                                       | 4.5                 | 29              |  |
| 73 | Individualized Dynamics in the Gut Microbiota Precede Crohn® Disease Flares. <i>American Journal of Gastroenterology</i> , <b>2019</b> , 114, 1142-1151                                                                                                                  | 0.7                 | 28              |  |
| 72 | Evaluation of a new pan-enteric video capsule endoscopy system in patients with suspected or established inflammatory bowel disease - feasibility study. <i>Endoscopy International Open</i> , <b>2018</b> , 6, E1235                                                    | 5 <sup>3</sup> E124 | 6 <sup>28</sup> |  |

| 71 | The Lewis score or the capsule endoscopy Crohnß disease activity index: which one is better for the assessment of small bowel inflammation in established Crohnß disease?. <i>Therapeutic Advances in Gastroenterology</i> , <b>2018</b> , 11, 1756283X17747780                | 4.7   | 27 |
